**Budget: bleak for education**

by Frank Alderete

Promising that there will be no more "ruinous" tax increases, Ronald Reagan sent the State Legislature a boneless $6.73 billion budget Tuesday. For the first time since the Depression in the 30's, the state government will run out of money, probably in the fall, and have to borrow from private lending institutions to pay its bills.

For this campus, the new budget seems to mean that there will be no salary increases, no new construction, and heavier teaching loads. Construction of residence halls and dining facilities will not be affected by this proposal, because they are financed through revenue bonds. Reagan's budget plan was $53 million less than what the State College Board of Trustees recommended as needed to maintain "the high standards established for the system over a period of ten years."

This campus, under previous state policy requirements, has already stopped recruiting new faculty members, except for emergency situations, and has cut off new enrollments for next year.

"Just as in any family," Reagan said, "there are years in which it is simply not possible to do all that might be desired."

Reagan went to say that because the unemployment rate is much higher than he would like, and that "thousands of Californians are vigorously seeking employment—many of them anxious to work at any job at any wage—state revenues are down down down."

Reagan dismissed educations requests for funds by saying, "It is a tribute to our educators that they express their needs and aspirations as definite requests. However, in a time of acute financial stress, it is one thing for a governor to deal with educators to do it."

**Weed cancer cure**

WASHINGTON UPI—Eight patients dying of cancer in an unidentified medical center showed some temporary relief of symptoms while taking daily doses of peppermint-flavored marijuana extract, the National Institute of Mental Health NIMH said Wednesday.

The doctor who headed the study refuses to be identified, did not plan to publish the results, and was reluctant even for NIMH to describe his findings, said Dr. Jack D. Blair of the Institute's center for studies of narcotic and drug abuse.

All the patients are still expected to die. But during the short time they drank the extract, in some cases their depression decreased, appetites increased, in some cases their depression decreased, appetites increased.

"He didn't want to give us this study," Blaine said. "The place where he was didn't want any research of this kind being done. He was opposed to using this kind of thing on patients." Blaine said all the patients volunteered and signed consent forms.

Dr. Archibald Hill spoke to students Tuesday night on linguistics, entitled 'Sunflowers Over Two Centuries.' Under fire were William Blake's 'Ah Sun-Flower,' Thomas Moore's 'Believe Me If All Those Endearing Young Charms' and Allen Ginsberg's 'Sunflower Sutra.'

Dr. Archibald Hill, the linguist who has done most to explore the intriguing field of linguistic stylistic-literary research, dissected and discussed the content and structure of three selected poems in his lecture entitled "Sunflowers Over Two Centuries."

Under fire were William Blake's 'Ah Sun-Flower,' Thomas Moore's 'Believe Me If All Those Endearing Young Charms' and Allen Ginsberg's 'Sunflower Sutra.'

The didactic lecture topped off Dr. Hill's second day on campus as a guest lecturer. Sponsored by the Art, English, Foreign Language and Linguistics Department and the Fine Arts Committee, the lecture will be a visitation on campus through Friday.

**Linguistics under fire**

One of the foremost leaders in the development of linguistics in the United States spoke before an audience of approximately 80 members of the campus community Tuesday night in the college Theater.

Dr. Archibald Hill, the linguist who has done most to explore the intriguing field of linguistic stylistic-literary research, dissected and discussed the content and structure of three selected poems in his lecture entitled "Sunflowers Over Two Centuries."

The didactic lecture topped off Dr. Hill's second day on campus as a guest lecturer. Sponsored by the Art, English, Foreign Language and Linguistics Department and the Fine Arts Committee, the lecture will be a visitation on campus through Friday.

Dr. Archibald Hill spoke to students Tuesday night on linguistics in the United States.

Fred Schenk, judge of the Morro Bay Justice Court spoke at Tuesday night's Project Number 9 series on some aspects of the courts as they relate to drug abuse.

Schenk feels that the drug problem is not a static one. The opinions of the courts and of the people who are dealing with the drug problem are changing.

The court's role in remedying the drug problem is to point out the impractical consequences involved if you're caught," Schenk stated.

In California, initial jurisdiction in drug cases depends on the category of the offense. In some cases, if a person is convicted of a felony, he may have to serve his sentence in a state institution. In Schenk's opinion, marijuana hurts the user by denying him of his rights to obtain a license or a credential if he is convicted on a marijuana charge.

"If there is an opening for a job, and someone with a drug problem, and one person without this problem apply, it's obvious who will get the job."

"The court's role in remedying the drug problem is to point out the impractical consequences involved if you're caught," Schenk stated.

Schenk feels there is a definite "marijuana movement" towards legalization, but he doubts complete legalization. "The alcohol problem is a lot harder to sell legislators on the idea that since we tolerate the alcohol problem, we should tolerate the marijuana problem."

Schenk pointed out that one of the biggest reasons standing in the way of legalization is that of judging to what degree someone is under the influence of marijuana.

