Tractor stolen

Reportedly the tractor was left near the highway, where there were tractor and track marks at the edge of the highway.

(Continued on page 11)

Flying bulb hits Lawler

The Flying Flashbulb of Fate Foto Contest has reached its grand finals with Brian P. Lawler being awarded the Flying Flashbulb of Fate Award. Lawler's entry, entitled "Monotone," was selected as Sweepstakes Winner by a panel of judges consisting of Dave Ramon, photographer for the Tribune, Lee MacRae, also from the Times, and John Healy, head of this college's Journalism Department. Richard E. Porter's entry, "Mortarium," a news photo of last year's Vietnam War Moratorium Day march in San Luis Obispo, was selected as Best Black and White Photo. Shelby Stever's summer shot of sailboats was selected as Best Color Photo. Both winning photos will be printed in next week's Mustang. The remainder of the entries are currently on display in the College Library.

Some of the more notable photos on display at the Library are "Newport Afternoon" by Tony Eastman, a color photo of the Shiraito Waterfall in Fukuwan, Japan; a black and white photo of the two-lined mosaic at Casa Diablo; a landscape photo of the tree-lined meadow at Costal-hy-the-Sea; and a unique time-exposure photo of a breakwater, taken by Gerry Lovelace.

With the end of the Flying Flashbulb of Fate Contest, another chance for all photography buffs to display their photographic expertise. Perhaps at some future time Mustang may once again provide the impetus for photographers to come forth and reveal their technical creativity.

Board still probes

Student discipline and procedures are once again in the vanguard with the start of the academic year.

During the July meeting of the Board of Trustees for the California State Colleges, an existing resolution was passed giving the Trustees the power to promulgate rules of conduct in matters of student discipline. The measure was passed after failure to pass a set of stringent rules to deal with student discipline. The resolution, according to Trustee William A. Norris, was an emergency measure to deal with any problem that might occur at the beginning of the coming academic year.

During the July meeting the trustees expressed their wish to see a set of concrete student disciplinary procedures, and the students represented at that meeting expressed their desire for a fair set of procedures.

It was decided that student organisations and the individual colleges would submit recommendations for disciplinary procedures and the Board would study these and report at the Sept. meeting of the Trustees.

Paul Banks, ASI Pres., said that he attended the meeting of a newly formed organisation made up of the student presidents of California State Colleges, where he presented his points of concern over the draft of the disciplinary procedures. Banks said he felt the idea of a Hearing Officer to predicate over a closed hearing was good. Banks however questioned the lack of a provision for a Panel-jury of peers to decide the guilt of the defendant.

Banks said that the idea for a coordinator, who would act as prosecutor, was a good one, but that there was a need for a provision in the rules for a defender upon request by a student. Banks was also against the notification method. He said the mailing of notices was sufficient.

Finally, Banks is against the section of the procedures that will allow college presidents to suspend a student for 10 days without a hearing. The idea is to rid the campuses of troublemakers. However, 10 days, according to Banks, of absences could result in failure of all classes.

These and other recommendations by student presidents will be drawn up in the form of (Continued on page 13)

Haight out of job in fall

Raymond Haight, unsuccessful campaigner for the Democratic gubernatorial nomination, has been fired from his teaching post in the Department of Social Sciences.

Haight was hired last fall as what was termed "an emergency measure" and has taught each quarter since his appointment.

This summer he is scheduled to teach two courses in American government.

The 60-year-old former Redlands (Calif.) high school teacher was not retained, according to Yvonne A. Douglass, secretary in the Social Sciences, because he "was not working on his doctoral degree."

Dr. Clyde Fisher, dean of the School of Applied Sciences, was more explicit. He told Mustang that Haight was hired as an instructor and not as a regularly appointed instructor.

"Mr. Haight has not had a regular appointment," Fisher said, "and his reappointment or non-reappointment is not part of the procedures for the regular teaching staff. The fact that Mr. Haight has not been recommended for the upcoming year is not a negative position on the part of the administration or the Social Sciences Department."

