CU Models Will Be On Display

SAC Starts Work On Next Year's Budget—Session Continues To 2a.m.

Students Display Talents In Spring Sing Tonight

Architects Dig Into Building Plans

Montgomery Will Direct CU Board

CU Models Will Be On Display

The models show students what a college union building for this school may look like, said Louis Harder, activities adviser. They may not be exact, but the concept of what it will look like is shown. The money was raised from the students to build the union building, according to Harder. The union building will be built on the site of the old gym. It is being built by the students and will be used by the students. The building will have a食堂, a bookstore, and a coffee shop. The building will be open to the public, and the students will be able to use it for their own activities. The building will be completed in the fall of the coming year.

Theatre Guild Members

By Zonia Togawa

The Theatre Guild presented the musical, "I Can't Give You Anything But Love," in the Student Union. The show was directed by David Thompson, and the music was conducted by William Johnson. The cast consisted of many members of the Theatre Guild, including Tim Harris, Mary Simpson, and Bob Geary. The show was a great success, and the audience enjoyed the performance.

Theatre Guild plans to put on a play every fall and spring. The group is looking for new members, and anyone interested is welcome to join.

Shakespeare Drama

By Zonia Togawa

The Shakespeare Drama Society presented the play, "Othello," in the Student Union. The play was directed by John Nipper, and the music was conducted by William Johnson. The cast consisted of many members of the Shakespeare Drama Society, including Tim Harris, Mary Simpson, and Bob Geary. The play was a great success, and the audience enjoyed the performance.

The Shakespeare Drama Society plans to put on a play every fall and spring. The group is looking for new members, and anyone interested is welcome to join.

Architects Dig Into Building Plans

By Zonia Togawa

The Architects Digest presented the article, "Architects Dig Into Building Plans," in the Student Union. The article was written by Bruce King, and it discussed the plans for the new building. The architects were looking for input from the students, and they were planning to have a meeting with the student body to discuss the plans. The meeting will be held in the Student Union on the 15th.

The Architects Digest plans to put on a meeting every month. The group is looking for new members, and anyone interested is welcome to join.

Montgomery Will Direct CU Board

By Zonia Togawa

The Montgomery Will Direct CU Board article was presented in the Student Union. The article was written by Bruce King, and it discussed the plans for the new board. The board was looking for input from the students, and they were planning to have a meeting with the student body to discuss the plans. The meeting will be held in the Student Union on the 15th.

The Montgomery Will Direct CU Board plans to put on a meeting every month. The group is looking for new members, and anyone interested is welcome to join.

Comedy To Satire

By Debra Chaghran

The group was looking for input from the students, and they were planning to have a meeting with the student body to discuss the plans. The meeting will be held in the Student Union on the 15th.

The Comedy To Satire plans to put on a meeting every month. The group is looking for new members, and anyone interested is welcome to join.
Student Union Vital To College Life

By CHUCK SMITH

Some students consider the role of the college union to be a minor one. In some cases, it is even considered to be an optional part of college life. However, the student union is an important part of the college experience.

The student union provides a variety of services to students, including academic and social activities, food services, and a place to relax and study. The student union is also a place where students can express their opinions and have a voice in the running of the college.

In addition to providing services, the student union is also a place where students can socialize and meet new people. The union is often the center of social activity on campus, with events such as parties, concerts, and dances.

The student union is also an important source of income for the college. The union generates revenue through the sale of food, drinks, and other products, as well as through the hosting of events.

Overall, the student union is an essential part of the college experience. Without the student union, students would be unable to access the services and opportunities that it provides.

Controversial Speakers

EDITORS NOTE: An article entitled "Cal Poly Campus Under Attack" was submitted by our campus news service. The editors have determined that the article, while not necessarily false, may be considered to be controversial. Therefore, the editors have decided to suppress the publication of this article. This decision is based on the editors' determination that the article may be deemed offensive by those individuals responsible for the publication.

Excerpt From Killgore's Statement

I have no idea that any student, or anyone, ever voted for free speech and controversial speakers. On the contrary, I am an advocate of free speech and controversial speakers. I believe that free speech is essential to a free society, and that controversial speakers are essential to a healthy and vibrant democracy. I hope that our campus news service will continue to support free speech and controversial speakers, and will not suppress the publication of any article that I believe is essential to the free and open exchange of ideas.

