Open elections set back

At the height of a tug of war vote, SIS President Paul Kreage announced he might veto the passage of Bill 86-1, that would require Student Affair Council Representatives to be elected from the students at large.

In the surprise move at the SAC meeting last Tuesday, Kreage stated that the council of a possible veto after Dr. Barrett, AIS vice president, broke a 9-9 tie with an affirmative vote. Bill 86-1 was amended so that the bill would be taken to the student body in an open election. The election date would be set by the Elections Committee.

Kreage has one week to veto the bill. If he does, Bill 86-1 is dead. If he doesn't, the bill will go to a convention. Supporters of the bill would require a two-thirds vote from SAC. Kreage confirmed, "They (supporters) don't scrape up two-thirds of the SAC reps. to override my veto."

John Robinson, Architecture Council member, hinted that another way to over-ride the public veto would be to obtain 300 signatures from students.

Kreage said he voted in favor of the bill because the SAC vote was so close it would be "only right to give it to the people." Had the bill been denied by SAC alone, Sally Banks, Applied Arts Council member, speculated it would have been defeated.

Bill proposed by Paul Banke, Agriculture Council, reads as follows:

ACTION: That the Student Affairs Council direct each School Council and the Elections Committee to revise their codes such that:

1. SAC members are elected directly by members of their school, in a general, school-wide election.

2. Any member of a particular school may, if nominated, run for the office of Student Affairs Council Representative for that school.

3. Elections for SAC representatives will be held before the last week of spring quarter; those elected to serve a term beginning the immediately following spring quarter.

4. Elections for SAC representatives will be supervised and conducted under the jurisdiction of the AIS Elections Committee. Such things as: petitions, campaign rules, expense limitations, etc. must be approved by Elections Committee. Elections Committee shall, if necessary, provide the personnel to man the elections booths and will be responsible for tabulating results.

5. All Student Affairs Council Representatives shall automatically be elected, become members of their school council, and shall be responsible to their school council as representatives.

RATIONAL: There are now many students in this college who are not members of clubs. These students have no voice in the selecting of SAC Representatives. There are many other students who feel that their club representatives do not really represent them in the selection of SAC Representatives. In order to correct this situation, to create more interest in and knowledge of student government, and to foster greater student involvement, I propose that SAC Representatives be elected directly by the students of each school. Because I recognize that clubs are still the hub of student activity on campus, and because there must be a way for students to lobby their Representatives, SAC Representatives should be members of and responsible to their councils.

Physics meeting set

The American Association of Physics Teachers—a national organization of college and high school instructors—will hold a joint meeting of its northern and southern sections here tomorrow in Science E-2.

Two distinguished instructors will present their recent publications to the state-wide convention.

Dr. Richard Tolman, associate professor of physics at Cornell University, will discuss his paper, "The Nature of Today's High Energy Physics." While "Monitoring of Highly Suspected Particles About Apollo 13 and 10" will be presented by Dr. Eugene Bertian of the University of San Francisco.

The event will begin with coffee at 8 a.m. and a luncheon will be held later in the cafeteria.

County development discuss at workshop

"The over-all view is a good one because it gets people to talking about the problems. This is how Ken Schwartz, mayor of San Luis Obispo and an architect, in charge of workshops for the citizens of San Luis Obispo County to discuss the development of San Luis Obispo County to discuss and make contributions to the orderly development of the environment of this county."

The program was sponsored by the San Luis Obispo and County Development Association in cooperation with the County Planning Department and this college.

The conference was held on Tuesday in the Music, Speech and Drama Building.

About 300 people attended the conference from all over the county. Mayor Schwartz thought the conference would have a good effect on the community but added that it would probably take some time for the effects to become evident.
Vietnam forum planned today

The Vietnam war issue is on the line—and the lawn—again today. An administration-approved Vietnam forum—open to any student or faculty member—is scheduled for 3:30 p.m. on the library lawn from 3 to 4:30 p.m. Supported by student body president Joe Beery, the forum will feature speakers from the college and community representing several political points of view.

