‘Air-structure’ expert will speak April 21

One of the world’s foremost authorities on air-supported structures will speak in the Theatre on Tuesday, April 21, at 10:30 am.

The public is invited to the free lecture but reminded that weekday parking on campus requires time and a permit.

Structural engineer David Geiger will speak on “Building Response for the Future — Air-Supported Fabric Structures.”

He will talk in particular about his innovative “cable-domes” for the 1988 Summer Olympics in Seoul, Korea; air structures at British Columbia Palace in Vancouver; and his translucent saddle roof for Linsday Park Sports Stadium, Calgary, Alberta, Canada.

A master in the design of the ultra-lightweight air-supported fabric roof, Geiger has designed virtually all the long-span structures of that type in the United States and many in other countries.

Winner of numerous professional honors and awards, Geiger last year received an Institute Honor for Lifetime Work from the American Institute of Architects.

Geiger’s April 21 lecture is part of the 1987 Distinguished Visiting Lecture Series of the School of Architecture and Environmental Design.

Cal Poly designated EPA training center

The U.S. Environmental Protection Agency has again designated Cal Poly as one of seven area training centers for air pollution control in the United States.

The designation means the EPA will continue to help fund short courses and graduate study at Cal Poly in the science and technology of air pollution control. The EPA provides support for individuals employed in air pollution control agencies and others interested in pursuing careers in air pollution abatement.

Cal Poly has been an EPA training center continuously since 1984, and is now the only one on the West Coast.

Cal Poly designated ‘no-smoking’ campus

President Baker has approved a revised campus smoking policy. Basically, the revision makes clear that the smoking policy is applicable to the entire campus community, not just to employees, and that smoking is not permitted in any campus facility except in specifically designated areas.

The university smoking policy follows:

• In accordance with Section 19262 of the California Government Code, the following policy and procedures regarding smoking on campus are established in recognition of the rights of nonsmokers to a smoke-free environment.

• “Smoke” or “smoking” as defined in this policy includes the use of a pipe, cigar, or cigarette of any kind in which a substance is burning.

(Cont. on Page 3)
Career planning is topic of workshop

Faculty are encouraged to announce to students that Career Planning Services will hold a spring workshop on three consecutive Tuesdays; April 28, May 5, and May 12. The sessions will run from 3-5 pm in the Counseling Center and will cover interests, values, skills, work environments, and researching career options.

Students are asked to attend all sessions, and preregistration is preferred. Call ext. 2511 or stop by Jespersen Hall (Bldg. 116) for registration forms.

One-man show on Robert Frost set

Noted actor and playwright Arthur Peterson, best known for his role as The Major on the television series “Soap,” will bring his one-man show, “Robert Frost: Fire and Ice,” to Cal Poly as part of the annual Poly Royal open house. Performances are slated for 8 pm in the Theatre on Friday and Saturday, April 24-25.

“Fire and Ice,” written by Peterson and fellow Frost devotee June August, is based on the life and work of the famous poet.

The script is true to what is known of Frost’s character and recalls events in his life from his youth in a California gold mining town through his married life on a New England farm. The story traces the beginning of his literary success in England and his later years of fame as America’s “poet laureate.”

In an often-moving portrayal, Peterson presents Frost as a canny and charismatic human being who fervently believed that “art cleans life.”

The well-crafted script tells much about Frost’s intention to capture the music of everyday speech in his poetry, the “sound of sense,” and says much about individuality, the struggle to be true to one’s inner drives, and the often destructive effects this can have on one’s family and personal relationships.

Tickets for “Fire and Ice” are $12 and $10 for the public and $8 and $5 for students. They can be purchased at the Theatre Ticket Office. Phone reservations may be made by calling ext. 1421 between 10 am and 4 pm on weekdays.

Peterson’s appearance is being co-sponsored by the Center for the Arts and the Fine Arts Committee of the ASI.

El Corral Bookstore needs local authors

El Corral is interested in displaying books in a “Local Authors” book section, located in the General Book Department. Titles of general interest and appeal that cover a broad range of topics not already provided in the textbook department are being sought.

Faculty, staff and students who have recently had a book published or are in the process of writing a book are asked to contact Kerry Roberts at ext. 1101.

Gravure Day held

Five leading authorities on the subject of gravure were featured at the fifth annual Gravure Day held recently on campus.

More than 100 Graphic Communication Department faculty and students heard presentations on the state of the gravure industry, changing technologies and management styles, and employment opportunities.

Representatives from the Gravure Education Foundation, the Gravure Association of America, Arcata Graphics, and Western Roto Engravers were featured.

Earthquake expert to speak April 23

The chairman of USC’s Civil Engineering Dept., a past president of the Earthquake Engineering Research Institute, will speak at Cal Poly on Thursday, April 23.

Dr. Mihran S. Agbabian is to lecture on the research used to formulate earthquake design standards at 11 am in Science B-5. The program is titled “Structures and Earthquake Safety.”

