Baroque era music highlights college hour

A program of music of the Baroque era will be featured at the College Hour Concert in the Little Theater Building under the direction of Ronald Ratcliffe.

Ratcliffe is a member of the Music Department faculty and will participate in the program on the harpsichord. Elinor Kogan, the wife of Irvin J. Kogan of the Electronic Engineering Department, will be featured on the cello.

The program will conclude with three arias sung by H. Porrill, from those of his early opera.

Ratcliffe, a noted harpsichordist, has been with the Music Department for three years. He received his B.A. from the University of Washington and a M.M. from the University of Southern California. He studied with Maestro Alter Ehrirs, a famous harpsichordist and friend and protege of Bach.

After obtaining his master's degree, Ratcliffe taught privately in the northwestern states. He taught music at the College of the Ozarks in Arkansas and was musical director for a professional musical comedy company in Seattle.

This program begins the third year of the monthly College Hour Concerts presented by the Music Department. The next program in this series will be on Nov. 8.

Housing manager dies in S.F.

Howard "Don" Watts, the college Foundation housing manager, died of a heart attack Saturday morning in San Francisco.

The manager and his wife left for San Francisco Saturday morning to attend a play there. Watts didn't live to see the performance.

Watts, a retired U. S. Army man, was named to his job in 1948. He has been the Foundation housing manager for about the last fifteen years, according to Joni Hernandez, Foundation Manager.

The funeral will be held today at 2 p.m. at the Sutcliffe Mortuary Chapel.

The 66-year-old Watts is survived by his widow, Ann, and a son, Garrett, who is in the U. S. Army stationed at Ft. Derussy, Md.

GOP speaker calls for unity

George Christopher presented another in the Republican "12" series speeches Thursday night Oct. 7 while speaking to an open meeting of the California College Republicans (CCR).

Christopher outlined what he thought would be some of the important issues during the summer campaigning including the farm problem, reapportionment, the free speech movement, and an "open door policy" for the California universities and state colleges.

The former mayor stressed the need to "unify" the Republican party in addition to the condemnation of the John Birch Society, which he feels can only hurt the party.

Commenting on the farm problem, Christopher said, "the farms cannot afford to become reformers before just to adapt the growing problems of farm employment."

The present problem of reapportionment, he said, is in the best interest of the state. He added that after the reapportionment is completed the state would be better off with a unicameral system of government, which he feels would be the best procedure to taxpay and in the best interest of the voters.

Commenting on the free speech problem which has plagued this state during the last year, Christopher said, "there is a difference between free speech and open talk."

Publications committee defines areas of work

The recent Board of Publications committee, headed by Everett Chandler, Dean of students, in commenting on the situation of college administrators, faculty, and students, emphasized the need for a better understanding between the administration and the student body.

The committee work will include all campus publications. General areas of work have been set up. These include preparation of a policy statement for all campus publications and outlining of necessary procedures to implement policy. Also, there is to be a clarification of organizational structures involving publications.

A fourth area will be research into the idea of setting up some kind of a board on a professional and ethical concern.

A major topic of discussion at this second meeting was the role of the campus newspaper and how does freedom of the press tie in with the campus newspaper.
One branch student government

Query editor's note: Robert Hood, 11 Mustang, the author of this article, has been reporting on student government activities for the past year and thus has become well qualified to present the theory and practice of "student government." This article is offered as an explanation of "student government" to those students who are among the comparatively uninformed.

The theory behind student government at Cal Poly attempts to be in line with the college's "learn-by-doing" philosophy. The preamble of the By-Laws, the Associated Students' Code, states that the general student body, elected by the students, serves as a government based on a system of democratic policies. Further, the idea of having the four Instructional Division councils (Athletics, College of Agriculture and Engineering, Social Science, and Performing Arts and Services) plus the college president's representative, vote on their student body by-laws. The idea is to create a council system which is representative of the student body. This student body by-laws, according to the views of their constituent organization, will be presented at the council meeting.

The Student Affairs Council and the Associated Students Inc., are to be the government of the Associated Students, Inc., the name of the general student body, states that student government is based on the belief that the highest efficiency . . . (of the ASI) can be attained through the application of democratic policies and principles.

As the above fact is realized through theory, the student government is comprised of twelve representatives from the four Instructional Division councils, and acts in legislative, executive, and judicial capacities. In this council, government is considered to be shared with the college administration.

As legally organized the Student Affairs Council is comprised of three representatives from the four Instructional Division councils; a representative from the Associated Students Inc., the Associated Students Inc. Board of Directors (Athletics, College Union, Music, Poly Royal, and Publications); an elected representative from the college's largest department, primarily being Agriculture and Engineering.

