Mozart festival set for August

by Pat Thorne
Staff Writer

The summer is a lazy time for a lot of people. Vacations, trips, and fresh entertainment are a matter of course. Going along with this relaxed attitude of summer attractions is the first of an annual event—the San Luis Obispo Mozart Festival.

Other festivals have become a trademark of the warm months of the year, and have become popular. The most spectacular, being the Santa-Clara Bach Festival and the Peter Brit Music and Arts Festival in Oregon.

The Mozart Festival, which is a tribute to Wolfgang Amadeus Mozart, is the latest addition to the classical music scene. Community leaders of San Luis Obispo feel that this city will be ideal for a festival of this sort, because the climate and town are both beautiful during the summer. The dates for the event have been set for August 6, 7, and 8.

The idea of the festival didn't just happen. Begun by Clifton Swanson and John Rice of the music department at this school, it has been in the talking stage for almost four years. When John Ellis, a well known obitist who will solo in the festival, performed with the school orchestra last year, he offered some help on the festival plans.

Then, last September, a few community leaders met to form the Mozart Festival Association. Dr. Jerry Jorgensen of San Luis Obispo served as president. For the last nine months, the twelve members of the board have been gathering donations for the festival from private parties.

The months of planning have paid off. The Mozart Festival will feature some of the top performing West Coast artists in the classical field. Harry Sings, concert master for the Peter Brit Music and Arts Festival, will perform Mozart's Violin Concerto No. 5 in A major Sunday, August 7. John Ellis will perform solo and also with the Los Angeles Wind Quintet.

The August 6 concert will be co-sponsored by the Cal Poly Associated Students, and will be presented in Chemshel Hall in the College Union. It will be the largest of the three concerts.

Tickets are available in the College Union for the three two-hour concerts. Cost per concert is $1.10 for students and $2.00 for adults.

Phone strike hits pay scale for men, penalties of 14 percent of top five year wage with a minimum of 812 per month and a maximum of 874 per month, increase of monetary pay scale of company health insurance policies to compensate for rising health costs, and no removal of prior negotiated clauses.

The present lack of a guaranteed cost of living wage standard, reclassification of town wage scales which determine wage scale according to the size of the town, shorter pay progression schedules which would allow for pay raises according to skill as well as the three year top pay scale for women and five year top pay scale for men, penalties of 14 percent of top five year wage with a minimum of 812 per month and a maximum of 874 per month, increase of monetary pay scale of company health insurance policies to compensate for rising health costs, and no removal of prior negotiated clauses.

Governor Ronald Reagan's recent budget cutbacks set the agenda for the California State College Student Presidents Association (SPA) convention at Los Angeles State last weekend. According to AIS President Pete Evans, who represented this school, the major issues kicked around were foreign students tuition, increase, decrease in Economic Opportunity Program (EOP) funds, and loss of faculty positions. He said the student presidents plan to pressure state legislators to override Reagan's budget veto in these areas.

Evans, who is an assistant in the business department, and his wife, Myron, are now attending state schools and successful opposition of a measure to introduce tuition for graduate students. Evans says if the SPA is successful in stopping passage of tuition for all students, it will mean a savings of over $5 million for students at this school.

The local union of the Communications Workers of America went on strike as of 3 a.m. yesterday. The strike is in conjunction with a nation wide strike which went into effect simultaneously and affects all workers of the American Telephone and Telegraph Company. John Wines, president of CWA Local 9424, said that the strike will affect 320 local workers of Pacific Telephone and Telegraph of which 260 are local union members.

No telephone or switchboard operators at this college will be affected by the strike. Because most telephone usage involves the direct-dialing system, students should find no difficulty in placing calls.

Phone company managers haven't seem to be worried about the walk-out. One spokesman for the company related that during a similar incident several years ago, people from other cities as well as students helped fill the gap while strikers picked.

Phone company managers haven't seem to be worried about the walk-out. One spokesman for the company related that during a similar incident several years ago, people from other cities as well as students helped fill the gap while strikers picked.

Among the demands are provisions for a substantial general wage increase to offset the present lack of a guaranteed cost of living wage standard, reclassification of town wage scales which determine wage scale according to the size of the town, shorter pay progression schedules which would allow for pay raises according to skill as well as the three year top pay scale for women and five year top
ASl business in progress

by Grift Royce
A wide variety of topics ranging from dormitory election to pre-season feeding of the football team were discussed at the Tuesday meeting of the Summer Insular Committee (SIC).

