ASI candidates tell their stories

Poly students will cast their ballots today and tomorrow in the student government elections for the offices of president, vice president, secretary and chief justice.

There are six candidates, a mix of old and new, running for the ASI presidency. Paul Kongor has been active in ASI for the past three years, serving as student representative to the San Luis Obispo campus Board of Trustees. His platform emphasizes the need to streamline the operations of ASI, including the budget, to make processes more transparent and efficient.

Dick Barrett, a soil science major from Arroyo Grande, is running for chief justice. He believes that ASI should be more responsive to student viewpoints and that the system of government needs to be opened up to all students. His platform includes a plan for a student government that is more inclusive and representative of all student perspectives.

Kali Kueiler is running for vice president. She wants to expand the Communications Office to improve student government operations. She also emphasizes the need for more effective programs of action. Kueiler believes that the most efficient way to make student government more responsive to all student groups is to have the student government report directly to the president. She believes that this will improve communication and decision-making processes.

Leonard Pedersen is running for the position of student representative to the San Luis Obispo campus Board of Trustees. His platform focuses on improving the quality of student life on campus, including the need for more efficient processes and better communication between the student government and the administration.

Ollie Nosa is running for secretary. He emphasizes the importance of effective programs of action and the need for more transparency in the student government. Nosa believes that ASI needs a new set of objectives and that the student government should be more responsive to student needs and viewpoints.

Robert Hurrett is running for the position of secretary to the ASI president. He believes that the student government must become more responsive to student viewpoints and that the system of government needs to be opened up to all students. Hurrett's platform includes a plan for a student government that is more inclusive and representative of all student perspectives.

For the vice president post, Ken Mutiny, Ken Markowitz, from Santa Barbara, is running for vice president. His platform emphasizes the need for more effective programs of action and the need for more transparency in the student government. Markowitz believes that the student government should be more responsive to student viewpoints and that the system of government needs to be opened up to all students.

Kueiler's information center would be expanded by Kueiler, he believes that it would be a waste of time and ASI funds. Markowitz claims Kueiler's proposal would violate the existing bylaws and policies. Hurrett's information center would be increased by Hurrett, he believes that it would increase student awareness of the system of government. Markowitz disagrees, he believes that the system of government needs to be opened up to all students.

For the vice president post, Ken Mutiny, Ken Markowitz, from Santa Barbara, is running for vice president. His platform emphasizes the need for more effective programs of action and the need for more transparency in the student government. Markowitz believes that the student government should be more responsive to student viewpoints and that the system of government needs to be opened up to all students.

Ollie Nosa is running for secretary. He emphasizes the importance of effective programs of action and the need for more transparency in the student government. Nosa believes that ASI needs a new set of objectives and that the student government should be more responsive to student needs and viewpoints.

Robert Hurrett is running for the position of secretary to the ASI president. He believes that the student government must become more responsive to student viewpoints and that the system of government needs to be opened up to all students. Hurrett's platform includes a plan for a student government that is more inclusive and representative of all student perspectives.

The student body will vote on the ASI presidency in the upcoming ASI elections. The presidential candidates are Paul Kongor, Dick Barrett, Kali Kueiler, Leonard Pedersen, Ollie Nosa, and Robert Hurrett. The vice presidential candidates are Ken Mutiny, Ken Markowitz, and Robert Hurrett. The secretary candidates are Ollie Nosa and Robert Hurrett. The chief justice candidate is Dick Barrett.
Markowitz's the one

It is time for a change. It is time to hear the old cliches that the SEC Presidential campaign. What Cal Poly wants and sorely needs is a person who is honest and has the willingness, as well as the talent, to bring about changes needed to make student government more responsible.

For these reasons, Mustang Daily recommends the election of Dave Markowitz for the ASI Presidency. As the editors look at the candidates, it is evident that Markowitz is pulling no punches. He is telling the students what they hope to hear in student government.

Markowitz has proposed to revamp the representation on Student Affairs Council. Presently no members are chosen. For a real opportunity for changes, something should come from the different schools' councils and other groups. But, they do not answer to the student body. As the evidence indicates, the students have no direct voice in SAC. Markowitz is committed to give students that voice.

He is vigorously pushing for new areas of revenue for ASI, and members of the student body. They are doing well in San Luis Obiapo has been upmost in Markowitz's mind. He is committed to bring down prices through various means. Now he remembers that one third of San Luis Obiapo's total business comes from Poly students.