The Social Science Council which is part of the Associated Student Council does not fulfill its role in representing the views of the students in the college's second largest department. This policy primarily because department students in general are not really interested in the council and must be forced to join it.

Turning again to the division councils, the operations of the Ag. Council were pointed to as the example of how the council system works at its best. The Applied Science Council, the Social Science Council, and the Student Unions Council are also examples of how the latter type of council functions.

This week

One branch student government

El Mustang

By Diane Schmidt

Student government officials adressed this week, that lack of time to do an efficient job was the biggest detriment in Cal Poly student government.

Bob Spick, graduate manager, said, "There is no time to do everything you need to do. Most students try to do too much, and their grades suffer." When queried as to the effectiveness of Cal Poly student government, Spick remarked, "Our student government works, as well as any form model. In any college, the club problem is a disturbing student interest."

ASI President George Soares

The Social Science Council which is part of the Associated Student Council does not fulfill its role in representing the views of the students in the college's second largest department primarily because department students in general are not really interested in the council and must be forced to join it.

This week's assignments were to improve the club system and to improve our class council. The question of having the five board members of MAC has been raised.

Most council members are interested in the club system. The Social Science Council has contributed to this council to improve our class council. The idea of having the five board members of MAC has been raised.

The Student Affairs Council is the branch council that has been raised.

Wells Fargo offers complete training.

If you're interested in the fascinating field of banking, Wells Fargo Bank offers you management training. We're offering Management, Branch Operations, Finance and Analysis, Title and Administration, Agricultural Representatives, and other similar positions.

Can you measure up to the challenge of unlimited opportunity for growth?" Wells Fargo invites you to talk business with you. The possibilities of banking are endless. Bank job opportunities are built on success. Wells Fargo is the bank for growing industry, and there's room here for graduates who have the capacity to excel.

Our representative will be on campus on October 18.

They take American friendship with them ... everywhere they go!

They're not the kind of men who often make news. But they carry American friendship—and ideas—into some of the most out-of-the-way places on earth. They are Standard Oil geologists, engineers, technicians. They explore primitive jungles, deserts, tundras, bayous, even the ocean bottoms, for oil.

When they find oil in far-off places, many other benefits follow. The local country gains a new source of energy, new jobs, new revenues, improved living standards. American cooperation makes stronger friendly nations.

Standard Oil men are more than oil-hunters. They are goodwill ambassadors. They take American friendship with them ... everywhere they go!

The Chevron—
Sign of excellence

STANDARD OIL COMPANY OF CALIFORNIA
Hot work out in practice. As several representatives-at-large do not serve as such, representatives-at-large serve as representatives of the entire past class representatives. The role of the general representative is open to the number of units he has taken. Because of these and other factors, class representatives are selected by a handful of students, all of whom must hold class cards, and thus their claim to serve as representatives-at-large is open to serious question. Further, since class consciousness is hard to obtain, these four people vote according to their personal views and such advisory opinions as the Inter-Club Congress may give.

The operational relationships of the three student body offices differ somewhat in the ASI By-Laws, the office of vice president is the most important and potentially powerful. The vice president is a voting and speaking member of SAC and is the chairman of the Elections and Rules Committee. Last year’s vice president, an active and resourceful person, utilized the potential of his office to the utmost and was able to make vast the ASI president. In the past, the ASI secretary has been hampered in actively being a representative of the student body at SAC because of his concern with taking the minutes of the meeting. This year’s secretary has appointed a recorder to take minutes and he can serve, along with the vice president, as a sort of representatives-at-large.

The ASI president as chairman of SAC votes only in case of a tie and speaks in rare instances. While the president does appoint committee chairmen and represents the student body at ceremonial events, his main influence is by virtue of his office and not any enumerated powers. It has been another law that the ASI president be an administrator of student body business and that he carry out the wishes of SAC. This campus wit has said that the ASI president reigns while the vice president and secretary rule.

No consideration of Cal Poly student government is complete without brief mention of the officers played by the Associate Dean of Student Activities, Dr. Don Lawson. This person has been with the college since 1951 and in his time has come to know Poly better than most people. A result of his background and position in the college hierarchy, the Associate Dean functions in relation to SAC as more than just a faculty advisor. His influence is futile for the most part as a result of the considerable influence of the direction SAC takes.

The office of vice president of SAC has found it expedient to lay down some rules. Law and order, in the words of Cal Poly Dean Lawson, a practice which prevails in other places, the philosophy, the influence of the Associate Dean is such that SAC in private has expressed that the ASI president be an administrator, as such a result of the student government is complete without brief mention of the role of the vice president and secretary. No consideration of Cal Poly student government is complete without brief mention of the role of the vice president and secretary. No consideration of Cal Poly student government is complete without brief mention of the role of the vice president and secretary.