Not approved by the administration is a Vietnam Moratorium Committee plan to encourage in-class discussion of the war. Moratorium leaders say they will request instructors to devote class time to the Vietnam issue—and if instructors refuse to permit class time for war discourse, committee leaders say they will encourage students to mobilize for dialogue.

A citywide canvas for antiwar support was conducted last night by members of the Moratorium Leaflets were distributed and cards—calling for an end to the war and addressed to the President—were signed by downtown shoppers and others throughout the community.

An auto caravan, composed of "peace pilgrims," is expected to arrive here shortly after 9 p.m. today. The caravan, originating in Whittier (President Nixon's hometown), will pick up antiwar supporters in communities along highway 101 en route to San Francisco's "March Against Death" on Saturday.

The pilgrims will flow off the freeway, onto Grand Avenue, and into the campus. The 5-2 parking lot has been made available. As the peace pilgrims arrive, Rev. John Fuller will ring the bells of St. Stephen's Church in a "community prayer." A brief "community greeting" will be offered on the lawn in front of the Men's Gym. A city policeman and a local minister will address the visitors—now joined by campus and community Moratorium participants.

The "March Against Death" will begin at Pier 30 on the Embarcadero and will be joined at two other places by marchers who prefer a shorter walk. Scheduled to begin at 1 a.m., the Saturday march will be completed when it reaches the pole grounds at Golden Gate Park sometime around noon.

There, a massive rally is planned, with speeches by the Rev. Ralph Abernathy, Dr. Martin Luther King's SCLC successor; Wayne Morse, former U. S. Senator; and Dorthy Huerta, United Farm Workers representative.

The crowd will be entertained by folk singers Phil Ochs, Joan Baez, Buffy Sainte-Marie; and the cast of Hair will perform numbers from its musical hit.

Freeman said sleeping accommodations will not be provided by sponsors of the pilgrimage, because of the numbers of people expected to participate. "It will be very informal," he said. "Bring sleeping bags."

Economic Opportunity pilot successful

by BERNIE GUESENEK Staff Writer

Last year this college ran a program to see if disadvantaged students, who otherwise couldn’t make it in college, according to Everett Chandler, dean of students, the program was a success. Of the 30 students brought to this campus last fall, 14 returned to Poly campus last fall 14 returned to Poly success.

Having 16 of the 20 students still in college by money received from the Economic Opportunity Grant and National Defense Educational Act Loan. Last year the students were housed on campus with white roommates. This year approximately 10 students returned to campus housing. Chandler commented that those in the dorms were not racial, but differences in personality.

The program’s biggest problem was in finding tutors. "We underestimated the difficulty of getting tutorial help. This is a problem we really need to work on," Chandler commented. With the program expanding, more tutors will be needed in the fields of mathematics and communications skills.

This year 21 students have been added to the program, bringing the total number to 38. The main problem with the addition of new students was money. The number of new students that could be admitted under the program was not known until the middle of July, Chandler said.

"We really don’t want to give anybody encouragement to come unless we can cover the financing. We think it would be most unfortunate to bring somebody in and dump them," Chandler continued. "Anybody we bring in we want to make sure that the first year they are totally financed."

Chandler felt this first year has provided a "good base to make a good steady expansion of the program." Next year he hopes the program will be at least doubled.
You've Got To Be Fickle

Columnists unite to design Rose Parade float

by TIM DOLAN

and JOHN DREXLER

Due to strong common interest--we're both cynics, sick of college, and graduating soon--said columnists have merged.

The resultant material furnished by the authors of "The Fickle Finger" and "You've Got To Be Fickle" is called "You've Got To Be Fickle." When we decided to combine what was left of our midterm, so-called literary talents, John Flueadolph, author of "Fists On Friday" (we can't present. We regret not being able to produce a "You've Got To Be Fickle On Friday.

Anyway.

It occurred to the two of us as we were swatting flies in the swammm with old Paul Kreage election posters that it might be difficult for the powers that be to think up suitable themes for the Cal Poly Colleges float for the annual Rose Parade in Pasadena.

