Red Cross picks coach to boss fund

The appointment of Coach Ed Jorgensen to the Chairmanship of the 1971 Annual Red Cross Fund Drive was announced this week by Hal Rosenwald, chapter chairman of the San Luis Obispo branch of the American Red Cross.

The annual fund drive will begin on March 1 and will continue throughout the month. Volunteers are now being sought to help in the pledge envelopes. The envelopes will be distributed without solicitation during the first week in March. Envelope pickup by neighborhood volunteers is scheduled for the second week in March.

Jorgensen and his wife, Margaret, have lived in San Luis Obispo since 1947. He coached basketball at this college for 19 years and is presently directing the men's tennis team.

The new fund drive chairman has been involved with the Red Cross for the last twenty years, teaching numerous first aid courses. He has volunteered his services during the last three years as a member of the local chapter board of directors, heading the committee on fund raising.

The chapter maintains plans and facilities to respond to local natural disasters by providing mass shelter and feeding. The local office has within the past year conducted first aid and water safety instruction for over 600 county residents as well as providing counseling services and services for over 600 civilian and military families and dependent relatives in San Luis Obispo. All activities are supported from local funds.

The Jorgensons have three children, two married daughters, and one son who is a Phi Sigma Kappa at UCLA. The chapter maintains plans to provide disaster relief to all areas of San Luis Obispo. The Jorgensons have four grandchildren.

Symphonic band tour

A winter concert tour of the Symphonic Band begins Monday, March 22 and concludes the evening of Friday, March 26, with 11 performances throughout Southern California.

The Symphonic Band will perform the following programs:

- Thursday, Oceanside; Thursday, San Diego; Thursday, Whittier.
- Monday, March 29, and concludes the evening of Friday, March 26 with 11 performances throughout Southern California.

The new fund drive chairman has been involved with the Red Cross for the last twenty years, teaching numerous first aid courses. He has volunteered his services during the last three years as a member of the local chapter board of directors, heading the committee on fund raising.

Tutors' trouble: money

The Business Curriculum Tutoring Lab is funded by the Student Assistance Funds through the department. Tutors are paid $2.00 an hour.

"We keep the expense down by anticipating how many tutors we need on a particular night," explains Wintersteen. "There may be 14 students attending the lab, and we're flexible. We usually have ten to 12 people here each night," says Wintersteen, director of the tutoring service.

One problem in the past has been getting people to come. Wintersteen feels they have been successful because of the many posters that advertise the lab and the good cooperation given by most instructors, since they "become aware of the program."

Largey, it is because of the friendly atmosphere and the ease with which students can locate and participate in the lab.

"We try to remove any obstacles that may keep people from coming," explains Wintersteen. "We want people to come."

Although a success since its beginning early in the academic year, the lab might not survive with the new college budget.

"I don't expect it to be continued next quarter," says Wintersteen, "unless we find some other source of funds."

What is audiometry?

A new course will be offered by the Speech Department next quarter and will be titled Introduction to Audiology. Audiology is the science of hearing and the course will introduce students to the function of hearing, the testing of hearing and the treatment and rehabilitation of the hearing handicapped," according to Mrs. Joyce Wright who will teach the class.

The course will cover the anatomy and physiology of the inner ear, the principles of the hearing mechanism, physics of sound and industrial hearing loss.

Mrs. Wright points out that the course is unique at this college, in that it is an outgrowth of a proposed major, Speech Pathology and Audiology.

Quake aimed at Diablo?

Although a campus instructor has found a series of earthquake epicenters emanating from the ocean and pointing directly to the Diablo Canyon nuclear power plant, a PG&E spokesman said that this does not mean there is a fault in the plant area.

Spokesman for the Engineering Week, a discussion on "Nuclear Power and the Environment" last Thursday was more concerned with the specifics of the PG&E nuclear power plant presently under construction in Diablo Canyon.

