**Women PE Teachers Hit Campus Monday**

"Physical Education—One theme for the seventh annual California Physical Education Workshop for women in secondary schools to be held at Cal Poly Aug. 13 through Aug. 16.

More than 190 women from high schools throughout the state are expected to attend. One of the largest registrations in the seven year history of the workshop has been recorded.

Ludville Verheul, nationally known physical education leader, is the workshop's coordinator. LaRue Fimman of La Habra high, workshop director, reports this year's theme was selected with outstanding leadership and a particularly fascinating program of activities to carry out the theme for the benefit of women physical education teachers in California secondary schools.

Co-ed Classes

Co-ed classes are to be held in conjunction with the women's session, as the women's session overlaps the last week of the men's program. Cal Poly is in charge of the workshop, working with the Basic Department of Education and California Association for Physical Education and Recreation.

Classes of Instruction and the Method of Teaching are as follows: swimming, basketball, baseball, track, tennis. Co-ed classes are to be held in conjunction with the women classes. All classes are restricted to 24 women per section.

Choral classes are to be held under the direction of John Niem, Cal Poly band director, and Ralph Alexander, Cal Poly football coach. In the typical one-week workshop, the classes are to be held on campus facilities.

El Corral Coffee Shop Reopens On Monday, Aug. 20

Duke Hill, El Corral manager, said the popular coffee shop will be closed until Monday, Aug. 20, the professional baseball season opening.

Purposes of the closing is to take care of current student cleaning and repainting, Hill says. He disclosed that the color and water and alcohol would be replaced.

El Corral staff, under Hill's direction, will prepare five huge meals of curries this week for the benefit of Cal Poly's athletic teams.

"Starting in the fall," says Hill, "students may expect to see Cal Poly's athletes more frequently in El Corral. "These meals will feature impressive combinations of curries and rice, Indian bread and fruit cakes and other exciting dishes.

El Corral, which has been closed this month, will open today. According to Al Ayes of the Poly staff, a carry-out service will be available Thursday through Saturday.

El Corral staff will be registered, 'Twix and Roses' as well as other regular employees.

**Student Bug Hunter**

**Gives El Corral A Clean Health Bill**

The El Corral staff, when the hall is sold, says Bob Kastner, Kastner, Biological Science major from Encinitas, La Jolla, that since he has had the job for the past couple of months, "I have not seen a sniff of a mosquito or termite in the building.

Working under the direction of Dr. Hugh Laynor at the health center, and Dr. B. C. Parish of the science department, Bob is responsible for taking care of the campus exterminator.

This aadiator consists of a complete check for "termite" that may be growing in the house, white ants, other bugs and other pests in these units. This "lice" is responsible for checking all the areas of drinking water on campus for possible contamination. He submits his findings in written reports to Dr. B. C. Parish.

**Rally Group Will Select Song Leaders**

Poly's six-man Rally committee, chaired by John Malakian, recently interviewed a number of future coaches as song potentials for the fall quarter.

For the first time in Poly's history, song leaders are to be co-eds rather than student solely. The game will be held during the first two weeks of school, Malakian said.

It is necessary to select song leaders during the summer term, taking placement tests during the summer.

Cadets Cop First Place In Overall ROTC Rating

By Vann Highley

Rightfully "waltzing tall" this week are Cal Poly's 18 ROTC summer camp veterans who have been named the 1965 ROTC western champions with a crown of reigns over 20 western state colleges and universities.

News of the first-place honors was announced by Major Earl W.shi, national executive officer of the American Association of University Colleges.

A safety cap designed to prevent children from opening bottles or containers of poisons, pills, insecticides, medicines, etc., is now available. The cap is being marketed in three states.

"follows through" on all jobs that have been filled, by seeing if the student meets the requirements of employers. Janet hopes that the students now working at the hospital will be able to adjust their school programs with their work programs. He also wishes to counsel student workers that work should be considered to be important in their college career.

Hospital officials state the Cal Poly students have proven to be excellent workers, and the contributions they have made to the operation of the hospital has been highly significant.

