Summer runs smoothly

From title administration and registration viewpoint, the full summer quarter is a great addition to Cal Poly.

C. Paul Winner, administrator,

comments that the summer quarter, in addition to eliminating the hassle and bustle of preparing for two short sessions, the summer sessions are also more costly in time and effort. Without accomplishing more than the full quarter. The summer quarter is sizable supported and makes good use of campus facilities.

The office personnel work 11 months a year handling the week-day and summer program problems and feel that the school goes on with much more work. Mrs. Mary Schmidt, supervisor of records office, stated that the summer quarter entails less quantity of work therefore it is much easier than the regular quarters. The office has more help, including student workers. With the two summer sessions and the full quarter, grades and transcripts have to be collected three times.

Travelers walk Freedom Trail; students look "homeward bound"

by PAT GREN.

This is the final report of the Inquiry 50 traveling group.

The trip drew to a close very quickly now. We have yet to see Philadelphia and Washington, D.C., but after those two cities, it will be straight home to San Diego. Our expected date of arrival is August 29, and with Chuck Rush on August 26, we will be off on our trip.

August 11-Maine: We took a tour of the Mt. Desert Island on which we had camped. We visited the different harbors, saw a fish cannery, and some boats being built.

That evening, some of the more efficient of our group worked into town to have lobster dinner. After this, we all met at a local coffee house and heard a speaker of the Academic Job Corps. He told us what the purpose of the group is, and its present progress.

August 15-West Ham started to Boston.

On the way the fog disappeared, and we saw part of the beautiful Maine shorelne. Some of the homes were regular mansions, with columns and vast expanses of lawn. We drove straight to a camp in Andover, Massachusetts, near Boston, where we were to spend two nights.

August 15-We started for Boston this morning and took the

Summer success revealed by Foreign Students Office

By Len Parker

The Foreign Student office ends a very busy and successful summer this week. Miss Jillian Wadhams, who scheduled the activities, reported that the combined efforts of the volunteer workers resulted in a well organized and well publicized program.

The students toured various schools and in the area. The trip that impressed the students most was a visit to the Mun Miao Mission which introduced them to the performing arts of the American Indian dance. The trip was arranged by Mike Sullivan, College Council president and a vote in deciding who shall

Miss Wadhams suggested that the following program, which introduces foreign students to the area, is ideal for incoming freshmen as well as new students.

The program is held on the campus, yet there is no member of the student body on the campus, so the program is held in the classroom, but is not about time that a few progressive moves be made to ensure the students of a democracy system of government at our college.

As my final act as Editor-in-Chief of El Mustang, I would like to make a few proposals that I feel would make for a better campus. I hope that SAC and the administration will consider these suggestions next year.

(1) Bring the life of our campus fraternities up for general discussion between administrators and students. Air the pro and cons, and then let the students vote after hearing all the facts.

(2) Have a member of the student body present for example, be present at Executive Council meetings on matters affecting the student body.

(3) Install a member of the student body at Executive Council meetings which consider administrative appointments outside. There are many students in California, such as the Mustang Award, which exclude poor coverage of meetings dealing with personal matters. However, I feel that the students should have a voice and a vote in deciding who shall be promoted or demoted.

(4) The President of the college should hold a monthly general meeting with all of the students and inform the college news media what has happened, what is going to happen, and why? The WHY should not be excluded from the students, unless it is in the realm of personal matters, as it is by the Brown Act.

(5) The President should set aside a certain time each week, say one hour on Fri., when anyone can walk into the President's office and ask any question that concerns him.

(6) A student learning program should be set up, perhaps during the summer quarter, to familiarize all students with democratic policies and procedures.

I sincerely hope that El Mustang and the student body will strive to bring the student voice up from a low whisper to a cry for democratic representation.

Monty Odell
Editor-in-Chief

Five busy students win Musta Award

Five hard working students have been selected to receive the Mustang Award. The award will be presented, Friday evening at the dance.

The award is presented to students who show themselves outstanding in curricular activities. The nominee for the award need not necessarily be an elected leader of an organization or an appointed committee chairman, but, rather, the student must be the one who achieves the highest academic average in a given quarter.
Mixer uses color code, produces feed by ton

Did you know that Cal Poly has its own feed mill which produces enough feed to supply all livestock units year round? Many students are unaware of the mill, yet it plays an initial role in livestock industry. The Cal Poly Feed Mill, located in Curlew Canyon, was constructed in 1946. It consists of a feed processing and storage room with seven grain bins and a capacity of over 1000 tons. In 1960 a 480 ton capacity hay dryer was constructed and in 1965 additional storage room was added. Since the first construction, there have been many changes to comply with the needs of Cal Poly's livestock programs.

In an average high month the mill produces approximately 99,918 pounds of feed. The feed is distributed in various forms to all units. In August of 1965 the feed room contained 133,414 pounds, horse unit 4,700 pounds, ewes with 8,536 pounds, daily 31,000 lbs. (including dairy projects); the sheep unit 3,180 lbs. and the poultry unit 13,560 lbs.

The feed mill has many functions. Besides providing feed for all livestock it also acts as a training medium for students interested in feeds and milk management.

The mill has also been the subject of many senior projects, as well as a lab for practical demonstrations in livestock feeds and ration formulas. Each year a graduate student is selected as foreman. This year the position is held by Ken Cliff. He will be managing the mill under the supervision of Kenneth Bloom of the Animal Husbandry Dept. Cliff will be working with a crew of about five students.

Most of the heavy work done by a typical batch mixer which is capable of mixing 3-8 tons of pellet feed an hour.
