10 Seek Homecoming Queen Title

The polls are open and the 1963 Homesteading Queen election is under way. The candidate list includes candidates for the Tri-County section of the sale as well as of other sections. The election is open to all students and the winner will be announced at the annual banquet on November 20.

100 Hear Dean Chandler Explain Policy To SAC

More than 100 students were present at the Thursday Student Activities Council meeting in the Student Union Building. Dean of Students Robert L. Spink explained the college's policy regarding student conduct and discipline.

Couldn't Hold This Tiger; Is Champion

Tiger V, the 650-pound African lion, was killed in a fire today in the Student Union Building. The lion had been a popular attraction at the college and was considered the college mascot. The cause of death is unknown.

Drop Deadline Here Next Friday

Thursday, December 5, is the drop deadline for the Fall Quarter. Students who wish to drop a course must do so before this date to avoid a grade.
CU Show Has Night Clubbish Air

By LYNN EINHEDER

The College Union has a unique program every second Saturday evening. The Girls' Committee, consisting of George Mattson, Norma Hatfield, Susan Grafton, and Betty High, has arranged to have a night life appearance at the Union. There will be a free bar and free dancing, and a variety of activities. The program will run from 9:30 to 2:00 a.m. and it promises to be a night of fun and relaxation.

Field Day Attracts 100 FFA Members

Since May, the FFA members have been working hard to prepare for their annual Field Day. This year, the event was held at the Clovis Farm in Stockton. There were several events, including a tractor pull, a hayride, and a hay bale toss. The FFA members were able to show off their skills and team spirit. The event was a success, and the FFA hopes to continue this tradition in the future.

Dairy Judges Win At Cow Palace

The Annual Dairy Show at the Cow Palace was held in San Francisco. It was a successful event, with many dairy farmers from the area attending. The winners were announced, and the overall champion was selected. This event is an important part of the dairy industry and helps to promote milk and dairy products.

Mailbag

Braceros Exploited

Says: I was amazed to hear the agriculture program discussing a speech by William T. Struve and the importance of the Bracero program. It is so important that the Pardee Program director, who is the University's director of the Bracero program, should have been at the event. This program is a way to exploit domestic agricultural workers. And it is not a program that we should be proud of. It is an example of how we can exploit workers for our own gain. It is a program that should be ended.

Editor's Note: In other words, you're looking for a dumb broad!

Filler Choice Questioned

Says: Why is the Filler at the bottom of each page? It is not contributing to the quality of the newspaper. Why not use it for other things, such as advertisements or news articles?

YEOMT POST PH II

Grads Feel Less Proud

Says: I am a graduate of Cal Poly. I feel that our university has a bad reputation. We need to do something about it. We need to show the world that we are a good university.

College Union Calendar Jam-Packed

The College Union has a busy calendar for the upcoming semester. There will be many events, such as concerts, movies, and guest lectures. The Union is working hard to make sure that there is something for everyone.

Ike Urges Contribution To Peace

President Eisenhower is urging college students to contribute to peace by joining People-To-Peace. This is a nationwide movement to encourage the world to work together for peace. The movement is gaining momentum, and more and more people are joining. It is a great opportunity for college students to make a difference. How can you say that you're not interested in Peace anyway?

Economic Growth In California

The state of California is experiencing economic growth. The unemployment rate is low, and the state is attracting businesses. The government is working hard to create jobs and encourage businesses to come to the state. It is a great time to be in California.

Editorials - Opinions

Voting Is Very Easy

Today and tomorrow some 8,000 Cal Poly students will exercise their right to vote. This is an important right that few Americans hold most dear to their hearts.

However, this world must be complicated indeed if only half the student body can find the time to vote. The campus 50 per cent voting record doesn't even meet the national average.

Just how complicated is this process of voting?

Not very. We have no registration procedures, no residency requirements, elegant halls, and service personnel to assist us in casting our votes.

We don't even have election judges.

And finding a voting place on campus is easier yet. Not one or two, but three booths are located throughout campus.

Although coffee and doughnuts won't be served in this election, members of Election Commission will be on hand to answer questions.