He will represent Poly students on-campus as well as off-campus. As the merchants in town look at it, you're coming from the different schools' councils and other groups. And the list goes on.

They are honest with him and he is honest with them. For a real opportunity for progress, something Cal Poly could never see again, Mustang Daily recommends the election of Dave Markowitz for the ASI Presidency.

Letters to the Editor

Supporters give opposing views

Kresge

Editor:

Mr. Markowitz is not a revolutionary candidate, but a leader who has the willingness, as well as the talent, to bring about changes needed to make student government more responsible.

Mr. Markowitz is the only candidate who has been fully aware of the problems of the student body. He knows their problems because he deals honestly, effectively, and smoothly with minority groups. His political beliefs dictate that he fight for their rights and he has the willingness, as well as the talent, to bring about changes needed to make student government more responsible.

In addition, he would encourage organization, with faculty and administration guidance, of an "experimental college" which would offer classes in academic areas of student interest and needs that are not covered by existing courses.

Mr. Kresge believes the Cal Poly present policy of providing courses in ethnic studies to augment the standard curriculum.

Mr. Kresge is in favor of Cal Poly's present policy of providing courses in ethnic studies to augment the standard curriculum.

And every year we have a multi-day council on the same issues, mainly student involvement. And every year we have a multi-day council on the same issues, mainly student involvement.

A vote for Mr. Markowitz will be a vote for Cal Poly.

Markowitz

Editor:

Every year, at this time, we have a student body election. And every year we have a multi-day council on the same issues, mainly student involvement. And every year we have a multi-day council on the same issues, mainly student involvement.

But for those who look to the future, Markowitz has the respect of everyone from the college president to a tough sergeant. They realize his capacity for leadership.

They are honest with him and he is honest with them. For a real opportunity for progress, something Cal Poly could never see again, Mustang Daily recommends the election of Dave Markowitz for the ASI Presidency.

Papers disappear

Editor:

Since the beginning of this term, there have been few papers from other publications. There are exactly two papers today, and I'm sure that Mr. Lovatelli would be glad to have them. But for those who look to the future, Markowitz has the respect of everyone from the college president to a tough sergeant. They realize his capacity for leadership.

They are honest with him and he is honest with them. For a real opportunity for progress, something Cal Poly could never see again, Mustang Daily recommends the election of Dave Markowitz for the ASI Presidency.

Sincerely,

Gail Hernandez

The Journalist

Papers disappear

Editor:

Where has Mustang Daily gone? It is true that we do not have many papers today, but that is because we have been printing exactly two (2) copies of Mustang Daily. This is due to the fact that we are printing for the entire campus.

If you are not satisfied with this, you can still get your copy of the student newspaper by coming to the Mustang Daily office, 103 Journalism Building, where you will find a new paper ready for you.

Take Wednesday, April 23, 1969 as a typical example! We were not notified by the Journalism building but could not find any papers. I went to the Journalism building and found that the paper had been searched, still no papers. I then went to the English building where there were not only no papers but the box that usually contains the papers had disappeared.

As I stood in the hall, waiting and longing, a copy of Mustang Daily that had been set aside for faculty use. I am not alone in this plight. As I hurried from the building, my newspaper...clutched tightly in my hands, I encountered a COPY of Mustang Daily! I am not sure how you feel about this, but I am pleased that Mustang Daily is keeping up with the rest of the world.

"You have a paper," she exclaimed. "Where did you find it? I am not the only one!"

Mustang Daily, WHERE ARE YOU?

Judi Irrati

Editor's note:

This is an all too common occurrence. It is just that students are grabbing papers faster than you can walk to the office to get them. In order to have a copy we are actually printing over 5,000 copies. This is the minimum number of copies needed to service our readers.
ASI candidates explain their respective views

(continued from page 1)

I urge all students to take advantage of this opportunity. More participation is needed in every area in order to increase each individual's understanding of the student government and its potential influence on fellow citizens and fellow students (world-wide). I would urge all students with vacancies to check next year's catalog for details.

5. Support of the Athletic Program—This is a very important area to me, and I feel Poly is no exception. I would strive to work with the Athletic Department concerning the athletic program and work with the ASI vice president to offer the school's support without sacrificing the needs of other student organizations, clubs, and functions.

