Editorial

It appears as though the conservative influence on the campus has spread itself over every floor. Students are moved to protest against the forces that are at work to bring on a new semester.

Last Tuesday on the BTC's 2nd floor, some students tried to make it known that they were against the happening in First Year. Though their tactics might be quite adaptable, at least their methods were in good taste. They should be congratulated for the orderly and nonviolent manner in which they conducted themselves.

There were too few of them. It is easy to say let it be known that they were not in agreement with S. A. A. and yet not present. News media of certain sector's may have considered the happening.

It is generally felt that all Poly students are generally opposed to the forces that really aren't? Could it be the "New Left" is beginning to make itself known on this campus?