Haight differed with this view of his ouster. In an interview Tuesday he said:

"I think you could say there is an attempt to have professors with the same philosophy at Poly."

Tractor stolen

A Caterpillar tractor is reported to have been stolen from one of this college's agricultural projects, according to Campus Security. The tractor was reported missing from a student technical creativity.
West protests more

The Far West of the United States is experiencing a more rapid growth in student protest on college campuses.

Fifth-ranked, though, is California, in the percentage of college campuses that have experienced student protest. These are part of the findings in a report by the Carnegie Commission on Higher Education and the Center for Research and Development in Higher Education at UC Berkeley.

Dr. Harold Hodgkinson, principal author of the report, entitled, "Institutions in Transition," based his findings on data assembled from 1,230 colleges and universities.

In summing up the report, Hodgkinson said, "One gets the impression from all of this that these high protest campuses are simply exemplary places in which people are more active, more assertive and more involved in something, although that something may necessarily be the welfare of the institution itself."

The report points out that although some areas have had more student protest than others, there is no "safe" region of the country.

New York ranks tops in the states that have the highest incidence of student protest, with 70% of the reporting institutions; Iowa, 44%; Michigan, 49%; Massachusetts, 40%; California, 29%; and Illinois, 26%.

Of all the educational institutions studied, about 30% reported an increase in protest, 44% reported no change, 1% with a decrease and 15% said they experienced no protest.

As to whether a school is public or private, Hodgkinson said there is no significant variation between the two in avoiding protest.

Hodgkinson reported, "It does seem, however, that as 'quality' increases, the incidence of student protest also increases."

As for faculty, he said he found a "quite consistent" pattern at high protest institutions. The study shows "interest in research, lack of interest in teaching, lack of loyalty to the institution, and support of dissident students."

In summing up the report, Hodgkinson said, "One gets the impression from all of this that these high protest campuses are simply exemplary places in which people are more active, more assertive and more involved in something, although that something may necessarily be the welfare of the institution itself."

The Social Science Department at this college is letting three of its best instructors go because they have failed to obtain their doctorate degrees. We are not singling out the Social Science Department, but we are using it because it is one of the few departments that offers courses which are controversial and highly relevant to world and national problems.

Raymond Haight, Anne Fowler, and Harry Woolpert are three teachers who have inspired thought and controversy in a college that has been lacking involvement for too long.

The reasons given for their non-retention are logical; but to the students who are eager to discuss political philosophies, race relations, and such areas that make the political pot boil the reasons the instructors not coming back are not good enough.

These three instructors have given many students a place where and a person with whom to discuss world problems in an open-minded and relaxed atmosphere. The popular image is that students here are not as interested in world problems and do not place these problems on the top of their priority list for a well-rounded education. There are many students here who are interested and who do care about these problems, and this college can expect many more (much to the dismay of the administration) who are going to try to do something about these problems facing this college and the state college system.

We feel that Raymond Haight, Anne Fowler and Harry Woolpert are the kind of instructors that are needed for this college to function as an educational body, especially at this time. We also feel that not retaining these instructors was a gross mistake on the part of the administration.

Hi Everybody!!
Gene Jones made eighteen commercials for the Nixon effort. "Look, I get it from my friends, too," Jones said. "I go to a party and the first thing everybody wants to know is, how can you work for that fascist bastard?" "The problem we've had, in most cases, is Nixon himself," Jim Sage, Jones' top film assistant, said.

"He says such incredible pap. In fact, the radicalness of this (solid pictures flashing) approach is in the fact of creating an image without actually saying anything. The words are given meaning by the impressions created by the stills."

The eagerness of Nixon media men to prostitute artistry—corrupt aesthetics—is another foul odor in a messy house.

"Nixon has not only developed the use of the platitude," Sage explained, "he's raised it to an art form. It's mashed potatoes. It appeals to the lowest common denominator of American taste. It's a farce, a delicious farce; self-deception carried to the nth degree."

Again, a murky house emerges from the gloop; a kind of mickey mouse: film makers who don't believe.

