New Construction Affects Many Major Departments

Arrival of a giant crane to lift the steel for Cal Poly’s Statebuilding has put another toe-hold on the mission: a big push for more educational facilities. Completion date is May 15 with occupancy in the fall of 1958.

Under direction of Dr. Clyde Fisher, building program coordinator, the major roster calls for replacement of some outdated office buildings, new quarters for the mechanical engineering department, and the partly completed football and baseball pavilion at the ornamental horticulture unit.

A complete new Student Health Service building, including botanic, clinical, and immediate medical services, has been proposed for the 1958-59 budget.

The College Union’s many activities said Bob Bronxan, Cal Poly’s student body president, should be tailored to fit the needs of the student body as a whole.

The critically injured little girl, after being sewn up by the orthopedic surgeons and the doctors, was transported her to the biological science building, near the experimental farm.

Thief Lifts Sign As Campus Sleeps

The "Welcome to Cal Poly" sign was taken in Sunday afternoon by persons or persons unknown, possibly some of the front entrance of the college. This report was secured by a "very reliable source" that the sign would be returned in the very near future. The Cal Poly student who is making himself responsible for return of the sign wishes to have his name withheld, for various reasons, from this article. He added, however, "The taking of the sign indicates a lack of good sportsmanship, in retaliation for certain verbal abuse on the Fresno State campus by some of our students. I believe this was a good show of school rivalry between Fresno and Cal Poly and it should be considered as such."

The building department obtained the necessary materials, put and fixed the steel, and completed the steel, and completed the building in the fall of 1958.

Five new home economics and extension service, including botanic and clinical offices, have been proposed for the 1958-59 budget.

A new home economics and extension office, the main objective of the committee, was to establish a recruiting program, proposed for the 1958-59 budget.

In the new building, the work area would be increased and installed with new equipment.

The main objective of the committee is to establish a recruiting program for the 1958-59 budget.

Dr. Jerome Dyer, farm management department head, police, the trip is for the student of the area of crops, varieties, land, fertilizers, and east of President McPhee's Science and Agricultural Engineering

**Men Take Cooking in Home Ec Course**

If the way to a man's heart is through his stomach, then perhaps preparing the way is as well.

Jim Richardson, MF major and Howard Lustig, electrical major, take a course in Men's Household Management and Home Service at the Polytechnic Institute. They have a final exam next campus, and are looking forward to spending the day with their group of eight students.

They have learned to prepare a meal, to wash dishes, and to keep a house in order. Now, one day, they will have additional training with advice on preparation of foods. It must be good, because there have been no complaints, the boys say.

But that is no more than the beginning, and against that background, they are planning to prepare a good dinner.

All of the boys are interested in the course, even those who aren't in the course. Some of the other boys in the dormitory are so impressed with the course that they are planning to take it themselves.

The boys have been able to prepare a meal that is as good as any dinner they have ever had, and they are looking forward to spending the day with their group of eight students.

**Men To Visit Missile Station**

The Electronics Department will have a chance to visit the missile station in China Lake next Sunday morning. They will leave their campus at 8 a.m. and be back by 4:30.

According to Richard Lewis, senior electronics major from Glendale and chairman of the IRS Student Branch, the trip will allow students to get a better understanding of what goes on at those stations and to see the facilities in action. The trip is open to all students.

The trip will be sponsored by the IRS Student Branch and will be led by a detachment officer of the IRS. The trip will include a tour of the station and a presentation on various aspects of missile operation.

The trip is open to all students and will be sponsored by the IRS Student Branch. Students will be able to see the facility in action and to learn more about the work that goes on at those stations.

**Women Take Cooking**

The Women's Student Association has organized a group of women students to take a course in cooking.

Don Sunderland, ME major and treasurer of the Student Association, was surprised by the number of women who have signed up for the course.

The course will be held in the Polytechnic Institute's home economics department and will be taught by a local chef. The course will cover basic cooking techniques, as well as more advanced cooking techniques.

The Women's Student Association decided to organize the course to help women develop their cooking skills. The association believes that cooking is an important life skill and that women should be encouraged to develop their skills.

**Student Teachers Association**

The following officers were elected at a recent meeting of the California Student Teachers Association: President, Joan Reiden; Vice President, Donald Fedora; and Secretary-Treasurer, Victor Buceola. They will be in charge of all the activities of the association.

The Student Teachers Association is a group of student teachers who meet to discuss and plan activities for the association. The association has a number of goals, including providing support and resources for student teachers, and promoting professional development for student teachers.

Student Visits Ten Countries 
On Three-Month Tour For $850

By Pauline Woods

"Vacationing in Europe is not an expensive luxury," the newest feature of the California Farm Bureau's "Visiting Out West" program was introduced by A. H. M. Johnson, the institute's deputy director of public relations.

"Our purpose is to acquaint people with the many attractions that lie within the west's borders," he said. "These attractions include not only the natural beauty of the region, but also the cultural and historical heritage that has evolved over thousands of years."

The program, which is financed by contributions from various sources, provides travel opportunities for up to 10 people each year. Participants are selected based on their ability to contribute to the program and their interest in learning about the west.

