San Luis Obispo, Calif.

Chancellor declares Good Friday holiday

In response to resolutions from the Student Affiliates Council of both Poly campuses, Vice Presi-
dent Julian McPhee, the chancellor of the state colleges has declared the afternoon of
April 16—Good Friday—an academic holiday.

In a letter to the president of the students' union, "Since the government is de-
bclaring the hours from 12 noon in. to 5 p.m. on April 16, a legal holiday, I feel that it
was appropriate to make the mo-
et afternooon an academic holi-
day. However, I did not feel that
we should change our academic
calendar to the extent of chang-
ing the entire day an academic
holiday. The Polytechnic Faculty,
afte each campus have in-
cluded the American Agricultural

Manzer on Cornell

Why college education?

Which is more important in college, the individual or the society? What is the purpose of a university education? To whom should a college education be available?

Two topics of discussion for the delegates were, "What is the purpose of a university education?" and "How does your university meet this responsibility?"

According to Manzer, the two topics of discussion for the delegates were, "What is the purpose of a university education?" and "How does your university meet this responsibility?"

It was generally agreed that the university must meet the needs of society. Not only must the student satisfy the individual's goals, too, but also the needs of society. In the words of society, satisfy man's allocation. "What do you do for the university?" and "What are the roles of the students inside and outside the university?"

Most agreed that all who wanted an education should be allowed to have one, providing they were actually interested.

At this point, said Manzer, "I want to find out what the foreign universities were like. As an example, the Czech student said that changes in his university were held all over town, even in storerooms. Other students in the attic of houses. When I told them about the California college system, they were absolutely amazed."

As to the second topic, the discussion group felt that the student should be free to study what he and society would like. The student should be allowed to study what he and society would like.

The girl representing the Dominican Republic added as a sidelight that in her country, Communist students, spent more time working extra curricularly than studying. The student democrats, said Manzer, "were just the opposite."

The fourth discussion session, concerning the future implications of colleges, proved "enlightening" according to Manzer. "We found that delegates could do very little while we were at the conference individually, unless we could organize and achieve a position of power within our respective nations."

Although delegate Manzer did not have to pay for either housing or food, the trip cost well over $400. "I was given $50 from Cal Poly and $50 from Western Fair Association to which I belong," said Manzer. "The remaining $384, plus $100 for my transportation, $140 for my meals, $100 for my hotel, and $40 for my travel, made the trip cost well over $400."

The remainder of the evening was spent in discussing the four programs and their implications. The cornell President Perkins, Cornell President Perkins, Cornell President Perkins, told the students that the university would have to serve the goals and ends of the individual or of society. Moreover, he said that the individual was most important and he was supported by a majority of the delegates in this viewpoint. A dissenting voice was heard through the Chinese-American student delegate who felt that the individual was of major importance in the university's work.

The afternoon and evening was also spent in discussion. The topics were, "In what way should a university education be available?" and "What is the role of the students inside and outside the university?"

Most agreed that all who wanted an education should be allowed to have one, providing they were actually interested.

"At this point," said Manzer, "I want to find out what the foreign universities were like. As an example, the Czech student said that changes in his university were held all over town, even in storerooms. Other students in the attic of houses. When I told them about the California college system, they were absolutely amazed."

"Place your bets, ladies and gentlemen, please your bets."

"I have ten; I have twenty."

"Twenty-one wins."

"Fare thee Well," a song popularized by Joan Baez; and "Two Brothers;" "Only One Thing;" "Fare thee Well;" a song popularized by Joan Baez; and "Only One Thing;"

"I have ten; I have twenty."

Shouters sought for auction

Any male student "who's a real man" and wants to be an auctioneer for the Y'All Come Auction during Poly Royal, should contact Hansmann, chairman of the Auction Committee.

Professional assistance, if needed, will be available to the rapid tallyer and he will be promptly rewarded by the committee. Interested students can call Miss Hansmann at 444-1616 between 5-10:30 p.m.

Items from piggy banks, made with bleach bottles, to Venus Flip Trap plants will be sold. The event was "very enjoyable." "I liked the girls; I liked the singing."

Auction proceeds will be used for desired equipment and food stuffs for that weekend so plans can be made.

Quota controversy fades away

by f. d. jeans

The Editor of El Mustang, Teri St. Onge, and this reporter went to a function for the English and Social Science Departments on Friday, but she was also expected to attend.

The most important basic principle one learns as a journalist is that "the people have a right to know" and that it is the newsmen's responsibility to fulfill that right. Thus it was that we decided Friday afternoon to make a list of those questions about the enrollment quota plan which the members of the college community were asking and present them to the college administration for comment.

