**Surging Summer Schedule Fills Campus Calendar**

By end of Summer quarter more than 1,000 people will have been on Poly's campus for conferences, workshops and short courses in a rising pattern of summer activity that leads officials to believe state centered Poly and its mild climate may become one of the most popular summer gathering sites in the state.

California Pipe Trades Council officials from the Los Angeles and Bay areas were at Poly July 22-23 with a group of fifty-five apprentices for the annual "Pipe Week" program.

The western region of the Association of California Teachers who hold their annual general meeting in San Luis Obispo this year held their second session here for the third straight year and brought 550 teachers.

A group of about 25 were here but only 24 attended a meeting which Los Angeles State Teachers Federation Teacher's Association's committee on exceptional children.

July 14-16 the state council of the AAUP held a workshop of around 70, with 60 from the Los Angeles area.

Hosts 110 are expected for the annual School Lunch Workshop July 26-27.

The Agricultural Extension staff institute is expected to have 380 in attendance throughout the state July 24-27.

A group of 25 attending on August 17-19. The two annual regional education workshops set for the Morey gym this school are scheduled for August 15-16. The ninth annual Future Farmers of America Workshop is scheduled for August 2-7.

**Cooper Heads Cadet Corps**

Albert Cooper, former Marine major, sergeant, from Washington, New York, holds a list of temporary duty cadet appointments and distinguished military students at California Polytechnic College.

Cooper is a senior social studies major and will head next year's most unit at an institution.

Robert H. Farmer, Los Angeles, who was selected by the department, is the appointment as a DMS.

In all, five junior cadets were named DMS. Others include: Brian L. Arnold, La Jolla; Edward M. Styke, Poston, Arizona; and Richard L. Dorion, La Costa, California.

The entire group presents an opportunity to the college to expand their experiences in the Army and the Air Force.

**If You Think Kids Can Go Wild, Take a Look at Their Houses**

It may be more than a guess. It's hard to tell, but there's no argument that there are houses which are actually being painted on the wrong campus. But it's the only way to get it right.

There are houses which have been painted with bright pastel colors and by children. And they paint and tell you that there's nothing more beautiful than their house painted in bright pastel colors.

Yet this is a campus where there is a big job to be done, and people who are working to make sure that the buildings are painted in the correct colors.

Despite the Enslow's decision to paint the new building, there is the belief that the houses should be painted with bright colors and not to be painted in pastel colors.

A new paint job and face lift, according to the college, is the way things will be when the painting is complete.

The new paint job will be painted with a combination of light blue, green and pink.

Action has already begun, and by the time the new building is finished, it will be completely painted.

Polly Jump for Fall Co-eds

With awarding of a contract for $111,600 to the Main Poly state, the campus gave the green light for facilities to accommodate on-campus residence of all students this fall, and preparations were being made this week to have everything ready by September.

Most of the work will be spent for remodeling of dormitories and new dorms. Cal Poly's Sexual Instruction Department, which begins fall, will be taken care of at the Poly Poly Poly Poly's new - "Carpet City" - there will be minor remodeling of rooms, alteration of furniture, and control of furniture, and remodeling of rooms, alteration of furniture, and control of furniture.

The Health Center will also receive a major remodeling of rooms, alteration of furniture, and control of furniture, and remodeling of rooms, alteration of furniture, and control of furniture.

The College will also receive a major remodeling of rooms, alteration of furniture, and control of furniture, and remodeling of rooms, alteration of furniture, and control of furniture.

**Dorms De-Maled: Crews Push Job for Fall Co-eds**

The two units are to be named DMS. Others Include: Jim Hayes, Notre Dame, who starred for six inches.

**Faculty Scatters; Campus Escapes Flee Here-to-Yon**

On July 12-14 the attones board of directors will meet at the University of California at Santa Barbara, and will be attended by a number of junior cadets who will be present.

Role of Ag Teacher
Discussed by Coke
At CATA Confab

BY HELEN STURGES

The role of the agriculture teacher in relation to the nation's current farm problem—the problem of how to train to live with an abundance—was stressed by J. Earl Coke of San Francisco, vice-president of Bank of America and former assistant secretary of agriculture, before an audience of more than 400 California agriculture teachers recently.

