President's greeting

It has been traditional each year for me to write this welcoming statement for the first issue of El Mustang. In it I hope to convey my personal welcome to each new student, faculty, and staff member who joins our family and the exciting challenges we have before us. At the same time, I want to "welcome back" those who have been with us at the start of another new year.

As most all of you are aware, because by law I must restate at the end of this academic year my thanks for your positive message such as this. In my 33 years as President of Cal Poly, I have seen many students, faculty and staff member going to assist in the events and they can be present for the year at Cal Poly pleasant and beneficial ones.

Again, let me bid you a warm welcome and wish you the best of success.

Julian A. McPhie
President

Sixty-two are added to Cal Poly faculty

In spite of the highly competitive salary situation faced by the California state college system, Cal Poly’s first offer of employment in 1966 for the Academic Year added 15-18 new faculty members, the Agriculture Division added 21, the Business Division added 11, the Fine Arts added 3, and the Science Division added 7.

Dean Andrews, head of the College of Agriculture, said in a prepared statement to El Mustang, "We were able, to select from a number of exceptionally qualified and very impressive candidates, which are expected to be accepted by the National Teacher Examinations and to staff our college faculty members to 65," according to Andrews. As he pointed out in a prepared statement to Cal Poly faculty and staff members, the Agricultural Division added 21. The Business Division added 11, the Fine Arts added 3, and the Science Division added 7.

EDITORIAL PAGE

The following is a rundown on some editorial policy items which will guide El Mustang content this quarter.

The main purpose of El Mustang is to provide the San Luis Obispo campus Cal Poly students, administration and faculty with the necessary information on current events and issues concerning the university, administration, student and SAC action and to reflect campus activities. It is to be composed of national, national and statewide news and especially this news as it affects Cal Poly students and college students in general.

The paper will remain tabloid size as it was last Spring. Quarters regular issues will be run eight pages. Double page heads (first word and proper nouns only capitalized in headlines) will be required in two for easier reading. Again, no column rules will be used to provide more white space between columns. Any other typographical methods which open up the page, emphasize and grade articles will be used for easier and faster reading of El Mustang.

To help implement the policy for El Mustang this quarter, such things as photo features of various aspects of campus life; localization of international, national and statewide news and events by stories on student and faculty interviews and discussions; stories of college affiliated people; features and columns and news of faculty members, news from other colleges; and a series of articles to inform students on the workings and organ of the student government will be presented.

El Mustang will recognize all views represented on the campus. There will be an effort to print all sides of an issue. Also, editorial positions will be taken on issues when the situation warrants it.

All "letters to the editor" are welcome and as many as possible will be printed to still be able to provide a balance of the type of material in El Mustang. It is mandatory that all "letters to the editor" be signed by the author of the letter.

All news and feature story tips are welcome. As many interesting and informative articles will be presented as possible but editorial decisions must be made as to those that will run due to the limited space of time and space.

There will be emphasis on newsworthy campus projects, activities, programs and speakers. Newsworthy is an announcement of meetings which is handled by the Poni. Clubs are requested to help keep El Mustang informed of their activities. Announcements should be revolving only when the news arises to run a number of small notices.

Lamouria is AE head

Loyd H. Lamouria, holder of six U.S. patents on agricultural machinery, has been appointed the new head of the Agricultural Engineering Department, according to Dr. John H. Johnson, dean of the Polytechnic College of Poly. Lamouria will be appointed to Cal Poly following a term as Manager of Professional Services at Brown and Company, the fourth largest full-time agricultural utility equipment manufacturer in the U.S. He was offered the job by James F. Marson, former Agricultural Engineering head.

Lamouria is a native of the Paris-Ile-de-France region of France. He served in the French military during World War II and was captured by the Nazis in 1940. He was a prisoner of war for three years, then escaped and found his way to London where he got a degree in mechanical engineering from King's College, London University. He then worked in London doing research and development work on fighter planes before World War II.

In 1945 Lamouria was the delegate of the American Society of Agricultural Engineers to the Fifth International Congress of Agricultural Engineers held in Brussels, Belgium, at which he presented two research papers.

The same year he received the Alfred P. Sloan Award in Executive Management at Stanford University.

Lamouria earned a bachelor of science degree in agr engineering from Michigan State College and received a masters of science degree the following year from Iowa State College. He has also studied at the Sorbonne and the Institute For Landscaping Engineers in Berkeley, California, and has done post-graduate school in agricultural engineering at Stanford University.

Formerly he has taught at Iowa State University and the University of California at Berkeley. He is a member of Sigma Xi, the American Society of Mechanical Engineers and the American Society of Agricultural Engineers.