Every Science, Engineering and Math student should know about CSSTP before he makes up his mind about a career.

CSSTP means Computer Systems Science Training Program. It’s an extraordinary IBM program that enables you to use your technical knowledge and problem-solving skills in new, exciting ways. Ways that may never occur to you unless you talk to the IBM interviewer.

He’ll show you how CSSTP leads to exceptional career opportunities with IBM Data Processing. He’ll tell you about the vital role of IBM Systems Engineer. How he goes into major businesses to help form systems solutions and control problems. He’ll tell you about the people who face IBM’s Systems Engineer.

Inside looking out...

During the last student body election late in the fall of the approximately 8,000 registered students of this campus, voted. Three figures who added to the general student opinion heard each day in the Beach Bar indicate to even the casual observer that student interest in "student government" is at an extremely low ebb.

Why does "student government" hold such little interest for students? A part of the answer to this question can be found in the history of "student government" as an institution.

"Student government" has two roots: student unrest and college administrative methods.

The first of these two factors, student unrest, is an old as higher education itself. The fourth century A.D., for example, was a period of terrible student unrest. A famous case involved Saint Augustine, then a professor at the University of Carthage, who was driven out of town by club-wielding students because they didn't like his teaching methods.

The battle of England's Oxford University has been turned down by students so often that historians have lost count. During the 1960s, American college students often want a part in making the campus a living organism.

But the originul foundations of "student government" have largely disappeared. In the first century of college history, the quality of instruction has largely disappeared. In comparison to earlier times teaching methods and quality have improved a hundred-fold. The second case, social activities, has also largely disappeared. The wealthy man's son of the 1800s with all his needs for status-oriented social events has been replaced in American public colleges by the middle class scholar whose primary need for academic success is financial. Yet even greater and more pressing teaching charges are presently affecting the student community and its administration.

With the increasing quality of education, the greater improvements in world communications and the dominant role of the United States in world affairs, the silent generation of the '60s is being followed by the activist generation of the '70s.

"Student government" is captured by the college administration and in the '60s and '70s a potential source of embarrassment to them, has not been allowed to change.

At Cal Poly these general trends in "student government" are apparent and have produced as institution which is the mirror of one dissatisfied student "student" or "government" needs.

The "government" offers goods and services which are largely underestimated. Classes, guest speakers, clubs and other social activities do not satisfy today's students' needs. The ASI will soon pass over $160 per student per year into a student union for furthering such activities.

With today's students' financial needs, many students openly wonder how much money wouldn't be better spent providing such tangible goods as low cost branded student housing, a discount bookstore, free competitive information and services, and other badly needed goods and services. But "student governments" must go further; it must take the lead in giving voice to today's students' growing activities. College Vice President Robert K. Kennedy said early this quarter that the recent student disturbances at the University of California, Berkeley, were directly related to the fact that the students refused to use the regular channels of protest.

If Kennedy were to look more deeply into the situation, he would find that those "regular channels" must be opened to students. "Student government," however, the "official student government," is the university as a means of communications and the dominant role, of the United States in world affairs, the silent generation of the '60s is being followed by the activist generation of the '70s.

"Student government" is captured by the college administration and in the '60s and '70s a potential source of embarrassment to them, has not been allowed to change.

In addition, the college is not allowing students a free hand with "student government." It is keeping it from fulfilling just those activist outlets that generation needs so badly.

Where will all these factors lead? Predicting the future is an extremely serious business, but if we can use the past as a mirror for the future, the present student dissatisfaction will not lead to either student violence or further student withdrawal from the college or both.

Those few in student government and in the administration should note present student attitudes toward "student government" and use them as a guide for solving past problems.

Poly wins, 33-0

by George Ramos

Well, it had to happen. Cal Poly just broke loose and really clubbed San Fernando Valley State, 33-0, last Saturday night behind the passing arm of Walt Raymond.

Raymond threw four touchdowns as the Mustangs broke a two-game losing streak, losing to Linfield and San Diego State.

The Mustangs also recorded their first shutout of the season and in the process, piled up their highest score in 4 years. Cal Poly is now 1-1 in conference play with Fresno State this Saturday.

The defense turned in a magnificent performance, holding the Matadors to 197 yards total offense, while they themselves totaled up 301 yards on offense.

The Mustangs first scored in the second period as Raymond threw an 11-yard touchdown pass to Monty Cartwright, later on in the stanza, Cartwright caught his second touchdown pass from Raymond for 4 yards and the score was 18-0, Cal Poly.

Cal Poly continued on their rampage as they scored twice in the third period: once on a yard run by Doug Bentley and the other on a pass from Jeff Carlyss to Ron Stutsman for the score. The Mustang defense was brilliant as Fred Streuberg headed the forces with 8 tackles and 8 assists.