Two representatives of PG&E, one of them a former student from this campus, presented the position of their employer to two campus instructors, Dr. Norman Eatough and Dr. Thomas L. Richards. Also present was a representative from the San Francisco base of the Atomic Energy Commission.

Commenting on testimony by campus instructor Ralph Vrana, who maintains that there is a series of earthquake epicenters that constitute a fault and point to the nuclear plant, the PG&E representatives said that their engineers could find no fault in the plant area.

Although there was a considerable amount of information presented, most of it was already known; there were no formal conclusions or resolutions drawn. The audience was allowed to ask questions—via pieces of paper— that were collected by ushers. All the questions were accumulated and then presented to the panel. Although there were about fifty slips of paper, only a few of the questions were answered.

There was no mention as to the possibility of having further talks on the subject.
EDITORIAL

Public not aware of creek pollution

Editor:

Concerns over the pollution of our city's creeks may seem like an old and tired subject to many of you. Articles and letters from a few conscientious people have appeared occasionally in the paper, but as usual, nothing has really been done to stop the pollution problem or beyond that, to plan a useful and natural program of development for our creeks.

I believe the main problem centers around a lack of awareness of the existing situation. I would guess that few of you have ever made the effort to take a walk along our creeks and see what's really happening.

At the beginning of the quarter, thirty-two students enrolled in Dr. Morgan's Awareness of Issues class (Engr. 360X) decided to inform themselves about the actual condition of our city's creeks. The ultimate goal of improving the San Luis creeks was decided upon as our course objective. Our class is an action group and things have been happening. Nine groups of students have surveyed every foot of the creek from Cuesta Park to the city limits near Howard Johnson's. Presently, a comprehensive map of this area is being made that list all of the existing conditions, including the type of land use and incidents of pollution.

We're now at a critical point in our total effort. This creek inventory will be submitted to the City Council in a few weeks with a proposal that immediate action be taken to formulate and implement a plan to clean up our creeks and preserve their natural beauty. The final decision will rest with the City Council.

If you are at all concerned about San Luis Obispo and about the preservation of the creeks, give our effort your support. The exact date of our presentation will be announced shortly so that you may come to the Council chambers and voice your concern. Our inventory will greatly aid the Planning Department in preserving the creek and with enough public support, a plan could begin to develop that would make San Luis Obispo quite unique—a city with freely flowing, clean streams that can be appreciated and enjoyed by everyone.

Letters to the editor

Cycles make mess; hikers don't hurt nature

Editor:

I would like to take this opportunity to thank all the motorized ecologists for taking care of our forest. Since writing my first letter, I have been questioned about why I am against the continual uncontrolled use of the national forests by motorcyclists.

There is no way a person on foot can mix the noise and visual results of motorcycling with the pleasures of a hike. While walking in a forest the hiker wants a chance to explore nature on its own terms, not to subdue or conquer it. While walking a person has a chance to observe and appreciate animals involved in activities that can be considered normal (i.e., other than flight). A hiker leaves no evidence of his passing and places very little stress on the organisms living in the area.

In my opinion motorcyclists alter the physical environment by increasing erosion and stirring up old soil and also because they loud exhausts stress the animal populations, especially during breeding and young rearing seasons. I also know that motorcycling noise stresses other humans trying to use the forest for any other purpose. I would like to see an area of the forest set aside for motorcycle use and the rest of the forest for other users. In few years the results should be apparent and we can all compare the two areas and make up our minds about the degree of damage done to our forests.

Another reason for writing these letters is to just make the motorcyclists realize that their fun is damaging. Most answers to my initial letter emphasized that there is "no" damage. I hope that they will open their minds enough to see that there is damage being done and that there is need for intelligent activity.

Man, whether he likes it or not, has responsibility for the land he uses. We live here not in a civilization but in a community with our environment but as partners. Only with a concerted effort to educate the philosophy of looking at the whole that is within the system will we gain the ability to say "the year 2000 and I am still here."

Have confidence

It'll help you through exams, speeches, class recitations and even just being with your friends. It's something every girl needs. One way to be friends. It's something every girl needs. One way to be introduced.