Miss St. Onge had asked for a press conference with college President Julian A. McPhee whose previous appointment was previously to meet the president's schedule had been too crowded to allow for one. All President Malcom Kemp had told her that President McPhee is always happy to see students when he is on campus.

We took the speedy new elevator to the president's fourth-floor office in the Administration Building. As we knocked at the door of room 407, a young light-skinned, light-haired man stepped from the next office and inquired, "What do you want?" "We're from El Mustang and we have some questions about the enrollment quota plan," the secretary gave us a knowing smile and disappeared into the dean's private office.

In a moment we heard a pleasantly booming voice invite us in. Entering, we met the tall, six-foot-plus man with a graying crew cut whom the voice belonged. He rose to his full height and leaned on the pile of paper on his cluttered desk to greet us. Before we could present our questions he said, "You can only stay a few minutes, though, as I can be swamped with work." Miss St. Onge asked, "Then the only person we can get this information from is President McPhee?"

Dean Andrews looked obviously pleased. "I'm sure you know, as much about this as I do. As dean of the college, many of the things I would rather not be challenged to me. I'm swamped with work and cannot talk to you at this time," I have to digest this information first," he said.

We walked to the stairwell in the Administration Building and in a few seconds of thought, decided to return to the dean's office. Lightly I moved to the suspects that were rapidly forming in our minds.

We offered the president a plug of blue cigars which so richly appraised the new administration headquarters. We explained our disappointment that both the president and vice-president were off campus and that the dean of the college was unprepared to answer our questions.

Miss St. Onge inquired as to the frequency of the director's absence of the top administrative head. "It very rarely happens," the reply was the reply. "Didn't the president express some reaction to his enrollment decision? Didn't the idea of a press conference occur to him?"

"Why, I'm very much that the idea of a press conference did not occur to him. He didn't express any reaction because the substance of every recommendation from all sources are the basis of the statement released. There is nothing in the recommendation which would indicate to us a strong reaction."

As to calling a press conference, he felt that all questions were answered, "In 3 or 6 years of working as his assistant, I don't recall President McPhee ever calling a press conference himself.

"Did the president return his return?"

"Not possible upon the president's return."

"I'm sure" - "I don't think it would be possible upon the president's return."

We walked slowly down the stairwell. As we depressed the last line of R. T. Ring's poem, "The Halloween Tree," ran through my mind: "This is the way the world ends not with a bang, but a whimper.

Engineering departments visited by professional accreditation team

Eight members of the Engineering Council for Professional Development (ECPD) visited Cal Poly last week. The purpose of their visit was to review various engineering departments in order to determine their eligibility for accreditation according to the criteria of the ECPD.

The ECPD appraises engineering colleges in accordance with predetermined standards which are the most beneficial to the engineering profession. It was called to the attention of the ECPD that Cal Poly's program is different from the conventional engineering program at other schools. In a state and national basis, more programs like Cal Poly's are needed to fill the gaps in the nation's educational engineering spectrum.

Each department was studied in detail. The investigation included a study of student examinations with grades from A to D, the library resources, placement data, and administration requirements. The accreditation team also made brief visits to the English, Social Science, Math, Business (Psychology) departments. These departments were examined on a general level in relation to their use for engineering students.

In a letter sent to enrolled graduates, Dean Hayes asked them to fill out a survey, "How well do Cal Poly graduates stand the test of time?"

Dick Jones, who is now Project Manager of Advanced Systems and Displays at IBM said, "I felt strongly that my experiences at Cal Poly have materially contributed to my continued work within engineering. My experiences at Cal Poly were far more challenging than those that culminated in the understanding of professional engineering and challenges which I faced in the industrial world."

New Western Resident Manager with the Hallvar Corp. Roy Hurle, commented, "I would say that Cal Poly graduates I have worked in offices with (four other) have no problems competing with graduates of other colleges, in fact, many times I compete more favorably, especially in areas of estimating projects, etc., where some acquired experience in manufacturing is beneficial."

And finally James E. Calhoun, Jr., Director of Research at Du Bois, Materials & Productibility, Acius Engineering, pointed out, I attribute a large degree of my growth to the various challenges of the education I received at Cal Poly. I have received a great deal of practical experience throughout my career indicating my appreciation of the practical background that can be received professionally highly through courses and work projects."

A final report will be published by the ECPD next October telling whether or not Cal Poly Engineering Departments will be accredited.