6. Emphasize the importance of the role of student government (its function, powers, etc.) to all students (WOW, clubs, organizations, etc.). This would be done through literature, formal talks, and informal conversations.

I pledge to work with the faculty, staff, administration, and most important of all, my fellow students to coordinate better the activities and educational process at Cal Poly.

Murray, from Rose, is running on a ticket with Markowitz. His platform reads:

"The legislative branch of student government is the most influential part of student affairs at Cal Poly. The ASI vice-president is chairman of the legislative branch. It is essential that the Student Senate, Council be responsible and responsive to all the students as SAC controls all financial matters of the student body.

"Keeping the students of Cal Poly informed of one of the primary objectives of the vice-president. He must be able to use the various media (Mustang Daily and KCPR) as a means of informing the students on the issues that confront the student body.

"Student government should be structured to benefit all the students. If it is to be effective, a solid working relationship between the vice president and the president must be established and maintained. It must be the job of the vice president to work with the president to effect a sound organization through his relations with the school administration and faculty and representing the students.

"Miss Reed, who resides in San Luis Obispo, is unopposed for ASI secretary. Her statement is as follows: "It would be my platform to take accurate minutes at SEC and SAC and work with the ASI president and ASI vice president on any school matters." Pedersen, also running unopposed, is seeking re-election.

He stated, "I feel I have accomplished this year will be implemented efficiently so that it will not bog down in the future."
Bakersfield music duo features piano, violin

by Emily Perry

Anyone who realizes the harmonious tone that a violin and piano can make will be sorry if they missed Concert Hour Thursday, May 1, Dale and Rebecca Brooks, a husband and wife team from Bakersfield, gave a recital in the Little Theater. Brooks plays the piano and his wife plays the violin.

The Brooks' program consisted of music by three composers. The first number, “Sonata No. 4 in D Major” was written by George Frideric Handel. The second piece was an Aaron Copland composition. Copland is one of the best known living American composers. His works center around American history and folklore. Copland's “Bach” for Violin and Piano, was played by the couple, is representative of a period in Copland's life when he was trying to make his music as accessible to the listening public.

The second piece was an Aron Copland composition. Copland is one of the best known living American composers. His works center around American history and folklore. Copland's “Bach” for Violin and Piano, was played by the couple, is representative of a period in Copland's life when he was trying to make his music as accessible to the listening public.

The couple does not ordinarily like to speak during a performance, Brooks felt the short explanation of the third composer would bring greater appreciation of the final sonata. Brooks said, “Charlie lives in "life" today. He has been overlooked for so long, that only now are people beginning to understand his music.”

The music lives has been considered a bit primitive. He is known for his sonatas from old America, such as: "Turkey in the Straw," "Bring in the Sheaves," and "Jesus Loves Me." Some people have trouble accepting this type of interjection as a form of art, so Brooks asks the audience, "Does it listen to the sounds, listen to the music?"

The Brooks' close with "Sonata No. 4 in D major for violin and piano" by Ives, substituted - Children's Lives at the Camp Meeting.

Mrs. Brooks is the sister of the late Bathistle of the Cal Poly music department. She is concert mistress of the Kern Philharmonic and is scheduled for a violin solo with the orchestra in June. Brooks also appeared with the Philharmonic in January playing the "Stravinsky Violin Concerto."

Brooks teaches piano and music history at Bakersfield music history at Bakersfield College. He and his wife organized and participate in the Kern County Music Teachers Association. They concentrate on the Soviet music (modern Russian composers) and American composers of the first half of the 20th century.

Keep off the grass. Many people have been assigned boxes of grass. The post office can no longer dispense postal services.

Music groups planning Kern County concerts

Harold P. Davidson, head of the Music Department, is an old hand at getting top-notch performances from Kern County's finest muscian. Their concert tours like the one scheduled for the Bakersfield area, May 8-9.

Davidson, who has been directing such tours for 28 years, is considered a hard task master by the 81 members of the Women's Club, Collegians stage and dance group, Majors and Minor, barbershop ensemble, and Collegiate Quartet.

Inspiring their itinerary for their two-day tour are assembly concerts at six high schools and a public performance which is scheduled for the Indoor Theater at Bakersfield College the evening of May 8.

Davidson, known as Davey to students, and staff, loves to head the college music programs since 1950. After graduating from Pomona College and teaching in Pomona for seven years, Davidson was hired here and charmed with the task of forming the college Music Department.

