Non-profit corporation aids campus operations

by Shirl Lawrence
The newly formed non-profit corporation, a newly created organization the purpose of which is to provide a source for the purchase of materials necessary for student activities. Incorporated in 1941, the Foundation is a non-profit organization which may carry on as many activities as are necessary to promote the educational program of the College. The Foundation is an important step in the direction of student control of student activities. The student project that has moved most rapidly is the construction of a new College Union.

The film feature of the week is "Tunisia" written by Carol 8:00 P.M. in the Little Theater. In addition to this, the Foundation handles the administration of grants and gifts which vary too much for "red tape" if they are to be handled properly. The Foundation gives financial aid to students in various fields of study. It was announced early this year that funds would be appropriated for the purchase of materials necessary for the Student Activity Fund.

The film stars Julie Harris. It is the story of a woman who is troubled by loneliness and her own fantasy. She is deeply hurt by his trip. The luncheon will be held at 3:00 P.M. in the Little Theater on Sunday.

Vice President Andrews comments loyal students

Last Saturday a group of seven women students climbed the hill behind the south maintenance building and whitewashed a fine job of painting the Poly "P" which states "Loyal to College Union." The President, Dale Andrews.

Theater to show Berkeley series and film feature

It was announced earlier this week that the College Union Project Program advisor, that the feature film for the week will be "Tunisia" written by Carol 8:00 P.M. in the Little Theater. The film stars Julie Harris. It is the story of a woman who is troubled by loneliness and her own fantasy. She is deeply hurt by his trip. The luncheon will be held at 3:00 P.M. in the Little Theater on Sunday.

Student activities recorded on effective point system

Cal Poly has a system for grading student activities. It began in 1962, and there is no other college which has such a system. In some schools across the nation, students report their activities to the Activities Office at the end of the year. This self-report is usually filled out and filed away for future reference. There are some problems connected with this system. For example, what happens to the student who for some reason does not fill out an activity card? What about the student who over states his activity record? At Cal Poly there is a complete report on everyone. Every club and organization reports on each member. There are full organizations on campus, only one of which did not report. The officers of the club are responsible for the report. The system is organized so that if a club doesn't make a report they will not receive a charter for the following year.

The report consists of who the members are, what they did throughout the year, their total number of points, and the grades they received. There are three basic steps for putting these grades on the transcript:

1. Each group receives a deck of IBM cards at the end of the year. The officers fill out these cards covering the names of the members belonging to the club. Then each member is graded according to cooperation, dependability, thoroughness, tact, and leadership.
2. The second step is transferring the information from the card onto a label. This is done through data processing. The label contains the student's name, the club name, the position held, the total number of points, and the grades with a totaled Activity Point Average (A.P.A.).
3. This label is then pasted to the transcript, for each year the student attends Cal Poly.

There are two factors which make this system so thorough. Quantity is one point. A student can join a number of clubs and accumulate a great deal of points. There is also the quality factor. To encourage the "Joiner" to join only those organizations where he will participate.

These transcripts are used for several things. Noteworthy prospective employers will read over the report of a possible employee. Many students also ask the Activities Office to write letters of recommendation for them. These records are used for all letters.

The Activities Office also uses these transcripts to decide whose name will appear in Who's Who. The Golden Key award for students maintaining a certain G.P.A. is based on the activity record.

Membership for Blue Key, Cardinal Key and Alpha Zeta is often decided with reference to a student's activity record. The Poly Women's Club pick out the outstanding girl of each class using both the G.P.A. and A.P.A.

Unique production from Audio-visual

Unknown to the majority of students on campus, a division of the Audio-visual Department produces displays which circulate throughout the state. This service is given to high school instructors in the field of educational and vocational counseling.

Audio-visual productions of the Instructional Media division have appeared at the California Teachers Association convention and at the Biome Capitol in Sacramento. Visual aids, including charts, overhead projections, and color slides are also used in cooperation with interested faculty members.

Currently three full-time artists and two photographers are employed in the production of forty different projects. They are assisted by a staff of faculty, students, and lay personnel under the direction of L.M.P. coordinator, Clyde Hostetter.

A program is under the auspices of the Biome of California and the Federal Government. Financial assistance is provided through the national Vocational Education Act and state funds.

CALIFORNIA STATE POLYTECHNIC COLLEGE

August 19, 1966

Dean Chandler goes native

Dean Chandler and his wife re­
cently returned from a five week
vacation in Western Samoa. He
described his trip as a visit to a
primitive paradise just as pictu­
resque as all the travel folders
and flims show it to be.

Western Samoa is comprised of
two main islands: Upolu, on which
the capital, Apia is located and
Samoa, which is lovingly referred to
as "Big Bertha." The island is
constructed the traditional rail fence,
removed the old fencing and con­
tinued to construct fencing
around the island to keep the animals
from straying through the new
fencing. The islanders are very poseeaslve
with open arms from the moment
their independence in January of
1962, formerly under trusteeship
of New Zealand.

The islanders were received
with open arms from the moment
of their arrival at the airport. They
viewed the South Pacific
island from a cultural level and
mingled with the islanders as
though they resided there.

Chandler described the Sam-*
* men's as a very proud and gen­
erous people, rich with tradition
and culture. Despite the increas­
ing contacts with the Western
Samoa culture is still the
dominant influence in the lives
of the people. The basic unit of
Samoa is the Aiga, an ex­
tended family system headed by
the Matai or chief.

The Chandler's stayed in one
of the three air conditioned rooms
available in a motel. He described
accommodations as adequate but
not plush by any means. They
ate with the islanders, sitting
with the people of the tribe they
were visiting. He remarked that
the islanders are very possessive
of their land and are eager to entertain
visitors.

Furn Shop crew
constructs fencing

"Don't Fence Me In" was
an appropriate cry from the beef
cattle grazing within the new
fenced pasture on Great Lane. The
fence will not only serve to
keep the animals from straying
but is also part of a school hectori­
fication project headed by Dean
Smith.

The Chandler's trip was very
carefully planned, and when they
are to be

The remaining vehicles are
small, consisting of forklifts and
scouters.

Auto Shop bakes and
maintains all the vehicles. James
Car­

riogen, Supervisor of Transpor­
tation for 24 years, heads the
Auto Shop. He is assisted by two
students, Dean Singleton and
Cliff Ziegler, who do the bookkeep­
ing and keep track of the trips.

Two mechanics are employed
fulltime and the rest of the work
is done by about 12 student assis­
tants. Student drivers are all schedul­
ing, mechanical repairs, body
work, painting, and driving of
the buses.

It is difficult to obtain new
vehicles, most are bought at low
prices from army surplus. The
vehicles are painted, repaired,
and put into use. One of the older
models, a big green trash truck,
is commonly referred to as "Big
Bertha." She is estimated to
date to the 1930's. Many of the ve­
cilces are from the depression era.

The Auto Shop has its own
gas pumps and fuel is supplied
with a credit card. The total
yearly mileage is over 5000 miles
and approximately 70,000 gallons
of gasoline are used per year.