Old business was aired with a suggation by the president that a committee be formed to set forth proposals for the day care center. Information about day care centers in operation on other campuses has been successful elsewhere and make recommendations to SIC.

Dormitory representatives, or rather lack of it, was an issue which initiated a drawn out discussion. After dormitory elections today the presidents of the respective dorms will be invited to participate in the SIC meetings.

New business touched upon the importance of registering 18 to 20 year olds for the upcoming state and national elections. The Student Housing Service Code was presented for discussion. A meeting today at 1 p.m. will be held by the ASI Vice-President Marianne Donohi to discuss and clarify the articles in the proposed code. This meeting will be held in the ASI offices.

Staff, a survey taken several times here in the last few years, is a rating survey conducted by students to evaluate instructors. The merit of such a survey, as well as the $750 price tag for the project, was questioned.

The football team, its care and feeding, was the final topic to receive the scrutiny of the president and the members of SIC. Almost 17,000 has been set aside to feed the 60 member squad for several weeks during pre-season training. The value of this large expenditure will be determined at the next meeting. The two and one-half hour meeting was a warm up for what is to come next Tuesday. The major issues yet to be resolved include the Student Housing Service Code, this college's membership in CSCSPA, and the football team's $7,000 meal ticket.

Pay raise veto
by Reagan not supported here

This college's faculty and students are on record as supporting efforts to override Governor Ronald Reagan's veto of salary increases in the current state budget for 1972-73.

Laurence H. Carr, president of the United Professors of California chapter on this campus has sent messages to state senators and assemblies urging them to overturn the governor's veto of salary raises for state employees and faculty.

Pete Evans, student body president, has written a letter to legislators in which, on behalf of the students, he protested the denial of salary increases and the reduction of funds needed to operate the State College system.

California State Employees Association (CSEA) Chapter 97 on this campus has joined other chapters in the CSEA Region to urge Corrective action by the state's 134,000 State employees who are members. In Sacramento the state officers of CSEA approved action to call a strike later this week if the legislators do not override Reagan's veto on salaries.

Carr announced through a newsletter that UPC protests the governor's accepting a $10,000 salary increase while asking state employees to go without a pay raise for the second straight year. The governor urges members to write state Senator Donald L. Grunsky or Assemblyman William M. Ketchum at the State Capitol to protest the governor's veto and to vote for an override. He suggests letters should be "short and to the point."

The mark of a professional

Of, engaged in or worthy of high standards.

So says Webster. And so we hope you feel of the employed of this school after you turn your head slightly to the right and read what they have to say on the proposed strike vote of the California State Employees Association.

Two weeks ago you read about Governor Reagan's cutback.

A week ago you heard about the CSEA proposal and a further look into the results. This week in favor of not striking and realizing all that was on the line, I applaud that move.

Put it on the scale and weigh things out. On one side there's the possibility—as slim as it may seem today and in California—of more money. But on the other side there's more—and as I see it—much more. There's the bread on the table for who knows how long and who knows how long? Too much risk.

It just doesn't BALANCE.

And then there's the question of professionalism. I'm not quite sure how important that ranks on administration and faculty priorities, but it's evident that it's up there somewhere. It's a taste we'd like to have. For sure, we don't have all that we'd like to have—but that's not the reckoning question at the present moment. Making do with our situation here at this school for others must do throughout the state definitely is an emotional strain, but until the new leader comes in, make do.

Come September, a strike would kill us.

It's good to know that the buck is number two in wisdom, common sense and us.

Run your ads

It had to happen someday. Today's that day. Mustang Advertising Manager Don Tutko said that the classified advertising section is keeping up with inflation by raising the rates. The cost per ad is determined, as usual, by the number of lines and the number of issues desired.

Up to three lines for one issue will be $1.50; two issues $2.25; three issues $3.25; and an additional $1.25 for every additional three issues. Additional lines will cost an extra $.50.

The deadline for each issue's classified ad manager, will be three from 3 to 5 Monday through Thursday to take the ads. I possible those wishing to see them should come in during these hours or call 546-2136.