And one more important fact. Tampan tampens can keep you cool and calm even when you're the center of attention. They can't show abs or absorbent for protection you can depend on. Developed by a doctor so you can depend on. Developed by a doctor so you can depend on. Developed by a doctor so you can depend on. Developed by a doctor so you can depend on.

Course in geography

A new experimental course will be offered for the first time in the Spring Quarter to make available a course in economic geography.

The new course, Geog. 360X, will be a part of the Social Science Department.

This experimental course is part of a "more professional approach" to the need for instruction in geography. This will replace Geog. 318, Political and Economic Geography, for architecture students who need a more relevant approach. Economic geography will later be offered for disciplines that will relate to that particular perspective.

Class seeks aiding hand

College Credit is now available for work done for the Youth Program of the Economic Opportunity Commission of San Luis Obispo County. Ed 222, a community lab, offers credit to the volunteers.

The program is sponsored on campus by Dr. Stanley Brown and Bob Levadson and seeks people of all majors to work with the youth of San Luis Obispo County to develop interest in vocations and participation in groups.

Pam McCoy, a staff member of the program, stated that "graphic arts and business majors are really needed to help in the project."

The program requires proposals for its various undertakings to be presented to government bodies that fund the operations. Due to this, there is a need for someone experienced in "writing complete, accurate proposals," according to Miss McCoy.

Anyone interested in working in the program is urged to submit regular conditional recommendations in BARE 215 on Friday nights. The meetings will be held at 7:00 p.m. Any questions regarding the meeting or the program should be directed to Milo Parsons, the programs director at the RCC center or by calling 544-2319.
**Bowl of trivia**

So you think people have a lot of garbage and useless information stashed away in their heads that they'll never use, do you?

Well, the Special Events Committee, a subsidiary of the College Program Committee, is going to give common people the chance of a lifetime to show off their knowledge of trivia through the festivities of the opening of the new College Union.

The happening, known as the Trivia Bowl, is patterned after television's College Bowl series. It is open to teams of four members each. The teams do not have to be sponsored by an organization in order to participate.

Entry fee is 50 cents per team and must be paid to the CU office by 5 p.m. tomorrow night.

A 40-question elimination quiz will be held at 11 a.m. Thursday in the SLC. The final round will be held Friday at 7 p.m. in the SAC Lounge in the new College Union.

The winning team will receive an honorary plaque and a prize.

Paul Simon — Sports Editor

Irvine victory dashes Mustang playoff hopes

The season since the 1981-82 year ended for the Mustang basketball team with a split of two weekend games. The team edged Cal State Fullerton 80-79 Friday night but dropped a 79-71 decision 34 hours later.

The defeat by the University of California at Irvine set the final Mustang record at 10-10 and probably eliminated Neal Rouse’s team from consideration for post-season NCAA regional play.

By nipping Fullerton, the Mustangs terminated the California Collegiate Athletic Association in second place at 6-2. First place was taken by San Fernando Valley State College, which clinched the title by blanking Fullerton 81-41 Saturday night.

The 18 point equality the 1981-82 Mustang total when the team went 16-7. The Mustangs have not won a conference title since 1966.

Billy Jackson and Lew Jackson had only six and one point, respectively.

An explosive fast break brought the Mustang to within four (41), with 4:11 remaining in the second half. Billy Jackson’s aggressive follow-ups kept the team close throughout the half but the Mustangs could get no closer than three until the final minute.

Both centers had fouled out: Bill George with 18:10 left to play and Bob Jennings with 7:40 remaining. With 3:34 left d’Autremont missed the second of two free throws and on the ensuing rebound play Billy Jackson drew his fifth personal and left the game.

With 3:18 left Lew Jackson’s 36- foot jumper brought his team up to a 63-67 deficit, but the Antelopes’ calm under pressure came up with key hoop by Bill Moore and Troy Ralston to insure their victory.

