CU guidelines approved

Literally working against the clock, the members of the College Union Board of Governors developed and approved a set of operational guidelines for the Board at their meeting last Thursday afternoon. The guidelines will be presented to Pres. Robert E. Kennedy for final approval.

Prior to the meeting Kennedy had informed Jeff Whitaker, chairman of the CUBG, that it is in order for the Board to come up with a set of guidelines by the end of the meeting. (Kennedy had a set of guidelines he had drawn up himself which he would approve. Kennedy said, "The Management Principles (which were drawn up by Student Affairs Council in December of 1978 and approved by Kennedy) were not designed to be used this long, and I cannot have this Board continue operation without an operational code any longer."

He said later that the set of guidelines which was submitted to him on Dec. 3, 1979 was acceptable generally except in several areas where it violated some of the principles previously set up. "The Management Principles were designed to act like a Constitution," Kennedy said.

Kennedy made it plain that he thinks the CUBG is "doing a fine job," but "there are many important things which it has to do without any guidelines to follow. I didn't want to see this thing carried on to the thirty-third or thirty-fourth meeting." Thursday's meeting was the thirty-second meeting at which the members of the CUBG had been considering the operational guidelines.

During the meeting members went over the proposed guidelines which had been drawn up by Whitaker and several other members prior to the meeting. Several changes were necessary before the guidelines were acceptable to all members. The CUBG was set up as a separate governing body from the College President, the Foundation Business Affairs, one SEC appointee. Voting members include 10 students, who are chosen for two-year terms by a membership committee; two faculty members chosen by the Academic Senate; and one member from the Alumni Board of Directors. Voting members include the College President, the Director of All Business Affairs, the Foundation Business Manager, the State Director of Business Affairs, one REC appointee and one SAC appointee.

More city candidates

Six candidates have lined up at the starting gate for a chance to land one of two seats going up for grabs in the San Luis Obispo City Council election on April 20th. The two City Council seats currently held by Art Spring, who is running for re-election, and Donald Q. Miller, who has stated that he will not seek another term in office, are being competed for by Charles D. Dills, a 48-year-old company; and Frank Rowan, an engineering professor at Cal Poly.

Other issues in the race for the two available council seats are John C. Brown, member of the city planning commission and engineer for the telephone company; and Frank Rowan, an engineer for the Division of Highways.

Incumbent Art Spring has stated that he is anxious to add two more years to his record of six years on the council. Spring has owned and operated the San Luis Motor Company for the past 25 years.

Dr. Billy Mounta, a Health Center physician, offered an open question for man's existence in Tuesday's Project 9 lecture. Mounta approached drugs with a "suspended judgement of skepticism," where drugs are treated as neither good nor bad. "Emotional man is a striving organism trying to achieve certain ends. Man is also a suggestible organism, he responds to his environment," Mounta said.

According to Mounta, the effects of drugs on an individual depend on his environment as well as his suggestibility. "Society, part of man's environment, has become drug-oriented. Some people take a sleeping pill at night. When they get up in the morning, they may still feel sleepy so they take an 'upper' to get them going. Towards the end of the day, if they're too 'up', they take a tranquilizer until they get home to a couple of martinis," Mounta explained.

Mounta pointed out that if man doesn't adjust to his environment he often finds a new one. "There is a perfect example. He didn't like the environment he was living in, so he found Walden and lived there for two years. However, there aren't many 'Waldens' left. A different environment might be found in drugs."

The Project 9 No. 9 lectures are held every Tuesday and Thursday in Ag. 253 at 8 p.m.

Cambria retreat set

In order to encourage discussions on diverse topics as well as group cooking and sports a group of Cal Poly instructors and students will spend the weekend of Jan. 28th at the Y Camp Ocean Pines in Cambria. Last fall's event was a happy combination of the young and old; and the fat and thin. Representing the faculty at the weekend rap retreat are: Carl Wallace, Co-Director of EOP; Brian Donley, Philosophy Department; Jay Featherstone, Mathematics Department; Rob Knapp, Physics Department; Dave Hafemeister, Physics Department; Richard Kreps, Biology Department; and Mike Orth, English Department. Weekend costs will be partially covered by a Danforth grant so that the final cost will be only $4 per person for the weekend. All interested students should apply by campus mail to Professor Knapp and Hafemeister of the Physics Department. Application forms can be obtained in Sci. E-17 and E-18.

W-2 forms

Statements of earnings (Form W-2) for State and Foundation student workers are now available for distribution. Students are requested to pick up their W-2 statements between 8 a.m. and 5 p.m. in Admin. 110 for State employees and in Admin. 112 for Foundation employees.

Donna Johnson, one of ten female Graphic Communications majors, operates a hand-fed platen press.
LETTERS TO THE EDITOR

Editor,

There seems to be existing a paradoxical (and hypothetical) situation here at Cal Poly. I am referring to a recent decision by the Student Judiciary regarding the Educational Opportunity Program (E.O.P.).

The paradox is in the decision which denied M.E.Ch.A. the right to select E.O.P. as an "acceptable cause" to donate 30 per cent of a fund-raising activity because they said the donation directly benefited M.E.Ch.A.

I believe that this decision was also a statement of attitude toward E.O.P. and M.E.Ch.A.

When filling a set of bylaws which would be "acceptable" to the Associated Students, a part of M.E.Ch.A.'s philosophy was to improve the status of all Chicanos people. One tool that M.E.Ch.A. considered very important in achieving this goal was higher education. This automatically implied that of the highest priority in M.E.Ch.A.'s programs was a Chicano recruitment program.

The goal of this program was to gain admittance for Chicanos into any institution and to serve as a catalyst for the reformulation of part of the educational program in California in order to provide relevance to the barrio. In other words, M.E.Ch.A.'s goal was to improve the status of all Chicanos people, not the status of M.E.Ch.A. One of the most important aids in achieving this goal has been the Educational Opportunity Program.

Now we reach another portion of the paradox. Last year an election was held that essentially admitted E.O.P. was of enough concern and importance to donate $6,000 of student funds. M.E.Ch.A. again mistakenly, construed the turnout as a significant cross-sampling of concerned Cal Poly students. As such, M.E.Ch.A. also assumed this sampling overwhelmingly indicated that E.O.P. was an "acceptable cause." Indeed, a precedent here at Poly.

However, as indicated by Mr. Banke and Mr. Turkovich, this year's student administration did not recognize this as a significant precedent. In addition, Mr. Banke indicated that the E.O.P. benefits only those students which are the unfortunate recipients of these funds. When the question of the Athletic Fund was brought up, M.E.Ch.A. was informed that football does benefit all the students of Poly, because "everyone goes to football games."

Apparently this year's administration, advertently or inadvertently, recognizes that education is a privilege and not a right, that a program of aiding students should be in place in M.E.Ch.A.'s philosophy, and that E.O.P. has no benefit to all the students of Cal Poly, or at least not as great a benefit as certain other programs.

The reason is obvious; E.O.P. puts no money into the coffers of a snow-white institution—football sure as a hell does.

Course calls for awareness

It calls for no required textbook. No midterm. No final examination. In fact, it stands as a slap in the face to the traditional structured approach to education. So, what is it?

It is an experimental course being offered for the first time this quarter entitled Awareness. The purpose of the course is to interpret the human experience through interdisciplinary approaches to current social, economic, political and environmental problems.

The emphasis of the course is on student initiated problem solving. Rather than being handed an assignment, being told when it will be due and when he will be tested on the material, the student chooses a problem area that concerns him and works in that area with little or no faculty intervention.

"Students wanted this type of class to enable themselves to become involved in interest of their own," commented Dr. John Mott in a recent interview. Mott, Humanities adviser for the course, stated that the class evolves around "freedom of student directiveness."

Such issues as the Tenants' Association controversy, campus education policies, and the nature of pollution and what can be done about it are examples of problem areas which concern the students in the awareness course.