What do you think of the possibility of a strike by state employees on campus in reaction to Governor Reagan's cutback of their cost of living raise?

by John Teves
Photos by Phil Bromund

I would never condemn any other wouldn't go on strike. I think we faculty member for not par* are professionals. I don't think par*ating in a strike as his that being professional allows us decision should be respected by to strike. When we strike who all. If a strike was lead by ultra- would it effect? Primarily the radical faculty members the students because it would be a lost day in class which we can't make up.

— W. P. SCHROEDER—Dept. Head Educ.—I don't believe a strike is the way to solve your problem. We need to work in more effective ways to get public support for higher education. Working to gain public support is never easy or simple. There is no easy answer. If there were a easy answer, we wouldn't be talking about strike possibilities.

Sterling Grogan—Soc. Set. Sr.—I think it's reasonable. I think considering Reagan's performance the past two years regarding salaries that it's possible to consider a strike as one way of reacting. It would probably be unfortunate for my academic career, but it would have a greater long run effect.

Scott Maughan—Hist. Instr.—I don't think it's possible on this campus. It's possible on others, though. Our real wages are going down. History has shown that the only way to overcomes such a situation is through militant unionism. The legislators feel teachers have an infinite capacity for Just taking what they've been given.

Dorothy Clay—Sec.—I would not favor a strike for financial reasons. Mainly I think it's silly and it wouldn't accomplish anything. I feel the pinch what with the cost of living going up. I don't live in luxury but I don't think you get anywhere with a strike. You negotiate.

Carol Somers—Plcmnt. lntvr— Ken Anderson—Bio. Chem. Sr.— The state employees shouldn't sit back and be passive. Governor Reagan has underrated state employees and their feelings. Two years in a row is stretching it. Why should it be the state employees who are put on the spot to balance the state budget?

Peacian—Salas-Catering Chef—I feel bad about the cut-back. I don't like it and I can't afford to be laid off on account of my family. I might be subject to starvation. I have to be satisfied with what I've got. Inflation is bad, but there is nothing I can do about it because of my financial status. Those who are making enough don't care because they have something to back them up. Those who don't have something to back them up can't afford the single day to be laid off because "Time is Gold."

Job opportunities

Current employment opportunities are available to students, the Placement and Financial Aid Office announced this week.

The positions, titles, and organization addresses are listed below. If further information about the job is desired contact the placement office.

**Junior Air Pollution Engineer:** San Diego County Personnel Department, 403 County Administration Center, 100 Pacific Highway, San Diego, California, 92130.

**Industrial Engineer:** Schering Corporation, Galloping Hill Road, Kenilworth, New Jersey, 07033, Attention: Frank M. Smith Jr., Personnel Services Manager.

**Field Sales Engineers:** Lloyd Kerchas, General Manager, Barber-Greene Telithim Equipment, 50 Victory Avenue, North San Francisco, California, 94080.

**Instructional Engineer:** Ron Regan, Director of Agriculture, Los Angeles City Schools, P. O. Box 3280, Terminal Annex, Los Angeles, California, 90054.

**Sanitary—Environmental Staff Consultant:** G. A. Leinfelder, College Relations, Con标准 Data Corporation, Box O, Minneapolis, Minnesota, 55440.

**Hydraulic Engineer:** G. A. Leinfelder, College Relations, Control Data Corporation, Box O, Minneapolis, Minnesota, 55440.

**Migrant workers taught lesson by grad student**

Two fifty graduate students from this school are working in summer school and community services programs with children of migrant farm workers in Salinas.

The recently-initiated cooperative arrangement is known as the Teaching Internship for Migrant Education (TIME) program. The 180,000 project is being coordinated by the Department of Education under a contract with the State Department of Education's Bureau of Community Services and Migrant Education.

The purpose of the program, according to Dr. Walter Schroeder, head of the Education Department, is to enhance "the development and teaching ability among outstanding young farmers. They are participants in the Agricultural Internship program of the Agricultural Education Foundation. The July seminar is the sixth in a series of the first year of the program. In addition to seminar sessions at this campus the 10 participants will tour the Binton and Brown Dehydration Plant, Stanley Brown Feed Yard, and Union Sugar Plant in the Santa Maria area, and the Diablo Canyon Nuclear Power Plant of the PG&E near Port San Luis. Seminar sessions will cover the following topics: "Communicating Problems of Waste Disposal,” "Goals and Problems of Education,” "Problems of Handling Communications with Groups," and "Influencing People to Take Action."

The three-year program for 30 young men will cover subjects on the state, national, and international levels. The second year will include travel to various areas of the nation and the third year will include travel abroad.

