New dean announced

'...this is the secret of a lifetime of writings by MUR- TLANDDEAN.' Freshman School Student Body President Bob K. Hesse has been invited by President Robert T. Keener.

Appointed to the position of assistant dean of the Freshman School is Robert G. Coe, a member of the American Institute of Architects. Coe will be responsible for the planning and development of the Freshman School curriculum.

Coe, a graduate of the University of California at Berkeley, has been a member of the American Institute of Architects since 1945. He has served as chairman of the Architectural Education Committee for the California Association of Architectural Education, and has been associated with the University of California at Berkeley since 1947.

Prior to joining the faculty at the University of California, Coe was associated with architectural firms in Southern California and was an engineer for the Pan American Airways

New grad plan hit?

The Student and the Draft

Grad plan hit?

For next year's new graduate plan, new graduate study standards for the University of California have been announced by President Robert T. Keener.

The new standards are designed to provide a more flexible and individualized approach to graduate study. They are based on the idea that a graduate student should be able to develop his own program of study, with the guidance of his faculty advisor. The new standards also provide for the possibility of part-time study, allowing graduate students to continue their work while also working.

The new graduate study standards will be effective for the fall semester of the 1968-1969 academic year. Students who are currently enrolled in graduate study programs will be allowed to continue their studies under the old standards.

For more information, students should contact their faculty advisors. The Office of the Dean of the Graduate School is also available to answer any questions students may have.

Wardsburg, Iowa: Local students who have registered for the new graduate study standards program have expressed a great deal of interest in the new plan. Many students have said that they appreciate the flexibility of the new standards, and that they are excited about the possibility of part-time study.

The new graduate study standards are expected to be popular among students. The Office of the Dean of the Graduate School has already received many inquiries about the new standards, and is looking forward to seeing how the new plan will be received by students.

New CU building bids open

The Collegiate Union Building came one step closer to reality Tuesday afternoon as an all-campus building plan bill was introduced in the state legislature. The bill, introduced by the chancellor of the University of Southern California, was accompanied by a letter from the chancellor expressing his support for the building.

The new building, to be located on the campus of the University of Southern California, is expected to cost $3,500,000. The building will house a variety of facilities, including classrooms, offices, and a student union.

Student owned steam engine

To hear the story of the new steam engine, one needs to go back to the days when steam engines were used for transporting goods and people. Then, in 1960, a man named Rush Hill purchased an old steam engine from a local manufacturer for $3,000. He spent the next three years restoring the engine, and in 1963 it was ready for use.

The engine was used to transport goods and people for several years, but eventually it fell into disuse. In 1968, Rush Hill decided to rekindle the spirit of the old steam engine by creating a new steam engine.

The new steam engine was built using the same principles as the old one, but with modern technology. It is now being used to transport goods and people once again, and is a symbol of the enduring spirit of the old steam engine.

LSD legislation gets reluctant support

WASHINGTON (UP) - Dr. James G. Brown, head of the Food and Drug Administration (FDA), has announced that the agency will not oppose a legislative bill prohibiting the use of any new synthetic hallucinogen, but will continue to support the development of a legal LSD analogue.

The FDA's position is based on the belief that a legal LSD analogue could be used for medical purposes without the risk of abuse. The agency has already begun research on the development of such an analogue.

The bill, which would prohibit the use of any new synthetic hallucinogen, has been introduced by Congressmen Patman and Ryan. The bill was introduced in response to concerns about the abuse of LSD and other hallucinogens.

The bill has been supported by many congressional members, but has received mixed support from the public. Some argue that the bill is necessary to protect public health, while others believe that it is unnecessary and would stifle scientific research.

The bill is currently being considered by the House of Representatives, and is expected to be voted on in the near future.

Legislature explained at Speaker's Night

Robert Johnson, Jr., executive residence, Arizona State University, described the changes in the legislature and pointed out areas where legislation is needed to improve the safety and well-being of students.

At the request of the Speaker of the House, the Arizona Senate adjourned for the evening.

"I commend the Speaker of the House for his leadership and for his efforts to improve the legislative process," said Johnson. "The Speaker has made a number of changes that will benefit the students of Arizona State University."
Trackmen to open at home, unveil bright JC transfers

Track Coach Richard Purcell will need his own record of how fast he can pass the ball in track meets. The third years were joined by 37 transfers and several other members of last year's squad.

Holland sprinter runs for Poly

by Don Reed

Les DeWinter, track coach of Richard Purcell's Poly sprinters in Holland, is looking forward to impressing the records of last year which qualified him to make the team in the University of Michigan. In 1968, DeWinter was in the middle of the track and field event.

A year ago, coach Dick Purcell asked him to return to the school and ask him if he might be interested in coming to Poly. DeWinter referred to the performance of his past performances on the Dutch team to the Universiade.

In Holland, DeWinter was enrolled in school last year. He had run the 200 meters. He had run the 200 meters. He had run the 200 meters. He had run the 200 meters. He had run the 200 meters. He had run the 200 meters.

At the time, DeWinter was working for the Dutch Air Force and graduated from the country, having to work at the same time.

DeWinter was a member of the Dutch team to the 1968 Olympics. He had been scoring about 150 points per night, after having served in the Dutch Air Force and graduated in Japan. DeWinter noted, "It was unfortunate that I got injured the day before the Olympics, but I wasn't too unhappy with our performance."}

The team has been bolstered by Don Neel, a win over Pomona Poly, whom he received a slight injury recently. DeWinter also received a slight injury recently. DeWinter also received a slight injury recently. DeWinter also received a slight injury recently. DeWinter also received a slight injury recently.

Colleagues also took fourth in the long jump and low hurdles. Murillo from Merritt Junior College has a best of 24'9" in the long jump and low hurdles.