CSCSPA Offers Freedom Resolution

WHEREAS, a number of California State College students are publicly voicing discontent over a number of issues, including free speech and controversial speakers, and WHEREAS, we are the elected representatives of the students of this college, we DO RESOLVE that:

Immaturity At Show

EDITOR:

Last week I went to a show at College Union Auditorium. The program was called "Al Fitti in Africa." I thought it would be a funny show, but it turned out to be a disaster. The performers were immature and rude. I had a bad time and won't be going to another show there.

Roms Bring Bucks At Annual Sale

EDITOR:

Congratulations to the Roms on their successful Annual Sale. It was a great event with a lot of people in attendance. The Roms have been working hard to raise money for their organization, and it's good to see their efforts paying off.

Biology Instructor Accepts Summer Grants

Eight staff members of the biological sciences department have received grants for summer work and research on various projects.

Dr. Glenn Reider, department head, will be working for four weeks during the summer at the University of Wisconsin-Madison on a National Science Foundation grant to study the interaction between bacteria and viruses.

Dr. J. W. Allsopp, assistant professor of chemistry, will be working at the University of California, Berkeley, on a grant from the National Institutes of Health to study the metabolism of certain amino acids.

Dr. T. J. O'Neill, assistant professor of zoology, will be working at the University of Colorado, Boulder, on a grant from the National Science Foundation to study the behavior of certain species of spiders.

Dr. E. F. Smith, associate professor of botany, will be working at the University of California, Davis, on a grant from the National Science Foundation to study the effects of certain chemicals on plant growth.

Dr. L. J. Johnson, associate professor of geology, will be working at the University of California, Los Angeles, on a grant from the National Science Foundation to study the geology of certain areas.

Dr. R. L. Taylor, associate professor of physics, will be working at the University of California, Berkeley, on a grant from the National Science Foundation to study the properties of certain materials.

Dr. J. H. Brown, assistant professor of mathematics, will be working at the University of California, Berkeley, on a grant from the National Science Foundation to study the properties of certain materials.

Dr. G. L. White, assistant professor of biology, will be working at the University of California, Berkeley, on a grant from the National Science Foundation to study the properties of certain materials.

The grants are funded by the National Science Foundation and are designed to support research on important scientific questions.
Mustangs, Matadors Vie In 1964 Baseball Finale

The Poly baseball team traveled south this week to enter its 1964 season against the San Luis Obispo Poly Mustangs. The Mustangs defeated the Poly team twice in 1963; however, the Poly team is expected to not be as strong this year.

Last weekend, Poly won both games against the Mustangs, 10-5 and 9-4. The Mustangs were led by their starting pitcher, Ken Black, who pitched a complete game.

The Poly team is expected to win this weekend as well. However, the Mustangs are known to be a tough team and will prove to be a challenge.

Contingent Of 8 Competes In West Coast Relays

The Mustangs contingent of eight athletes is set to compete in the West Coast Relays this weekend. The athletes will be competing in various events, including the 100, 200, 400, 800, and 1500-meter races.

The Mustangs are expected to do well in the 400-meter relay, with the Mustangs' relay team consisting of four athletes who have been training hard for this event.

Kickers To Compete

This weekend, a team of kickers will be competing at the Poly field. The kickers will be competing in various events, including the 50-yard field goal and the 20-yard field goal.

The Mustangs kickers are expected to do well in the 50-yard field goal event, with the Mustangs' kicker, Tom Black, having been training hard for this event.

EL MUSTANG

ALL-AROUND ATHLETE... Bruce West also played hockey. . . . Bruce West also played basketball. . . . Bruce West also played football. . . . Bruce West also played baseball.

Let's say for a minute, this is you.

You've got the gold bars of a second lieutenant in the United States Air Force, which is some status for you.

Well, you may fly an aircraft entrusted with a lot of responsibility. Or you may lead a team of research team tackling problems on the frontiers of knowledge. You're helping to run an organization that's essential to the safety of the free world.

Sounds like you're called on to shoulder a lot of responsibility.

Once you wear the gold bars of a second lieutenant in the United States Air Force, you'll find yourself shoulder a lot of responsibility.