This group of 30 began their leadership development summer in February. Another group of 30 will begin the program in September and a third group a year later.

The program is financed by the James Q. Brown Foundation, Los Angeles, the James Irvine Foundation, San Francisco, and the W. K. Kellogg Foundation of Michigan.

Other participating colleges are the program are Fresno State College, Poly, Pomona, and University of California, Davis.
Old-time fun reappears

If you're tired of the same old Cal poly non-entertainment where the last 30 years have left you high and dry, then why not get back to some good old-time fun like used to talk about?

In short, drive yours and your roommates' body to the house or Barb Stitty at 434 Foxwell. It's going to start happening at 6:30 tomorrow night. If you need a ride, rally around the flagpole in front of the Administration Building at 6:10 and someone will come to pick you up.

Then you're going to be a lot of singing, some good talk, and a whole lot of fun—the kind you used to have. Following this, it will be into the cars and over to the roller rink in Morro Bay. When was the last time you roller skated? When was the last time you kissed your mother good night? Cost is $1.00 and possible sore back.

Pete Evans goes by no other name.

After a couple million phone calls Pete and I finally made contact at my house. We had met once to have dinner, but all I knew about him was what he looked like, that he was rumored to be a "radical," and that he had been elected ASI president in May by a majority of the student voters who had been the largest in campus history.

To judge "radicality" by the length of one's hair, Pete would be a disappointment. To judge by the amount of picketing, that length isn't long enough to be appeasing to anyone except the police and the Texas Longhorns.

Pete Evans goes by no other name. After all, he's a mechanical engineering student who has attended this school for ten years. Originally from Los Angeles, Pete spent three years with the Navy in Japan. Since then he has spent time in various community colleges up and down the Pacific coast. Like many other students, Pete was attracted to this campus because of the beauty of its surroundings, and the reputation of its administration.

Pete's mode of transportation is an Enduro motorcycle and his chief sport consists of running around with his two dogs—one a German Shepherd, and one a "little ugly white thing."

His taste in music is mainly rock. He favors musicians such as Jethro Tull and Santana, but occasionally he says he gets an urge for a little Tchaikovsky.

Along the line of outside interests, Pete has two other friends, recently purchased a bar which he plans to develop into a bar-and-sandwich-place—"hopefully open to everyone."

When asked why he was in college, Pete thought and responded, "Maybe it's because I don't know what else to do."

He sees schools as having a lot of political action, which is his major interest.

Then I asked Pete the million-dollar question, "Why did you run for ASI president?" He answered that the other candidates represented the past and were too engineering driven to bring about student oriented change.

When questioned on his position of cutting back traditional school functions, such as football and Men's Glee club, to provide funds for new programs Pete maintained, "I don't think they (old traditions) approach the importance of the new programs. They are not worth the money they get."

He qualified this by saying ASI funds should be plugged into things that benefit the student body. Pete explained that programs such as a housing office and legal-aid center would benefit all the students.

One of his big objections to the traditional-type functions is that "a lot of these groups are in violation of the regulations they're handed under."

He was referring specifically to Title II of the ASI code which says that all ASI funded programs must be open to all students. He cited as examples of closed membership the ROTC, drill team and the Rally club.

Pete is interested in finding out for the students exactly how their money is being spent. "I think everything on campus should be investigated to the limit and laid out in front of the students."

If he were in Robert Kennedy's position as college president, Pete says he would reduce the bulk and cost of administration of the school. Of President Kennedy he says, "He has too much power on campus and I have too little."

"Nevertheless, Pete was tolerant in his attitude toward Kennedy, saying that although Kennedy is much more conservative than the average student, he is one of the most student-oriented state college presidents.

Pete views money as a sort of necessary evil. "You need it to operate. I like to have enough to do what I want to do."

He hinted that what he'd like to do was create people-oriented changes through political action.

About war, Pete said it was inevitable. About the Vietnam conflict, though, he was much more optimistic. He felt that it was making it obvious that the U.S. produces as many war criminals as any other nation. His indictment of the American people is that they are ignorant or apathetic about wars and therefore, just as guilty.

Throughout the interview, Pete expressed a fear that at all levels of government administration the people are being kept ignorant. He says that through open-air public meetings there is a likelihood of the nation going down with a certain type of civil liberties and personal rights, by popular consent.