Shuffling about in Nixon's hallways was Roger Alles, a tv studio apparatus innovator. His energies were employed arranging pithy question and answer shows and thinking aloud, "Let's face it, a lot of people think Nixon is dull. Think he's a bore, a pain in the a**.

"He'd always have his homework done and he'd never let you copy."

Put Nixon on tv, Alles said, and "you've got a problem right away. He's a funny-looking guy. He looks like somebody hung him in a closet overnight and he jumps out in the morning with his suit all bunched up and starts running around saying, 'I want to be President."

Alles, who seemed to be the circus wit in a house of mirrors, said that because people see Nixon as a funny looking bore the hand picked theatre audiences and select panels were needed. "To make them forget all that," Alles said.

Nixon's "ethnic experts" in Philadelphia counted one of every three voters there as black. So Alles said, "we definitely need a Negro" on the taped panel show for that "region."

(Continued on page 9)
Phosphates are headaches

by RALPH ALLEN

Our modern-day, heavy-duty detergents have come a long way from Grandma's laundry soap. However, these new detergents, and their additives, are creating headaches for this country's ecologists.

Regular laundry soap was used by almost everyone until it was apparent it would not work in hard water. This resulted in the advent of today's detergents. The problem today is the ecological effect of the widespread use of heavy-duty detergents. The additives in these detergents that are most harmful are the phosphates.

Phosphates are not biodegradable, which means that they cannot be decomposed into inert substances. They are plant and algae nutrients and upset the ecological balance which existed in our rivers and lakes. A current example of the result of phosphate saturation is the "drying" condition of the Great Lakes.

It is interesting to note that all of today's detergents do not contain the same percentage of phosphates. Below is a list of these values as reported by a recent publication of Credit Union National Association (CUNA) International, Inc. The detergents are listed with their respective phosphate contents in ascending order:

<table>
<thead>
<tr>
<th>Detergent</th>
<th>Phosphate Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ajax Laundry</td>
<td>32.3</td>
</tr>
<tr>
<td>Bold</td>
<td>30.3</td>
</tr>
<tr>
<td>Tide</td>
<td>30.6</td>
</tr>
<tr>
<td>Oxydol</td>
<td>30.7</td>
</tr>
<tr>
<td>Salvo</td>
<td>29.3</td>
</tr>
<tr>
<td>Bio-Ad</td>
<td>29.3</td>
</tr>
<tr>
<td>Blist</td>
<td>29.4</td>
</tr>
<tr>
<td>Action</td>
<td>43.7</td>
</tr>
<tr>
<td>BOB'S Car Wash</td>
<td>50.4</td>
</tr>
<tr>
<td>Drive</td>
<td>50.5</td>
</tr>
<tr>
<td>Drill</td>
<td>50.8</td>
</tr>
</tbody>
</table>

The recommended phosphate level is 9.8%. Consumers can begin to return the ecological balance in our nation's waters by using low-phosphate detergents.

Our modern-day, heavy-duty detergents, the additives in these detergents, are creating headaches for this country's ecologists.

Campus drive to gain voters

Voter registration booths will be set up on campus over the days of Aug. 14-16 to register student voters, according to Paul Banker, ASI President.

The booths will be located in the library's main and the student union and will operate during hours of 8:30 a.m. to 7:30 p.m. on Aug. 14 and 5-7:30 p.m. on Aug. 15.

The voter registration drive is a part of a national effort by the National Board of the League of Women Voters and the National Students Association who have contacted Banks to aid in its effort to mobilize the student voters on this campus.

Showing his support of voter registration on campus, Banker said, "I'm confident that we will be able to register at least 35 percent of all eligible student voters.

He added, "I hope that students who have shown such interest in the political atmosphere in the past will take the time to participate in the democratic process now."

Though the program is sponsored by the League of Women Voters, students may help by running the booths during operating hours; any student wishing to help may contact the office at 543-8921.

In closing, Banks said, "It is students who are ever to make sure constructive changes in the system, they are going to have to take part in the democratic process."
Architecture gains 13

The appointment of 13 architects and urban planners to the faculty of the school of Architecture and Environmental Design has been announced by George J. Hassidin, dean of the school.

