Construction To Begin

Halls were opened by the Rural Development of Architecture office on Feb. 8 at Los Angeles for the construction of Cal Poly's new Administrative Building. Construction should begin in late August, according to Chester G. Young, assistant to the dean of the college.

Young estimated the cost of the new $15,700,000 structure at $15,700,000. The building should be occupied by the end of Winter Quarter.

The new building will contain all college administrations and business offices and the counseling center. The former Administration Building will be occupied by the Business and Education Department.

Class Plan Chosen
For Campus Center

The first problem chosen by the Junior Architectural Design class, taught by Paul N. Nord, was to admit a design for a proposed Campus Christian Center.

Initial designs were submitted after the first week by the class and the five final solutions were chosen. The class was then divided into five working groups.

Two weeks after the five final solutions were selected, was to begin a competition for the architectural design of the new building. The five-story building will be located west of Sequoia Dorm and east of the Science Building. At the present time, the architecture designs of that area will become the parking lot for the new building.

The five-story building will be located in the center of campus, according to Young. The first four stories will contain all administration offices, and the fifth floor will be occupied with mechanical equipment such as air conditioning and elevator machinery.

Ag. Students Back from Successful Mexico Tour

"The actual methods of agriculture in Mexico and the experiment stations of Mexico are set on two completely different levels of practice," said Wally Youngblood, who recently returned from a "nice-up look" at Mexican agricultural practices and facilities during a 15-day trip as a guest of the Sears, Roebuck Company of the United States and Mexico Foundation.

Traveling with Youngblood were nine other Cal Poly agricultural students, members of the board, and Warren T. Smith, dean of the agricultural college, and Dr. Curless Johnson, head of the Crop Department.

Youngblood said that the experimental stations are far superior to the actual farming methods practiced in the country.

"The former in Mexico teach a plan of from 25 to 50 acres in a day, whereas, in American conditions, are often in the 25 to 32 acres in an hour," said Youngblood.

The trip, which began Wednesday, July 2, took students to the National Agricultural Experiment Station at Chapingo, Mexico City, Veracruz, and a number of other areas in the Central American nation.

While there, the group studied the growing of tropical crops, Mexican agricultural research programs, irrigation, rice production, and coffee production.

"Students making the journey were Allan Johnson, poultry major; Ronald W. Licht, a junior Agricultural Business Management major; Joseph A. Alpker, a Dairy Husbandry junior; Paul F. Burliar, a junior Agricultural Business major; and Carl Johnson, a Farm Management major.

Also John W. Egger, a Crop Production junior; Roy E. Killinger, a junior Science major; James Warren, an Animal Husbandry major; and Ronald Wyatt, a junior Ornamental Horticulture major.

"The trip was the only Cal Poly mission of agriculture found to be conducted in the Sears, Roebuck and Co. program this summer," according to Dean Youngblood.

A similar group of agriculture students and educators from Mexico are expected to visit the state and Cal Poly later in the summer, should be completed for the 1965 Winter Quarter. Above is the state artist's drawing of the new building.

The five-story building will be located west of Sequoia Dorm and east of the Science Building. At the present time, the architecture designs of that area will become the parking lot for the new building.

The five-story building will be located in the center of campus, according to Young. The first four stories will contain all administration offices, and the fifth floor will be occupied with mechanical equipment such as air conditioning and elevator machinery.

PO Reminder!

Several reminders are coming out of the Post Office this summer. It is a reminder that Spring Quarter begins and in the mail box is a reminder that the Post Office is closed for the Summer Quarter. Students who have moved into Trinity from another dorm for the Summer Quarter have to pick up their mail at the Post Office this summer. Also, according to Margaret Hingston, Post Office director, students who have moved into Trinity from another dorm for the Summer Quarter have to pick up their mail at the Post Office this summer.

"The purpose of the problem was to show the design solutions for the problem presented by Ayala. Since the students have come from the Health Center and student organizations, it is to create interest in the problem," according to the Architectural Design class.

The purpose of the problem was to show the design solutions for the problem presented by Ayala. Since the students have come from the Health Center and student organizations, it is to create interest in the problem.

"The final solution for the Junior Architectural Design problem is not to be expected for another three months," according to the Architectural Design class.

"The problem presented to the Architectural Design class was to create interest on campus for the project. The two story Center will include a library, rooms for fellowship and teaching offices for college faculty, a reception room and a small lecture hall. The Architectural Design class was divided into five working groups, and the five working groups were divided into five solutions for the project. These were competent student solutions to a complex problem and should generate a great deal of interest in the Campus Christian Center."
14 Get Sears Scholarships

Fifteen students who are expected to enroll in courses at Cal Poly have been selected to share $1,200 in scholarships awarded by Sears, Roebuck Foundation, according to an announcement this week by the college.