According to Pete, the majority of mankind, by its apathy, is headed in the wrong direction. He believes the real criminals are those who see the light, know what is happening, and yet are doing nothing for mankind's betterment, and do nothing about it. However, he says he does still have hope for mankind.

Pete views the human individual as an important entity which does have power to affect its environment. He personally thinks that there aren't enough people exerting their influence "to make a difference." He asked Pete if he had any guiding principle for his life. He replied, "One that I've tried to live by is understanding." "Being un­understanding," "Being un- understanding." "Being un-understanding," "Being un-understanding." He believes that everyone has an intrinsic responsibility to every other man. His practical side showing through, though, he added, "It's too bad that national and racial lines cut that to ribbons. I think the concept of nationals should be wiped out.

That's basically what I got from two hours of ASI President Pete Evans. He's new to the political scene. He says he's not in it for himself. He views the presidential position as only a means to an end of bettering life for his fellow man. More immediately, that means bettering it for his fellow students.

If you expected an all-girl rock band to come on stage with revealing costumes and suggestive actions then last Sunday’s Fanny Concert was a disappointment.

On the other hand if you expected good rock music and a lot of talent from Fanny then your expectations were met in every way. Appearing before some 500 people Fanny charmed and entertained everyone.

The four girls were completely professional. They played and sang on stage as easily as they talked and vacillated backstage.
The girls said they really liked working with Streisand. "Five years ago I never thought," said Alice, "that I would be meeting and working with Barbra Streisand."

The group travels all the time. They had up until February mainly played around the Los Angeles area. Then they began appearing all over the West Coast.

Although talented and experienced, the group doesn't just come by their perfect harmony and rock through sheer luck. They sometimes work from practicing had paid off well. They made the small room sound like a stereo had just been turned on.

"You can talk to me," they sang, "You can talk to me." And you can, very easily.

Onstage their perfectionism and professionalism came through to the audience superbly. They brought the house down with their opening song "It Takes a Lot of Good Loving."

"Yeah," Nicky (short for Nicole) cut in "they kept trying for a long time to get me to come down but eventually they did." 

Fanny last September.
With a really tough practice schedule,*

The Blue Peacock Management firm handles all of the business for Fanny. The girls never are worried with scheduling concerts, advertising, or paying any bills. The firm does all this for them.

Do the girls along well?" Most of the time, "said June.

And what about the sisters? "We need to fight when we were little, but that was when times were pretty rough. We always stuck together, though," June said.

Alice de Bahr (rhymes with "poor") is 21 and independent. "I started playing the drums when I was in second grade. I played in boys' bands until I didn't get along with Dave after a while. I left home at 17 and went to Sacramento," she went on. "I asked who needed a drummer and got hired up with June and Jeannen."

"Why Fanny?" "It's short," Alice explained. "And easy to remember."

Although the girls are young, all 21 or 22, they have a long list of credits to their musical name. According to Barbara Streisand, it is one of the outstanding acts. Through a mutual friend of their manager's, Fanny was booked up with Streisand on her two latest hit singles. A third just released, "Where You Lead," features the instrumentation of three of the girls: June, Jeannen and Nicky.

They performed songs they had composed and written. A few of these are on their latest album, Charity Ball.

"You think you're going but you haven't got a ride," they sang. Fanny is going and the group made its own ride. That ride seems to be taking them straight to the top.
**Relocations at the library**

**Computers get campers sites**

The bookstore has had a very unique history. It began in 1915. Prior to that time, the school relied on local merchants. The bookstore has been located at various places. It began in Crandall Gym and then moved to the basement of the old administration building which now houses the audio-visual equipment.

The bookstore has six departments. The first is the Textbook department which provides on-campus students with personal needs, carries gift lines and other school items.

Special Services department takes care of the miscellaneous services such as selling hard-books, Poly Royal buttons and the Xerox machine.

The Technical Supplies department carries machine shop tools and other items of a technical nature.

The General Supply section carries school items such as paper and pencils, and the General Books collection handles books related to classroom and books of general interest.

The information counter has a file which contains every book in the bookstore.

The final department is the Textbook Area which is restricted to students except during the initial rush at the beginning of the quarter. This action prevents the stealing of books which occurs during the slow periods.

The move completed the integration of the general reference and periodical reference services in room 106. The indexes and abstracts collection were also moved to room 106A and microfilm readers into room 108B. The periodical collection was relocated to the first and second level stack annexes.