"There are ways of showing the influence of alcohol, but it's more difficult to judge the degree of drug influence. Until there is a means of judging, there will be a little probability that marijuana will be legalized. We have to be able to control it through laws."
The sea, the sky, and the land were convenient disposal sites for all kinds of refuse, and since all three were vast and limitless and could absorb an infinite amount of filth, everything was just dandy. The Inhabitants of themselves into a smaller sararound, crowding and polluting the planet. They decided to spend another S O years or so studying things straight.

**Fellow archies' letter is an 'insult to intelligence'**

**Editor:**

In Monday's Mustang Daily I read a letter sent by a group of architecture students. In part they suggested that a fellow architecture major Jim "get out of architecture," as his opinion about color use is "an insult to the Intelligence of Cal Poly architecture students."

I take no sides here in the controversy about the colors of the Student Union. But I do take issue with the intolerance shown by these students. Design is a subjective thing, with no fast right or wrong, so naturally there is bound to be disagreement. But when that disagreement degenerates into a personal attack, as in the above letter, then all worthwhile discussion breaks down.

Jim King may be right or wrong in his opinion of the colors. But he is less likely to be more admirable than that of his detractors.

Rick Callens
Architecture major

**Prof wants orderly city**

Dilla plans to seek information regarding gas stations in other cities and will conduct a demand against the demand in San Luis Obispo if elected to the council. "I only want to know whether we really need another gas station or not," he said. Dilla proposes to re-evaluate the current city plan so that future needs would be encompassed in the plan and the variants would be held to a minimum.

"I have been an advocate of ecology for the past six years," he said. "I believe that the city's natural resources should be used to their fullest potential."

**Two engineer films featured**

Two films will be featured at a general meeting of the Society of Plant Engineers tonight at 7:30 in Science North Rm. 313. The two films, "Inception Printing Plastics" by Mattel Inc., and "Tire Making" supplied by B.J. Goodrich Co., should be of great interest to students majoring in Engineering Technology, Industrial Engineering, Civil Engineering Technology and Mechanical Engineering. For those interested students who need further information, contact Dr. John Alexander, vice-president of the Society at 543-470.

**ON CAMPUS . . .**

- **thursday, February 4,** the only major sports event of the weekend will pit our men in shorts (No. 1 in the league against Fresno State at 8 pm in the men's gym; still 30 cents . . . **FRIDAY** . . . good day for roller skating . . . Rally buffets can take to the streets at 6 pm when the "Course Marker Omao Rally" begins in the Grand Ave. east, entry fee $1. The location will be shown at 7 & 9:30 in the engineering aud. for 50 cents . . . **FRIDAY** is the last day that applications for the powerful College Union Board of Governors can be accepted, this is a good chance to get INVOLVED in the campus; get involved or go down the tube . . . **SATURDAY** . . . head for the hills . . . **SUNDAY** . . . watch our gamy, gambling. Gimmick Rallye" begins in the Grand Ave lot, entry fee is two bucks per car . . . the Rick "Winning" will be shown at 7:30 . . . **SUNDAY** . . . watch our gameday, gamboling, Grogs take on OMBAC in another grubby game of Rugby behind the basketball courts around 1pm . . . bring your guitars, tambourines, harps, etc. to "The Cellar" coffeehouse for a jam session beginning at 7:30 . . .

**Developers set for seven years, felt that the need for "a salaried homeowner" to represent the community in long over due. He cited the proposed College Union Board of Governors can be accepted, this is a good chance to get INVOLVED in this campus; get involved or go down the tube . . . **SUNDAY** . . . watch our gamy, gambling. Gimmick Rallye" begins in the Grand Ave lot, entry fee is two bucks per car . . . the Rick "Winning" will be shown at 7:30 . . . **SUNDAY** . . . watch our gamy, gamboling, Grogs take on OMBAC in another grubby game of Rugby behind the basketball courts around 1pm . . . bring your guitars, tambourines, harps, etc. to "The Cellar" coffeehouse for a jam session beginning at 7:30 . . .

**EDITORIAL**

"I have the same interests in ecology as most of the students do. I will accept the work and responsibility as a councilman."

**LETTERS TO THE EDITOR**

**Atlas shrugs—too late?**

**Editor:**

Once upon a time there was a rather small group of inhabitants on a rather large planet, with vast quantities of food, clean air, and potable water. Being quite busy luxuriating in this pleasant environment, the inhabitants never gave thought to the possibility that one day the planet might not seem as large.

The inhabitants decided that

Ideas aren't definitive yet

by Mike Beoli

We are definitely going to have a Summer Quarter, but right now there is not a lot that can be said about it, according to George Beatle, associate dean of special programs.

Plans for Summer Quarter are already being formed, according to Beatle, although a lot of the ideas are still in the planning stages and cannot be classified as definite. Plans are currently being developed to determine the budget for Summer Quarter, allocation of faculty, coordination of payroll services, determining special over-time employment rules and determining which instructors will be allowed to teach.