CONSERVATIVELY speaking
by Bob Kocror

If a student to desinflate him­self politically affiliated with the Democratic or Republican party is an affront, then to affiliate with Person­alist ideology is far worse. The reason for this is that the moral basis for the former can be varied, while the latter is solid. The real division of political opinion is between the personal­ist ideology and traditions cut into the order of things by the Dem­ocratic or Republican party. Only by those ideological principles can true identification be made.

What is Conservatism? This question can be answered in two parts: (1) by listing the legisla­tive proposals which one follows, or is against; (2) by stating con­tent, not necessarily with a direct rela­tion to the national level.

Though statistically registered as a minority (only 26 million...), there are reasons to believe that millions of more Americans harbor the above principles of Conservatism; (2) that there are many students here at Cal Poly who would, but aren't allowed to, assemble as an official organiza­tion on campus—a Conservative Club—in order to express the above ideology. "Don't believe me? Try it..."

If the administration did pur­pose fully to the Easter observ­ance I find them a bit cold in their Christian feeling and in part take such action as an ins­ult to the students religious be­liefs. The act of restoring the Good Friday observance (If it is restored) should not be em­ployed at all to the students because it never should have been committed in the first place. "Thank you, Julian McPhee."

"The most"—say to the least—about the very best

Football is here again; workouts start May 3

A bumper crop of some 50 to 60 athletes are expected to report for the opening of spring football drills May 3 to begin a four-week session of tuneups for the coming fall campaign.

Head Coach Sheldon Harden is all smiles at the mere thought of so large a turnout and with good reason. Last season when his Mustangs fell to the very abyss of gridiron existence with an 0-10 record, he had only a handful of recruits on hand to field the team. Traditionally the time when the spinning out process is undertaken, it is important that the spring group be representative of the talent available. There is simply no time to try out newcomers in the fall when conditioning and the perfection of plays is the order of the day.

A group of seasoned veterans, some top prospects up from last year's frosh team and some interesting newcomers will form the nucleus of the squad ready to bust out on the 3rd. All of this has prompted Coach Harden to take on an optimistic view of the team's chance for next season. "We can do nothing but improve, he says, "if these guys come through for us."

Harden expects 28 returning lettermen to suit up, minus All-CCAA tackle Chuck Campbell who dropped out of school this quarter, but will be back in the fall.

Fred Richelieu, Bill Raabe, and halfback-armed Bill Ward give the Mustangs three returning frontline quarterbacks. Other topnotch backs include Pat Beasley, Bruce McPherson, and Dave EDMONDSON. The latter returns to the campus in 1961 and may unseat Beasley this fall as the team's number one fullback.

In that event Beasley will probably be moved to one of the halfback spots.

The line will have a number of top returnees. Line: Overbeck, Dave Taylor, Jim Fogarty, and another ex-Mariners Connie Burger appear to have the inside track on the guard positions. Dick FISCHER and Mike FORSTER will be tough to beat out at the tackles, and Harden has two good centers returning in Dave Paul and Ken RAMSEY. The end post, however, will be hit hard at graduation and are weak at this point.

Fred STRUBERG and Bill ROBERTS, kingpins of the 1964 defensive corps, will be back, a fact which will make some enemy ball carriers a little wary of the coming season. Roberts, in particular, a bumper crop of some 86 to 100 athletes are expected to report for the opening of spring football drills May 3 to begin a four-week session of tuneups for the coming fall campaign.

Rain halts tennis, baseball, track

Poly's baseball, tennis, and track teams were fooled again by the weather over the weekend as rain halted their respective contests.

Coach Bill Hicks' varsity baseball squad was forced to put away their spikes for the second week in a row. They were scheduled to meet Long Beach State at Long Beach for a single game on Friday and a doubleheader on Saturdays. Last week it was the same story as they stumbled in their meet with San Fernando State on the home field. The track team remained at home Saturday due to the rainy conditions in Santa Barbara where they were to compete in a triangular meet with the University of California at Santa Barbara and San Diego State.
**RAC COMMENDATION**... Coach Vaughn Hitchcock, recently commended by Student Affairs Council, and members of grappling team, received second place trophy earned at NCAA Small College Wrestling Championships.

**SAC commends grappling coach for outstanding season effort**

Cal Poly’s Student Affairs Council adopted a resolution commending Vaughn Hitchcock for his outstanding coaching of the nationally prominent wrestling team April 1.

The resolution read: WHEREAS, the 64-0 victor was the outstanding excellence this season, and WHEREAS, a great part of this excellence is attributable to your coaching, therefore be it RESOLVED, that we members of the Student Affairs Council commend Coach Vaughn Hitchcock for a job well done.

