Tenure: teacher's haven

by Ann Jones

Tenure... another means much if a college professor is willing to work hard and produce. That's the view of Dr. Fred Harclaroad, former president of Cal State Hayward who spoke Wednesday night to over 200 faculty members and students.

Harclaroad, who now heads ACT, a national educational testing program explained how tenure contracting could be used instead of tenure. Too many teachers use tenure he said "as a haven for academic ineptness." Harclaroad doubts that a good teacher would hurt without tenure. If a teacher were not meeting the standards that he should be given a detailed description of his weaknesses and a year's notice to correct them.

Tenure was only one of the things in education which is a part of the past according to Harclaroad. He went on to talk how higher education must change in the future.

"The old Joe College student is gone. Tomorrow's student will be different. More and more will not go through college—more and more will go in and out of different colleges until they find the school that can give them what they want. Harclaroad feels that tomorrow's curricula won't meet these new students' needs. College curricula are presently based on a four year plan filled with prerequisites and general education requirements which prevent students freedom to change.

"Flexibility is the key word," stated Harclaroad. "Curricula must change so students can move. Many students who know just what they want go to proprietary schools where they can train for a profession and not have to put up with the "gulf" in a regular college.

Harclaroad described two test programs, performance contracting and output measuring, which will help improve the teaching profession. Performance contracting would set a standard for teachers and their accountability could be measured by the output measured. Harclaroad feels that output measuring would be a test on students to see how much they have learned as a result.

The role of the educator is going to have to improve too. Harclaroad quoted Bob Powell, former president of the National Students Association, as saying "the enemy is the staff... they use grades as weapons to protect their 'attitude.'" The student voice also criticizes faculty who are experts in their field but know little about the learning process.

Hopefully educators would be able to find their weaknesses and correct them for the student's best interest.

When asked to comment on the granting of tenure, Harclaroad said "a college president must depend on the judgement of his (the teacher's) peers. He cannot be the personal judge for a $8000 to $80000 investment in that person."

Harclaroad feels this "jury of peers" identification is a better opinion as capable students, "the good and honest students.""When asked to comment on the granting of tenure, Harclaroad said "a college president must depend on the judgement of his (the teacher's) peers. He cannot be the personal judge for a $8000 to $80000 investment in that person."

He cannot be the personal judge for a $8000 to $80000 investment in that person."

Postal unit opened

A self service postal unit has been installed on campus directly beneath the old science building on inner perimeter road.

It will replace the contract station that has served the students and faculty for many years on a five day, 8-6 basis.

The unit will dispense postage stamps in one, 5, 6 and 32 cent denominations. Also 10 cent airmail and 24 cent postcards, 5 cent envelopes, and 10 cent airmail envelopes may be purchased. In addition, customers can buy 50 cent insurance booklets to insure parcels up to $10 maximum value.

Parcels can be weighed, and postage computed for all 40 states and trust or territories.

The unit is open 24 hours a day, 7 days a week.

When customers need postal information at the unit, a phone is provided with a direct line to the office downtown.

"We hope to have it in operation by tomorrow evening," said James Hughes, postal technician in charge of the unit.

Hot sounds set for gym

Sweetwater, fast-rising country-rock group will be in concert March 28 with Linda Ronstadt, the artist whose single "Long Long Time" recently climbed the national charts.

Sweetwater, Swampwater and refreshing Linda Ronstadt will be country-rocking into San Luis Obispo on March 28 with a satisfaction-guaranteed tag attached to their concert that evening.

Playing in the Men's Gymnasium Sunday at 8 p.m., the music extravaganza will kick off the spring quarter for country rock music buffs.

...one of the few aptly named groups in contemporary music," reads a recent press release. "Sweetwater can be placed and reflective, rushing and spectacular.

Their sound is captivating and it flows pleasantly and fully like a small spring river through a variety of senses and experiences.

The term "country-rock" really doesn't say it for the music produced by a flute, conga drums, acoustic guitar, bass cello, base and standard drums.

The information reads: "The relation between the bottle of pure spring water and a good river is about the same as the relation between Swampwater and Sweetwater live. Both are good. Both serve different ends." Sweetwater bottled is available on twr Reprise albums: "Sweetwater" and "Just For You."

Barefooted Linda Ronstadt will be backed by Swampwater in a seven piece roped outfit as she gets down on the male portion of the audience when she sings things like Bob Dylan's "I'll Be Your Baby, Tonight."
This institution not perfect

Editor:
The past few weeks have been filled with allegations, condemnations and some contrived attempts at confrontation. During this time I have read the letters to the editor column and listened to many individuals speak out on issues that concern them.