Drug speaker set Monday

The author of the nationally acclaimed research paper entitled "Teenage Drug Abuse: A Major Rural Crisis" will be on campus next Monday.

State Assemblyman William "Bill" Cambell will speak at 7:30 in the Music Auditorium and will be sponsored by the Cal Poly Republicans on this campus.

Cambell will also be present at Architecture seminars Monday morning, be the chairman of the literature committee on Urban Affairs.

Cambell will attend a buffet lunch Tuesday at the Motel Inn. Campbell's speech Monday night is open to the public.

Home Ec association hosts meeting

The Annual Fall Conference of the Southern California Student Member Section of the American Home Economics Association will be held on campus tomorrow. The American Home Economics Association, world's largest professional organization for home economists, is promoting its goals of community and professional orientation with this year's theme of "Building Blocks of Child Development." Lynette Allen, chairman of the Southern California Student Member Section, will welcome AHEA student members from throughout the state at a 10:30 a.m. coffee hour.

The program will include three guest speakers from the area of Child Development. Miss Angli Wai, instructor of Child Development here, will speak on "Who Speaks for Children?" Bruce Tjader, campus pastor and instructor, will speak at the noon luncheon. Also scheduled to speak is a specialist from the Headstart program who will speak on "The Impact of Headstart on Children and Families."

Registration fee for the program is 50 cents and the cost of the luncheon is $3. Interested persons are asked to contact Karen Guebel or Betty Boote in the Home Economics Department.

Spaghetti feed set

The Student Architect Wives Club is sponsoring a spaghetti and casserole feed at the New I on Nov. 16 from 5 p.m. to 7 p.m. with a Happy Hour from 4 p.m. to 5 p.m. The meal costs $1.35 per person, including seconds and tickets may be purchased from any Architecture wife or at the door. For further information contact Diana Crawford at 546-3181.

The tale of the minor miner

Once upon a time there was a young miner named Olaf. He couldn’t be considered a major miner, having only a very small gold mine with one ore car and a single track.

Although his mine was small, he mined a considerable amount of gold, which he hid under his bed. Soon, however, his hiding place became apparent; his bed stood four feet off the floor on a pile of gold nuggets.

One day one of his brothers said to Olaf, "Hey, Olaf, why don’t you put your gold in a safer place?" Like Security Pacific Bank.

"Nope," said Olaf.

"You’ll earn interest," said Olaf.

"You can even open a checking account there," said Olaf.

"Nope," said Olaf.

Olaf’s brother shrugged his shoulders and went off to polish a tarnished silver mine.

The next morning Olaf awoke to find his gold gone. Tiny elf tracks led from his ex-pile of gold to the woods, a tarnished silver mine.

But then, as everyone knows, you can’t tell anything to a kid with a one track mind.

SECURITY PACIFIC BANK.
Chamber music concert features three pianos

Yesterday the campus Chamber Orchestra gave its first College Hall Concert of the season. The group had formerly been known as the Little Symphony, but Clifton Swanson, conductor of the group, had changed its name so that they could perform the chamber music that is left almost untouched by the larger symphonies. Yesterday's concert marked another landmark in the Music Department besides the first concert of the new group, a performance by three pianos.

This is a rare occurrence indeed as the extra piano had to be shipped up last week from Los Angeles. Three of the pianos were brought on stage and surrounded the conductor in a very beautiful melody by Mozart, "Concerto for Three Pianos, K. 242," which was composed in 1776.

Mozart wrote the piece for the Countess Loderon, and her two daughters, who were both students of Mozart at the time. It is a rich, delicately balanced piece of music that wavers back and forth between piano solos, duets and trios.

Also included on the performance were "Valse Trieste" by Sibelius and "Rumanian Folk Dances" by Bartok. "Valse Trieste" is a soft soothing piece of music that brings out all of the rich, smooth qualities of the chamber orchestra. While in deep contrast, the piece by Bartok is a light, airy piece that strongly shows its Slavic Background.