Edward J. Ward, with an expected enrollment this fall of about 1,400 students studying architecture, architectural engineering, and city and regional planning, the school is among the largest of its kind in the United States.

In addition to the five-year Bachelor of Architecture Degree, it offers courses leading to the Bachelor of Science Degree in both architectural engineering and city and regional planning.

Chancellor Glenn S. Dumke of the California State Colleges has been appointed to the Board of the California State Colleges has the authority of the Commission of Accrediting.

The commission serves to coordinate activities of 25 professional and specialized higher education accreditating organizations throughout the country. Through these groups the commission exercises a supervisory role in the quality of higher education.

Dumke will succeed President Arland F. Christ-Janer of Boston University as a representative on the Commission of Accrediting.

The commission, with headquarters in Washington, D.C., has representatives on its governing board of six constituent associations which in turn have more than 1,450 member institutions.

**Gi scholars gain money**

Veterans attending this college can now receive full-time educational benefits from the G1 Bill by enrolling in 12 course units. Previously, a veteran was required to be enrolled in a minimum of 14 units, according to John Enos, veterans service officer.

The change is part of a bill that boosted GI educational benefits by 25 percent in March. The bill, signed by Pres. Richard Nixon on March 25, increases monthly payments to single veterans from $130 to $175 if they are attending school full time.

Veterans who carried a course load of less than 14 units, but more than 13 units after March 25 are eligible for retroactive payments for the difference between full and three-quarter time allowances. Any students who fall in that category should contact Mrs. Kathy Husam at the Records Office in the Administration Building if their payments have not been corrected.

Students with 10 or 11 quarter units are now considered to be attending school three-quarter time and students with seven to nine units are considered half time students.

Single veterans attending school three-quarter time had their monthly payments increased from $60 to $128. The same veterans attending full time received a $21 increase going from $86 to $107.

Veterans attending this college and going to school full time received a $50 increase from $115 to $165. Three-quarter-time students had their allowance increased from $95 to $128 and half time students jumped from $75 to $100.

A raise from $175 to $230 was given to full time students with two dependents. If he were attending three-quarter time his allowance would change from $130 to $177; if half time it would change from $85 to $114.

**Air pollution study solution**

Many high school and community college science and engineering teachers will be participating in a short course on air pollution here. They are expected to arrive late this month.

Dr. Harold M. Cota, director of the special program said last week that 50 teachers from throughout California have been selected for the short course. Twenty-seven of the 50 teachers are returning for the second time.

The week-long course is being financed with part of a $10,705 grant to the college from the National Air Pollution Control Administration (NAPCA), a similar grant from NAPCA, an agency of the U.S. Public Health Service, made the 1969 event possible.

Dr. Cota, a member of the faculty of the college's Environmental Engineering Department, sponsor of the Aug. 24-28 program, said the participants were selected from applications received earlier this year.

The National Air Pollution Control Administration (NAPCA) has agreed to provide a $50,000 grant for the college's Environmental Engineering Department to continue the special program for three more years.

SAN LUIS OBISPO
Today's military veteran doesn't receive the educational benefits of his World War II predecessor did.

UPI Senior Editor Louis Cassels has this to say about the GI Bill of Rights, enacted in 1944, made it possible for any WWII veteran, however poor to obtain a college education.

A WWII veteran had the right to enroll in any accredited institution, from an expensive private college to a low-tuition state university. The government paid his full tuition, whatever it might be, plus any extra laboratory, library or instructional fees. In addition he received a room- and-board allowance of $75 a month if single, $100 a month if married and $130 if he had two dependents. Under the current GI Bill, a Vietnam veteran who wants to go back to school is eligible for an educational allowance of $75 a month, if single, or $225 if married and attending school full time. The maximum period in which the allowance can be paid is 36 months or four school years of nine months each. The Servicemen's Readjustment Act of 1944 allowed for an allowance payment period of one year plus the period of enlistment, up to 48 months. This eligibility, applied to the room- and-board allowance of $75, $100, and $130. Schooling was required to begin within four years from date of discharge. Congress attached an income ceiling amendment to the education bill in 1946. This meant that single and person wishing to work to add to his veterans administration subsidy was forced to have a combined total monthly income from labor and VA of no more than $175. A veteran with dependents was allowed $200 per month. In 1948 these totals were raised to $210 and $270 respectively.

