Kline earns NCAA university title; Poly places 5

When Tani Kline came home from the NCAA University Division championship in Fresno, Calif., he was more than just another athlete. Kline earned a place in the history books after his performance.

The senior, who is a California State University, Bakersfield student-athlete, earned a title in the national championship meet. He was the first person to win a national title for the university division in the 110-meter hurdles. Kline's victory marked the first time a California State University, Bakersfield student-athlete had won a national title in any sport.

In the final heat of the 110-meter hurdles, Kline prevailed over his competitors, including defending champion David Scott from the University of California, Riverside. Kline's time of 13.98 seconds was just enough to secure the title for him.

Kline's achievement is significant because it not only won him the NCAA title, but it also earned him a place in the University of California, Bakersfield record book. His name will be etched alongside other greats such as John Smith, who won the national championship in 1983.

Poly places 5: The Polytechnic State University placed 5th in the team standings at the NCAA University Division championships. The team placed second in the team standings in the NCAA University Division.

The Mustangs were led by Senior Andrea Johnson, who finished 1st in the 110-meter hurdles with a time of 13.98 seconds. Johnson's performance set a new school record and helped Polytechnic State University claim the national championship in the 110-meter hurdles.

The Mustangs were also led by Senior Andrea Johnson, who finished 1st in the 110-meter hurdles with a time of 13.98 seconds. Johnson's performance set a new school record and helped Polytechnic State University claim the national championship in the 110-meter hurdles.

Letters to editor

Governor applauds work during floods

Editor:

Was elated to receive recent issue of Mustang Daily on March 5, 1979, along with many other copies of the article "Students, teachers, campus police, wanted to know," which appeared in the Mustang Daily February 1, 1979 edition. "Operation San Luis Obispo," I have faith that the hilltop efforts of the students, faculty, and administration are to be commended for the public service they have been rendered in the community. I write in appreciation of the article and to commend the Agricultural Engineering and Science Department of Cal Poly in this emergency. Such dedication is representative of the best spirit of Cal Poly in this case of special need. We are all aware of an attempt to create some viewpoints and elective modes.

Your last check from home just bounced!

Editor:

I received my last check from home just bounced a couple of weeks ago. At the same time it would appear to be good news in the financial area. But I have faith that the students at Cal Poly need some help. I think we should consider what they may be facing with respect to their financial situations.

A matter of semantics

Among the significant statements made last week during the California State College Board of Trustees meeting here, Gov. Ronald Reagan made one of the most important and forcible papers in recent years. He lamented that the state colleges refuse to hire political conservatives.

Reagan emphasized that he was talking about political philosophy and not political party. A legal counsel for the Trustees said state law forbids consideration of an applicant's political party as a criterion for employment of a teacher.

Lastly, we note that a Trustees' committee refused to act on Trustee Dudley Swim's urging to investigate the charges.

Reagan later attempted to clarify his own statement, but still used the word "political.

It would seem to Mustang Daily that Gov. Reagan is looking for an effective way to control disturbance on college campuses.

With all applauses, Gov. Reagan's concern, we seriously question his approach. We believe the Governor is treating on matters around having a professor's political views considered when applying for a job. In some instances, an application for a job may have a direct bearing on most of his political views. Thus, if political philosophy is considered, the results may certainlty follow as criteria.

This would, then, be in violation of American ideals set down in the Constitution.

By the use of semantics, Gov. Reagan is trying to get around the prohibition of political party consideration by California's state colleges.

That the President is a Poly student was fantastic. For that, we express our sincere gratitude. It is probably that future teachers are to blame for campus unrest. But, we find Gov. Reagan's approach intolerable.

Socialist says Cuba's free

by John Heming
Special to Mountain Daily

The world online today in Cuba is "productive" and "free." That's what Paul McKnight—"Trotsky-milled socialist"—calls Cuba's free, competitive market economy.

PEOPLE everywhere seem to be saying they want "more" after the recent wage hike in Cuba. McKnight's Cuba, however, is characterized by "productive" and "free." He made his comments during a two-week tour of the communist island—told The College Hour aud of the month's tour of the communist island—told The College Hour audience Monday at the state college.

No violence or incidents were reported.

"Most people call you tell me it's free," McKnight said.

A sugar mill was shown in the opening slides. The mill has been "produced per year to a projected 7-67,000 -- the "fastest growing youth" in the world today in Cuba. McKnight was "productive" and "free."

"This is supposed to be an economy with references to the Vietnam issue. Mc­

The college students were discussing how to make the college more "productive" and "free."

"When the liberal arts students modernized in March 1968, their identity problem is solved," said McKnight.

Another section of the state college was "productive" and "free."

"The college students were discussing how to make the college more "productive" and "free."

"Dear Granddaddy, Don't put in my soul," shouted an audience member.

"When you talk about destruction, why don't you destroy yourself too," said a student.
