Hughes Steps Down As Head Football Coach

Experts Predicted Last Place Spot For Mustangs

Cal Poly's Mustangs closed out the 1961 season with a 1-6-1 record, not up to the gridiron experts last Friday night, when they downed the Santa Barbara Gauchos 8-14, to clinch second place in the CCAA standings.

Following last year's plane crash, the Mustangs were listed open as probable cellar-dwellers in the CCAA. But the Mustangs were not to be content with a standing-season mouth and marched through four opponents in eight games to a steady winning record for a squad with only ten starters, four of whom returning.

An early indication of the Mustangs' success in the season came as the Mustangs held a 6-3 lead in the first half of the game. Although the Mustangs were not to score further, they kept the lead throughout the second half, maintaining the same score to the final whistle.

For the Mustangs, the game was a victory in the history of football, as it was their first win in the CCAA, a conference they have been members of for many years.

The victory marked the end of a 5-9-1 season for the Mustangs, and they concluded their season in a winning position.

FANS HONOR COACH IN LAST GAME

A finals to an outstanding career

Friday night, as LeRoy Hughes or "The Silver Fox" as he is known to football fans, stepped down as head coach of the Cal Poly Mustangs. It was a fitting climax to the end of the Mustangs' season, and a may final tribute to the man who has guided the Mustangs in nine trips to the Bear.

Although the temperature dropped to a cool 22 degrees, 6,000 fans huddled into Mustang Stadium to pay their respects and express their appreciation of the man who has served the university so well.

In fitting tribute prior to the Mustangs' game, President Lee Freeman, on behalf of the student body, presented Hughes an engraved watch. Freeman said: "I think it is a great deal of pleasure, that I present you the token of appreciation, for your outstanding service and devotion to the student body of Cal Poly."

In accepting the gift Hughes remarked: "I will not only the Cal Poly student body but the community and the entire city of San Luis Obispo, wish you the best of luck in your retirement."

In the 13 seasons at Poly, Hughes has coached three CCAA championship teams. In 1960, the Mustangs defeated 22-1 San Mateo College and went on to win the state championship.

As the Mustangs took the field at Los Angeles Coliseum, two of the nation's best small college teams will compete in what is probably one of the nation's most publicized games in the history of football.

The Fresno State Bulldogs, CCAA champs and undefeated, join this year's version of the Poly Mustangs.

In 1936, the Fresno State Bulldogs and Cal Poly Mustangs met in the Fresno Coliseum, and the Bulldogs emerged victorious by a score of 6-2, with no record of this season.

Both football experts are making predictions for the outcome of this game. Cal Poly's Mustangs are favored to win, but it is expected to be a close game.

One For You, One For Me...  

makes top marks  

'All My Sons' Outstanding  

College Drama Production  

by Carol Bisno, Special Writer  

Theater-goers delighted in a sterling performance turned in by Judy Molina when she portrayed Kate Keller in Arthur Miller's tragedy, "All My Sons," presented in the Air Conditioning Auditorium last Thursday, Friday, and Saturday nights. The production was directed by Keith Milisen of the English-Speech Department.  

Miss Milisen's characterization of the emotionally-torn mother dealt an unmerciful blow to the tenets of the viewers. Her ability to lose her own personality and become the person Arthur Miller created for this part, was the thing that made Miss Milisen's efforts excellent. Some of the other actors failed in varying degrees to deliver a convincing portrayal.  

Derek Mills, in the role of Joe Keller, was equally as powerful as Miss Milisen. At times Mills overemphasized the audience with his characterization of the successful businessman in that the portrayal typified the stereotyped executive who came up the hard way. Keller's character is flavored with a twist of guilt that the other players bring out in him, and while Mills very subtly offered the audience. His most convincing acting was the scenes containing the underlying conflict in his character.  

In his portrayal, Michael Powell did credit to the production with his unemotional and subtle reactions from highly emotional situations. The more subdued parts were handled with comfortable ease; the third act was obviously best in that she acquired a certain touch in handling rugged situations.  