Film makers relay set

“Bailing the Z,” the first International Super 8mm Film Makers Relay will begin Wednesday, Jan. 17. The 4-week relay is being sponsored by E-Lab architecture students.

Anyone or any group may become an entering “studio.” All films will be shown to the student body.

The First Relay will be held from Wednesday, Jan. 17 to Wednesday, Feb. 3. The topic will be “Story Board.”

The Second Relay will be held from Wednesday, Feb. 3 to Wednesday, Feb. 10. The topic is “Filming.”

The Third Relay will be held from Wednesday, Feb. 10 to Wednesday, Feb. 17. The topic will be “Editing.”

The Fourth Relay will be held from Wednesday, Feb. 17 to Wednesday, Feb. 24. “Sound” will be the topic.

Interested persons or groups should sign up and meet on Monday, Jan. 25 and on Wednesday, Jan. 27 at 10 a.m. at Z Lab, behind the Library. There is no charge.

On Campus Interviews
Oakes and Co. annihilate UCLA

by Mark Colley

The mark of a good team is not to die when behind. The UCLA Bruins learned this lesson Thursday. They started off by losing the first two matches—but again those were the only two to be lost in a 34-6 victory over U8IU. Winning wrestlers were Anderson (134), Morgan (145), Gardner (150), Cooke (156), Finch (187), Oakes (190) and Koplar (197). UCLA's win was by a pin.

Led by sophomore Frank Oakes, the Mustangs battled the Bruins to win seven straight matches in an easy 91-49 victory over Sonoma State Saturday night. The Mustang basketball team, led by sophomore Frank Oakes and Co., defeated UCLA coming off a slow start to defeat the UCLA Bruins last Friday night, 27-4.

But Larry Morgan (145) reversed the losing trend in registering a 6-0 decision. From this point the grapplers never looked back. UCLA was denied a victory for the remainder of the evening. Steve Gardner (150) brought the Mustangs into a tie by blanking his Bruin opponent, 60. Several times, though, it appeared that Gardner might be pinned as he was intentionally on his back for much of his match. But on his back, he managed to accumulate over six minutes of riding time.

The nights featured match between Poly's John Finch and UCLA's Allen Dunn failed to materialize when Dunn moved to victory string by winning a forfeit lower weight class. Ailyn Cooke (187) met the challenge of Dunn by easily defeating him, 8-2. Finch (187) extended the victory string to four by outlasting Alphonso Cummings, 4-0.

But the highlight of the evening was yet to come. Demonstrating why he was picked the Mustang "Wrestler of the Week," Oakes, wresting one weight division above his usual, recorded a take-down after just seven seconds and took only another five to pin his opponent. It was his pin that assured victory for the Mustangs over UCLA.

Just as a story lacks in excitement after the climax so did the rest of the meet. Gary Mauld (190) posted a 15-0 decision over UCLA's Bob Swanson, who is also from San Luis Obispo. Tim Koplar (197) completed the decision. Beginning losses were suffered by Lue Green (118), 6-0, and Gary McBride (130), 6-0. Anderson (134) drew with his opponent, 1-1.

In each of the Mustang victories an essence of winning time was accumulated by the grapplers. Though the extra points awarded had no bearing on the outcome of the matches, the riding time showed the overall dominance California Poly had over the Bruins.

For those who like instant replays, the UCLA match was almost identical to the U.S. International University match last Thursday. The Mustangs started off by losing the first two matches—but again those were the only two to be lost in a 34-6 victory over U8IU. Winning wrestlers were Anderson (134), Morgan (145), Gardner (150), Cooke (156), Finch (187), Oakes (190) and Koplar (197). Mauld's win was by a pin.

Mustangs roll Sonoma

The Mustang basketball team, taking a week off from a hectic conference race, coasted to an easy 91-49 victory over Sonoma State Saturday night. The Mustangs, who lost to Fresno State Friday night, now have a 7-4 season record.

Law Jackson led a balanced attack with 14 points against Sonoma's defense. I*w Jackson led a balanced attack with 14 points against Sonoma's defense.