GI BENEFITS FOUND LAGGING

WW II veterans better off

He also feels that a change in the mood of congressmen in 1963 and 1966 contributed to the different kind of GI Bills. Enos said, "There was more likely a change in public interest programs indicating a stronger desire for people to earn their own way."

Veterans organizations such as the American Legion and Veterans of Foreign Wars heavily lobby congress most of the time. These organizations are mainly responsible for all increases in educational benefits to veterans, according to Enos. "Possibly these organizations just were not influential enough," in 1963 and 1966, said Enos.

Cassels explained that a single Vietnam veteran gets a total of $1,875 a year to finance his college education. He contends that, that sum won't begin to cover tuition at a leading private university.

The veteran UPI writer notes that "even if his tuition is modest—say $375 a year—the Vietnam veteran who is dependent on his GI Bill income has to feed, clothe, shelter and transport himself on $1,300 a year, which is far below the government's own officially defined poverty line."

Enos agrees with Cassels. He doesn't feel the college veteran is getting a fair deal, considering current living expenses. He said, "The veteran is conditioned to the amount he's getting now. Most veterans don't know what the benefits used to be like. The Vietnam veteran started out with $100 per month in benefits in 1968. That was raised to $150 and $270, so he thinks he's doing pretty well."

What about the future? "I doubt if they'll ever go back to the 1944 type of GI Bill benefits," Enos said.

Many irrelevant classes do you have?

Roni Green - Education "It's not the subject that's irrelevant; it's the way that it's taught. It's the teachers that make it irrelevant."

Bruce Patamky - Hist. "A lot are irrelevant, a lot I just sleep through. Things like economics, anthropology, international relations. It just goes in the garbage can."

Barbara Lipton - Education "I guess some of the courses are pretty stupid. I can't even remember what some of them were."

Mike Jenkins - Wildlife Bio. "I still can't see the necessity of taking Chemistry. I know some guys who switched to natural resources since they don't have to take chemistry or physics."

Vicki Grombeck - Journalism "Well, most of the classes that I've taken are pretty relevant, but some of the teachers aren't!"

Monte Ogletree - Arch. Eng. "I think there are many classes that are totally irrelevant to my education. Sociology, psychology, philosophy—maybe it was the teachers.... to me it's a total waste."

Ric Mengham - Arch. "I don't have any irrelevant classes. I can't afford to take any. I think education is pretty liberal... nobody's forcing anything down my throat."

Paul Knot - IT "Most classes I feel are relevant, since in the future they will give you a broader knowledge of the world in general."

How many irrelevant classes do you have?
commemrating the Athletic Department, and its head, Dr. Robert Motz, for their outstanding contribution to P.E., over the past two decades.

Day pointed out that the state has come a long way with its fitness programs, but that a long road is still ahead. He proposed that the college look into the possibility of making coaches and instructors responsible for their F.E. since a part-time coach cannot devote time to his field if he is involved in classroom instruction.

Day was deeply concerned with the training of the younger elementary students. "From kindergarten through the third grade, they are the most important years of training a student physically," states Day. "If we do not start here it will be too late to start in the upper elementary school.

Top jumper gets award

The man with all the watches, medals, and trophies, will have to make room for one more on his shelves. Mohinder Gill, the number one track man on the campus, has been named the "Poly Athlete of the Year." Gill, the top ranked triple jumper in the U.S., number three world wide, will now be under consideration for the California Collegiate Athletic Association's (CCAA) top honor. The CCAA crown will be decided by a vote of a group of sports writers. The voting will take place in the near future.

A native of Chandigarh, India, Gill competed in July with his home country, at the Commonwealth Games held in London. This most recent effort placed him second in his specialty.