Education Program Geared To Keep Drivers On, Not Off Highways: Neyhart

"The purpose of a testing program for drivers, a better law enforcement and a better highway system is to keep drivers on the highways, not off the highways," says Dr. A. E. Neyhart of Penn State university who has conducted a weeks advance driver education course on the Cal Poly campus.

Major achievement program is a modern necessity, explains Neyhart.

"With the thousands of accidents on the American road today, the driver education course is designed to give the student an appreciation of the complexity of the highway problem and to make him a more qualified person to handle the complexities," says the Penn State professor.

More than 41 persons from southern California high schools and junior colleges attended the sessions.

Neyhart pointed out the validity of such a program has been shown in all independent research studies conducted in higher education surveys and without the country during the current year. He said that one half of the people who had received driver education have made on the average a half as many crashes.

HARRY BOWMAN, aeronautical engineering major from Honolulu—hit 919 out of a possible 1000 points, and served as platoon leader and was one of the group's executive officer for his platoon.

BRENDA WELLER, engineering major from San Diego—earned 904 points and was one of the group's administrative officer for his platoon.

AL COOPER, social science major from San Diego—collected 917 points and served as his platoon's executive officer.

RUSSELL BARNETTE, mechanical engineering major from San Diego—collected 917 points and was one of his platoon's executive officer.

JOHN MCDONALD, animal husbandry major from Los Angeles—collected 917 points and was one of his platoon's executive officer.

GORDON WILSON, ornamental horticulture major from Arroyo—hit 916 points and served as his platoon's executive officer.

LARRY LEE, engineering major from Redondo—hit 916 points and was one of his platoon's executive officer.

JOHN McCUNE, animal husbandry major from Los Angeles—collected 916 points and earned a physical proficiency award.

ROBERT KEMP, arts major from Lambert—hit 916 points and was one of his platoon's executive officer.

LITTLE MAN ON CAMPUS by DICK BIBLER

Workshop Gym Show; Open To Public On Tonight

A "Workshop sports night," said Arne, chairman of the physical education and athletic department, will be held Friday night at 7 p.m. in the Cal Poly Fieldhouse.

As part of the physical education department's latest attempt to increase student interest in physical education, the workshop will be held for 180 students and 400 members of the public.

The evening will feature instruction in "juggling," "an evening's entertainment," "planning," "an evening's entertainment," "a man's work..."

Mystery Is Who Built Bulletin Board; Students' Friend Will Have New Location In Hall

BY BOB SPINK
Cal Poly has its own "Whodunit." Have you ever wondered who put the bulletin board up in the basement of the administration building? The board that advertises concerts, appointments, and student clubs is not marked with a "built" label.

A new woman's room is being constructed and the bulletin board is not hanging in its old spot. I decided to find out who was responsible for moving it to the new location and also who built the bulletin board.

Phillis passes

A chance conversation with Phyllis, Cal Poly registrar, determined it was put up by someone who knew its location and did not want it to be moved. The bulletin board is inside the new building.

During the next half hour, Chandler made notes on paper and wrote to different instructors and persons who have been at Cal Poly for several years. There were many different replies.

One person said, "As I remember, it was always there." Another replied, "Oh, let me see, I guess it was there three or four years ago, but I don't know..."

More than one person said, "I know it hag been there three or four years, but I don't know who put it up in the first place."

A man who had been at Cal Poly for several years, said, "I guess it hag been there for 1848, but I don't know who it was built by.

After many years, it was determined the bulletin board had to be moved up some time since 1848, as that is the year the building was constructed.

Then someone recalled it wasn't on hand when the bulletin board was put up in 1846. New we had it moved up somewhere between 1843 and 1848.

"Carl Beck should know," said Chandler. "He's the man who built the bulletin board."

"I don't know," said Chandlers. "I don't know who built the bulletin board."

A patent has been recently issued for a plastic pipe extruder which moves on a tractor and produces pipe continuously, as the tractor moves forward. The pipe extruder lays several pipe, without joints, at a speed of several miles an hour.