This institution, that we call Cal Poly, is certainly not perfect; it has many faults and shortcomings. Letters to the editor and some student comments of late have portrayed this college as totally bad; thoroughly corrupt, dishonest and ineffective.

As students we are often portrayed as idealistic, concerned about humanity, prejudice, honesty and individualism. Phrases like “do your own thing” and “what the good people in the world think and believe” are idealisms that I believe we should each try to make “reality” in our own lives. It seems to me that we often condemn, condemn and discriminate against groups of people, whom we have never even met, more or less talked with...

Many things, these days, bother me, but this much I know—each of us as individuals must begin to change ourselves, to work for betterment and good, and not add further negativity or violence into an already confused world. Before we arbitrarily apply our morality to others let’s apply to ourselves those responsibilities which our ideals demand of us.

A few students get a great thrill of coming to the College Union to “Arena” and cheering for their side (right on). Yes, if you disagree with someone call him a pig, fascist or some other name...Is this the atmosphere that solves problems?

Paul D. Banks

EOP neglect worries grad

Editor:
As a June, 1970 graduate of Cal Poly, this past week-end gave me the opportunity to visit S.L.O., the new College Union building, etc. However, I soon became distressed upon hearing the move underway to stop the student allocation to the E.O.P. program.

In a special election held last spring, the A.S.I. elected to assess themselves an annual fee to help contribute to the E.O.P. program. However, it now seems that some students who are opposed to the contribution last year and themselves in a power position, where they would like to see the money go to other "interest" areas.

Before I go any further, remember that the E.M.A.M. contribution for this school year gives several E.O.P. students the opportunity to attend college.

Also remember that the overall G.P.A. in the E.O.P. is 8.6. Some of the student leaders have charged mis-handling of funds in the E.O.P. office and the contribution for this school year find themselves in a power position, where they would like to see the money go to other "interest" areas.

I want to ask the students at Cal Poly not to be misled by efforts to do away with the student allocation to E.O.P., particularly since only a year ago the students voted to allocate them-selves this fee! Certainly a more relevant reason for elimination of the student contribution to E.O.P. must be brought forth by Mr. Banks and his friends. Please let me A.S.I. and Finance Committee representatives know your feelings.

Dick Barrett
A.S.I. Vice-President, 1970-1971
Summer school has 300 courses

A tentative list of courses that will be offered for the 1971 Summer Quarter are available to students, according to George Beatle, associate dean of special programs.

"The purpose of the course listings," said Beatle, "is to give students a general idea of what will be offered during the summer so they can better plan their Summer Quarter schedules." Over 300 courses will be listed in the catalog with each of the college's schools participating in the Summer Quarter curricula.

Many plans for Summer Quarter are already being formed, according to Beatle, although a lot of the ideas are still in the planning stages and cannot be classified as definite. Plans are currently being developed to determine the budget for Summer Quarter, allocation of faculty, coordination of payroll services, determining special over-time employment rules and determining which instructors will be allowed to teach.

This year Summer Quarter registration will be on June 30, with classes lasting from July 1 until September 14. "The reason for the Summer Quarter beginning so late," said Beatle, "is because there were no funds budgeted for it during the 1970-71 fiscal year. It was budgeted for the 1971-72 budget, which begins on July 1." Planning for the Summer Quarter is approximately 9.3 weeks behind last year's pace. "Another setback is the delay," said Beatle. With full time enrollment projected to reach 1,000 students, 400 students more than last year, approximately the same number of instructors will be hired to teach for Summer Quarter 1971. The reason for not increasing the size of the staff is because of financial problems.

Over 270 instructors will be hired for Summer Quarter," said Beatle. Another factor that has complicated faculty hiring decisions is the determination of which instructors are eligible to teach. The current system allows a maximum of one-third the available faculty to instruct during Summer Quarter. According to Beatle, instructors can teach 10 of 13 quarters before they must take a quarter vacation and they can work a maximum of seven consecutive quarters before a mandatory vacation is taken.

Efforts are being made to make the coming Summer Quarter more like the other quarters in respect to course offerings. In the past, the curriculum has basically been limited to classes that fulfill general education requirements. "The scope of what will be offered depends on what the students want to take," said Beatle. At this point it looks like there will be fewer different courses offered, but it is anticipated that more sections of these classes will be available.

"Right now it is too early to say what the registration fee will be for the Summer Quarter," said Beatle, "but the chances of it being similar to the other quarters is very good." 