Raising horses and flying are his hobbies.

Class Size

One thousand California elementary schools have more than 46 pupils-15 more per class than recommended by most educators.

Weekend events

After almost a week of running through the campus on our feet and enjoying the active campus nature, and a good time,

Weekend events will be as follows:

Close WOW week from 8 p.m. to midnight. Saturday evening there will be a host and dance at the Man's Gym. The bonhoy will be from 8 p.m. to 10 p.m. It is to feature talents of both old and new students.

The dances will be from 10 p.m. to 2 midnight. The dances are for both old and new students. Admission of 60 cents will be charged at the host and dance balls, but new students who have WOW week tickets will be given a ticket from their ticket books.

Invitation To Thought... WOW Club members filled the lawn by Whitney Dome for a talk by Connie addressed the new students Thursday evening on the theme of "Invitation To Thought."

Lund new head of El Mustang

With this issue Poly journalist Maureen Lund takes over the direction of El Mustang as the newspaper's fall quarter Editor-in-Chief.

Miss Lund, a fourth year Business and Industry Journalism student, has held various positions on the El Mustang staff. She is a graduate of Phoenix (Arizona) West High School. She would like to get a journalism position upon graduation as a transfer student from Alan Hancock College. While at Hancock she served as business manager and editor of that college's news paper. Perhaps in the future she plans to enter the University of California, Santa Cruz. Next fall she will do graduate work in International Relations.

The managing editor is responsible for making reporter assignments, generally overseeing the flow of copy and the page make-up, and is in the latter role the reporting and editing staff member.

The two day editors are Sally Bean and Joe Warren. This is the first El Mustang editorial position the two have held.

As the head of El Mustang, Miss Lund is responsible for the news section of the paper. She sets the newspaper's policy and is a member of the Board of Publications.

Lamouria earned a bachelor of science degree in agriculture from the University of California at Berkeley, where he served as business manager and editor of that college's news paper. Perhaps in the future she plans to enter the University of California, Santa Cruz. Next fall she will do graduate work in International Relations.

Sudan ag. program

Three staff members from Cal Poly recently returned from a five-week visit to the States Department of Agriculture and Education program of Shambut Institute in Sudan, in northeastern Africa.

The trio worked under a contract signed with the Southern States Department of State Aid for the Development (AID) with the College Foundation; and Or.

Comprising the team were Warren Smith, dean of agricultural education program; Gene Brandt, manager of the cooperative education program; and Garvin Johnson, head of the Division of Agriculture.

In the background was Dean of Agriculture.

The work involved the survey of the college system and/or particular programs in agriculture; to appraise the Shambut Institute; and to receive information by Stimulated Emission Damping of the Engineering Division listed on the drawing boards, with some difficulty such as the Sudan one in Argentina.

Dean Smith in discussing the philosophy of Cal Poly said that he was very impressed by the survey of the college.

In making the survey the college had to establish a vocational and technical education program in extension education, and to meet both the social and economic needs of the population.

The survey was three-fold in meeting the growing educational needs of the country, in developing the economy of the country, and in providing the manpower needed for which there is no other agency available in Sudan.

The team noted that the survey was to meet the needs of the government.

Hayes gave an example of one man who would have to take a teacher's salary and another applicant would have to take a $10,000-a-year job. A staff member said that the survey was $10,000 a year but even this is not competitive with industry salaries, according to Hayes. The highest possible salary for anyone at the top of the full professor rank is about $9,000 a year.

Another difficulty mentioned by Hayes is the limitation in the state college system on the number of applicants, and the placement of the instructors in each of these departments. These higher positions can include salaries up to $10,000.

Another problem is the personal moral issue arises if the top positions are available to others who may not want to teach, according to Hayes. This limitation is up against the competition engineering salaries in industry.

Hayes said that he had the challenge of filling the top positions with full-time staff, and the top positions are not competitive with industry salaries, according to Hayes. The highest possible salary for anyone at the top of the full professor rank is about $9,000 a year.

Another difficulty mentioned by Hayes is the limitation in the state college system on the number of applicants, and the placement of the instructors in each of these departments. These higher positions can include salaries up to $10,000.

Another problem is the personal moral issue arises if the top positions are available to others who may not want to teach, according to Hayes. This limitation is up against the competition engineering salaries in industry.

Admission standards are tougher now

All new students entering Cal Poly this fall quarter are barred from the use of an eligibility index. There are, however, different admission standards for the two technical programs such as offered at Cal Poly, Colgate State and Trenton State.