The cost of the trip includes airfare, ground transportation, lodging, meals, and a small daily allowance for incidentals. Participants are expected to return a portion of their expenses to help fund future trips.

Registration for the program is open to anyone who meets the eligibility requirements. For more information, contact A. H. M. Johnson at the California Farm Bureau Federation office in Sacramento.

---

Administration Offers Pre-Scheduling Advice

Winter quarter pre-scheduling planning meetings will be held on Dec. 6, 11:00 a.m. to noon, to give all students and advising officers an opportunity to make arrangements for pre-scheduling day, Dec. 7, and to become familiar with the instructions on the pre-scheduling day forms. Advertisements will be distributed and explain the use of scheduling materials, including the instructions committee at the meeting, as well as the latest student activities and other campus events.

Obtain White Cards

Students who fail to attend the Dec. 6 pre-scheduling meeting will obtain their white cards while pre-scheduling from the Registrar's Office upon presentation of either a receipt for the payment of the registration fee or a card that requires payment, which will be obtained at the registration desk.

For students who need advice in planning their schedules, a white card program and other sources are available. The goal of the white card program is to provide students with assistance in scheduling during the quarter, and to help them plan for future semesters.

Sign When Completed

The advisor with whom you meet will sign your white card and date it as it is satisfactorily completed. In some cases this step may be completed on Dec. 6, while in others it may be necessary to return on the same day.

Load Conjunction

On pre-scheduling day, Saturday, Dec. 8 students should report to schedule advising and meeting. Students having Saturday classes or who are engaged in college activity on that day should obtain a note from the staff member to be scheduled if the student desires to appear at a time other than as scheduled.

The student will be scheduled for a 15-minute appointment with his or her advisor, who will fill in the student's white card. Students who have not attended the Dec. 6 meeting may schedule on day.

Battalion

The student advisor meeting will be held at 8:00 a.m. in its regular classroom.

Final Exam Schedule

FALL QUARTER 1956-57
December 14-16

The final examination period, which begins December 14, is designed to accommodate the needs of all students. The purpose of the final exam period is to provide students with a structured and distraction-free environment to study for their exams.

The final exam period will run from December 14 to December 16. Each class will be scheduled for a 3-hour exam block during this period. The exact start and end time for each exam block will be announced by the instructor.

Final exam schedule for classes meeting MWF, MWF, MWF or W

Final exam schedule for classes meeting TuTh or TuTh

For more information, contact the Registrar's Office or your advisor.

**Architectural Majors Plan Future of Baywood Park**

Architectural engineers are going to help shape the future of another coastal community—this time, Baywood Park, near Morro Bay. Working under a special scholarship established by the Baywood Park Chamber of Commerce, a team of six architectural engineers has already begun the study of Baywood Park to consider a future residential, commercial, industrial, and recreational area. Sessions meet every Monday at 10:45 a.m. at the Chamber offices.

**Handicapped Cowboy Tackles Rodeo World Wearing Brace**

Working under a handicap is nothing unusual for Benny Sedgwick. A Cal Poly animal husbandry major from Palm Springs, Richard (Benny) Sedgwick matches courage with another rodeo career when only 20 years old, he confounds his limitations to become one of the nation's top cowboys, working under a handicap consisting of a left arm brace. Born in Ammon, Idaho, Sedgwick began a riding-roping career when only 15 years old. In England he was awarded the position. His many, varied interests include a hobby of mechanical gadgets. Another recent instructor addition from outside the United States is Charles Harold from England. John E. King, of Pasadena, is a former rodeo champion, a social sciences major from Palm Springs, Va. Harris, the cat°t! Comes, and a member of the Cal Poly rodeo team, has been the chief of rodeo clowns in the Baywood Park Chamber of Commerce rodeos, and is scheduled to return for the winter season. He plans to round out his year's time competition at the Veniceville Rodeo this weekend, and then at Needles. He proudly wears the engraved gold silver belt buckle awarded him for being the only living rodeo clown to have won the coveted saddle bronc event at a major rodeo. Benny modestly admits, "I have never won a championship." BICYCLE Campus Travel

**NEWMAN HAYBRIDGE**

Members of Cal Poly's Newman Club and friends will take a hayride to celebrate the fall season tonight, according to George Persons, the club's chairman. The group will meet at 9 p.m. at the Old Mission Church in San Luis Obispo, and carry-away from there to the hayride, which will be complete with horses. George says he wishes the hayride would be held at the end of the rule.

"The Customers Always Write..."

Dress Or Redress

Dear Editor:

Don't complain that the clothing that the young ladles of Cal Poly are wearing today is anything other than the rule of modern dress.

Of course we all know that with the coming of new fashions, that we revolutionized the schools, and also knew that many people were not in favor of it.

It is not an unusual thing to see a typical student walking into E Corral, dressed from the sheep barns, with three days growth of beard, wearing a three-week-old overcoat, and wagging a tail that has been chopped and crushed by every cow or whatever else they have over in the Ag department.

Nothing is said to these gentlemen, simply because they look like this whenever they have chosen to do so.

For as I'm concerned, if the college officials would like to make the ladies wear uniforms, that's the way, but I certainly wish they had said something before enrollment.

