The Mustang Flying Association, a student organization at Cal Poly, won an Honorable Mention in the National Safety Program for Flying Clubs. It was sponsored by the National Safety Council and the National Naval Flying Club, Inc., in Maryland. Points are given to clubs for safe flight training, adherence to all rules and regulations, sound flying habits, and general safety. The Mustangs are proud to announce that they won second place in the competition.

Big Dance Turn-out; Next One Saturday!

There was such good attendance at the Big Dance last Saturday night at Hilts Hall, sponsored by the Student Council, that there will be another dance this Saturday night. The dance will be at the Century Ballroom, 2111 L St., beginning at 8:30. Admission is 25 cents. All are invited.

No First Class Students Scheduled for Fall

No first class students will be scheduled for the fall quarter at Cal Poly. This is the first time in the university's history that such a step has been taken. The reason for this is that the university is in a state of flux due to the war.
To prepare more highly-trained personnel for the growing industry of floriculture, the California State Florists association has arranged for the first time on any western campus a two-year program in floriculture this fall by the ornamental horticulture department at Cal Poly, says a brochure just released by the association.

Students desiring to specialize in floriculture may complete a two-year college program, if they elect, complete a regular four-year Oh degree curriculum.

For his two-year program, a student may select such courses in floriculture as Nursery Practice, Flower Arrangement, Floriculture Practices, Marketing, Flower Shop Arrangement, Green House Management, Advanced Flower Arrangement, Retail Floriculture Advertising, and many more including a wide range of electives. One of the courses offered this fall will be Flower Arrangement, which deals with designing and arranging flowers, baskets, corsages, and specifically designs for all occasions. All of the courses used retail and wholesale florist work.

Arabs on Vacation!
With summer vacation in full swing, the Kellogg campus's famous Arabian horses are taking a break from their Sunday shows. The new show series will resume Sunday, October 14, with the usual 6 p.m. start.

Survey Shows Married Housing Supply Limited
A surprising list of figures indicate that Cal Poly's living quarters for married students are in constant demand, and have been released by Howard D. Wood, housing department head.

Since 1945, according to Wood, more than 800 married students have taken advantage of campus quarters.

Last spring quarter figures show that a total of 86 couples lived on campus with 173 trailers occupied, and 12 "Poly Ninos" units filled. Rent for the two types varies from $45 for most to $69 for a trailer, and the "Poly Ninos", depending on whether you occupy one or two bedrooms.

Welding Society
Wayne Marcellin, mechanical engineering major from Bishop, was elected to the office of chairman of Hemp's Welding Society for this fall year. He was informally installed at the A.W.S. regional banquet at Santa Monica College.

Next spring, two new officers from James A. Miller of Long Beach and Secretary-Treasurer Ralph R. Miller of Van Noppen also took office.

Parties took place that the ceremonies and shared in the barbeque, band camp and other picnic activities.

R. C. Wiley is faculty advisor for the organization.

Starting last fall, Carl T. Rhemil and former secretary-treasurer John F. Bartley, both of Merced, have already gone to Fort Bliss Air Force Base of Los Angeles, Wiley reports.

Post Office Asks Visit From All Summerites
Have you checked in with Cal Poly's post office yet? If not, you are urged to do so as soon as possible.

Many students don't seem to realize that even though they are off-campus and receiving mail elsewhere, many instructors, college offices, the library, and health centers send communications and notices to the post office for distribution. This report: "Even if you don't wish a box, drop in and say 'Hi' here, to the post office.

In addition, a problem which he says is always present at the post office is the handling of mail, guest that you plan to leave a forwarding address at your end of term departure. "Mail is still coming in from students who left in June. When we have no forwarding address, we can do it send it back," Brundage states.

Let's Help At Home!

The FOREIGN policy of the United States is one of the most widely discussed and criticized facets of American politics at home and abroad today. Most of us who are quick to criticize would have little constructive advice to offer Mr. Dulles and President Eisenhower if they were to ask us. "International relations" seems too complicated and too distant a subject to cause us much concern.

However, we at Cal Poly have a wonderful opportunity to help our government further these relations. We have had on our campus students from over 40 countries representing every continent in the world. What a chance we are missing if these students don't go back to their countries with stories of the friendly reception they enjoyed here!

