SUMMER ISSUE

'Sharp-Eyed' Cadets Rank Second In Rifle Firing

Cal Poly's small but "sharp-eyed" ROTC representation at Fort Lewis, Wash., ROTC summer camp has placed second out of the 80 colleges in M-1 calibre .80 rifle competition with an average of 210 points per cadet. Col. P. A. Lolselle, PM ST here, made the announcement.

Cafeteria Crew Busy Even In Summer Term

The closing of the cafeterias to students during the summer quarter does not mean the end of the summer cafeterias, Cal Poly is the site of last year, Cal Poly ranks fourth out of the 80 college! In M-1 calibre .80 rifle competition with an average of 210 points per cadet.

Poly's 18-man group was in competition with an average of 210 points per cadet.

Col. P. A. Lolselle, PM ST here, made the announcement.

Student 'Wiremen' Learn-by-Doing On Campus Repairs

Many student electrical and engineering majors are gaining valuable experience this summer working as student electricians for the Cal Poly maintenance department.

Harold Miller, state electrician and head of the organization, explains that the value of on-the-job training in a modern, "learn-by-doing" system of education. He plans to employ as many student electricians as his annual budget allows.

In utilizing all P-1 and R-1 majors as summer electricians, Miller believes that he is giving the men experience which is similar to the type of work they will be doing once they become engineers. Most of these students are working with machines, heating, and installation for Cal Poly, related to their work as summer electricians, Miller believes that he is giving the men experience with problems similar to those they will encounter in their careers.

This summer the crew of student electricians has been working in addition to supplying the guests with three squares a day in cafe this summer too.

In addition to the full time electricians, there are part time student electricians, Miller believes that he is giving the men experience with problems similar to those they will encounter in their careers.

Campus Repairs

This summer the crew of student electricians have been working on the following projects:

* Gerald Ashley of Fort Worth, Texas, was the 1957 student electrician. He is currently working as a summer electrician, Miller believes that he is giving the men experience with problems similar to those they will encounter in their careers.

Enjoy Mezio Trip

Christine Morgans recently took a trip to Mexico. She says it was a trip of a lifetime. The trip was sponsored by the university's travel agency. The trip was arranged by the travel agency.

For those who have been hen-hung up by busy schedules, this new course will be offered in the fall to teach the operation of well advanced machines as the rugweaver, tool and surface grinders, the screw machine and also is not a trilling.

Foreign Students like Poly

(Continued from page 118)

"village" called "Poly View" when the school was just a small college. The buildings in the "village" were the homes of their instructors, and the students. Meat, milk, and rice are available in abundance now although some of the vegetables found in the markets here, according to the school secretary, have decreased in price in the last few months.

The Largest veterans' training program in the world has been set up in this fall. The largest program for veterans training was set up in Cal Poly during the last war. The program was set up to give veterans a chance to catch up with the years taken out of their lives by military service, and the veterans administration says that the program will last for the next ten years.

The Korean Vet Training

World War II veteran training program ends; Cal Poly has share of trainees

The largest veterans' training program the world has ever known has ended for all but a small handful of World War II veterans. It is the 10-year-old World War II (1) -law that has given more than 7,500,000 World War II veterans a chance to catch up with the years taken out of their lives by military service, and the veterans administration says that the program will last for the next ten years.

Also virtually ended is another veterans' training program for disabled veterans. This program, which was for disabled veterans, has been given a "kick" out of their lives by military service, and the veterans administration says that the program will last for the next ten years. The program was set up to give veterans a chance to catch up with the years taken out of their lives by military service, and the veterans administration says that the program will last for the next ten years.

National Production Record
Set By College Guernsey
Beverly Guernsey cows in the Cal Poly herd have recently registered high production records on a twice-daily milking basis. George Drumm, head of the college's animal husbandry department, reported.

A new record was established by Polytechnic Senior, Kittie, with the production of 11,200 pounds of milk and 38,800 pounds of butterfat over a period of 281 days on twice-daily machine milkings. The record, Smithfield class, is now marked as the highest standard for the class formerly set by the large margin of 20 points of butterfat.