The lecture is sponsored by the School of Engineering and its Civil and Environmental Engineering Department.

Afro-American speakers series

Four speakers are scheduled to appear as part of Cal Poly’s Distinguished Afro-American Speakers Program during Spring Quarter. The presentations begin at 7 pm in San Luis Lounge.

Lloyd Gavin, professor of mathematics at Cal State Sacramento, will discuss “AIDS: A View Through the Eyes of Mathematics.” His talk is scheduled for Monday, April 20.

Science fiction writer Octavia Butler will present “Creating Brave New Worlds and Brand New Fantasies: Blacks, Women and Science Fiction” on Wednesday, May 6.

“Afro-American in the Sciences: New Challenges, New Responsibilities” is the title of James Smith’s Thursday, May 14, talk. Dr. Smith is a professor of physics at the U.S. Military Academy, West Point.

On Friday, May 29, Aliko Songolo will talk on “Apartheid: Literature of Protest.” Dr. Songolo is a professor of French and African literature at the University of California, Irvine.

The Afro-American speakers series is co-sponsored by the Affirmative Action Faculty Education Equity Program and the Vice President for Academic Affairs Office.
Microcomputer short courses available

Registration forms are still being accepted by Computer User Support for the faculty/staff microcomputer short courses offered for Spring Quarter. The DOS series scheduled for May and the Wordperfect, dBASE III±, Communications, and MACINTOSH courses scheduled for April/May all have a few openings.

To register for any of these courses, drop by Computer Science 101 (the Computer Accounts Office) or call ext. 2593 to obtain a Spring 1987 Training Schedules/Registration Package. The package includes the micro course schedule, the mini/mainframe course schedule, general information about the training program, and a “by mail” registration form. Course registration is by mail only.

• These policies are applicable to enclosed areas only, including state automotive vehicles containing more than one passenger.
• Complaints arising out of alleged violations of this policy shall be directed to the Personnel Office. The Personnel Office shall interpret the policy and cause it to be enforced.
• When conflict occurs in the implementation of this policy, the Director of Personnel, or designee, will determine the course of action in consultation with the concerned supervisor and the section staff, if they desire to be included.
• The Director of Personnel, or designee, is responsible for implementation of this policy and will establish periodic review procedures to ensure conformity. The Facilities Planning staff is available to assist with physical rearrangements to the extent funds are available.
• This policy shall supersede any existing smoking policies at Cal Poly where conflict in policy exists.

These guidelines are based upon the recommendations of the Academic Senate and the Public Safety Advisory Committee.

. . . ‘No-smoking’

• Smoking shall be permitted only in designated areas campus-wide at all times.
• Smoking is not permitted during formal meetings, which includes office hours. A formal meeting is defined as an assembly of two or more persons by prior announcement for the purpose of conducting business. Individuals responsible for conducting formal meetings will, if possible, arrange for breaks at least every two hours to accommodate those who smoke.
• Supervisors/managers/administrators will pursue various options in an effort to accommodate everyone’s needs in their respective work areas. However, if such accommodation is not achievable, the rights of the nonsmoker shall prevail.
• These policies are applicable to all facilities on campus, including the University Union and Foundation facilities, with exception being made for the student rooms in the resident halls and other private residences.

Students to help local non-profit agencies

Fifteen Cal Poly students have been selected to help local non-profit human service organizations and governmental agencies with 200 hours of student services — free of charge.

The program is administered by the Center for Practical Politics, Student Life and Activities, and ASI Student Community Services.

The two goals of the program are to encourage students to contribute their knowledge and skills to benefit the community and to help service organizations that need assistance. Students are helping the following agencies: The San Luis Obispo County Department of Social Services; the San Luis Obispo County Mental Health Department; the San Luis Obispo Health Department; the San Luis Obispo County Alcohol Services Department; the California Conservation Corps; the City of San Luis Obispo; and local human service organizations.

Spearheading the program were Dr. Dianne Long, director of the Center for Practical Politics and associate professor of political science, and Sam Lutrin, assistant director, Student Life and Activities.

Each of the students selected received a $1,000 stipend from public service funds provided by the lottery to The California State University.

3M division donates $40,000 system

3M has donated a color proofing system valued at approximately $40,000 to the Graphic Communication Department.

The system consists of a positive proofing processor, a negative proofing processor, and a matchprint laminator. It will be used by students in a new color proofing laboratory being developed by the Graphic Communication Department and will also be utilized in the department’s seminars and workshops for industry focusing on color and color reproduction.

The gift, from the Graphic Preparation Systems Division of 3M, is a continuation of the support that the GrC Department has received from the company for many years.

Unocal donation aids ME program

Unocal Corp. has given $7,000 to aid the study of petroleum engineering in the mechanical engineering program.

The money will be used to support the work of Assistant Professor Amrollah Mehdizadeh, who heads the petroleum engineering studies.