I hate to be told what to wear, and what's more, I won't be told what to wear unless the day comes when Central students begin to live as my daughter, with pleasure or not.

When I come to school for an education, and not to compete in dressing up, I expect to be left alone.

Signed: Eileen McGrew

Banish Profanity

Dear Editor:

While one is complaining I'll join the chorus that the boys stop swearing when there are girls near. This is the only reason I would like to see them make up to it.

Opening doors and giving their chairs are entirely unnecessary with more girls and would possibly make us feel uncomfortable if carried to extremes. Is there any law about it?

Signed: Lorna Weber

No Dough

Dear Editor:

My depleted pocket book has recently brought to my attention the fact that both the students and Central students are out of dough.

Now, we can't ask our students to walk in town in the dark and get a sandwich to give them over a couple of blocks.

I have been taking my girl into town and giving her money along around eight a.m. and out of pocket.

I have been in the habit of carrying a few small bills in my purse on Sunday evening, say 5 or 10, so that I can afford to feed them and still register next quarter.

Signed: John "No" Dough

TO SAY THE LEAST

By Alton Pryor

At the end of the Spring quarter, this columnist left off with an article discussing the new uniform drill. I would like to pick up where I left off by saying the same old arguments will be used. As a matter of fact, so many people have come out in favor of a new outfit, I'm afraid I'll have to change my mind.

While on the subject of girls, I am reminded of a discussion about whether or not certain types of events could be attended. I'm sure you have all heard about the recent student and fraternity brawl. One suggestion seemed real appropriate—a band concert.

Everyone seems concerned about costs on campus. Therefore, that is why Student Body Proxy Ed Slevin asks for a vote by showing their right hands. It never fails to bring at least three left hands into the air.

Congratulations to Sigma Omega Beta for directing the attempts by student body leaders to take the torchlight parade from its assigned route into theaters and other business houses. The several attempts by one leader found the parade going to a asha la, would be much more ao in a flaming jet. On one of the local wife's clubs is going to make a new outfit of buttons and bows to hold it.

Latest rumor going around campus is a raid—into theaters and other business houses. The señorial attempts by one leader found the parade going to a asha la, would be much more ao in a flaming jet. The parade is directed at the girls, however—some women at odd.

Postmaster Margaret Hoyt asked an interesting note to her P.O. wall: "To All Students! Congratulations and my sincere thanks to the 400 students who have not lost the combination of their post office boxes, (signed) Margaret."}

Bulldogs Overpower Poly For 21-13 Win
Cal Poly's Big Green turned the Victory Bell over to the Fresno State Bulldogs this night, but not before battling exhaustively to retain the possession. More than 11,000 spectators watched 80 minutes of Poly's rough football battle with the Bolling City, the schools of the Western Intercollegiate Conference. The Bulldogs are more likely yet reverberating over Cal Poly's thirteenth battle-worn. Designated nine-point underdogs by sportsc rapa, the Mustangs bunted by some 800 Poly players and local housewives early in the game and were left quality in the crowd. In the first half, Poly had enough to keep the Bulldogs in the game at intervals, but the score remained 0-0.

They pulled out all the ropes in the third quarter, Poly's running the third quarter of the Mustangs moved within one point of the Bulldogs when Dick Bock and followed his way up to the FSC 18, and out- fingers the Bulldogs running ground attack by the Mustangs moved within one point. The extra point kick was wide and the Mustangs set 11 minutes left to play. Dick Anderson Mustang's wo will be able to improve on their release from the service.

Intramural Basketball Next

Next on the schedule of Intramural activities slated here at Poly will be a basketball program. A meeting of the team representatives has been scheduled for November 20 at 6 p.m. in Grandel gym. Pete Cutine has been appointed as chairman of this year's Intramural basketball program.

It's for Real

by Chester Field

SULTRY SCENE WITH THE HOUSE-PARTY QUEEN

She sat next to me on the train that day.
And a wave of perfume wafted my way
A dangerous scent that is called "Fire Ball"
Deliberately made to drive men mad.
I tried to think thoughts that were pure and good
I did the very best that I could.
But alas, that perfume was stronger than I.
I gave her a kiss... and got a blank eye!

If nothing stronger has its dangers, in smoking at least enjoy the real thing, the
Big, Big pleasure of a Chesterfield King!
Big size, big flavor, smoother all the way through. It's packed more smoothly by hand-rolled.

Like your pleasures big?
A Chesterfield King has everything!

It's that new V8 in the '57 Chevrolet.
It's as quiet as a contented cat and
as smooth as cream... and it's
cat-quick in response when you call
for action!

No household tabby sitting in a sunny
window ever purred more softly than
Chevy's new V8. engine. You can
carefully tell when it's idling.

But when you nudge the accelerator,
you know it's there, all right! Its right-
now response keeps you out of higher
emergencies. It overpowers steep hills
with such ease they seem like level
landscape.

This new Chevrolet V8 puts up to 245
high-compression horsepower under
your command! It's easy, sure—but as
tame to your touch as a purring pussycat.
Come try the smoothest V8 you
ever put to a toe.