Smog controls put to test

The Mechanical Engineering department will be performing tests on several automobiles equipped to reduce pollutant emissions during July and August. Two of the corporations who will be furnishing cars will be the Southern California Automobile Association, and the DuPont corporation.

The DuPont tests work on two basic principles. The first is the use of a thermal reactor, which increases the burning of the fuel after combustion, and thus eliminates many hydrocarbons escaping to the atmosphere. The second principle is the recirculation of the exhaust gas back to the car's fuel to act as a distillate agent, in order to reduce the amount of nitrogen oxide which are normally emitted.

Music Department Head honored at Glee Club's 25th anniversary

H.P. Davidson, Head of this school's Music Department, was recently honored by the Cal Poly Women's Club during the anniversary of the 26th yearly preview performance of the Men's and Women's Glee Clubs.

The performance which was held last Tuesday in the College Theatre was highlighted when Mrs. George Clucas, president of the women's club, asked Davidson back to the stage following the regular program where Mrs. Robert E. Kennedy presented him with a boutoniere. Mrs. Kennedy also presented Davidson's wife with a corsage honoring "her many years of assistance and thoughtfulness."

Mrs. Kennedy served on a committee that helped arrange Davidson's first performance 10 years ago in 1961.

Following the presentation, the joint glee club sang praise to the Music mentor.

Dr. Robert E. Kennedy was also on hand to congratulate Davidson and gave a short commentary for the occasion ending with the words, "Deevey, don't ever retire." Davidson was then presented with a humorous gift by Mrs. C.H. Gregory, representing all past presidents.

Spring Quarter to open crafts center

Since many students have shown an interest in an art workshop on campus, Spring Quarter will usher in the grand opening of the College Union Crafts Center.

Located on the first floor of the CU, the crafts center will provide space and equipment for students interested in most craft fields. Ms. Leslie Griffin, director of the center, said that anyone with a basic knowledge of a particular craft is welcome.

The center, according to Ms. Griffin, will contain many different fields for a variety of activities. It will be divided into three main parts; one portion will be the graphics section. This section will house tools for lettering, drafting, silk-screening and posters.

The second part will be a photography area. It will consist of darkrooms and enlarging equipment. The darkrooms will be operated by the camera club, but can be used by non-members for a minimal fee.

The other section will serve as a general workshop. It will contain tools for lapidary work, minor woodwork, jewelry, macrame, tie-dying, ceramics and leather craft.

The center will be available under three different time schedules. The first is the regular scheduled hours which are expected to be 10 a.m. to 10 p.m. Monday thru Thursday, noon to midnight Friday and Saturday and 3 p.m. to 6 p.m. Sunday. However, the center will not be open at full hours until all the equipment arrives. This means that the first few weeks are subject to change.

The center may be rented before or after closing hours by any group involved in a socially organized project. The only cost for extended hours will be for the instructor present.

Classes will also be held for students who want more detailed instruction. They will be held for two weeks at a time and cost $20. According to Miss Griffin, red tape has kept us from offering classes. But the number of students interested in the classes is large enough to justify offering classes.

One restriction required All or Art 101 and Art 102 students use the equipment. A rule allowing only Art 101 and Art 102 students to enter the area.

A special darkroom permit will also be required to use the photography equipment. This permit may be obtained by demonstrating some knowledge of the equipment and previous experience.

Along with Miss Griffin, three photography instructors will be available for help in the center. They will be there to help maintain the center and to deal with their craft problems.

Bridge over troubled mud

A bridge over troubled mud, might be an exaggerated label for a bridge linking two parking lots, but for those students who have to park below the Aero Hanger a new bridge will prove to be quite a comfort.

In an effort to increase use of the campus' newest parking facility, six students are constructing a bridge. The students, all architecural engineering majors, are building the structure for a senior project.

The bridge will connect the parking lot below the Aero Hanger with the parking lot south of Food Processing, spanning a troublesome creek separating the areas. It will be primarily for pedestrians, since it will now be used in front of the Agriculture Shop, which was built for vehicle traffic. Since the bridge will be six feet wide it also may be used by bicyclists, according to Michael Mahr, one of the students on the project.

The bridge was approved by the Chancellor's Office early this quarter as a campus planning project. It was granted $8,000. Mahr added and has received many donated materials and equipment.

The entire project consists of steps leading down the hill from the upper parking lot, a concrete walkway across the dirt tractor road, and the bridge. The bridge will be made of two blocks, tied together by cables.

Mahr added that a slight reshuffling of the parking lot will occur, in order to facilitate movement of the cross traffic near the bridge. The completion date is not certain, but the students hope to have it finished by Pola Royal.

