Brown reports

School for yell leaders opened to all students

The 1966 version of Cal-Poly's Yell Leader School opens its doors to interested candidates. Yell Leader, Dave Riggs, speaking before Tuesday's SAC meeting, reported that the school will run for about six weeks at the end of which tryouts for yell leaders will be held. The meetings will be held weekly on Tuesdays in Crudinal Flynn Annex at 7 p.m. Attendance is mandatory, Bigge stressed.

"We need energetic, enthusiastic candidates to make this a good year for next year," Riggs said. "I prefer regulars, of course, but it isn't necessary. Lots of things are changing. For example, next year we will be meeting seven yell leaders rather than five. The reason for this is the increased size of the roster section. Five leaders would be spread too thin," he said.

Riggs said that all candidates on an equal basis, basic moves and routines are taught along with crowd psychology.

Printing Week queen crowned

International Printing Week got an early start at Cal-Poly with the Society of Printing Engineers electing Marilyn Ross as its Printing Week queen.

Marilyn Ross, an eighteen-year-old Home Economics major from Porterville, was chosen from two other candidates from the college, 14, and 16, by Junior Renee Miller and Karen Roth, 18, who will serve as princesses.

In observing Printing Week, "it is a privilege to be a part of it," Ross said. "It is a privilege to be a part of it," she said. "I really enjoy the activities, especially the banquet." Ross said that she is interested in becoming a graphic artist. She is also a member of the Photography Club and the Psychology Club.

Enrollment breakdown

Six thousand seven hundred thirty-nine students registered at Cal-Poly for the Winter quarter. This figure represents a decrease of 487 as compared with last quarter's 7,247. A larger enrollment of about 140 students had been projected for this quarter.

College Register, F. Gerald Holley reported that there was no appreciable reason at this time as to why the projected enrollment was not reached. He asked whether the military draft may have been a causative factor limiting Cal-Poly enrollment. Holley said, "there is no evidence at all to support such a conclusion." Applied Arts increased all other divisions in total enrollment with 2,061 students. Enrollment totalled 1,978 in Engineering, the only division with a lower number as compared with an year ago. The Agriculture Division had 1,661 enrolled. Applied Sciences registered 1,180.

The 5-1 male-female ratio narrowed a bit last quarter. 3,118 men enrolled as compared with 1,106 women. This quarter 3,273 men and 1,778 women registered.

Department-wise the Architecture Department ranked first in total enrollment with 542 students, the same number as last quarter. The Science Department followed with 583. Business and Administration enrolled 448 students; Music, 419; Engineering, 449.

Other statistics: the Bio-chemistry Department enrolled the lowest number of students (153) Graduate students total 1,024, including 441 freshmen, 487 sophomores, 141 seniors, and one student.

Printmaking queen crowned

[continued on page 4]
Fair association honors McPhee

Dr. Julian A. McPhee, in his retirement term of a 21-year career as president of Cal Poly, has been honored by the Los Angeles County Fair Association for its 45-plus years' contribution to the state's fair industry. The tribute in the form of a plaque was presented to the noted vocational educator by Fred Yntema, president of the Los Angeles County Fair Association.

McPhee initiated much of the work accomplished through the years by California's Future Farmers of America in connection with the fair industry since the FFA's inception in the late 1930s. He served directly as an associate in the latter division of the California State Fair from 1935 through 1940.

The first college course in farm management offered in the U.S., initiated a year ago at the San Luis Obispo campus, has received acclaim by the national fair industry. The Western Fairs Association provides scholarships to support the program.

McPhee, a former president of the American Vocational Association, is scheduled to retire in June at the age of 75.

Cal Poly with a second under-graduate campus at Modesto, and Educational Center for Farming and for the development of the young person's potential in judgement and their guests are invited to attend.

Monthly meetings are held in the snack bar patio, li-

The committee noted that the past year "was marked by a trend in the direction of increased teaching. Teaching, it seems, is the major reason for setting the same level as research, publishing and public service.

The report paid particular attention to the "All Poly weekend," which was held annually. It was noted that the weekend has been a success in the past, but it is also noted that the time required for the weekend has increased.

Cal Poly prepares education kit

High school agriculture students and their parents soon will be learning how best to handle the newest weapons in the fight against starvation.

Since World War II, agricultural chemicals have been a major armament in the battle against disease and pests that threaten plant and livestock health and the nation's food supply.

Weak front of the battlefront, however, has been the lack of knowledge of the hazards of using the chemicals. To combat this problem, Cal Poly has just published a pair of handbooks aimed at acquainting America's farmers and their parents with the safe way of handling and using agricultural chemicals.