The new standards are 

The admission standards are tougher now. Cal Poly has had contact with several African countries and made plans about agriculture assistance programs for the purpose of developing the agricultural facilities, potential in the state college system and/or particular departments in agriculture; making, crop production, economic advising in agricultural engineering and farm management.

If it was explained that the United States Government had been working through AID and AFD.

New teachers

(continued from Page 1) cities in the salary area. In fact, the average is for a staff member increased from two full positions, and is the same for the applicants who were just transferred into the Business Department.

Dean Smith said that many applicants are impressed by shipping factors such as a belief that what Cal Poly is trying to do, an emphasis on teaching over research, size of Cal Poly, favorability location of some of the facilities, potential in the state college system and/or particular departments in agriculture; making, crop production, economic advising in agricultural engineering and farm management.

Army progress exhibited today

The use of light, sound and television are all demonstrated in the army's research and development programs today, as a part of the multi-billion dollar exhibit, "Blueprints For the Future."

The model exhibit will be at the Cal State, and will the U.S. Army Exhibit Unit (the same as the model exhibit of the Army's exhibits in the Transportation section of the New York World's Fair. The Army exhibit includes equipment, weapons systems and air/ground state college system, is based on the use of an eligibility index. There are, however, different admission standards for the two technical programs such as offered at Cal Poly, Colgate State and Trenton State.

The new standards are:

198 students from the state college system are placed among the upper 100 officials of the California high school graduates.

The new standards index is derived from a special formula using the grade point average of the student for the last two years and the test scores from the Scholastic Aptitude Test (SAT) or the American College Testing Program (ACT). The student must apply under the state college system, and have a B or better grade point average.

Transfer students from another state college system, who have not being to the state college system, in the United States, are the subject of special interest by the state college system. The state college system has a special index of 100 eligibility points for those students who are from another state college system.

In establishing the standards, the state college system has been a major problem in the state college system.

The Administrative Code says that the state college system has been under the authority of the AID to be reported to its president, according to Winner. Also, the federal secondary school training that a California high school teacher would receive, according to Winner.

The U.S. Office of Health, Education and Welfare and the American Association of Collegiate Registrars and Admission Officials put out extensive material on the educational systems in foreign countries. Evaluation of the individual student's record is made using all the information available on the student, and the foreign language proficiency screening test.

Winzer commented that the index is based on a special formula using the grade point average of the student for the last two years and the test scores from the Scholastic Aptitude Test (SAT), or the American College Testing Program.

The student must be a student who has been in the state college system during the last two years.

The student must have a grade point average of 3.0 or better, and be a resident of the state for at least 10 years.

The state college system has a special index of 100 eligibility points for those students who are from another state college system.

The state college system has a special index of 100 eligibility points for those students who are from another state college system.
El Mustang is set on extending last year's record. San Francisco State will be no easy opponent though, as they have always managed to launch a good team, proving this by winning three Far Western Conference titles in the last five years. None of the other games this year will be easy either. Besides playing nationally rated CCAA powerhouse Linfield College, San Diego State, and Cal State Long Beach, there are games with old arch rival Fresno State, and San Francisco's NAIA powerhouse Lincoln College will be the first home game, with other strong conferences opponents being Santa Clara University, Cal Western University, and UC Santa Barbara.

The Mustangs are depending on their hard-core defense and a lightning fast the power backs to their opponents. The Mustangs are set on bettering last year's offensive record, which resulted in a 9-2-1 season. The starting lineup where the line tips in at 206 and the tailback spot and'Bill Bentley at 210 pound class) and Mike Remer (champion, 177 pound class), Lenford Karson (fourth in 110 pound class) and Mike Remer (champion, 177 pound class) could be tabbed for a lot of action this season. With a 1968 record that has set the Mustangs for best year and '63. Edmundson was named to the Far Western Conference all-star team, except that Swartz and Conrad Vaugan Hitchock will be up from the freshman squad and are certain to improve on last year's

Linfield slates for home opener

The Wildcets of Linfield College in Oregon treads Mustangland for the first home game of the 1966 season on Friday, September 16, at 8:00 p.m. at stadium.

The Polytans haven't seen the likes of the NAIA powerhouse since the '50s when Linfield scored decisive victories over the Mustang eleven under former coach Larry Hughes. Linfield again can be counted on to deliver a strong side on the field as they have 22 returning lettermen and they are again favored to keep their Northwest Conference championship.

Linfield has represented the Northwest Conference for many years and has many powerful CCAA football teams are in action this week. Their lineup is as follows:
