Circle K honored for service

The local chapter of Circle K received the "International Help Service Award," and had one of its members elected to the district Board of Trustees, at the annual convention of the Circle K International, Alas Chapter, chapter president, last week.

Meeting in San Francisco earlier this month for the Cal-Nev. Hoxo District conference, the poly chapter was given the service award for its work at the Chris Jepson School for handi capped children. According to Evans, 200 chapter members put in more than a thousand hours during the past year helping to run and maintain the school facility. Work included cleaning and working on the grounds, painting rooms, and installing new equipment and general maintenance work.

In addition the club hosts an annual party for the children. Last year the Jefferson Park student activities were taken on a tour of the agricultural units of the area.

Being elected L. E. Governor of the District was Ed Martin, an Aeronautical Engineering student. According to Evans, no chapter has been reported to be an unprecedented event. It is the first time any Circle K chapter has held an elected position on the Board of Trustees, for four consecutive years. In the same election David E. Evans, a Cal Poly student, was reelected Circle K to the Cal Poly district for an additional term.

The district board guidelines and guarantees the affairs of the society-wides rights in the district. Ed Martin will have the immediate responsibility of directing the policies of the clubs within his district. Evans will continue to run the service area from San Luis Obispo to Montecito county.

The Cal Poly Circle K Club is part of the Circle K International, is sponsored and guided by the San Luis Obispo County Kiwanis Club. With over 85 clubs, Circle K International is the largest college service organization in the nation.

Home Concert features variety show

Scoring a successful one-week tour of the upper San Joaquin and Sacramento Valleys, the Cal Poly Music Department, will present the 25th Annual Home Concert in the Alice M. Griffin tonight at 8 p.m. From "Pillow Talk" to the classical and from jazz to folk music, Home Concert combines the talents of six different musical groups numbering almost 150 students.

Defined by Music Department Head Harold Daukstien as "A completely student venture," Home Concert is the highlight of the Music Department's yearly activities.

The 8D member Men's and 7S women's groups provide a variety of music in the concert hall with, both analyzed by Dr. Irving Berlin, De Silva and Gershwin. Working in harmony are the trades of the Majors and Minors, 12 band group bent on varying this portion of California's musical past, as they present a musical and charmingly nostalgic tapestry of song and art forms.

Zany humor and madcap fun, as well as the best in barbershop harmony, are the trademarks of the Majors and Minors, a 12 man group bent on varying this portion of California's musical past, as they present a musical and charmingly nostalgic tapestry of song and art forms.

Tickets for the concert are $1.25 for general admission, and 75 cents for Cal Poly Students, and may be purchased at the ASI office or at the door.

Engineers urged to take exam

"It is certain that mock weight will be given to a pass score on the Selective Service Examination or on a high academic standing," announced the Engineers Joint Council. The council is part of the Engineering Manpower Commission (EMC). The EMC recommends that "all engineering students take the Selective Service qualification test and that those of engineering and college administrations give students every assistance."

"Neither a passing score on the qualification test nor high class standing will guarantee deferment," stated the council recommendations. "The student standing is just one of the factors which local boards must consider when deciding on the classification of a registrant."

The council, which is advised by the administration will alert all students to the test which will be given on May 14, May 21, and June 8. The administration will work with local boards to assure that students obtain application obtain application-available at the ASI office or at the door. (Continued on page 11)

Army exhibit set for visit

An Army exhibit highlighting the role Army Reserve units play in the area will be on campus April 22 and 30 in Lib. 120 C.

The exhibit, U.S. Army Training Forces Leadership, will feature a series of audience participation devices which enable visitors to see, hear, and "do" as they travel through the spectrum of Army education and training.

A miniature laboratory is the main attraction of the exhibit. Visitors to the lab can study any or all of five foreign languages—Vietnamese, Russian, French, German, and Rgyandish—and then listen to themselves played back on a special tape recorder.

Other features of the exhibit will include three-dimensional models of an infantry training device which enables visitors to see, hear, and "do" as they travel through the spectrum of Army education and training.

A miniature laboratory is the main attraction of the exhibit. Visitors to the lab can study any or all of five foreign languages—Vietnamese, Russian, French, German, and Rgyandish—and then listen to themselves played back on a special tape recorder.

Display presentations will run the gamut of Army education and training—from basic for the new soldier to the National War College and Air University officials—and list those programs to the civilian community.

The exhibit, U.S. Army Training Forces Leadership, was produced by the U.S. Army Training Forces Leadership in Alexandria, Virginia. The exhibit is currently on a tour of the United States and all showings are open to the public without charge.

Reorganization here

SAC starts self review

All together, Harold Daukstien, Music Department head, leads the combined Men's and Women's Glee Clubs through one of the last rehearsals before tonight's Home Concert. The 25th annual student production starts at 8 p.m. and will be held in the Men's Gym. Tickets for the Concert are $1.25 for general admission, and 75 cents for Cal Poly Students, and may be purchased at the ASI office or at the door.

Sal Busby, chairman of the Student Government Reorganization Committee, presented the committee's recommendations at the Student Affairs Council last Tuesday evening.

The major changes will be a three-branch government to replace the one-branched system. Membership would consist of three classes standing will guarantee deferment," stated the council recommendations. "The student standing is just one of the factors which local boards must consider when deciding on the classification of a registrant."

The council, which is advised by the administration will alert all students to the test which will be given on May 14, May 21, and June 8. The administration will work with local boards to assure that students obtain application-available at the ASI office or at the door. (Continued on page 11)

Student government talks of change

Evolutionary changes predicted in agriculture

Gaylord Huhvoy, assistant professor of educational economics at Purdue University in Lafayette, Ind., predicts that evolutionary changes in agriculture may be on the horizon.

Huhvoy noted that he wrote an article recently for the American Journal of Agricultural Economics which predicted trends in agriculture.

"The Farmer Computer-Man," the article explained, "is changing the techniques and methods of bookkeeping, advertising, public relations, publications and photography." Huhvoy claimed that the farmer's "idea of a foreman is today's computer."

According to Huhvoy, the truly revolutionary aspect is the ability of new computer technology to handle the six students running for the ASI* (see p. 5) campaign approaches by the Student government talks of change (continued from page 1)

Brown urged the members of SAC to take the committee's recommendations back to their clubs and councils for discussion. The committee's report will be discussed in two weeks. If it is approved by SAC, a general election will be held for the student body.

Also presented at the meeting were the committee's recommendations for the three student body offices.

Other matters considered included the adoption of a resolution by Finance Committee to take $500 out of ASI contingency for "legality." The money is a form of insurance and will be returned if it is not used.

COURSES OPEN TO ALL

Examination in journalism courses is open to students of all other departments who wish to gain skills in the techniques and methods of advertising, public relations, publications and photography. (continued from page 1)

Gaylord Huhvoy explained, "Of though we didn't use the computer in this discussion in management decision, we give students real management experience through the use of a computer."

The game is designed to illustrate the conditions an agriculture business firm would operate in. The " Farmer Computer-Man" will be able to make decisions much more rapidly than a human can make decisions, according to Huhvoy.

Huhvoy noted that the six computers in his game will make decisions such as the amount to spend for advertising, the price for products in the market, and the firm's earnings.

To play the game, a student, seated in front of a computer screen, is given a small computer (IBM) and he must make decisions as fast as he can. Huhvoy said that the computer is not available to the public, but that most students are able to use it.

The computer is designed to simulate the conditions of an agriculture business firm. The student is given a small computer (IBM) and is required to make decisions as quickly as possible.

Guitarist praises audience in happy, talkative manner

by Mary Lindstedt

The husky, silver-haired man in black stand­ard is a flash chord on the guitar. He smiled, and put his head toward the applauding audience and started with display of the blue solemnity of the star into the audience.

One out of sight of the audience, he stopped, grinned, and began slowly to be a little bit lost.

Leonard Almeida had just fin­ished his first encore.

He turned, went back on stage, and played a louder note, then left the stage for the last time.

from the blue solemnity of the audience he stopped, grinned, and strolled with dignity in happy, talkative manner.

He chuckled. "OK, weren't." He turned, went back on stage, and put his head toward the applauding audience and started with display of the blue solemnity of the star into the audience.

"I don't need that," he pro­ceeded. "Yes, you do," she said firmly. "What, why?" he asked. He spoke freely during the talk from the stage, which was easier to the reception.

"This audience was very good. Usually there is a quite spot, and someone goes, cough, cough. But not here. The air must be very good here.

Almeida named a very soft instru­ment—the weakest in the or­chestra. With other instruments, you can carry one noise, but for guitar you need two or three.

He tapped the flattened fingertips on his left hand with his right hand. "This is not flesh. It's like a hornet, like a bee, oh, what do you say? Buil. Money has done a lot to let people know about classical gui­tar. It has been something since he was—what? Fur­theren years old, and he was now around seventy. Compared to what he has done, I have done a small part.

"I like to teach, but I don't have time.

"Strings last, depending on how much you practice. When I practice five or six hours a day, I have to replace the three basic strings in a week."

"The popular interest in guitar seem to be growing? "Oh, yes! More people are playing guitar than ever before. There are many guitars to this.

Almeida called rock-and-roll the other side of guitar playing. He said that people bought gui­ters, found out that playing the clas­ical guitar is difficult, and switched over to picking and chord-playing.

When you play upon guitar, it was bad, it was not recommended for beginners. It was thought they would go to bars, scenes, they'd get colored, take drugs.

"One day when I was seven, my father took me. Every-member sister was going to be taught to play the guitar, and I was to sit next to her to give her moral support. I sat through the lessons with my eyes glued to the inspector's fingers, and when he left, I would grab the guitar run out to the bars we had, and perform in secret.

"This went on for two years—then came a day of tragedy."

"My father was playing the guitar one day when a string broke.

"I ran and put another string, and sat on the guitar that evening.

"My second mistake is that I tuned the guitar up. And then, I couldn't reach the strings of the guitar."

"All—your fingernails should be round!"

"Ah—your fingernails should be round!"

"My father, sitting there watching the whole time, and he asked what I was doing, and he asked me to play for him."

"After he had look ed over all, he had big plans."

"My next album? When you work for a big company like Capitol, they usually tell you what to do. Do albums accord­ing to what is selling. House nova is back in the rage right now—for awhile. Things that are not artistic, usually."

"Someone asked Mrs. Almeida when she played the guitar. No, sir. I am just his wife. One in the family is enough, that's my rule."

"What did the Almeidas think of Cal Poly? Mrs. Almeida smiled. "It's like a town by itself—all the houses and school buildings, you know? We drove out to Monterey—what do you call it? Rock, Yes, the Rock, and Monterey, My, it's beautiful. We love it."

KAN LUIS COUNTY
San Luis Obispo County offers ideal opportunities for the study of a wide variety of plants and animals since both Southern California flora and fauna are represented.

College engineers needed as state demands increase

"In the year 2000 almost five million engineers will be needed to continue the present rate of increase in gross national product," said C. Martin Duke, chair­man of the engineering division at U.C.L.A., in releasing a study made by the Engineering Advisory Council (EAC) for the University of California. Duke spoke in campus April 18.

"This growth will increase the present number of engineers by at least 200,000 and, in the year 2000, we will need 900,000 in 1979, 11,000 engineers graduated from California colleges, according to the study.

The projected increase in number of engineers in 1979 will be 15,000; in 1980 it will be 21,000; and in 2000 it will be 25,000. These figures put a demand on the educational institutions and place a great responsibility on California colleges and universities to supply more of the engineering work force.

Duke felt that the State should be putting more of its own residents to work rather than drawing them from other states.

Another recommendation by the EAC was that the Master's Degree should be the first professional degree a present BS in engineering should be charged so that students would possess a degree in a Master's Degree.

Chairman of Engineering De­gree was prepared to propose stu­dents to have a more active part in the Master's Degree. A Doctor of Engineering Degree would include a thesis and a major design project. It would also prepare students at the most advanced level, similar to the present program for a Doctor of Medicine.

The EAC also recommended a collaboration between industry and government. For the college, this would mean cooperative work study programs, joint use of facili­ties and part time and tempo­rary faculty. Also complementa­ry research and development programs would be planned. The most important suggestion was that industry will be able to influence educational policies as to industrial needs in a work force. Duke felt that coordination was needed between the state college system regarding junior college transfers and state college transfers to the university in a master study. Dean Harold P. Hayes is on such a committee to coordinate undergraduate study in all graduate study for a Masters Degree with the same background.

EDITORIAL

Last year 20,000 people in the United States willfully took their life through an act of suicide. This is a statistic that has been increasing annually during the past century. Presently, California and the other far west states have the highest suicide rate in the nation.

Probably the most astonishing fact about suicide is that it ranks second only to accidents as the cause of death among college students. Suicide among students seems to be motivated mainly by despair over real or imagined failure to meet the standards set by our society. In recent years, an increasing number of suicides among college students has been in "protest" of standards and policies set by the American government.

Currenty, a national suicide prevention program is being developed. Authorities agree that, because of facts to date, this program must be sensitive to the needs of the young people.

Authorities have stated that suicide, especially among college students, is avoidable without exception. Students and teachers alike must be aware of the signs of suicideextreme depression, a student talking about suicide, a student's expression of "being totally trapped"—and should work to aid the potential suicide victim just before "the critical period.

Indian film depicts love foreign style

The New York Times and the New York Post have reported that "Madhuban" and "Aandhi," two Hindi films currently showing in New York, are "tearing up the box-office" and "the local box office" is "banging away at the records.

With English subtitles, the two films are considered very popular in India and Pakistan.

Robert, a young American, and Naina, a young Indian, fall in love. She, with love expressed in beautiful songs, is not quite ready to confess her love to him.

"Aandhi," described as a violent "social comment," has "many scenes of extreme violence and terrorism, including a scene in which a group of terrorists attack a village." The film depicts "the terrible consequences of the fight for independence in India.

Frog jumping contest

Editor

We the members of Mat Pia Pi Fraternity at the California Polytechnic College in Sun Lula, call for an open challenge to any organization on campus to enter a jumping contest at the Calaveras Jumping Team at the annual Calaveras Jumping Festival to be held at Angels Camp, California on June 21 and 22, 1980.

Arrangements and information about the Frog Jumping Contest may be acquired by writing to the International Frog Jumping Committee, Angels Camp, California 95222.

Unchanging religion

Editor

My letter concerns your recent editorial on Religion-In-Life Week.

You mentioned, with evident approval, that many churches have tried to correct the man-made distortion of the true religion and have made an effort to carry a true message. "Theology, degrees or a doctrine or how to formulate formally and authoritatively, affirmed.

The question arises, is substituting more, doctrine for the Biblical doctrine legitimate in God's sight? The following indicates it is not. From Mark 15:20-21, "For I am the Lord, I change not." The unchangeableness of His purpose and plan is mentioned in Hebrews 6:18.

I think it is true for every church, for example, that many have chosen to substitute doctrine for the Biblical doctrine legitimate in God's sight.

I don't doubt that R.I.L.W could be improved upon but I question the wisdom of any minister's attempt to improve on the subject as is presented in John 14:8 and 15:12, with one-on-one of them.

I also don't think that Blvd.W could be improved upon but I question the wisdom of any minister's attempt to improve on the subject as is presented in John 14:8 and 15:12, with one-on-one of them.

Your editorial states, "But the old time religion does not seem to be enough even for most thoughtful students." If by "old time religion" you mean a religion based on the Bible as God's revelation to man, may I suggest that the student carefully study a comparison of the New Testament with the student carefully study a comparison of the New Testament:

Sequoia's problems

Editor

Spring is here and, as has happened for the past four years, the air-conditioner in the Sequoia Student Union building does not work. It is due to the fact that the personnel are absent for the operation of the air-conditioning unit and realize that these machines require preventive maintenance, and that a good time to do the necessary cleaning, inspection, and testing is during the summer months.

The radio antenna system is another source of irritation for many years it has not worked satisfactorily for any appreciable length of time. The equipment, therefore, needs major rebuilding.

For many months we have been awaiting permission to connect the cable TV system. The campus is located in a poor TV signal area. It looks as though our set will work better before we will be able to enjoy a strong picture.

There are only a few of the many problems which decision-making and acceptance of responsibility seem to be lacking. Can't someone be appointed in all offices to coordinate and establish responsibilities among the various state and foundation organizations that are connected with the operation and care of the campus residence halls?

Austin Angel

Poly golfers preparing for intercollegiate test

Ending their regularly scheduled league matches with a loss to San Diego State, the Mustang golfers of coach Charles Hanks are whipping themselves into shape for the Southern Intercollegiate championships at the La Costa Country Club in San Diego, April 28 and 29.

Los Angeles State, with two of the top ranked golfers in the nation, is favored in the tournament, but in league play they were upset by the Poly golfers at the San Luis Obispo Country Club by a score of 30-34.

Poly's first man, Corky Nelson, who has consistently been low medallist for the Mustangs, is currently in the better half of the league standings and is expected to lead the Mustangs in a good showing at the Conference championships.

April 27—Fastpitch softball at California State College, Los Angeles, 1-3 p.m.; Poly vs. Arizona State University, Tempe, 5-11 p.m.

Orioles have loyal fan

Baltimore Orioles manager Hank Bauer received a very laudatory letter from a youngsters in Prairie Village, Kansas. The nine-year-old boy said he had been reading that the experts pick the Orioles to finish third, but he assured Bauer he feels Baltimore will win the American League pennant.

The boy went to great length reviewing the assets of the Orioles, and he offered some advice to the manager. The program explained the one reason he picks the Orioles to win is because the way Bauer manages. The boy signed the letter, "Love, Herman."

The letter writer was Horace Burger, one of Bauer's four children.

DO YOU HAVE WHAT IT TAKES TO BE A LEADER?*

*If you do, don't settle for less.

If you will complete your first two years of college this spring and have not had ROTC training, you now have a special opportunity to earn an Army officer's commission in the next two years. You can quickly fulfill your military obligation as an officer while you study for a college degree in a field of your choice.

Through a new two-year Army ROTC program you will receive leadership training and experience that will be valuable assets for the rest of your life, either in a military or a civilian career. You will receive an allowance of $40 each month during your Junior and Senior years. If you desire, you may request postponement of your military service while you complete your studies for a graduate degree.

Most large business and industrial firms prefer the college graduate who has been trained and commissioned as an officer—who has the ability to organize, motivate and lead others—and who has had experience in accepting responsibilities beyond his years.

You owe it to yourself to investigate this important opportunity.

For complete Information on the new two-year Army ROTC program see the Professor of Military Science on campus.
Gauchos invade Mustang oval

With its most impressive win of the season last weekend, coach Walt Williamson's track team is
heavily preparing for its encounter with University of California at Santa Barbara's Gauchos, sched-
uled for Saturday at 1:30 p.m. on the Mustangs' oval.

After their 112-52 win over Los Angeles Valley State last weekend, the Mustangs will host the Gauchos in the year's dual-
meet wrapping, with the Mt. San Antonio College Maple the fol-
lowing weekend and the West Coast Relays in Fresno, May 14, equally approaching.

Turning in blue ribbbon-winning performance in 13 of 17 events, including a Cal Poly record-breaking high jump by Richard Jones, the Mustangs completely dominated their visitors from the south last Saturday.

Leading 8-06 to lead a stamp of the high jump event, Jones placed himself in the first 850.

Among 180-mile leaders in the event for the 1966 campaign.

Horsehiders host LA,
Dorn, Gregory to start

After playing nine of their first eleven California Collegiate Athletic Association league contests on the road, the varsity baseball team will return home to enter-
tain California State College at Los Angeles in single games this
day at 2:30 p.m. and Saturday at 1:30 p.m. in league action.

Hoping that the friendly con-
ferences of Poly discount will help his Mustangs improve upon their

Arms, when he learned he had won the Poly Royal button design contest. Bitty Ballino, Poly Royal queen, presents Mustang with a $1 bill check for his design and the above picture is an attempt to honor him by El Mustang in regard to Rockman's feelings. The button design will be the official emblem for Poly Royal, which begins next Friday.

Poly featured in T.V. special

"Thirty-five years of Learning by Doing" was the title of a special program recently shown on KGET.

The program, which covered the years from 1941 to the current year, was a documentary that covered all the various events that occurred during the college and its academic programs. Highlights of the 45 minutes uninterrupted sequences included more than 50 photographs and campus shots.