Reprints of the teaching project is a student workbook, "Agricultural Chemical Safety." That provides answers to the "how," as well as the "why," of safe chemical usage. The Definite manual explains the vital role of agricultural chemicals in helping feed the world's millions and those who eat what they can explain why they should be used with care. Other examples, for instance, is a group chemical in common use that is perfectly safe, when diluted, for killing insects on crops. Three drops of the concentrated chemical on a farmer's kiss, however, will kill him.

Other technical topics included in non-technical terms include toxicity, runoff, state and Federal agricultural and public health regulations, comparison of chlorinated hydrocarbons and organic phosphates (the two most common types of pesticide), emergency first aid treatment for chemical poisoning, and the proper storage, mixing and application of the dozens of farm chemicals now in common use.

Author of the student work

Cal Poly Dean of Agriculture and Forestry Van DeVanter, a member of the State and Federal agricultural and public health officials, chemical companies, commercial application firms, farmers and high school agricultural teachers.

"The idea behind this publication," Van DeVanter explained, "is to make students and their parents better aware of the hazards as well as the values of agricultural chemicals. Horticulturists are familiar with such potentially dangerous chemicals as detergents, eating disorders, disease and blights. The nation's farmers need to be just as familiar with the chemicals that are helping feed our rapidly-expanding population."

A special features of the student workbook is a removable section of charts and signs for posting in areas where agricultural chemicals are stored and used. Included in a first aid reference chart giving symptoms and emergency treatment for various types of chemical poisoning.

More scholarships are available

The Leon County Courth School of California offers a $100 scholarship to a student who will attend a college. This is the only award to a student who will attend a college.

John Waggoner B.S. in Industrial Engineering, UC Berkeley

John's first assignment was to take over the management of an Information Officer and its 50 employees. Using his initiative, John saw possibilities for improving operations by streamlining certain equipment and centralizing supervisory personnel. As a result, his office's efficiency greatly increased.

Bob Goldsmith B.S. in Electrical Engineering, California State Polytechnic

Bob has a nine-man pilot service crew all his own. Together with his men, he is responsible for seeing that over 2,000 complex customer accounts always have smooth and uninterrupted service. He and his crew are also responsible for the maintenance of vital defense communications systems at two military bases.

California State Employees Assistance Plan is an aid scholarship for a young man who is not college bound. For the remainder of this year, Preference will be given to students whose parent is an active, retired, or deceased CSEA member.

More people interested in the scholarship should go to the Foothill & Biood 543-7316 Foothill & Biood 543-7316 Complete Ornke Service

Think of yourself in one of these positions...right after graduation.

(Interested? See our man on campus. He's got a career for you.)

John Waggoner B.S. in Industrial Engineering, UC Berkeley

Bob Goldsmith B.S. in Electrical Engineering, California State Polytechnic

Terry Westbrook B.S. in Electrical Engineering, Briand

Lloyd Thorsen B.A. in Philosophy, Col- lege of the Pacific

ASI Revamping

(Waited Bantz, B.E. of the Bilt Bethlehem "Long" Course, is an employment at our far, 500 million pounds laboratory. He's typical of young men on the move at Bethlehem Steel.

Terry Westbrook, B.S. in Electrical Engineering, Briand

After only a few months with the company, Terry was made Trouble Operating Manager of the Marysville Long Distances and Maintenance office. On the job, he supervises 120 employees who handle over 16,000 calls a day. In his position as manager, Terry is also responsible for the quality of service, labor relations, and administrative matters. He has increased his annual payroll of over $485,000.

WALT BANTZ (B.E.) of the Bilt Bethlehem "Long" Course is an employed at our far, 500 million pounds laboratory. He's typical of young men on the move at Bethlehem Steel.

Lloyd Thorsen, B.A. in Philosophy, College of the Pacific

Lloyd was reared in a mountainous, farming community. Now, 2000 miles away from his old neighborhood, he is discovering opportunities he improved. Lloyd made a study on his own and was able to get his B.S. in Chemical Engineering. They were accepted and put into effect. The improvement, which would not have been possible without the aid of the Missouri Pacific, has been vital to the company.

BELL SYSTEM REPRESENTATIVES WILL BE ON CAMPUS JANUARY 25, 26, and 27

AN EQUAL OPPORTUNITY EMPLOYER
South Africa on trial before World Court

Editorial

South Africa on trial before World Court

The problem* certifying the Cal Poly football program continues to consume the time of the Cal Poly student athletes, the coaches, and the administration. The players are pressing for a return to normalcy, while the administration is pressing for a return to the status quo.

