Men Beware! Kennedy May Getcha in Draft

Campus Security officers and the U.S. Department of Defense have raised the issue of the Kennedy draft again, and it's not looking too good for those who are侥幸 delaying it.

The recent threat comes after President Kennedy announced that all draft-age men will be required to register for the draft by May 1, 1964.

The new registration rules state that all men age 18 through 26, inclusive, who are not already registered with Selective Service, must register by May 1, 1964. Those already registered will be required to update their information.

The registration process will begin on March 21, 1963, and will continue until May 1, 1964. Those who fail to register will be subject to fines and other penalties.

Women's Housing System Uses 'Learn By Doing'

The President of the Housing Committee at the University of California, Berkeley, has announced a new program to help students learn the skills necessary for living in a group setting.

The program, called "Learn By Doing," will provide students with an opportunity to develop their own housing arrangements and learn the responsibilities of living in a community.

The program will begin with a pilot project in the fall semester, and will be expanded to include all students in the spring semester.

Hells Angels—CP Branch

Black leather jackets, long, uncombed hair and motorcycle boots are the trademarks of a wild breed of motorcycle clubs known as the "Hells Angels." When they hit town, business closes and lock their doors, the police is called out and people fear for their lives. Cal Poly cycle riders don't look like the Hells Angels or have the same effect on the campus. But sometimes they do make people fear for their lives.

For instance, the roar of an unmuffled exhaust as a cyclist takes off in a cloud of dust scares many a person out of bed. Some cyclists have little regard for the rights and lives of pedestrians. Instead they see the warning of a rumbling drive chain and bellowing pipes to frighten normal people off the streets.

Granted, all motorists and scooter riders aren't exhibitionists and show-offs, Poly Penguins, a campus motorcycle club, is an official Cal Poly club, and has been for years. But still as a whole, the cyclists have much to be desired. Besides making too much noise, they create parking, traffic and pedestrian problems. They park anywhere and anyhow. All available curb space, no matter how small, can seemingly accommodate a scooter or cycle. The bikes riders take advantage of this fact, especially in front of El Cortez North Hall. At least three and four two-wheelers can be seen parked in the red zone, crosswalk, or infringing on the parking space.

The cyclists have gone so far as to create their own private parking lot. Although very illegal, this parking lot is located in the heart of the campus and blocks a road completely.

Cyclists are surreptitiously leave their two-wheelers—so many as 15 to 20. Motorcycles and bikes—at the intersection of North Poly View and Campus Way.

Even with all these flaws, motorcyclists will never be scared off this campus.

Besides having social privileges such as parking areas reserved for the owner of the motor and lower parking fees, the cyclist enjoys an easy mobility, dodging in and out of congested traffic.

They get fantastic gas mileage compared to who drive fins and have to drive to school on time, cutting in and out of traffic jams. And they enjoy low maintenance costs.

So motorcyclists, we common people must live with you. And we would like to do so in peace and harmony.
The Press Club has received, its tentative will be needed. Nomination of 15 for office, elections, games, music and initiation are on the agenda. We need more members. -Jay Handy, a new chairman of the Board of Student Affairs, will become the new chairman of the Board of Student Affairs today (Oct. 8). He was appointed by the President of the University. The Press Club will sponsor a road ride through the San Luis Obispo Club. The ride will be held on Saturday, Oct. 12. All members of the club are invited to participate. The ride will leave from the club at 10 a.m. and will return at 2 p.m. The ride will be in two parts: one part will be on the mountain roads and the other will be on the flat roads. The ride will be a great opportunity to enjoy the natural beauty of the area and to socialize with other members of the club.

Heat Wave Had Effect On Farm—Ruffled Fur, Burnt Tomatoes

By SUSAN KNOPPER

A survey of Business Club members has been made to determine what problems the heat wave had on the farm. The results of the survey are as follows:

Exhibitors

Place High

At LA Fair

CA Poly's Academic Exhibitors were among the first to exhibit their products at the LA Fair. The products included agricultural products, livestock, and various other items. The students were able to show the public the advancements made in the field of agriculture. The Winslow family is sponsoring an event called: "The Winslow Family and Their Adventures in Agriculture." The event will take place on Saturday, Oct. 12, at 2 p.m. in the University auditorium. The Winslow family will share their experiences and knowledge about the field of agriculture.

Press Club Party

The Press Club will be hosting a party on Friday, Oct. 11, at 7 p.m. in the University Ballroom. The party will feature music, food, and drinks. All members of the club are invited to attend.

Campus Capers

By ROBERT KNOOPPER

The results of the survey are as follows:

- The heat wave had a significant effect on the crops.
- Animal husbandry majors were the most affected by the heat wave.
- Students in the Food Science and Nutrition Department were the least affected by the heat wave.
- The heat wave had a negative effect on the livestock.

The Winslow family is sponsoring an event called: "The Winslow Family and Their Adventures in Agriculture." The event will take place on Saturday, Oct. 12, at 2 p.m. in the University auditorium. The Winslow family will share their experiences and knowledge about the field of agriculture.

The students are encouraged to attend the event and learn more about the field of agriculture.

WORD'S: THEIR CAUSE AND CURB.

As a student of language, I have noticed that the words used in electricity are quite different from other fields. Take, for instance, the words used in electricity: "current," "electricity," "watt," and "amperage." These words are used to describe the flow of electricity, the amount of energy, the unit of measurement, and the amount of current, respectively.

I have also noticed that the words used in electricity are often used in a metaphorical sense. For example, "the current of electricity" is used to describe the flow of current, and "the wattage of an appliance" is used to describe the amount of energy used by the appliance.

In conclusion, the words used in electricity are unique and have a special meaning. They are often used in a metaphorical sense, making them fascinating to study.

The students are encouraged to read books and articles about electricity to learn more about the words used in this field.

Ruffled Fur, Burnt Tomatoes

Heat Wave Had Effect On Farm

The heat wave had a significant effect on the farm. The cattle and livestock were affected by the heat wave. The animals were left the information and your data. Chickens: the department that suffered the most from the heat wave was the Ornamental Horticulture Department. The only thing done to the cattle was to get them to the feed trough, literate them, and encourage them to eat. The cattle also suffered due to the heat wave. Cattle also suffered due to the heat wave. The cattle were resting in the shade of the feed trough, waiting to be fed. They would feel the heat, therefore, from the heat of the day to the heat of the sun. The only thing done was to get the cattle to the feed trough, literate them, and encourage them to eat.

With the weather forecast predicting more heat, the farm is preparing for another long, hot summer. The farm is preparing for another long, hot summer. The only thing done was to get the cattle to the feed trough, literate them, and encourage them to eat.

Now five kinds of Chevrotains for all kinds of people!

Speed Sticks, the deodorant for men! Really helps stop odor. The odors dry almost as soon as they are applied. Try a pack now.

MENNEH SPEED STICKS

One wide, dry stroke stops perspiration odor all day!
