'Midwife' Parrish Delivers Cal Poly Baby

By LYNNE NOHUM

"Why, I'd be a real cow," Walt Parrish said.

The former farm boy and now San Luis Obispo-based veterinarian was only partly joking. But he's also not lying. Since he was a teenager, he dreamed of becoming a veterinarian for dairy cows. And that's exactly what he's doing now. Parrish, a 1963 Cal Poly graduate, has been living his dream ever since.

"I was always fascinated by cows," Parrish said. "I grew up on a dairy farm, so it's in my blood."

Starting in the early 1970s, Parrish worked as a veterinarian for several large dairy companies, including the Dairyland Co. in Wisconsin and the Cal Poly Dairy in San Luis Obispo. He eventually became the owner of his own dairy farm in Waterford, California.

"It's a tough business, but I love it," Parrish said. "I get to work with cows every day, which is something I've always wanted to do."

Today, Parrish operates a small, family-owned dairy farm that specializes in Holstein cows. He also provides veterinary services for other dairy farmers in the region.

"I enjoy being my own boss," Parrish said. "It's hard work, but I wouldn't trade it for anything."

And with his recent delivery of a healthy baby cow, Parrish's dream of becoming a veterinarian for dairy cows has finally come true.

"It's a huge accomplishment," Parrish said. "I'm so happy and proud."

Student Chopter Saturday

Students at Cal Poly were ready to have a blast on Saturday night when the Student Chopter Club hosted its annual event. The party was one of the most popular on campus and drew a large crowd of students who were ready to have a good time.

"We try to make it a fun event," said Student Chopter Club President Jim Merson. "We want everyone to have a great time and forget about their worries for a little while."

The party featured live music, dancing, and plenty of food. Students were encouraged to dress up in their favorite costumes, and there were even some prizes for the best-dressed attendees.

"It's always a great night," said Cal Poly Student Nick Page. "I love seeing everyone having fun and hanging out with each other."

The Student Chopter Club is a student-run organization that hosts events on campus throughout the year. The club is known for its unique and fun gatherings, which are popular among students and faculty alike.

"We're always looking for new ideas and ways to make our events even better," Merson said. "We're always open to suggestions from the students, so come on out and join in the fun!"
MACMARRIAGE IS NEW ELECTRONICS REVOLUTION

Microelectronics is the new electronics revolution. Microelectronics has transformed the electronics industry and will continue to do so. The new device, the transistor, has been hailed as the electronic industry's most important development since the invention of the vacuum tube. Transistors are used in a variety of applications, including computers, communications, and consumer electronics. They are also used in military equipment and space exploration. The development of microelectronics has led to the miniaturization of electronic devices, allowing them to be smaller and more efficient. This has had a profound impact on the way we use and interact with technology. In conclusion, microelectronics is an exciting field that has the potential to revolutionize the world of electronics.

Philosopher, Reverend Judges New Catholicism

By KAREN JORGENSEN

"In our study of basic trends we will never be able to come to a conclusion, and there will be no way to come to a

conclusion," said Arthur J. Schopenhauer, German

philosopher, at the end of his seminar last week.

"Neither will it be possible to see where we are going to go."

Continuing by saying that they could not be sure of anything, Schopenhauer

said that the history of the church is in the hands of

the people, who are the ones who can say where they are going.

Marion is currently finishing a book on Schopenhauer.* Caution!

**Jockeying Around**

According to Robert E. Kennedy, Cal Poly's vice-chancellor, Cal Poly will remain in the news for a while in connection with several athletic events. The Cal Poly Mustangs are in the midst of a new era, which promises to be a period of change and growth in athletic competition.

The team's success has been realized in various ways. The Mustangs have shown remarkable improvement in their horseracing department, which has been a cornerstone of their athletic program. The team has also made significant gains in their tennis and track and field programs, with several athletes attracting national attention.

**Mustangs Face Champs Following Two Loses**

While the Cal Poly Mustangs are facing the challenge of keeping up with the University of California, Berkeley, in their upcoming meet, they are determined to give their best effort. The team is well-prepared and ready to face the tough competition.

**Coors Swim Way To Intramural Title**

Highlighting the annual intramural games is the swimming competition, where the Coos Swim teams are striving for victory. The teams are working hard to improve their performance and bring home the title.

**French Mermen Drop First Meet**

As the French Mermen team faces the challenge of their first meet, they are determined to give their best effort. The team is well-prepared and ready to face the tough competition.

**Gymnasts Lose Two In Weekend Meets**

The Mustang gymnasts are facing the challenge of keeping up with the University of California, Berkeley, in their upcoming meet, they are determined to give their best effort. The team is well-prepared and ready to face the tough competition.

**Wheeler Swishers Host Feb. 22**

The Wheeler Swishers are excited to host their upcoming meet, where they are determined to give their best effort. The team is well-prepared and ready to face the tough competition.

**We Cash Student Checks**

For students looking to make sure their money goes as far as possible, the service of cashing student checks is offered. The service is convenient and reliable, allowing students to easily manage their finances.

**Matmen Win Two More; Host San Jose Tonight**

The matmen are gearing up for their upcoming meet against San Jose, where they are determined to give their best effort. The team is well-prepared and ready to face the tough competition.

**Poly Linksman Get Set For Busy Year**

As the Poly Linksman team faces the challenge of their upcoming meet, they are determined to give their best effort. The team is well-prepared and ready to face the tough competition.