The most recent development in this ongoing saga is the announcement by the NCAA that South Africa is ineligible for post-season play. This decision, made by the NCAA's Committee on Infractions, is based on the NCAA's determination that South Africa is not in compliance with Title IX of the Education Amendments Act of 1972.

Title IX requires educational institutions receiving federal funds to provide equal opportunities for girls and women in sports. This includes offering comparable opportunities in terms of recruitment, financial aid, facilities, coaching, and other resources.

South Africa has consistently refused to comply with these requirements, leading to a boycott of their team by some NCAA conferences and a withdrawal from some tournaments. The NCAA's decision is likely to further isolate South Africa from the international community.

The South African government has consistently denied any wrongdoing and has suggested that the NCAA's decision is politically motivated. However, the NCAA has stood firm in its determination to uphold Title IX and has refused to back down in the face of South Africa's objections.

The NCAA's decision is a significant blow to South Africa's efforts to maintain its status as a major player in international sports. It also highlights the importance of compliance with Title IX and the need for educational institutions to provide equal opportunities for girls and women.

The NCAA has also indicated that it will not reconsider its decision unless South Africa complies with Title IX. This may be a difficult task, given the government's continued refusal to do so.

The NCAA's decision is a victory for those who believe in equal rights for girls and women in sports. It is a defeat for those who believe in the continued exclusion of South Africa from the international community.

South Africa will likely appeal this decision, but the odds are against them. The NCAA has a long history of upholding Title IX and has shown no signs of backing down in the face of pressure.

The NCAA's decision is a significant step forward in the fight for equal opportunities in sports. It is a step forward that should be supported by all who believe in fairness and equality.
Military Ball set Feb. 5

Seabrook and Blade's fourteenth annual ROTC Military Ball is slated for the night of Sat., Feb. 5, at 9 p.m., and tickets are on sale for $2 per couple from any ROTC cadet or from the ROTC office in the old library building.

Tickets will also be on sale the night of the dance, which will be held in Men's Gymnasium.

Dress is semi-formal and dancing will be to the sound of the Cal-Poly Collegians. Color photographs of you and your date will be available as souveniers along with the official military-type dance "old" ticket.

Highlights of the festivities is the crowning of the ROTC Military Ball queen for 1967 from a court of six princesses selected by Seabrook and Blade-the ROTC honor club and voted upon by the entire corps of cadets.

The Grand March and presentation of the royal court will follow the prolonged "military splendor" of such occasions.

As an added incentive to the corps, the cadet who sells the most tickets will receive a promotion of grade in the non-commissioned officers category. The Company with the highest sales will receive the coveted "Honor Unit" designation for the month of February.

Student protests harmful

According to recent poll

Washinglon (CPS) - A substantial majority of adult Americans believe student and faculty demonstrations are not harmful to the United States, a recent Committee

JUDGMENT WAITS

Why does God allow the almost limitless instances of man's inhumanity to man, famine, sorrow, heartaches and tragedy? If He is all-powerful, good and loving, why does He let evil happen at all?

The Bible answers these questions. God's grace, His undeserved kindness to sinners. In love regaining through righteousness until eternal life by Jesus Christ our Lord (Rom. 8:23). God is longsuffering in our ungodliness, not willing that any should perish, but that all should come to repentance.

All should be converted, not only to faith.
Chris Riddle
Long Beach State's Forty-Niners
and San Diego State's Aztecs fell to Cal Poly with a 22-point win in the first half.

The Mustangs, despite a seven-minute drought in which they didn't score a field goal and were outscored 13-0 by the Forty-Niners, went into the half, leading 44-28. . .

The 72 cage teams in intramurals

The winter intramural sports season has come to an end this week, as the winter basketball games come to a close this weekend at the Recreation Gym.

Niner 72 clubs, dozens of other intramural sports, and the big Spring intramural season in the fall are just some of the intramurals that are about to close this week.

COACHES

Coach. Richard Purcell's Freshmen

Coach, Richard Purcell's Freshman football team put on their best effort at the end of the season, but didn't manage to win over the Forty-Niners.

COWBOYS

COWBOYS tops at Tempe

Cal Poly's high-flying forwards flew high in the air, and the Mustangs lived up to the hype, scoring 22 points in the first half.

COWBOYS coach, Bill McNeel, said, "We were hoping to win this game, and we did."

The Mustangs, despite a seven-minute drought in which they didn't score a field goal and were outscored 13-0 by the Forty-Niners, went into the half, leading 44-28.
