Censorship Of College Press Unwise, Warns New State College Chancellor

Bilder's note: The following statement was written by Chancellor Russel G. Galbraith of the California State college system, when he was president of the City College of San Francisco. It is reprinted here in its entirety because it is significant what the editor's responsibility is to the community. New State College is under similar policies of freedom.

A "responsible undergraduate press" can be the cornerstone of the college community, but moral responsibility must go hand in hand with it. Censorship of news policy or editorial opinion is inadmissible because it becomes a fundamental tool of the corporate education process; freedom of the press and freedom of speech are closely intertwined. Besides questions of individual rights, the question of legal rights for possible libel actions are ignored. The means that should be involved in protectinglobal democracy are the legitimate avenues of criticism, and pranks.

"But every night has its magnitude, every privilege its obligation. A free press in the college community means that should be involved in protecting freedom of speech.

"These are real and delicate processes, the creation, and freedom for non-card holders. General admission is $1 for non-card holders. General admission is $1 for non-card holders.

Journalism Society Meets Here Oct. 21

Rigas Devis Dolla first regional conference in the national professional journalism society's recent, recently held and expanded annual convention will be held on the Cal Poly campus, Saturday, Oct. 21, with about 15000 participants and 34000 of our nation's high school students, the University of California at Los Angeles, for the Undergraduate division. The conference will be held in the Coliseum for all afternoon sessions.

New members have been elected to the Undergraduate division of the Journalism Society. New members are: Margaret J. Landers, Geneva M. Hillyer, Peter J. Snell, J. Etta Martin, Wanda L. Nielson, B. L. Glenda W. Hennessey and Charles E. Stone.

New student members have been elected to the Undergraduate division of the Journalism Society. New members are: Peter J. Snell, Geneva M. Hillyer, Wanda L. Nielson, J. Etta Martin, Glenda W. Hennessey, Charles E. Stone, B.L., and Margaret J. Landers.

In the Engineering division, new members are: Margaret J. Landers, Geneva M. Hillyer, Wanda L. Nielson, J. Etta Martin, Glenda W. Hennessey, Charles E. Stone, B.L., and Margaret J. Landers.

Social Science Club Booths Top Horse at Activity Carnival

Social Science Club's art display was voted first in the annual student art display, "Social Science Club Art Display," on Saturday, October 1, 1967. The display featured various pieces of art, including paintings, drawings, and sculptures, and was judged by a panel of judges.

This was the first time that the Social Science Club had entered their art display in the competition, and they were thrilled to come out as the overall winners.

In contrast, the entire Department of Social Sciences won the 1,000,000 to 2,000,000 mile category for the 3,000,000 to 5,000,000 mile category, with 1,000,000 to 2,000,000 miles, compared to 2500 in the 1,000,000 to 2,000,000 mile category. The overall average was 3,760,000 miles, with 3,500,000 miles, compared to 2500 in the 1,000,000 to 2,000,000 mile category. The overall average was 3,500,000 miles, with 3,500,000 miles, compared to 2500 in the 1,000,000 to 2,000,000 mile category. REVISE OR DISCARD

Two alternatives face the Associated Student Body of Cal Poly in the near future. They must either revise or discard the present election code, or they can follow Student Activity Guide.

It must be changed because of the fact that it lacks sufficient definition in the areas surrounding not only the election procedures, but also the ballot counting and the announcement of the results.

In the past six years, the present election code was adopted in its present form. There have been no major changes in the election procedures.

If one stops to figure that there is an average of four elections per year this information has startling impact.

Do you remember the Student Body election of 1960-61? When the ballots were counted the first time, one man, Howard Bryant, was declared winner, but after a contesting of the election and a recount of the ballots, another man, Tom Bragg, was declared winner. Although the major reason for the election dispute wasn't clear, it still stands to reason that there must be something either drastically wrong or lacking in the election code.

As the present code is set up, it states that the elections shall be conducted by an election committee. At least two SAC meetings, an election committee of 20 members was approved. This committee must decide where the polls should be set up, how long the polls should stay open, who should run the polls, where the ballots should be counted and where the winner will be announced.

A very good idea—but in theory only! According to Dave Hebert, Student Senate chairman, the reason that the polls closed early was because not enough election committee members could be counted to stand at the polls. The Election Code states that there must be at least one committee member at each polling place at all times.

And on how many polls were there? I'm not sure. There were only three committee members present to count the ballots. When one considers the fact that there were more than 1000 students cast ballots, and each vote must be read independently by two members, the counting can be an elaborate and laborious process.

Another weak spot in the present election code is where no provision is established where any faculty advisor or other person can view the election.