The annual tours, which have seen performing groups from the college cross and recross the state numerous times, were inaugurated in 1941.

The likeside Davidson has also gained recognition as a choral composer and arranger. He wrote three traditional college songs that are included in most performances of the college's glee clubs: "Ride High, You Mustangs," "Cowboy Lullaby," and "All Hall, Green and Gold.

A well-known figure in San Luis Obispo where he has served as president of the Rotary Club, Davidson sums up his feelings about the past and his plans for the future by saying, "I like it here."

That feeling is echoed by members of the four ensembles he will direct during the two-day tour in Kern County. Drop outs rare in this school for Lettergirls

"We're proud of Cal Poly, and we're proud of our Mustangs!" the Brooks' program. The type of music played is exemplified by each and every girl participating in Lettergirt's School. Lettergirt School, officially started on Wednesday, April 30, is the beginning of last year's team. Last year's group included seven members, but for next season, 11 girls will be chosen for the team. Those who are members of last year's team and are returning for another year are: Head Lettergirl Donna Faxon, Judy Dawson and Carole Lehman.

Tryouts begin early this month and the girls who qualify will perform a routine. Although they are part of the college Music Department, they perform their own routines. Although they are part of the college Music Department, their program is for the girls at the college. They also perform during the football games and basketball games.

A superb team, they are a brilliant and disturbing film. A movie so brilliant, so special that it's dangerous to write about it. I'll be talking about if...forever..."

"ANGRY, TOUGH AND FULL OF STING."

"WILL PROBABLY BE THE BIGGEST MOVIE ON COLLEGE CAMPUSES SINCE THE 'GRADUATE'!"

"LET IT SUFFICE TO SAY THAT IT'S A MASTERPIECE, reason enough to rank Anderson among cinema's major artists."

"THE MOST INTERESTING FILM SO FAR THIS YEAR... A superb film, if..."

"IF YOU'RE YOUNG, YOU'LL REALLY DIG IT...if you're not so young, it's more reason than ever to go see what it's all about!"

Campus post office-old standby will cease to exist for students

Students who have not checked their campus post office box in the last three years better do so promptly. On June 7, 1960 the campus post office will cease to exist. To the 7,000 students who have been washing their mail away with this means that they must have all mail sent to their residence halls.

Mail delivered in residence halls should be lost in the address: the name of the residence hall, room number, zip code, Cal Poly, BLY.

The post office can no longer afford the space to accommodate all of the students. Boxes were sometimes shared by four students, making it easy to miss the mail.

The other alternative, that of a new post office service was thrown out when postal authorities told the school it would cost about $70,000.

Although June marks the end of the post office service (started in '36) it will not mean the end of the stamp services. Stamps and other postal needs will be sold in the book store. Also there will be some stamp machines that will be added in strategic locations on campus.

The ultimate end of the post office will come when the new college union is finished. It will have its own special window to dispense postal services.

Former Ag head home

Warren Smith, head of an agriculture team at the Bakersfield Agricultural School in Thailand, is home for a 10-day leave. Smith, who was dean of agriculture from 1961 to 1967, has been with the college there for two years and has accepted another year's assignment there.

Bangor is a school for training agricultural teachers and is located 70 miles from Bangkok, Thailand. Smith has been working with the college there to improve their program by training potential agricultural teachers. He is head of the agriculture project from our school financed by the Agency for International Development (AID) of the U.S. State Department.

During his leave, Smith has met with three high school agriculture teachers, who were trained and chosen from students in the school that he will join the project this June. He has found time to visit the School of Agriculture and President Kennedy to make brief reports.

Paramount pictures: a memorial to the world's greatest stars. A movie so brilliant, so special that it's dangerous to write about it. I'll be talking about if...forever..."

Russian scientist speaks on education and optics

by Joyce Tokyo
Staff Writer

Most professors usually have gray hairs that stick out,” said Dr. Alexander Kovrigin, a young, brown-haired “main teacher” and exchange scientist from Moscow State University.

He was the guest speaker for a joint meeting of the Society of Physics Students and the Students Branch of the Institute of Electrical and Electronic Engineers held Thursday at the Air Conditioning Auditorium.