He will return to the U.S. later this month to compete in a meet at Lake Tahoe, after which he will enroll in the Fall Quarter.

Library cuts

Despite an approximately 25 percent cut in appropriated funds, the college library will continue to function under normal operational policies during the upcoming academic year. The 1970-71 library budget is $11,005,303, which is $525,176 less than last year's budget. L. Harry Strauss, college librarian, has expressed the library's continuing policy of providing the best possible service to students and faculty members of this college.

The question was raised on adult physical fitness, what can, and should be the school's role. Here again, Day stated this should be handled at the local level. Cities and schools in many districts share facilities to get adult participation in physical fitness.

Day has very definite opinions on how our school system should be run. He believes that the school board should not interfere with the policies, unless asked to do so.

He is all for young people. Day is instrumental in organizing the Economic and Youth Opportunity Agency of greater Los Angeles.

Thursday flick stars Newman

Paul Newman stars in "Cool Hand Luke" this Thursday evening in the Air Conditioning Auditorium. The film will be shown at 7 and 9:30 p.m.

Co-starring in the action film is Arthur Kennedy, who won the Academy Award for Best Supporting Actor for his role in the film. Depicting the harsh life of a Southern prison camp, "Cool Hand Luke" presents Paul Newman in one of his best performances. Newman received a nomination from the Academy of Motion Picture Arts and Sciences for Best Actor of the Year for the film.

The library book budget for last year was $400,000. This year the budget is set at $220,300, or 36 percent less than last year's. This cut means the library will acquire some 18,000 fewer volumes. Strauss cited a recent report in the Los Angeles Times which, in explaining the Cal State budget cuts, described most campus libraries as below national standards by saying that these standards are set by the number of books the libraries have. He says, "The campus library was ranked at number 171 nationwide for colleges with enrollments over 1000." This ranking was done in a 1969-70 study.

A reduction in funds available to the student assistant program comes as no surprise according to Strauss. Last year the funds generated by several Temporary Help positions were transferred to augment the approved Student Assistant budget, resulting in a total appropriation of $87,072. This reduction in total staffing for the 1970-71 prevents a similar transfer of funds. Managing the Library must operate within the basic budget allocation of $45,500. This amount represents a decrease of nearly 52 percent. Strauss indicates that this means there will be fewer student employees hired. He also indicated, however, that the Library hopes to augment funds from other sources with its organizational structure to cover the Student Assistant budget cuts.

The College Librarian wishes to emphasize that although the year's funding will adversely affect the total program, every effort will be made to maintain an effective program in Library Public Services.

Haight’s straits

(Continued from page 1)

"My position on marijuana during the campaign hurt me with some of the upper members of the administration." Haight went on to say that he was not positive about this and possibly it was only rumor.

"If Cal Poly doesn't want faculty members to have opinions on legalizing marijuana this is their prerogative."

Haight feels that his situation is somewhat similar to that of Angela Davis, a UCLA instructor who was not allowed to continue teaching because of her admitted Communist affiliation. Haight said he felt that this college was reacting to him as UCLA did to Miss Davis. He said: "If Cal Poly has this philosophy they must consider an alternative," meaning that this college must come up with a more appropriate reason for not retaining certain instructors.

In reply to the reason given to him for nonretention Haight said: "If they hire people who just have their doctorates they may be impairing themselves." He feels that although some instructors do not have their doctorates they may be able to educate students equally as well with their past experience and knowledge of their subject.

Haight’s plans are somewhat indefinite. He would like to teach in a high school or Junior college but he added that he "always wondered what it would be like to go on welfare."

Boat owners beware

Boat-trailer owners should have wheel bearings inspected frequently if they must back a trailer into water deep enough to reach the axle and hubs.

Though the grease seals on most trailers are designed to be waterproof, the seal can be broken when a hub that is hot after highspeed highway travel is suddenly rolled into cold water.

If water gets into the bearings, it can cause corrosion and break down protective grease. Where evidence of water is found, bearings and axle spindles should be wiped clean and repacked with fresh grease.