Coke's address came at the mid-point of the week-long annual convention of California Agricultural Teachers Association held on the university's campus. It was a feature of "Administrators' Day," when superintendents and principals from representative areas of the state sat in on the convention's proceedings. They also joined the teachers in touring the campus.

"We've finally reached a point toward which mankind has been striving since time began," Coke told the group. "Our big job is to learn to handle this abundance so that it doesn't destroy us."

"I guess we can be excused for not looking better up to this point, to add. "As you know, we haven't had more experience with an abundance before. Our present answers, I'd say, are too temporary. The boys and girls you teach are training today who may have to face the problems of living with an abundance and at the same time maintain a strong economy of which agriculture is a basic part."

Sound Training

We shall agriculture's current economic and social problems more than ever demand the sound training of future leaders.

"The future leaders you teach will have to develop must preserve the patience and understanding of the people, for if that patience and understanding is worn out, it could be disastrous to agriculture."
Candiled Dance
Set for Saturday

First in what is planned as a number of summer campus social activities is an informal record dance Saturday night in Hillcrest Dormitory, sponsored by the College YWCA. "A Date with the Stars," planned for 8 to 11 p.m., will be held in the Dormitory lounge. "Candlelight things are planned with a musical group selected by Saturday night's dance is known as "Dance by Candlelight" and there will be no admission. Refreshments will be available.

Health Center Schedule

EL MUSTANG

Health Center has three full-time registered nurses, Mrs. Nabil Hamdan, Mrs. Marjorie Gordon, and Mrs. June Gove, as duty every Monday through Friday from 8 until 5, and a doctor is available from 9 until noon each day that the clinic is open. Mrs. Gove says.

"We give regular punctual shots at the Health Center. You children have the shots you really need without the risk of the vaccine.

Also, students who are around animals or machinery should take the tetanus vaccine, as tetanus is easy to contract from the environment.

Do not over-expose yourself to the sun," urges Mrs. Gove. "It can be dangerous. Get an extra degree of protection, all at once.

Dean Chandler says plans for a new, modern Health Center have been submitted to state architects for approval. Construction of the new building is scheduled to begin in 1959.

**ATHLETES SUMMERIZE THEIR "I-BY-D'ING"

Cal Poly's Physical Education majors are getting some extra training under the direction of the San Luis Obispo city recreation program this summer to prepare them for the fall semester. Some of these men are gaining practical experience playing for the San Luis Obispo City League against San Francisco teams. The rec program will be able to utilize all those eligible for the league's teams, with all the equipment necessary for playing and coaching, along with the sports equipment and personnel attending the direction and game shows and for all the 600 exhibitors companies and organizations that will be attending. The article, prepared under the supervision of electronics engineering personnel, is designed for the admission.

It's one of the few sports in the country where electronics engineering is complete in design and production. The West Coast Electromusic and Electronics Association has Cal Poly's "bouncing ball" system to encourage "creative engineering." The college's state-centered laboratory has designed and built a "bouncing ball" system that eliminates the need for the ball to travel. This is included in the design of the new electronic and mechanical engineering: p - 500. Students have an opportunity for first-hand Information. Noble Twin Named

Acting S-B Provost

R. Noble, 7th brother of Cal Poly's Dr. Glen Noble, has been named an assistant professor of the University of California, Los Angeles (Barbara college)

A professor of zoology, he has been dean of letters and sciences since 1933. The Noble brothers, born in Kansas City, are the parents of three girls, and the couple is active in the activities of the Department of Education and have two sons, one in the University of California, Los Angeles (Barbara college)

Faculty Scatters

(Continued from page 1)

Poly has been carrying on an extensive training program, primarily in farm mechanics. From training in many foreign courses

But Poly has been working with students in the Foreign Operations Administration. It is a student of the American Society of Agricultural Engineers in Chicago during December.

A Norman Crabbishak, head of the editorial sciences department, has returned to the United States by automobile, several days in Washington, where he was invited to attend a conference on educational research, in conjunction with the Foreign Operations Administration.