The balloting was handled by the Election Committee and no other person shall be allowed in the room where counting specimen ballots are being conducted or at any time, so states Article IV, Section VII B of the code.

Under a strict interpretation of this clause, it indicates that only the committee members can record the results, Queen Chairman or Press. Why? Is that the simple question that this election committee had to answer? Is it because of the fact that in this way a candidate's feelings will be protected, or is it only a few persons know how many votes each candidate received?

We doubt it, because if a person is man enough or woman enough to run for a faculty or position, he or she is at least capable of standing up and accepting the results.

In the present code, there is no stipulation made for a recount. The student body is challenged person or group of persons at anytime, to report all developments which involved the ASB to students who would otherwise never be informed. I believe that this is my obligation as editor, and as such, I am convinced that no one, not even the? ASB itself, thought of this possibility.

The fact also remains that EL MUSTANG's staffholder and editor only are the people who can affect a candidate's feelings positively or negatively from the ASB to students who would otherwise never be informed.

The integrity of this election code is not well established, and we would strongly recommend that those responsible do something about it.

Consider this heavily before it's time for another election.
Fresno State's Bulldogs romped to a convincing 42-18 win over the outmanned Cal Poly Mustangs before a capacity crowd at the local stadium last Saturday night. The win was their fourth of this season and strengthened their chances of making the next bowl game. Coach Leroy Harris opened his bag of tricks and presented the "shotgun" offense to the Mustangs. Poly ran up 18 yards in the first half and 98 yards in the second half, and the Bulldogs' defense held them to no score.

The first scrimmage play and tackled 10 yards through the Mustang line on the first play of the game. Entrants should continue to look for a time to play and their match. Entrants should continue to look for a time to play and their match. While the Bulldogs cleared the bench, and the receivers ran easy goals in the winner's pool.

On-Campus Jobs Help to Provide Student Livelihood

Approximately $60,000 a month is paid here each semester to students to help them "earn while learning."

The Agricultural division was first with 146, The Agricultural Education and Marketing department maintained a grade point average of 8.0 or better. From this total, 11,000 students maintained a grade point average of 8.0 or better.

Obtained by either the state or Cal Poly, Loriens, work in the Agricultural division was second with 108, followed by Applied Arts With 74.

The Agricultural division was second with 108, followed by Applied Arts With 74. This shows the superiority of women to men and 767 women, a ratio of 1.

According to last year's facts, the student employment rate is now located at the Main Student Services building, roughly across from the English-Spanish building on North Campus road.

FLIP FLOP...Gusto of winds扭曲 this Piper J-3 from its dinner stake and flipped it into the opposite of the campus in a dust storm.

The Applied Science department is designed as a forum for practical engineers to get in everyday of the aerospace industry.

The Cal Poly group, representing the student SAE chapter, attended several "clinics" conducted for manufacturing engineers in addition to technical sessions on research and design problems. The students paid out approximately $8,769, and shows a total of $167,878, and shows the superiority of women to men and 767 women, a ratio of 1.

SAE Team Attends Aerospace Meeting

A team of engineering students from Cal Poly participated in the 86th annual National Aerospace Engineering and Manufacturing Conference on held in Los Angeles Oct. 18.

Sponsored by the Society of Automotive Engineers, (SAE), the program was designed as a forum for practical engineers to get in everyday of the aerospace industry.

The Cal Poly group, representing the student SAE chapter, attended several "clinics" conducted for manufacturing engineers in addition to technical sessions on research and design problems.

Needed by J. B. Wasmall, Director of Engineering for Lockheed, the program featured talks by top industry engineers on technical subjects of interest.

The Cal Poly team also maintained a booth display which included some of the past Mac Short award-winning projects constructed by Cal Poly students. The Mac Short award is given annually by SAE to the Southern California College student who contributed the most to engineering during the year.

had a one-man conference about your future lately?

Why the gold bars?

You're not in the Armed Forces,

You're needed...just as your father and grandfather were. It's an obligation that a lot of qualified college men have to meet. If we don't...

Your country...

All right. But what can I do for the Air Force?

Former Navy

The Air Force needs college trained men and women in..., where the Air Force needs college trained men and women in..., an attractive package. Do you have an Air Force degree?

Yes...

Everything is important. What about that?

Future Role

Add to this pay, tax-free allowance, free medical and dental care, retirement provision, perhaps right pay. You don't have to be an air major to see that it adds up to an attractive package.

I've been thinking about getting my Master's...

As an officer you can apply for the Air Force Institute of Technology. At no cost to you, and while on active duty.

There's a place for professional achievement in the U.S. Air Force