This program will again be performed tonight in the Little Theater at 8:30 p.m., with one slight change. Hayden's "Symphony No. 13 in D Major" will be added. The concert is free and open to the public.
Stress found in awakening

GETTING UP: Does the sound of your alarm going off at 7 a.m. send a chill up your spine? Do you often feel like throwing the blasted clock through the nearest window, then feel like rolling over and going back to dreamland?

Many of us feel very guilty about not being able to hop right out of bed in the morning.

According to psychologists, the act of getting out of bed actually causes measurable stress and can even bring on mental breakdown.

Dr. D. O. Hebb, professor of psychology at McGill University, in Montreal, points out that "with the right kind of stress applied long enough, anyone would break down.

In a recent article in Psychology Today, Dr. Hebb stated that "in the case of the person who apparently breaks down spontaneously, it is well to remember that everyday life involves a great deal of stress." A great deal of stress is getting out of bed in the morning. It sends the adrenal cortical hormones in the bloodstream way up.

Science has, at long last, verified our own observations. Getting out of bed in the morning is hard on a person. The getting-up syndrome, it appears, is common to us all. It is a part of our biology.

Just imagine what getting up in order to take an exam does to your body chemistry. Can't you just feel your adrenal cortical hormones rising at the mere thought?

Barbeque slated

Tomorrow, a chicken barbecue will be sponsored by the Soil Science Club. It will start at 11 a.m., at Cuesta Park.

Members and their guests are invited. Admission will be $1.25 per person.

NOW PLAYING

1035 Monterey St. • 543-1121

Gaylord Galleries, a newly formed business operated by Kirk Stathes, Jon Jannotta and Barry Stone, three architectural students, will hold an art sale during the grand opening of their gallery in conjunction with Rose Lee Imports at number five Mission Mall.

On sale and on display will be paintings, pottery, metal works and other creative objects made by students.

According to Stathes, it is the intent of Gaylord Galleries to be more than just another business in town, but rather a business that is interested in emphasizing the natural beauty of San Luis Obispo and in particular the areas surrounding the creek.

Help "Bring It Together" by attending the grand opening of Gaylord Galleries tomorrow, said Stathes.

Bookmarked

The Knitting Establishment

The finest Scotch spun Shetland yarns have been expertly worked by Bernhard Altmann into this classic-looking sweater. It's luxuriously soft and warm. The fit is especially comfortable because of the full-fashioned shoulders. And it comes in a choice of very handsome colors. Naturally, it is completely washable—either by machine or hand. $17.00.

Mustangs host Gauchos Saturday

Recapturing their winning combination is the assignment facing coach Joe Harper’s gridiron team as they prepare to meet the UCBB Gauchos. Kickoff time is set for 1:30 Saturday at Mustang Stadium.

It will be the 83rd meeting for the two teams. Poly possesses a 19-11 edge in the series. One contest ended in a tie. The Mustangs will be seeking their fourth consecutive win over their foe. Last year the local eleven won by a 24-14 score. The last time that UCBB beat the Mustangs was in 1966, 36-4.

The Mustangs hope to snap a two-game losing streak while the Gauchos are looking for their second straight win.

Coach Joe Harper has this to say about this week’s opponents, “UCBB has changed from the beginning of the year because of some injuries. We think they’ve made the personal adjustments very well as was demonstrated last week against Cal. Rate L. A. Jim Curtice may be the best all-around quarterback we’ve faced all year.”

Colts end season; an impressive win

After losing their first three games, the Poly Colts of coach Tom Lee came back to win three straight and gain a forfeit to turn in a 4-3 win season.

The Colts dropped their first two encounters by close margins, losing to Costa College 16-8 and to Hancock Buildings of Santa Maria 14-6 and then were shut out by the Long Beach State Spartababes 5-0.

From that time on they put away the Fresno State Bulldogs, The San Fernando Valley State Pipers and the Pomona Poly Broncos. Their, forfeit came last Friday when the UCBB Gaacho freshman men couldn’t find enough men to fill a team. Quarterback Clancy Smith threw for two passes to end Mike Appo and ran for another all in the first period of play. Mike Donaldson made good the conversion points after each touchdown.