We interviewed a group of seven students from Indonesia last week. They were enthusiastic about Cal Poly and happy to have the privilege of studying here. One thing they said, however, disturbed us. "Americans are so busy—they rush to class-room-right home. It's hard to have time to talk. How can we practice our English? We can't stop them and make them listen."

What a small thing for us to do—stop and listen! Like the proverbial rock tossed in the pond; the widening circles of small friendly gestures can encircle the world. This week to talk. I how can wo practice our English?

New 120-Day Feed Trials Underway

A new 120-day trial conducted respectively by C. P. Hultman, Bovine Pest Control association in Chico, and M. L. Brown and Breton feedlot at Portales, N. M., is in progress at the university. The experiment was authorized by Instructionary Harry Mooney, head of the animal husbandry department, and is to determine which feeds are the most economical and suitable for the rapid growth of steers. Animal husbandry students have been assigned the steers as commercial projects to be run on the Cal Poly Farm. Mr. Hultman's "Livestock and Market Feeds" is one of the experiments.

Help—or Does It?

When we are bothered about the magnitude of some of the world's problems and difficulty to take ourselves and our affairs with much seriousness, a few extreme therapies offer us a regnant perspective. Director Donald H. Mason, of Harvard Observatory reminds us that in our own galaxy there are approximately one hundred billion stars. There are not more than a million galaxies within each of our constellations. If we assume that each star has ten planets around it, the total number of planets (like our earth) would run into a billion billion.

CAPT. ULRICH BOUND FOR DUTY IN JAPAN

Capt. Ulrich Bound For Duty In Japan

Bound for duty in Japan, Capt. Donald Ulrich, professor of military science and half-time director of the freshman class, is expected to return his assignment. Capt. Ulrich began his military career as an artillery officer following completion of the University of Pennsylvania. He is a magna cum laude graduate of the university where he schooled in 1936.

Prior to his assignment at Cal Poly, he served as inspector general in Alaska. Capt. Ulrich played a major part in the ROTC department's negotiations for the university where he schooled in 1936.

Co-Ed Swimming! Cal Poly summer students were reminded again this week that the swimming pool in Cramond Gym is open each day from 8 a.m. to 6 p.m. for co-educational swimming.

Richard Anderson, instructor in the PE department, says that 50 summer students are taking opportunity of this privilege and that he'd like to see the other 750 take a swim at least once before the summer passes.

Foothill Blvd. Open 7 a.m. until 1 p.m.

We can't help but wonder how many billions of people will have taken advantage of this privilege and were those who have not taken the bath do so immediately? reminds Mrs. Haggard, "since they are subject to paying out-of-state fees until this requirement is fulfilled."

No Let-Down in Electronics Career Field, Predicts Clarence Radluis

"Opportunities are nothing short of phenomenal in the field of electronics engineering—witness any indication that there will be no let-down," declares Clarence Radluis, head of the electronics engineering department, who recently returned to campus after a year's sabbatical leave in the East. Graduate study at New York University, attendance at several conventions, visits to industry and engineering schools, filled his daily program to capacity.

"A straight half a mile in rumbling along at 15 miles an hour, to pass a crossing, took only two minutes. A passenger train does it in about 6.0 seconds, yet many motorists risk their lives and the lives of their passengers trying to save this little bit of time."

Board of Education

radius reports.

"Theres is need and a place for younger engineers returning to complete degree requirements. The exam-

inations involve five hours of written work and a half-hour oral examination. According to Dr. Art Balskus, education head, at least a half-dozen more will take their examinations during the middle of August.

You Have It Tough?

If you think you have it tough, consider the 81 candidates for Master of Arts degrees who will take their written examinations this weekend. Preliminary examinations begin Friday at 2:30 p.m. and the large group over ever to take these examinations at Cal Poly at any one time.

Take It Easy!

How long do you think it will take a typical half a mile in rumbling along at 15 miles an hour, to pass a crossing? It takes only two minutes. A passenger train does it in about 6.0 seconds, yet many motorists risk their lives and the lives of their passengers trying to save this little bit of time.