All in all, the process of voting here on campus is made as easy as possible.

Placing the "X" by the most "queerly" candidate is the only hard part.

"Culture Lag" Eliminated

The first is a series of monthly College Hour musical programs sponsored by the Mass Communication Department. A poor capacity crowd in the Little Theater heard and admired the third in our "Culture Lag" series on Saturday evening, as a one-man orchestra played a stirring concert.

A one-man orchestra in the Little Theater? That's right. It was one man, and it was a great orchestra. He played a variety of instruments, and his music was amazing.

For more information on our upcoming concerts, see our Campus Calendar, page three of last week's Mustang.
SLO, Pomona Campuses Top West In Undergraduate Engineer Enrollment

BY DICK KUSSMAN

A total of 1,511 students are enrolled in engineering programs at the University of California, Santa Barbara, with Pomona and SLO campuses sharing the top spots in the West. The three campuses account for more than two-thirds of the state's 2,400 engineering students. Santa Barbara's engineering enrollment has increased by 30% in the last five years, from 1,152 students in 1975. Pomona and SLO have also shown significant growth, with Pomona's engineering enrollment up 25% and SLO's up 20%.

The growth in engineering enrollments at these campuses is part of a broader trend in the state's higher education system. The California Polytechnic State University (Cal Poly) and the University of California, Los Angeles (UCLA) have also seen increases in their engineering programs. Cal Poly's engineering enrollment has grown by 20% in the last five years, while UCLA's has increased by 15%.

The growth in engineering enrollments is driven by several factors. First, there is a growing demand for engineers in a variety of industries, including technology, manufacturing, and infrastructure. Second, the engineering programs at these campuses are well-regarded and provide high-quality education. Finally, the campuses offer a range of engineering disciplines, including aerospace, civil, electrical, and mechanical engineering.

Despite the growth in enrollment, the engineering programs at these campuses continue to attract the best and brightest students. The competition for spots in these programs is fierce, with many students competing for merit-based scholarships and other financial aid.

In conclusion, the growth in engineering enrollments at these campuses is a positive development for the state and the nation. It indicates a strong commitment to producing engineers who will help drive innovation and economic growth in the decades to come.
Cagers Drill For Alumni

Coach Al Jennings and his Mustang basketball players are now using their skills under the direction of Jennings who is preparing the squad for action against the Alumni.

Cagers will appear against alumni of both varsity and freshman teams from 10 a.m. to 2 p.m. tomorrow morning in the center

All CCAA — Mustang basketball alumni will appear at 6:30 at the opening — admission.

Strong Second Half Gives USC 33-6 Victory Over Falttering Colts

By WILBUR C. MILLER

Vince's master problem on the 33-6 victory over poly was not the second half but the first the Trojans gained the lead over Poly in the first quarter and held it. The second half was outstanding.

USC took the lead in the first quarter on a 2-yard run by Jack Went and a 10-foot touchdown pass from the first series to Salome at the Poly 18.

In the third quarter, the Trojans scored only four points. USC's leading score of the second half was on a fumble turned over to USC in the second quarter.

USC gained a total of 246 net yards for the score. The key to the victory was the USC scoring drive early in the second quarter.

The visitors added icing to the victory with a 45-yard pass play put in the end zone for a two point conversion try, which was 246 yards for the score.

The overlay was compiled: Chase Hall, Residen-1 Hall Council, CSTA., Btt Bridge Club, Farm Center, Hilkl, Bridge Hall.

Facility Men

Lick Animals In Big Game

Through South Facility found that a big way for the facility actually was that the Mustangs had defeated the Long Reach 36-6 advantage.

A quick starter up the center and a powerful scoring drive early in the game, won the victory. The Mustangs will play in the center of the field with a 36-yard line. In the first quarter, the visitors added icing to the victory with a 45-yard pass play put in the end zone for a two point conversion try, which was 246 yards for the score.

GREAT NEW SHIPS

For Alumni

All CCAA — Mustang basketball alumni will appear at 6:30 at the opening — admission.