The government documents section which includes capped books, the archives, senior projects, maps, and other special materials, also occupies part of room 108 and a capped area in the third level annex.

A major shift in the general stack areas also took place, converting room 301 on the third level into a stack area.

Summer hours for the library are Monday through Thursday 7:45 a.m. to 9:00 p.m., Friday 7:45 a.m. to 8:00 p.m., Saturday 9:00 a.m. to 1:00 p.m. and closed on Sundays.

**Does the library suddenly foreign to you?**

Well, don't think you're losing your mind. Some moving has been done and in a big way.

According to Angelina Martinez, head of public services, a major shift and relocation of library services was undertaken during the quarter break. Miss Martinez says, "We are hoping these moves result in improved services to both faculty members and students." The move completed the integration of the general reference and periodical reference services in room 196. The indexes and abstracts collection were also moved to room 106A and microfilm readers into room 108B. The periodical collection was relocated to the first and second level stack annexes.

**Computers get campers sites**

The new system has increased the number of campers and the length of time that they stay in the parks. There are several reasons for this.

Before Ticketron, the camper and tent set had to take off on their chosen day to look through a country park for a place to spend the night. They were free to move on the next day to a new place or a different park. There was more of a feeling of being on the "open road."

Now, the element of searching for a place to camp is removed. But, so is the freedom of being able to move on to new sights as the urge hits, so campers stay longer in one park.

In short, Ticketron has turned the state parks into a kind of "reservation only" chain of wilderness hotels. At least, so far.

Campers involved in the new system have more botherome problems to consider, though. Since the nights are assigned in a first-come—first-serves basis, the necessity of getting up early to arrive at a park in time to find a good place is changed to one of getting up in time to make it to the nearest Ticketron office by the 7 a.m. opening time. On holiday "rush" periods, that can get pretty rough.

The reservation system plans to expand for national service and outlets in Mexico. Since this would create a national demand for campgrounds, it would provide more users for unpopular areas in both the state and national forest systems.

If the National Forest Service adopts this reservation system, families on either side of the country will be guaranteed a place to stay in a park on the far side of the nation or any park in between. More families will be able to enjoy the national forests, if not more privacy.
Don't lose your loot: use a bookstore locker

Students may be assured of a secure place to leave their belongings while shopping in the El Corral bookstore by using one of the coin-return lockers situated at the front of the store. This is an added service of the bookstore to prevent loss of personal belongings and theft. The lockers may be operated by depositing a quarter and receiving a key. When the key is returned, the quarter is returned. Since the lockers only use quarters, change may be obtained at the check-out windows.

Graduate gets honor

Patricia K. Linder, a graduate of this school, has been awarded a 1977 citation for achievement along with 70 other journalism graduates from different colleges and universities, by Sigma Delta Chi, Professional Journalism Society.

Recipients are chosen on the basis of character, scholarship, and competence to perform journeymen. The decision in each case is made by a committee composed of student, faculty, and professional members of the Society.

Linder, graduated from here with a 4.0 GPA and was awarded the Glen Smith Award for outstanding achievement.

The law section of the library on this campus has good coverage of California statutes, according to Casel, who has taught law here on occasion. Again he recommends humility as the key to learning. He says that asking for help is the easiest way to find what you need quickly. For dealing with landlord-related problems he recommends a textbook, "Business Law-California landlord-tenant model" with rental agreements and examples of real estate contracts.

The July portion of the course introduced a series sponsored by the Student Tenants Association. The courses are scheduled for more specific areas of the law that pertain to their complaint. The law section of the library on this campus has good coverage of California statutes, according to Casel, who has taught law here on occasion. Again he recommends humility as the key to learning. He says that asking for help is the easiest way to find what you need quickly. For dealing with landlord-related problems he recommends a textbook, "Business Law-California landlord-tenant model" with rental agreements and examples of real estate contracts.

The sessions meet at 7:10 p.m. in room 102 of the Student Union.

It is necessary to bring a check in California for payment on contract to a firm in Arizona. California is a legal place to start an action against the firm. Important, too, is the fact that attorneys are not permitted to represent either party in small claims court. Casel states that only the name persons in the complaint may represent his clients, that all cases are situations are permitted. Corporations must authorize a single, representative person to represent one of the persons in a complaint. The name of the individual or representing of a corporation does not appear, the plaintiff may win his judgment. The sessions meet at 7:10 p.m. in room 102 of the Student Union.