Jackson took high scoring honors with 22 points, d’Autremont had 14 points, Jennings contributed 11, Chris Hit Lowndes each added 6 points, Randy Genung and Lambie each hit 10 and Billy Jackson had nine.

Fullerton’s ability to stop Billy Jackson handed the league scoring title to its own Tony Rodriguez, Rodriguez, who went into the game tied with Jackson at 20.8 points a game, tallied 18. In a game in which the lead changed hands 13 times in the second half alone, the Mustangs went into the final half minute trailing 75-79. On a fast break Genung scored to put his team up 77-76, and after Fullerton missed a shot Billy Jackson’s halfcourt throw to Lew Jackson added an empty hoop.

Genung turned his ankle on his game-winning basket and was unable to compete against Irvine. Scoring 18 straight points the Mustangs had jumped to a 55-51 lead that was then cut down to 87-83. At halftime the Antelopes led 76-74.

In the second half the game was tied three times and the lead constantly changed hands. Rodriguez missed two free throws with 1:41 left that would have given the Titans a 77-73 lead and perhaps the win.

West Coast wrestling supremacy returned to the Mustangs last Thursday when the grapplers defeated Washington, 25-5.

The grapplers demonstrated the power two days later by overwhelming the opposition in the conference championships, pulling it nine straight for the Mustangs.

The grapplers celebrated their new position on top of the West Coast by running away with the California Collegiate Athletic Association title last Saturday.

The Mustangs captured nine of the ten titles highlighted by John Finch’s fourth straight conference championship.

In winning the 154-pound title, Jack Spates pinned his two opponents. It was Spates’ first chance against the conference after taking three straight matches last week in dual meets against the CCAA.

Guy Greene pinned his first man then took a 9-4 decision to claim the 138-pound title. Ron Shaver at 134 lost the only title bout of the affair by losing 18-14. Steve Gardiner also pinned his first opponent and then took the 143-pound title by winning 16-1.

Lee Torres pinned all three of his opponents in winning the 165-pound title. Allen Cooke used a pair of decisions to claim the 185-pound title. Finch won his fourth title at 197 by taking a 13-0 decision.

Frank Oakes won the 177 title by pinning his first man and then taking a 9-4 decision. Gary MacFie also pinned his first man and took a decision to win the 180 title.

Tim Kopilin continued on his pin-binges by pinning both of his opponents. Kopilin has now pinned his man in seven of his last eight matches. The one he did not was a forfeit decision.

Most valuable wrestler award was passed over the Mustangs and awarded to Ken Turner of Cal State Fullerton. It was Turner who defeated Shaver.

The Washington meet was billed as the battle for the West Coast championship as Washington came in ranked third in the nation while Mustangs were 11th. But since the earlier ratings, the Green and Gold had posted back to back victories over the number one-ranked Oregon State and seventh-ranked Portland State.

Garry MacFie (118) started the affair by taking a 6-0 decision from the Huskies’ Scott Calvin. McBride recorded a takedown after just eight seconds to put the match away.

Greene (128) replaced Glenda Anderson and won a 5-4 decision over Pat Kaveney. Greene won the match with the 1:56 of riding time.

The Huskies fell behind 54 when Shaver (134) posted a 7-4 decision over Mark Kondo. Gardner (143) extended the shutout string carried over from the past weekend by recording a 4-3 decision.

Torres lost his second match of the year. But it took National Champion Larry Ogwens to do it. Torres led Ogwens for a little while but lost, 10-4. It appeared several times that Torres should have a predominance called in his favor but did not, according to the official.

Finch (160) lost the second match of the night by falling to Don Pleasent, 6-3. Pleasant recorded a takedown with 9 seconds left in the bout to gain the victory. Oakes (187) reversed the losing trend by posting a 16-1 decision over Ken Latipper. Oakes led 6-0 before Latipper scored his first point.

Down a weight class, MacFie (177) won a 7-3 decision from Bill Murdoch. It was MacFie’s victory that put the match out of reach for the Huskies.