Of the scholarship awards were to young people, will be teaching Agricultural students in the fall, six were for freshman honors, and grants for use in agriculture. All were in the amount of $200 for the 1963-64 school year.

Women of the 13 freshman grants are selected on the basis of financial need interest in the particular field of study, high school grades, and qualities of citizenship and morality.

The Agricultural scholarships are available annually to the outstanding of the students who received freshman grants for partial tuition.

These receiving Sears, Roebuck Foundation Freshman Agricultural Scholarships for 1963-64 were: Marshall Christiansen of Arcadia, Alan J. Mender of San Bernadino, Charles Fairbanks of Palmdale, and Kenneth Roy Newton of Gardena.

In Home Economics scholarships are: Patricia Mae Hilli of Sutter, Barbara Joyce Boster of Burney, and Frances K. Boyd of Kerman.

Winston of the Bronx, Roebuck Foundation's Sophomore Scholarship was Michael V. McKenry of Selma.

Cutino Takes Homecoming Theme

UC Swim Post Is 'Autumn Holiday'

A Cal Poly graduate has accepted a bond-selling job at California's largest university. Pete Cutino has been named as successor to Bill Phillips, who held the position of head swimming and water polo coach at the University of California at Berkeley.

While attending Cal Poly, Cutino played water polo and participated on the swimming team for three years. He was a junior college transfer from Monterey Peninsula. His swimming accomplishments were well known throughout the state because he was the state champ in the 100-yard breast stroke and held many Pacific records.

He returned his general secondary and was on his way to better things.

His first year out of Poly he became an assistant coach to Cal Poly swimming Coach Dick Anderson.

After a year he became head diving coach and head the Mustangs in the Pacific Coast Intercollegiate

Peace Corps Examination

Slated For July 20

Requests from 17,000 for additional Peace Corps Volunteers this year have prompted the Peace Corps Volunteers for the addition of a July 20 date for national administration of the Peace Corps Placement Test.

Dr. F. H. Harber, director of the Peace Corps selection division, said the noncompetitive test will be given by the Civil Service Commission to more than 400 communities on July 20, and again on August 28. Each applicant must take all five sections of the test.

"In order to meet the most urgent requests from Latin America, Asia, Africa and the Western Hemisphere, we plan to start training programs in September and December," Dr. Harber said. "Since we have all the information we need to make any peace worker, the Peace Corps will focus on its most urgent needs and will use its most efficient methods of selection and training."

Farm Bureau Meat

Farm Bureau Woman, Farm Bureau Young People, Natural Resources, Education, and the 3,000 in training during the summer at headquarters in Washington, D.C., will participate in the activities planned for the four-day conference.

A dinner and initiation will be followed Wednesday night by a program on the problems facing California farmers today and an analysis of the problems facing California farmers today and the need for solutions. Coach Harden is optimistic and is looking forward to a successful season.

Sports Background Helps Yoakum With "Armchair Athlete"

During the regular school year, a column entitled "Armchair Athlete" appeared in the Mt Mustang. It is a column written by Chuck with input from the team, or better known as "C. O. Y." Since Chuck is working on the Ohio Register, I felt this would be a good time to let his readers know a little about him and what he does as he writes.

Since his hometown is Glendora, which is to the Los Angeles area, he was exposed to sports at a very early age. When he went to Cornell, he was able to play basketball and football as a fullback. One game with the fullback ended when he passed, he says, was hurt and carried to the dressing room. Here Bill Kittler, who is now playing professional football for the San Francisco 49ers, told Chuck he should write to his mother back home about it. Chuck decided this was a good idea, but instead of a letter, he did a story about it in the newspaper. This was his beginning as a sports writer.

Yoakum decided to come to Cal Poly to further his education in journalism because of the department's high ranking on the Pacific Coast. When he entered Cal Poly, he says, as a journalism major, he was assigned to the El Mustang sports editor. But he wanted to do more for the paper, so he just write about what he felt, as he put it, "could not make a career out of it." That is how he came to be a reporter.

A year ago he went out for the Cal Poly football team, which was direct from summer school in a summer camp in hopes of picking up some extra work. For further his education and follow Cal Poly's principle of "learn by doing," he is employed by the San Luis Obispo County Department of Education.

Chuck says he does not have a preference in either offense or defense, as long as he can continue to train twice a week. During the summer, when he was in California, he went out for pitching in the softball playoff. Bonds, who was a pitcher, told him he should write the story. Yoakum says he wrote it directly across from Jerry Slocum, a player who has made quite a name for himself in the National Football League and the Canadian Football League.

Next year, Chuck says he will be tough, but will be a little thin in depth.

One of the players that he would like to coach football at some school after leaving Cal Poly.