"Anything you can give a court, other than your word, which generally, cannot be used as evidence," he advises in preparing a presentation. Be sure to do everything that is not entirely filled in. Keep all receipts and write a check specifically in payment for rent or on contract.

The deputy district attorney for the county handled in the small claims court. In this system work to realize changes.

Edward J. Duchelli, instructor in Radio and Television at this college, is a full-time summer quarter student in English. He is studying for a master's degree. He obtained his bachelor degree at University of Pacific.

Dr. Norman Cracikahnkis, who will be acting head of Social Sciences next fall quarter in the absence of Dr. William Alexander during the latter's sabbatical leave, is spending the summer on the island of Majorca of the coast of Spain.

Dr. Frank Handel, aeronautical engineering instructor in Aerospace Science, is doing research work this summer at Vandenberg.

James Hayes, instructor in Journalism, is working at the San Luis Obispo Telegram-Tribune during the summer months.

Robert Andreas, instructor in Speech, returned from London last week after a quarter's special leave in England to study speech programs at several universities.

Kenneth Schwartz, Architecture instructor, and mayor of San Luis Obispo, is in Manchester, England on a special study trip.

The Vanished People

by Brian McGulnue

part II of a three part series.

Juan Juto, the last surviving full-blooded Chumash Indian, died more than thirty-six years ago near Santa Barbara. His forefathers, the Barbareno Chumash, like the better part of the Indian people were great mariners. They plied their fragile, swift-planked canoes to and from the mainland and the Channel Islands in pursuit of the great wealth of fish that can be found there all year round.

The Chumash of our immediate area, however, lived more off the land than from the sea. Since our coastline is less protected from the strong onrush of westerly winds that daily batter our shores, the Luseno Chumash were limited to fishing on relatively calm days from their villages on San Luis Obispo Bay (Avila Beach), Morro and Estero Bays.

The Chumash of our locale depended on such staples as acorns, wild seeds, crespes, celery, wild roses, rabbits and deer and shellfish with fish being their last consideration. This is not to say, however, that they ignored the seasonal run of the steelhead trout in the entire length of San Luis Creek from Avila Beach, for they revered such fare. They also relied and feared the ferocious grizzly bears that roamed in herds in nearby Los Oso Valley. The Chumash would try to steal small grizzly cubs from their mothers to raise and fatten for eating. Many Indians were mauled for life in these ventures until the early Spanish landowners eliminated the bears to make room for cattle. Like the ancient Chumash, the Grizzly Bear is now completely extinct in California.

The dependence of the Indians on acorns is indicated by the large number of bedrock mortars that can be found in our area. Near permanent villages and oak groves the Indians chiseled and scratched small parabolic holes in outcroppings of rock. Gathered acorns and seeds were shelled and pounded in these mortars to make a flour for gruel and bread. Acorn harvests were usually short but involved practically every member of a village. Good oak groves could yield up to a maximum of 1,400 pounds of acorns per acre, and the Chumash of San Luis Obispo needed all the acorns they could get to see them through the cold and rainy winter.

One such surviving bedrock mortar site exists on this campus, undisturbed by civilization for hundreds of years. Another larger site is on land now used by the county's environmental education campus at Camp San Luis Obispo. A third smaller site was recently destroyed by the construction of a motel near the present day Madonna Shopping Center complex. (To be continued next week.)
Will you help a fellow man?
by Malcolm Bone
Staff Writer

Most of us are concerned with our own needs—keeping warm, eating hearty, better health care services. Don Christman of Paso Robles is a fellow man in need.

Uncontrolled bleeding. It is a major and often serious problem for people with the life-long disease, hemophilia. Hemophilia is a legal defect which results in uncontrollable, non-stop bleeding. It is caused by a basic normal level of factor VIII in the blood plasma, which aids your clotting.

A minor bruise becomes a major injury, particularly on their knees and elbows. If Chris bruises an elbow, he bleeds under the skin and the joint swells. This then requires treatment with factor VIII which Chris estimates the cost at about $40 per 5000 cubic centimeters. This can be replaced on two for one in the same a blood.

"Blood, that's our biggest problem," Christman said. "Most of the bills are taken care of by insurance, those for blood are not. The problem is getting people to donate blood. They always need more. It only takes twenty minutes. But, they hate to. They are afraid of the needle or something." Chris was four months old when his defect was discovered.