Born in Moscow, Dr. Kovrigin graduated in 1969 from the Department of Physics, Moscow State University where he is a senior lecturer (assistant professor) in physics. He is presently working at the Hansen Physics Laboratory, Stanford University, engaged in further research in his particular field of study—experimental investigation of the optical parameters of optical parametric oscillators. He has been in California for eight months.

There are not many private schools in Russia. Most are state-run schools,” said Dr. Kovrigin, explaining about Russia’s educational system.

“Aafter 10 years of compulsory secondary education of all children, a student takes an entrance examination and decides whether to go to a university or a specialized institute. The women are luckier.

Men have two attempts to pass the examinations, but if they do not pass, they go to the army. But he may return after two years in the service to try again.”

He also explained that the Moscow State University is one of the largest in the country with over 33,000 students. A thousand of these are from foreign countries invited by the government to study without cost.

“All education is without cost. There will be an exchange between Moscow and Stanford next year.”

A student takes “common courses” in general education courses for the first three years, deciding his major after four years and graduating in five years. Then he may be a lab assistant or go on to obtain his Ph.D. after four years of research work.

“All education is without cost, and the state will help any student if assistance is needed to complete his schooling.”

The grading system is based on a one to five range with five being excellent, four good, three pass, and the rest “you kick out.”

“After 10 years of compulsory secondary education, a student takes an entrance examination and decides whether to go to an university or a specialized institute. The women are luckier.”

Patriotism dominant theme

With patriotism as their theme, 250 high school girls and 32 advisors met in the home economics department Saturday for their sectional PFA meeting.

As part of their activities, the girls held chapels, display competitions, an election and installation of officers for 1969-70, and held a white elephant sale to raise money for Kim, a foster child their PFA section is sponsoring.

As a founder and honorary member of PFA, Mrs. Barbara Weiler, home economics instructor, was invited to give the welcome address and also work as coordinator for the events of the all-day meeting.

Members of Home Ec 411, a methods class, attended the meeting and later served as tour guides to show the girls the facilities of the Home Economics Building. Most of the girls now taking the methods class will eventually be advisors to PFA after starting their teaching careers.

Mrs. Mildred Kube, state advisor of PFA from Sacramento, was guest speaker at the meeting. National honorary members from the campus were Mrs. Eva Scudder, Mrs. Connie Housenale, and Dr. Marie Piff, head of the Home Ec Department.

PFA is a national organization of students who have been or are now in classes in home economics in high school or in junior high school.

Opposing views on mandatory fee

Fee’s fate to be decided by vote.

The proposed mandatory health fee, which is on today’s ballot, has caused pros and cons to appear.

Mike Robinson, ASI vice president, opposes the fee because it “is a socialized medicine, a concept unacceptable to the mainstream of American liberalism,” Dr. Monta comments. “Administratively, the Health Center converts itself with the provision of a first rate health program. The mechanism to be used to finance this is to be implemented (i.e. optional or regular fees) should be a decision of the students. We can objectively provide facts that will allow you to make the decision, but prefer to make no recommendation for or against a regular fee.

1. Student Health Medicine is financed in two ways:
   a. portion of student fee (regular students)
   b. Optional Health Fee (chosen by 65-70 per cent of all students)

2. Benefits of “Optional” Program are available to all regular students:
   a. Optional card holder—no charge (except medication)
   b. Non-participating charged on fee for service basis. Thus, “Optional” aspect of Health Program creates two categories of students. Implication of “optional” aspect accounted for 7 per cent of last year’s budget.

3. To insure all students in optional benefits would allow a reduction in annual health fee from #24 to #21.

b. budgetary salvage of 7 per cent in administrative the Program

c. Eliminate Pharmacy charges

d. Program would be paid by 100 per cent Student Body rather than the option of 65-70 per cent.

Just a few of the objections are listed below:

1. Many students have personal insurance policies or are covered by parents’ policies.

A compulsory student health fee would require these students to pay for something they have already paid for.

2. Many students do not participate in the present Health Program because their past health records indicate little need for such a program. Why should the healthy pay the way of the unhealthy?

3. Many students do not participate in the present Health Program because they prefer to have the medical problems treated by specialists, rather than clinic doctors. With the mandatory fee, these students would be paying for services which they will never use.

Long Beach in baseball upset

Poly drops series

In one week the Cal Poly baseball team has trimmed to its first place CCAA standing with a 5-2 record, to now stand out of the title race at 6-5.

But Young popped up a first-pitch single in the ninth by Young.