Walt Raymond completed 13 of 22 passes for 112 yards and four touchdowns. Carlyss did just as well, completing 3 of 8 aerials for 79 yards and a touchdown.

Statistics-wise, the Mustangs piled up 37 first downs to 16 for the Matadors. Cal Poly out-passed San Fernando, 190 yards compared to 110 yards for the Matadors. They also out-rushed the Matadors, 111-97.

Individually, Doug Bentley and Steve Arnold were the big workhorses for Coach Hardin's crew. Bentley gained 103 yards in 10 carries while Arnold rushed for 61 yards in 10 carries.

The much-hyped Matador quarterback Bruce Lemmcrman was contained thoroughly by the Mustang defense. He completed only 9 out of 24 passes for 89 yards.

Score by Quarters

Cal Poly 18 18 7 - 33
San Fernando 0 0 0 0

They're the toughest!
The Cal Poly Coyotes bit uncrowned, held on stubbornly in Fresno Friday to win the Fresno State Bulldogs 13-0 at Memorial Stadium in Fresno.

The Coyotes ran the Fresnomen's offense record to a spindly 2-6-and lost to 10-1 Fresno over the UCGS youngsters.

Coach Ed Swart reported the "easiest" in which his team had facilities for tape rays must have been 110 degrees and that the Coyote attack was ready to play football when they finally reached the field.

The Bulldogs had only 15 points nailed on the scoreboard when the Coyotes started their attack on a quarterback sneak from the two. The conversion failed, and the Coyote offense held a slim 6-0 advantage.

After an exchange of the football at midfield, the Coyotes moved deep into Fresno territory and with 2-4 minutes remaining in the contest, scored on a 15 yard pass from Bedworth to Dave Felsomer. The PAT failed and the Coyote was shown by a 13-0 score.

Defensive一名 substitute for Poly were Davey, Ken Partners, Larry Phillips, Dennis Juarez, Craig Edmondson, and Greg Hornett.

The Sports Car Racing Association of the Monterey Peninsula, which presents the Monterey Grand Prix, with the cooperation of the San Francisco Examiner, announced that they have received entries from all of the most famous C. U. C., and Canadian drivers, including Hall & Sharp, Wall & Hagencon and Parmelee, Nick Muther, Don Weest, Ed Leslie, Ken Miles (driving a Ford GT-40 Daytona coupe) and Skip Scott of the Essex-Ware-Ware team, and a host of others.

The big Laguna Seca championship will start Oct. 15. With slightly different and qualifying for the pro entries, continue Saturday with Monterey Regional events, and wind up on Oct. 17, with four big races, the last two being the two heats of the grand prix.

The rivalry between Cal Poly and Pomona, a driver in international racing competitons, has entered its new McLaren-McLaren in the $40,000 Monterey Grand Prix.

Two other plans for the weekend: San Diego State played and won second in four of the six offensive statistics for the games so far this season.

Another disturbing fact, to the credit of the home team, is that San Diego State and Cal State at Los Angeles have been rated in the top ten small colleges by the wire services.

Manager of the Los Angeles Colffy, who is fourth in the Pacific Coast, and a host of others, "Carburetor" reported the contest, scored on a 16 yard pass from Bedworth to Dave Felsomer. The PAT failed and the Coyote was shown by a 13-0 score.

The Sports Car Racing Association of the Monterey Peninsula, which presents the Monterey Grand Prix, with the cooperation of the San Francisco Examiner, announced that they have received entries from all of the most famous C. U. C., and Canadian drivers, including Hall & Sharp, Wall & Hagencon and Parmelee, Nick Muther, Don Weest, Ed Leslie, Ken Miles (driving a Ford GT-40 Daytona coupe) and Skip Scott of the Essex-Ware-Ware team, and a host of others.

The big Laguna Seca championship will start Oct. 15. With slightly different and qualifying for the pro entries, continue Saturday with Monterey Regional events, and wind up on Oct. 17, with four big races, the last two being the two heats of the grand prix.

Dan Gurney, America's ace sports car and Formula 1.4 driver in international racing competitons, has entered his new McLaren-McLaren in the $40,000 Monterey Grand Prix.

Gurney, president and executive director for All American Racing, Inc., has consistently been in competition for World Championship titles in the Formula 1 division.

Dan Blocker, who plays the role of "Hoss" Cartwright in the Sunday night TV Western, has entered his brand-new Genie Mark 10 sports racing car.

Blocker's driver will be John Curzon, well known in the world of sports car racing. Curzon, a Canadian, has raced at Laguna Seca several times in the past and finished sixth overall in the 1964 1000 Miler event. He was first in under 2 liter in the first heat of the 1964 California Grand Prix and in the second heat for an overall fourth in class.