These statistics back up this well deserved award.

- **Tournament Competition**
  - San Jose State Tournament
  - UC-LA Invitational
  - Team Champions: Arizona State, UCLA, Invitational Team Champions
  - CCAA Conference Tournament
    - N.C. Freestyle Tournament
      - First Place: Chico State
      - Third Place:

- **NCAA Western Regional Tournament**
  - NCAA Champions: 
    - Second Place: Cal Poly

For the third consecutive year Cal Poly dominated the California collegiate wrestling scene by maintaining its undefeated dual meet record over California colleges and universities, defeating such outstanding teams as UCLA, San Jose State, University of California, Fresno State, Stanford, Long Beach State and Santa Clara State.

Cal Poly has a three-year dual meet record of 35-0-1 in California competition. In addition to this outstanding record Cal Poly has competed against other outstanding teams in the West Coast and has defeated Arizona State University and Arizona with the outstanding teams on the West Coast and has defeated Arizona State University and Arizona with the outstanding teams on the West Coast and has defeated Arizona State University and Arizona State.

- Cal Poly record with a 63.4
- Cal Poly record with a 58.0
- San Diego 186, Cal State Long Beach 70, Cal Poly 34, and Fresno State at Long Beach. Illman took second in the 100-yard individual medley, setting a new Cal Poly record with a 58.0. In that same race Mustang Phil Heintzelman took second in the 100-yard freestyle, setting a new Cal Poly record with a 48.0. By Jim Wilson

- Mustangs finish fifth

Nine new records were set at the California Collegiate Athletic Association Swimming Championship held last week at Fresno. Gary Illman, twice Olympic gold medal winner at Taxy, set new NCAA records for Cal Poly at Long Beach. Illman took first in the 100-yard butterfly, and he was on the record breaking Long Beach 400-yard freestyle relay team.

- Mustangs finish Dave Meurisse

Team Champions: Harvey Wool-Captain, Sam Cereceres, and John Garcia (128) and Lance Cornell (130) capped third place honors, and Mike Ramer at 185 placed fourth.

Toastmaster Phil Sullivan-Outstanding Wrestler, Jesse Flores-Outstanding Freshman Wrestling Champion.

**Freshmen show well; Mustangs finish fifth**

Coach Richard Anderson said after the meet, "I was really pleased with the freshman performances; they accounted for 3 new school records. With these freshman coming back we are starting a building program. We should do nothing but get better.

- John Woods, Dennis Ervin, Richard Souza and Jon Munko will place honors, and Mike Kemer at 185 placed fourth.
- Mustangs finish fifth

Cowboys who 'love the sport' make our rodeo team tops

A hay soft-spoken young man was explaining how the rodeo team at Cal Poly was such a success.

"I think it is because of the Agriculture's excellent affect here at Poly," commented Eddie Newton, a member of the Cal Poly rodeo team.

The college doesn't encourage scholarships for rodeoping, and the team members pay for their own food and have their own horses. Cal Poly, however, pays for transportation and meals.

The Poly rodeo team has had another successful year, winning three of the four they have played," reminded Newton.

The team has three rodeo rides again, including the one during Poly Rodeo. The Poly team, like the rest of the college teams belongs to the National Intercollegiate Rodeo Association. Scores are kept and are compiled in the Western division.

Becoming and staying a member of the team isn't easy, Newton said. At the beginning of every school year, tryouts are open to those interested in the club. From members of the previous team and new students, their staff selects.

According to Newton, about 20 fellows try to make the team. But only 15 to 20 will represent Poly in the NIRCA. Two alternates are also chosen and used if any braves are injured in the regular team.

There are six events that the team can enter, including calf roping, bull dogging, ribbon roping, bareback riding, and saddle bronc riding. Team members may choose to enter any of these six events.

With a slight smile on his face Eddie continued, "We don't do prize money. We don't do prize money or we do prize money."

Cal Poly has 2 girls on the rodeo team, and they can enter only two events. These are goat tying and barrel racing.

"Flying colors" is one way of describing how the Cal Poly ROTC unit passed the recent federal inspection with flying colors, staff and cadets, which included such details as the quantity of all physical properties of command, from president down to the man's squad leader.

After inspecting the corps, the colonel, with his staff, took on campus early in the morning to inspect the ROTC facilities, staff and cadets, which included such details as the quantity of all physical properties owned by the Corps.

"All the people that I saw had absolutely made some effort to prepare for this inspection," the colonel told the corps. "This indicates a high morale.

Due to the rainy weather, the ROA Corps formed in Cottle Gym for the 11-hour inspection.