The construction will be handled completely by the students, with some help from the Architectural Society. Six students on the project are John Basermann, Richard Hernandez, Brian Jones, Michael Mahr, John Denis and Steve Bediquam.
Friday in the CU

Unfinished bowling lanes, a busy burger bar and even duster pool lounge reflect a typical Friday routine in the new College Union.
LIMITED ENGAGEMENT

Two on road plus one; full weekend for netters

Coach Ed Jorgensen's tennis squad will meet two schools from the Far Western Conference this weekend on the road.

Friday at 3:30 p.m., the netters will invade San Francisco State; last year's meeting between the two schools was rained out but San Francisco State and Hayward State are always in contention for the PWC championship.

Hayward State will be the second opponent the Mustangs face. Court tip-off time will be 3:30 a.m. on Saturday. Last year, the netters blanked Hayward State by a score of 9-4. This score was also the tune played against Chico State.

The team will face Chico State, another PFW foe, here at 10 a.m. on Sunday.

"We will be preparing ourselves as much as possible before we take the two weeks off," asserted Jorgensen. "We will be going with our top six men."

Playing for the Mustangs this weekend will be: Dan Lambert (8-3), Tom Martin (7-5), Greg Piers (6-3), John Ross (6-3), Bill Talmage (3-4), and Paul Sumners (8-3).

In action last Saturday, the netters dropped a 7-4 verdict to UC Santa Barbara. Claiming victories for the netmen were Ross and Sumners in a double match while the sole winner in the singles competition was Martin.

On the home court last Tuesday, the Mustangs dropped a close 6-4 verdict to Fresno State bringing their season mark to 6-4.

Larry Byers probably is a mouth full of dirt as Titans host batmen

Coach Augie Garrido's baseball team face Cal State Fullerton today and tomorrow in a three game set at the Titan's diamond. The teams engage in a single game today with a doubleheader on tap for tomorrow.

Fullerton is 5-3 in league play, having lost to Cal Poly Persons twice on Tuesday. The Titans are 8-3 on the year.

The Mustangs took a big step in the right direction Tuesday after coming out on top against defending national and league champion Valley State in a single game, 6-4. The game was the first in league action for the Mustangs while it was the first loss suffered by the Matadors against two wins.

Both teams scored two runs in the opening frame, with the Mustangs taking longer than Valley State did. Gary Knuckles opened the game with a single and advanced on a steal. Valley State added its last run in the last half of the seventh.

The victory sets the Mustangs record at 18 double plays," he continued.

Both teams scored two runs in the opening frame, with the Mustangs ahead to stay with a leadoff home run.

Pitching has been an important factor this year. "Our pitchers have done a good job of not beating themselves through unnecessary walks," said pitching coach Herby Hurr. "Our pitching has complimented the defense as our pitchers have enticed our opponents to hit the ball at somebody. One thing it has meant is 18 double plays," he continued.

Kick out the Jams brothers - and - sisters

Some people get their kicks in the strangest ways. A number of students on this campus are getting theirs from one of the fastest growing sports in recent years, karate or the oriental art of self-defense. Plans are now being made for Shodikan, or Japanese karate class which may be offered next fall. Organizers of the class state that there are over 50 participants in the sport on this campus.

Jackson's
all-league

Two Mustangs lead the selections on a balanced all-league team that was announced this week. Valley State, UC Riverside and Cal State Fullerton each placed one on the team.

Sophomore Billy Jackson and Lew Jackson paced the team, while no Mustangs placed on the second team. Joining them on the first team were Paul McFarland of UC Riverside and Tony Rodrigues of Cal State Fullerton, who is the only repeater of last year's squad.

Most of last year's first team was placed on the second team this year. Mike Washington and Howard Lee of UC Riverside and Emerson Carr of Valley State were moved to the second team while the winners battle for the right to move on to the nationals.

"The strength of each of the teams in the tournament is that everybody has a strong rebounder," noted Mustang mentor Neil Storer. San Francisco State has the leading reounder in California junior colleges last year in Jack Wilson. Seattle Pacific owns 200-lb. Jim Ballard while Puget Sound counters with Mike Jordan and the Mustangs have Jennings. Storer said, "We are concerned with our own offensive consistency and our overall defensive play."

**Last swim**

Sunday will be the last day for open swimming this quarter at the Crandall Gym pool, according to the Women's P.E. Department. The hours will be from 3 to 5 p.m. The pool is open to students, faculty and their families.

The pool will reopen on the first day of the spring quarter. Hours will be 1 to 4 p.m. Sunday will be 2 to 4 p.m.