Third National Polyteline Junior, Kitty, 4 years, eight months, currently ranks as the top producer of points of butterfat in the college herd with a total production of 9,000 pounds. This figure ranks third nationally in this classification. At present, Kitty’s production is listed nationally as fourth, but established a new California state record.

Most of the high-producing Guernsey cows in the college herd were sired by McDonald Farm’s Juaron who maintained an outstanding record as a sire of high-producing daughters.

FOREIGN STUDENT SHOULD
Know Own Country Before
U.S. Visit: Kirkpatrick

Before a foreign student can expect to gain the greatest benefit from a visit to the United States, he should make sure that he knows as much as possible about his own country.

That’s the counsel of William Kirkpatrick, coordinator for foreign students at Cal Poly. And, by now, both Kirkpatrick and Cal Poly have had long and frequent contact with students from overseas.

For Many Here
Cal Poly has enrolled students from more than 40 foreign countries representing nearly 50 different nationalities. The college has sponsored tours of duty in Thailand, Indonesia, and Malaysia, himself, has supervised the campus visitations of some 180 foreign students since his assignment here. They have represented 35 different countries.

He believes that more and more students from overseas will look for a chance to visit their own country to see where they were born and to experience the cultural and national life found in their home countries.

The theme of the intercultural meetings is “One of the basic requirements (to continue on page 4).”

Kirkpatrick

Cal Poly’s football team last year had four players start who all came from one other college. The usual two were from Cal Poly, but one from every other Southern California college was included.

Antelope Valley Jaycee Has

College Has New Thoroughbred

Cal Poly’s animal husbandry department has received a new thoroughbred mare named “Tempest” in a donation by prominent Los Angeles businessman, Willard D. May.

Of the 16 thoroughbreds "Tempest" and sired by "Reading," imported Australian stallion now at Northridge Farms, Northridge, California, the newest addition to Cal Poly’s green and white quarter horse program, has a track record of six wins, three seconds, and two thirds in sixteen starts. His total earnings amount to $16,000.

Prior to coming to Cal Poly, the horse was used for breeding purposes at May’s Double Diamond Farm near Reno, Nevada.

A thoroughbred broodmare, "Tempest," Cal Poly’s newest arrival, is now in good health. Animal husbandry students will gain actual experience in feeding, care, and management of thoroughbreds in line with the college’s learn-by-doing methods.

Metro Chamber Sponsors Farm-City Liaison

One of California's largest metropolitan chambers of commerce has taken a stroke toward better liaison between the city and the farms.

Financed by members of the agricultural committees of the San Francisco chamber of commerce, the plan includes finding a central location for the agri-business trade and publishing the agricultural journalism program at California State Polytechnic College has been sent to every high school and junior college in the state.

The Cal Poly program—only one of its kind in the West—communicates commercial interest for editorial, advertising and promotional jobs with newspapers, magazines, radio stations, advertising and manufacturing firms and organizations. By journalism majors, some of the city's best salesmen.

California's population changes are making it all the more important for industry to communicate effectively, according to the chamber's report.

Matth's Whiston Figures Sports Cars Are for Old Folks, Too

Those who figure the small sports cars are especially designed for the younger set, have an idea of the surprise they will meet.

One of the many surprises is that more and more of the smaller makes you have to get two or three cars to equal the space in a large one.

A smart man, therefore, who owns a small car, is not limited to those with a permit for experimental drivers.

A working knowledge of the English language is necessary, but if you can name the foreign language you wish to learn, you should be able to deal with a foreign language by yourself.

Only a few of the students have a working knowledge of the English language.

Owners of a "bug" himself, Whiston declared that a student has to be a master of his art:

For a good used car of these makes, you have to get two or three cars to equal the space in a large one. Women like the way the owner spends his money and the way the car is treated.

Changing the rule that more and more of the smaller makes are being imported, the car shown above is the only one of the known brands of a used car that is more than a year old. It has a large fuel tank and economy motor.

In a recent on-campus survey by the Los Angeles Times, over 2000 students declared that they would like to own a Royal Portable than the next 8 makes combined.