There are two things that cause faculty limitations, said Beatle. First of all, the budget must be received from the state so we will know how many people we can hire and then, because of college regulations, we have to determine which teachers are eligible to instruct said Beatle. The current system allows a maximum of one-third the available faculty to instruct during Summer Quarter. According to Beatle, instructors can teach 10 of 12 quarters before they must take a quarter vacation and they can work a maximum of seven consecutive quarters before a mandatory vacation is taken.

This year the Summer Quarter will last from July 1 until Sept. 1. "At this time," said Beatle, "we don't know how much money the government will give us, but the summer quarter will be about the same size as it was last year." Summer Quarter 1970 had approximately 3,000 students.

Efforts are being made to make the coming Summer Quarter more like the other quarters in respect to course offerings. In the past, the curriculum has basically been limited to classes that fulfill general education requirements. "The scope of what will be offered depends on what the students want to take," said Beatle.

"We haven't decided if we are going to have a pre-quarter survey," said Beatle, "but I don't think it would be advisable to wait until after Spring Quarter registration in order to find student reactions toward the proposed summer curriculum." Several people have asked why the Summer Quarter is starting so late this year. The reason is that no funds were budgeted last year in the 1970-71 budget for the Summer Quarter, it is being budgeted in the 1971-72 budget, in other words, the 1971 Summer Quarter is being paid for by the 1971-72 budget," according to Beatle.

Architecture 'illuminated'

by Roger C. Davis, chairman of the Virginia Section of the Illuminating Engineering Society, is expected to present a lecture on "Lighting and Architecture" in a public address scheduled for 8 p.m. Thursday, Feb. 4, in the Engineering Auditorium.

Davis' lecture is part of a schedule of weekend events on campus during which he will be holding informal seminars with architecture students. His lecture on Thursday evening is being sponsored jointly by the School of Architecture and Environmental Design and the campus student chapter of the American Institute of Architects.

People wishing to attend the architecture-illumination engineer's lecture in the Engineering Auditorium are invited to do so. Admission will be free.

Cagers scar up nonconference enemies

by Jean Corbett

The freshman basketball team tallied another victory Tuesday night with a 74-48 drubbing of cross-town opponent Cuesta JC in a fast moving game. This leaves the Cagers with an overall record of 15-1, as well as their second Cougar defeat of the season.

Behind guard Horace Williams, the Cagers established control during the first nine minutes of play with a 30 point lead. Cuesta was unable to attempt shots from the floor, despite having a higher field goal percentage. The Cagers pushed hard toward the end of the first half in an effort to gain on the Cagers but were only able to narrow their losing margin to 43-33 when time ran out.

The second half of play found the Cagers experimenting with their offense while substituting teams. Once again the Cougars tried to play this up to their advantage but were unsuccessful, thus ending 30 points behind as they had started.

Leading the scoring throughout the game for the Cagers was Horace Williams with a total of 16 points. Other double figure scorers were Skip Williams with 17 points, John Parker added 16 points and Ralph Reese with 15. Impressive rebound figures were also acquired by both Skip Williams and John Parker.

Mustang center Robert Jennings holds third In the CCAA In field goal percentage. The Cougars pushed hard toward the end of the first half In an effort to make the score closer. Despite having a higher field goal percentage, the Cagers were unable to gain any advantage, and the game ended 30-33. This leaves the Cougars with an overall record of 15-1, as well as their second Cougar defeat of the season.

Billy Jackson paced the second half and final statistics with 26 points and 11 rebounds. d'Autremont saw little action in the final half and finished with 3 points.

In that encounter the Mustangs will be seeking revenge for the 40-33 setback the Bulldogs threw at them in Fresno a few weeks ago. In the series between the two schools Fresno has won 36 against the Mustangs' 18.

Leading the Bulldogs will be 8-2 high scoring forward Jerry Pender, who was last week's PCAA Player of the Week. The Mustangs will answer with Billy Jackson, Player of the Week in the CCAA.

Mustang average 81.1 points a game, against the Mustang average of 81.1.

Mustang squad saw action as coach Neale Stoner adjusted his line-up. Billy Jackson paced the second half and final statistics with 30 points and 11 rebounds. d'Autremont saw little action in the final half and finished with 32 tallies.

Billy Jackson, a 6-4 forward, totaled 33 points for Dominguez Hills. He was followed by Manuel Guerrero with 26.

Although entertaining, the game was poorly played. Turnovers and passive defense were distinct characteristics of this school's play. The contest was little more than a warmup, however, for a more severe test in Thursday's toss-up with Fresno State.

In that encounter the Mustangs will be seeking revenge to the 40-33 setback the Bulldogs threw at them in Fresno a few weeks ago. In the series between the two schools Fresno has won 36 against the Mustangs' 18.

Leading the Bulldogs will be 6-4 high scoring forward Jerry Pender, who was last week's PCAA Player of the Week. The Mustangs will answer with Billy Jackson, Player of the Week in the CCAA.

Mustang average 81.1 points a game, against the Mustang average of 81.1.