The only other score in the game came in the second quarter when Willie Williams counted on a 46 yard scamper. The bold time score stood, Colo 31-Broncos 6, and that’s the way it stayed for the rest of the game.

*CEILING
AND
VISIBILITY
UNLIMITED

At Pratt & Whitney Aircraft “ceiling and visibility unlimited” is not just an expression. For example, the President of our parent corporation joined P&W only two years after receiving an engineering degree. The preceding President, now Chairman, never worked for any other company. The current President of P&W started in our engineering department as an experimental engineer and moved up to his present position. In fact, the majority of our senior officers all have one thing in common — degrees in an engineering or scientific field.

To insure CAVU*, we select our engineers and scientists carefully. Motivate them well. Give them the equipment and facilities only a leader can provide. Offer them company-paid, graduate education opportunities. Encourage them to push into fields that have not been explored before. Keep them reaching for a little bit more responsibility than they can manage. Reward them well when they do manage it.

Your degree can be a B.S., M.S., or Ph.D. in: MECHANICAL • AERONAUTICAL • ELECTRICAL • CHEMICAL • CIVIL • MARINE • INDUSTRIAL ENGINEERING • PHYSICS • CHEMISTRY • METALLURGY • MATERIALS SCIENCE • CERAMICS • MATHEMATICS • STATISTICS • COMPUTER SCIENCE • ENGINEERING SCIENCE • ENGINEERING MECHANICS.

Consult your college placement officer — or write Mr. William L. Stoner, Engineering Department, Pratt & Whitney Aircraft, East Hartford, Connecticut 06108.

CAVU* might also mean full utilization of your technical skills through a wide range of challenging programs which include jet engines for the newest military and commercial aircraft, gas turbines for industrial and marine use, rocket engines for space programs, fuel cells for space vehicles and terrestrial uses, and other advanced systems.
Runners go to nationals

Coach Dick Purcell and seven cross country men will travel to Wheaton, Illinois this weekend to compete in the 1969 N.C.A.A. college division championship.

This year's competition promises to be tough as a record number of over 800 runners representing between 50 and 70 schools will compete.

Fencers slash way to honors in meet

The men's fencing team piled up a 39-17 win-loss record to capture the championship. Taking two firsts and a third, Tom Ferguson won the All-Round championship at the Tucson Rodeo last weekend. In winning the championship he helped the Mustangs gain their second N.R.A. rodeo victory of the season. Ferguson grabbed a first place in both foil roping and ribbon roping. He then added a third in bulldogging to clinch the championship with 237 points.

Now You Know

The most points scored in a National Basketball Association game were 173 by the Boston Celtics, Feb. 27, 1959, in a game against Minneapolis.

Horsmen ride to victory in Tucson

Taking two firsts and a third, Eddie Cadena, one of the teams top runners was hurt and will not be able to compete in the meet. Picking up the slack for Cadena will be Mathyas Michael.

"Michael" stated Purcell, "I felt I could do it all along. But he has had a broken jaw and has only been able to practice for two weeks."

By United Press International

The championship seems destined for the west coast this year. The Mustangs top competitor will come from Chico State and U.C. Davis. According to Purcell, "We have a real good chance of winning. We have faced a lot of tougher people already this year."

The last time the Mustangs competed in the championships was three years ago when they finished 22nd. Purcell stated, "That's the reason we haven't gone since, we didn't think we had the teams to do it."

Eddie Cadena, one of the team's top runners was hurt and will not be able to compete in the meet. Picking up the slack for Cadena will be Mathya Michael.

With 573 points, Poly's men outrode second place Mesa Community College, 387.5 points, and third place Arizona State University, 178.5 points to capture their second win of the season.

Sharon Meffan brought home the honors for the women, as she won her first All-Round Championship of the season. Miss Meffan took first in the goat tying and a third in the breakdown roping for 137 points total.

Donna Carter was the only other girl from Poly to break into the win column. She took a third in the goat tying event.