For the past ten years, Chris has had a running bill of $700-800 dollars that never seems to get paid off. Chris's parents are at their wits end and can't make the $400 payment. Christman is asked to call Marion's Dough at 566-2111.

Correction

In last week's issue of Mustang it was stated that the School of Engineering and Technology had an enrollment decrease of 3 per cent. This was incorrect. This school had an increase of 11 per cent. The School of Architecture and Environmental Design was down 7 per cent from the 1970 enrollment.

Jewish Meeting

The Jewish Student Union will hold its first summer meeting Sunday night at 7:30 in Room 219 of the College Union. For further information call Brice Judson—546-2380.

More lauds for '71 grads

National awards of merit in architecture presented at Commencement this summer have paid off for recipients. John Beuermann, 1971 graduate, received the Alpha Rho Chi national social-professional fraternity of Architecture model. He also is president of the faculty of the School of Architecture and Environmental Design for next year in San Diego.

Roderick F. Wright, also a graduating senior, won the 1971 School medal of the American Institute of Architects. It was given by AIA's Henry Adams Fund for scholastic achievement, character, leadership, and personality of professional ability.

State teachers retirement fund cut substantially

If hiking is your thing you’ve got a chance to prove it this weekend when you can join the Outings Committee on a back-packing trip to Jepson Lake in Sequoia National Park.

According to Jeff Wilson of the Outings Committee, the hike is open to all students at this school and is considered a beginner’s trip. Sign up for the outing close tomorrow at 9 a.m. You may sign up again for the information desk in the CU.

The party will leave from the TU at 6 a.m. tomorrow and return San. afternoon. Cost for the weekend is $5 for food. Passengers will share expenses for gas. Pack it may be rented at the weekends in the center tomorrow at 13:30 p.m. and again from 6 p.m.

Steve Simmons, head track and field coach here, is at the United States Olympic Development Camp at Bowdoin College in Brunswick, Maine. This is a big step toward his goal of being an Olympic Team coach.

Coach Simmons said that U.S. Olympic committee selects the top athletes in every event in track and field and brings them to specialized training camps during the summer. The committee also brings in the best coaches in those events to work with the individual athletes.

"I want to be an Olympic Team coach," he said. "Mainly because then you're working with the very best athletes on the very highest level of track and field."

He said that what the U.S. committee is doing now is what the Europeans have been doing for a long time. This is of the most value to the athletes in the field events, because they receive intense instruction in one area for three weeks.

"I'm going to be there is that I changed Gill Mohr's technique from a single-arm jumper/triple jump to a double-arm technique," Coach Simmons said. "The double-arm technique is an European style, and he feels it is definitely superior. He is considered an expert on it because he has had more success with it."

"Gill was the only guy at the National Collegiate Athletic Association championships who used it," he said.

Coach Simmons also feels that being selected for the Olympic camp will help his recruiting program. He has developed two national champions in Gill and high jumper, Raymond Brown and sprinter Bobby Turner can hold his own with the best in the nation. "I try to identify with the athletes they have," he said. "In fact, Cal Poly is known as a sprint and jump school in track and field circles. They have to be my main interests, most of my skills lie in those areas as a coach."

Coach Simmons feels the Mustangs rapid rise to national prominence in track and field is unprecedented, and he gives the team's recent success to being selected for the camp before has a school been so dominant. I think that is due to the efforts of Dick Purcell. He did it through extreme personal effort and dedication to building a national program."

"One of my main goals with the track team here is to give the team more national exposure. I'm not really concerned with dual meet situation at all. I'm concerned with championship meets and large relays because if there is to do the reputation of a track program is built."

Coach Simmons was an all-America basketball player at Los Angeles City College and he holds single game and single season scoring records at Chapman College. Still his first love is track, and he was the assistant track coach at Chapman for five years before coming here.

"This is the only sport I have ever been really interested in coaching because of the intense personal nature of it. I feel that it is an individual effort thing, I feel that I'm an individual in every aspect of the word. Track has always given me an opportunity to express that individuality as a runner and as a coach."

---

**Intramurals set for summertime**

The Men's Swimming Pool will be open to all students this summer. It was announced this week. According to Dick Heath, who is in charge of intramurals, the hours will be from 3 p.m. to 8 p.m. daily. He emphasized the fact that there are no dressing room facilities for women, so they would "come prepared."