Mercury Bowl Bands  

Hosted By Alumni  

Members of three college bands playing at the Mercury Bowl have been invited to an informal band reception at the Sportsman Lodge, Century and Western streets, in Los Angeles on Nov. 11 at 6 p.m. All bands in the area are sponsoring the reception.  

More than 500 bandmen and women from Cal Poly, Fresno State, and Bowling Green who will participate in games and half-time activities, have been asked to attend the reception. The Los Angeles State College band will have a press box staff, and refreshments will be served to accommo-

**Fifth at CCAA Meet**

Cal Poly's cross-country team, winner of two races in a row, finished fifth in the league finals held at Santa Barbara last Saturday.

Banta Barbara drove to the Mustang nine. After two attempts were stopped, Carlson swept right and to score.

Four Mustangs ended their Cal Poly football careers, Fred Brown, Bob Johnson, Roger Kelly and Ted Tollnor will graduate this year.

The Mustangs had several things going for them Friday night from the standpoint of morale. First, this was the final game for Leroy Hughes and the Mustangs wanted to give him a victory record, the team was not in any bad shape, although only in a token appearance. Fred, a standout for the Mustangs on defense, played on a severely injured ankle despite advice not to. It is players like Fred that make football the game it is.

The Gauchos took the second half kickoff and quickly proceeded to pass themselves out of the game against this Mustang defense, playing No. 1 for the Mustangs, Wally Welker, kicked off a 33-yard pass and leaped 14 yards to the goal.

The Mustangs got another scoring chance a few minutes later when John Albs blocked a Gaucho punt. Dick Green recovered for the Mustangs and five plays later Parker plunged over from the one to score.

Clayton Reatales, who must be setting a scoring record, hit a second touchdown from the Gauchos. With the score now 18-7, he took his 33-yard pass from Tollnor into the end zone for the Mustang scoring.

The Gauchos made one last attempt to make the score a little closer. With halfback Chuck Cowton and fullback Larry Lott carrying the ball,梗

**EDITOR:**

Are the people now complaining about charging for activities the ones who said last year, "Only those who want to attend activities should pay, why should we who do not attend have to pay?" Maybe we are, however, what is more important is whether we should not be paying for the activities through increased charges on other activities and we would like to have a more critical look taken at the budget.

Last year if SAC was faced with the problem of rising costs due to an expanded activities program, why did they decide that an increase in income was the only way out? They could have evaluated the activities program itself and what was free-loading. Facing the expanded program increased an increase in income is failing to be self-critical which is one of the responsibilities of SAC and the Finance Committee. I think one fault of our present American society is that people seem to think they are owed something.

If computers process data in mathematical terms, how can they be instructed to handle information and applications that are not essentially arithmetic? IBM in cooperation with the U.S. Air Force, is finding some answers through research in automatic language translation systems. Machine translation of idioms, for example, is teaching us a great deal about information processing. An idiomatic phrase may have a meaning quite different from the sum of its individual words, and a system that merely matches these words won't come close to translating it. One solution is an "expanded electronic dictionary" that contains idioms and grammatical instructions as well as single words. Work is now under way to clarify meaning further by automatic syntactical analysis. Systems research such as this requires its own kind of translation—the translation of an idea into a working system. For people with this ability, who like to travel beyond the boundaries of their specialized areas, IBM offers unusual opportunity. If you're interested in any of the fields in which IBM is making important advances—semiconductors, microwaves, magnetic, superconductivity—and your major is in engineering or one of the sciences, you are invited to talk with the IBM representative. He will be interviewing on your campus this week. Your placement office can make an appointment. All qualified applicants will receive consideration for employment without regard to race, creed, or national origin. Write, outlining your background and interests, to: Mgr. of Technical Employment, Dept. 899, IBM Corporation, 990 Madison Avenue, New York 28, N. Y.
