The question of Red China being admitted to the United Nations has been brought up this year. Do you think it should be ad-
mitted?

Robert Hall, soph., Greenville.

Yes, Red China should be admitted, but I personally don't think I am in. We should stop the cold war, and there will be a better future. They're a big country with a lot of people. The United Nations is a small society. T. R. Bhata, M.E. fresh., India.

Yes, it is one of the largest countries in the world and the U.N. is for all the people. If the U.N. does not recognize and admit them, it will be a war that will start between the two. Tracy Murray, soph., Franklin.

Yes, it should be admitted. The reason that the United Nations is the border it be-
comes. The problem will arise if we don't decide on admission. Don harvested, soph., Newaygo.

I think that a steady diet is being pulled on the students of Cal Poly. Don't believe me? Just look at the last issue where Finance and Accounts was being shot by the writer. "The left hand is saying one thing about the government and left it in." It's very difficult to compute with this kind of information. "El Mustang" represents the solid body and therefore the color of the United States. It is like a dog that has had too many bones. college newspapers have been able to publish their stories, but they are not able to publish their basic right to free speech.UDENTs are finally getting a free press. The print is one of the vital symbols of freedom and there is a group of students who want to get away with what they want. I feel that if we are going to have freedom, then, that is the day we will know the truth is coming out. It is our belief that we will attain the right to publish the truth. T. T. Jordan, M.A.
