FRIDAY, JANUARY 20, 1967

PAINTINGS ... Jo Ann Bailey and Linda Honeysock look at part of the watercolor paintings that were donated to the library by the "Ford Times" of the Ford Motor Company. The $9,846.00 collection will have its initial showing in the library on Sunday. (Photo by Kent).

Ski Club makes splash at Badger Pass slalom

The Ski Club took the first of thirty-two thru the finish at Badger Pass slalom. Staying good, contrary to the first day of meeting once the thrill was gone. The club members seem to think this is the same old man who has been moving along for some time. The success of the event got the club off to a fast start, but fitting into the slow-moving crowd.

Several members of the club have been there since the first day of the season and it seems like they have been there forever. Several of them have never skied before, but have decided to try it out.

Saturday night, "Apple Bob" Roberson, who is a member of the larger group, filled in at the 1000 yard point. The exciting things that have gone on in the past year are a great part of the club's activities. One of the most memorable events was the "second wind" and were ready to go again.

Sunday morning, the club members gathered around the starting line to watch the first run of the slalom. "Apple Bob" Roberson was one of the first to go down, and he finished second.

The objective of the Ski Club is to have a fun time on the mountain. They are working on making the club more easily accessible to others who wish to join.

SAC covers evaluations

"Ford Times" donates paintings to library

The Ford Motor Company recently presented a collection of 50 original paintings to the special collections library of the California State Polytechnic College. The paintings were presented to be displayed in the library. The collection includes works by such well-known artists as Rembrandt, Van Gogh, and Monet. The exhibit is on display from now until March 1.

Chairman states faculty position

Faculty evaluation was the topic of the Faculty-Staff Council meeting held last week. The council discussed the role of the faculty in the evaluation process and the importance of faculty input.

Support from SAC and the student body is necessary if this process is to be successful. The council asked for the support of the student body and encouraged them to participate in the evaluation process.

SAC was also discussed during the meeting. The council expressed support for SAC and urged them to continue their work.

Among other topics discussed were student activities and the need for more involvement on the part of the student body.

Poly science instructor authors low-cost lab book

A low-cost laboratory approach to physics, chemistry, and math was proposed by the Poly science instructor. The book, titled "Experimental Physics," is designed for use as a low-cost lab book in the physics, chemistry, and math courses.

"It could also be used as a supplement to a more expensive textbook," the instructor said.

The book is to be used in the physics courses.

Globetrotters to provide relief from homework

The basketball team of the Poly Club has been invited to participate in an international tournament. The team will be representing the Poly Club and will be competing against teams from other universities and colleges.

The basketball tournament will take place in Israel. The team will be traveling to Israel on March 15th.

Award available for local women

The Sacramento Club of the American Association of University Women is offering an award for West Coast women who are pursuing a career in science or engineering. The award is $500 and is available to women who have completed at least one year of college.

The deadline for applications is February 15th.

Appointment

The new director of the Poly Club, Mr. Williams, was introduced at the meeting. He is a graduate of the Poly Club and has been a member of the club for several years.

The meeting was adjourned with the next meeting scheduled for February 10th.
Debate Editor:

I, being a former student, have found that Cal Poly campuses are the home of the Paulist, a Christian dialogue of the Philadelphians. There is a School of a Combined Study in the old country, and people are very much exposed there to critical opinion. Western and national universities are the home of a real Paulist, a group that is much exposed to the critical opinion. Our own Paulist, the Eastern and national universities, are the home of the Paulist, a group that is much exposed to the critical opinion.

Faculty Support

I would like to clarify some misunderstandings that have been present in your article. In April, a group of faculty members and students expressed their concern with the 1970-71 annual budget. Faculty members are for the greater good of the students, and we would be happy to support the Faculty Council if their demands were met. We feel that a large number of the budget is allocated for the sake of the students, and we would be happy to support their demands if they were met. The students here are for the greater good of the students, and we would be happy to support their demands if they were met.

Evaluation

Our evaluation of the Paulist, a Christian dialogue of the Philadelphians, is a group that is much exposed to the critical opinion. The current evaluation is a group that is much exposed to the critical opinion. I would like to clarify some misunderstandings that have been present in your article. In April, a group of faculty members and students expressed their concern with the 1970-71 annual budget. Faculty members are for the greater good of the students, and we would be happy to support the Faculty Council if their demands were met. More radios than tubs

A broadcast excursion says there are more radios than tubs in your town. There are not. In your town there are more radio sets than tubs. It is possible to say that there are more radio sets than tubs. It is possible to say that there are more radio sets than tubs.

Cost of Food

If you want to know the cost of food, please do the following calculation.

1. Find the average cost of food per month.
2. Multiply the average cost of food per month by 12 to get the annual cost of food.
3. Subtract the annual cost of food from the annual income to get the amount of money available for other expenses.

In conclusion, the cost of food is very low. It is possible to live on a budget of $75 per month.
**Basketballers invade bay area**

With a trio of fine performances by Mustang forward Craig Pedego, guard Al Spencer, and award John Hinderhoft, the Cal Poly five downed a tough Portland State column with 22 points while Cru-...
Workshop slated for cool engineers

Student Engineers are organizing a home-cooked feed on Saturday, Jan. 22, at 6 p.m. and will serve a choice of menu items, all for one dollar. All supplies are supplied by the passengers.

Rally inaugural

Rally Committee announces the initial rally dinner at the Lutheran Student Center on Saturday, Jan. 22, at 7 p.m. The dinner will be followed by the first large-scale rally of the year. Those attending are expected to gather promptly at 7 p.m. in the Air Conditioning-Refrigeration Department based at the Elks Club. Guest speaker will be William F. Foy of the Precision Corp., Minneapolis, Minn.

Rally demonstrations will be announced by the Baltic States Association at the Lutheran Student Center. The audience will attend as Baltic States Association guests.

Campus Capers

An estimated 50 members of the Engineering-Science Society, Students are expected to be around for the ninth annual Baltic States Association luncheon which will take place today after the rally. The luncheon will begin at the Baltic States Association's headquarters at the Elks Club.

Rally for 1977

Rally Committee announces the initial rally dinner at the Lutheran Student Center on Saturday, Jan. 22, at 7 p.m. The dinner will be followed by the first large-scale rally of the year. Those attending are expected to gather promptly at 7 p.m. in the Air Conditioning-Refrigeration Department based at the Elks Club. Guest speaker will be William F. Foy of the Precision Corp., Minneapolis, Minn.

Meet Jill Henderson

Jill Henderson is an American fashion designer and businesswoman. She is known for her contributions to the fashion industry, particularly in the realm of eco-friendly and sustainable fashion. Henderson has been involved in various initiatives and projects that promote ethical and environmentally conscious practices in the fashion sector.

She has worked with a range of organizations and individuals to advance sustainability in fashion, including collaborations with non-profit organizations, universities, and other companies. Henderson's work often involves education and advocacy to raise awareness about the impacts of the fashion industry on the environment and society.

Her approach emphasizes the importance of considering the lifecycle of a garment, from the materials used to the final disposal or repurposing of the clothes. Henderson advocates for using natural and renewable materials, reducing waste, and supporting fair labor practices.

In her roles, she has sought to create a more equitable and sustainable fashion ecosystem, addressing issues such as climate change, ethical production, and the need for transparency in the supply chain. Through her initiatives and collaborations, Henderson aims to inspire change and encourage broader adoption of sustainable fashion practices.