Roth started the series on Friday for Poly with a score of 7 wins, 1 loss. Young's second-run single was the highlight. Poly tied it in the bottom half as Mike Marozza began him, allowing a triple by Santa Maria's Steve Kevski. An infield double put two runners on second and third.

The Mustangs take a 10-10-1 overall record into Monday's contest with the San Diego Mariners. Long Beach won it 17-2 in all games. Both schools are 8-0 in conference play.

Why is Camaro the pace car again?

Camaro 88 has been chosen to be the Indy 500 pace car for the second time in three years. That's because it has what it takes. The transmission comes linked to a 3-speed floor shift. If you want still more, there's a 4-speed Hurst shifter available.

Start setting a pace of your own. At your dealership, start setting a pace with the 1988 Camaro 88 Convertible with Rally Sport equipment and our Super Shaker hood.

Because it's the Hugger.

Camaro 88 has been chosen to be the Indy 500 pace car for the second time in three years. That's because it has what it takes. The engine choices start with a standard 300-hp 350-cu.-in. Turbo-Fire V8 and run up to a 325-hp 390-cu.-in. Turbo-Jet job. There's even a new 4-speed Hurst shifter available.

Trackmen try ballet

by Don Noel

Would you believe that somePoly trackmen in Coach Dick Purcell's mind are ballet dancers? Purcell singled out his field men, sprinters and hurdlers to practice modern dance techniques during the second week of spring practice.

Miss Sharon Kest, women's physical education instructor, placed a student through stretching exercises, during full and winter quarters. Only Ernie Holmes, Poly's number one high hurdler, had permission in such an exercise program previously.

Purcell offered the volunteers in the program to the men to help control movement of the body and relaxation. Such preparation would also hopefully reduce muscle injuries later on in the track season.

Holmes credits the exercises with helping to loosen his upper body and muscles in the groin. He said, "I want to do it again if not only next year, but maybe the rest of my life."

Purcell noted his warm-up time has been reduced by the exercises. He emphasizes loosening of the muscles in the groin which are not used much in handling hurdles.

Holmes added that the exercises showed him what he needed to stretch more. He is using the exercises in his warm-up now.

Purcell noted that high jumpers, pole vaulters and hurdlers took the most interest in the one hour and a half week sessions conducted by Miss Kest.

Looking back, Miss Kest notes the exercises helped them relax and "become shelf." (Flexible.)

"We worked on stretching legs, back, shoulders and any other kind of stretch," she said. "Some were extreme stretching techniques."

"They were exposed to modern dance techniques and we had a lot of fun," she recalled.

Purcell added that he gained a new outlook on exercise. He found out how flexible he could be.

Coincidentally, Purcell credited the success of the program to Miss Kest and her fine knowledge of modern dance techniques.

"Intermediate handler Benny Powers, said the program helped him get looser than ever before especially in the hips and lower back. He believes it will help prevent hamstring injuries this year."

As a consequence, Powers has found he is getting down on the hurdles better and wants to continue the exercise program again next year.

Powers emphasized the voluntary aspect. "No one had to do it. We were competitive, but each of the team was there."

"In order to benefit, you had to make the exercises hurt," Powers added. "You did it to improve yourself."

The Mustang track men noted that the loosen the men are doing is "the fun and a part in their events."

"I think this type of program in a track season in a way that most coaches thought would be helpful, but not do that," Purcell concluded.

Trackmen run over southern opponents

By Greg Van Houten

Los Angeles is a friendly town for Coach Dick Purcell and his Poly trackmen. Saturday afternoon saw Purcell's twin men's triangular victory over San Fernando Valley State, 94-47, and Cal Poly Pomona, 94-42.

Week's last time you were blocked off the box. Try learning judo with the judo club and worry no longer. All students and staff are welcome to join, with meetings held on Tuesday and Thursday at 7 p.m. Saturday afternoon the Men's Gym is open from 2-4 p.m. for recreational use.

If you want to avoid dried-out white meat and shrunk drumsticks, serve them on Thanksgiving turkey, haie, bake and brown it with batter. First, stuff and truss your turkey, and for basting and stuffing plan on two pounds of batter. Spread softened butter on the skin of the turkey to prevent drying out and to add a rich flavor. Cover the turkey with a moist cheesecloth dipped in melted butter, and brush frequently during cooking, right over the cheesecloth.

Avoid pulled muscles
