More donors needed to aid leukemia victim

The Thursday blood drive in the Men's Gym, for Pets Lemon, a leukemia victim, received 340 pledgee for donations, but not everyone confirmed his commitment.

Due to the nature of the disease, people who signed up and didn't show can make up their mistake to Lemon on May 8, said Durant.

By 10 p.m. candidates for offices will be elected and plans for campaign strategy will be laid for campaign strategy, Boveri said. A surface of the icosahedron is subdivided into frequencies or "quel ports. When all the surfaces are divided into the same number of frequencies, the geodesic dome evolves. Fuller did, according to Feldman, stimulate a great interest in the geodesic dome. The dome constructed for EXPO in Montreal, Canada, has 31 frequencies, Feldman said. He added, however, that all domes are not always geodesic. He said the Astro Domes in Houston, Texas, are not a geodesic dome.

The original triangle of one Icosahedron surface can be divided into any number of equal parts. Following any debate from the floor, there will be general voting in the light of the facts that the panther party will take on various issues, according to Boveri.

Seale centered his presentation around four programs. The Noble Cell Anemia Research Foundation was developed to aid the black people in finding out if they carry this disease at the Urns they are checked.

In the most recent food donations sponsored by the party, it dealt with more grocers in three days or four five (Continued on page S).

Geodesic dome: a many-sided thing

The frosty, rounded structure put up in the College Plan last Thursday was a good example of a geodesic dome.

Jacob Feldman, from the School of Architecture, spoke on the mathematics of the geodesic dome in a presentation sponsored by the mathematics department. The dome assembled in the plane by 50-year architecture students exemplifies the intriguing geometric domes hold for the young. Fuller's geodesic domes are for both as the fourth century. B.C.

Fuller did, according to Feldman, eliminate a great interest in the geodesic dome. The dome is based on the icosahedron, a polyhedron with all surfaces equal, Feldman said. A surface of the icosahedron is subdivided into frequencies or equal parts. When all the surfaces are divided into the same number of frequencies, the geodesic dome evolves.

The original triangle of one icosahedron surface can be divided into any number of frequencies. The dome constructed for EXPO in Montreal, Canada, has 31 frequencies, Feldman said. He added, however, that all domes are not always geodesic. He said the Astro Domes in Houston, Texas, are not a geodesic dome.

Feldman said there are any number of ways to "fold" a geodesic dome. He showed slides of different structures using plywood, tin-wood, and plastic to create the dome.

Light shed on new political alliance

Student Rights Alliance may be the first attempt at a political force on this campus according to Max Boveri, one of the organizers.

"It's been an idea for a long time," said Boveri. "Along with Bobbi Seale, Robert Burdett, Dave Pollack and Jim Patterson have been working as a political movement for the past five weeks to organize the alliance for the spring elections, according to Boveri.

"We want to hold a convention to establish the student come and hear platforms."

Student Rights Alliance will be formulating positions and nominating can- didates for the ASI elections.

The party's immediate plans will be to hold a convention on Tuesday at 3 p.m. in Chumash Auditorium.

"There will be caucuses on pertinent issues where small groups will get together and discuss the problems," said Boveri.

Seale will preside at the general meeting at 7 p.m. representatives from the caucuses will present the issues.

"It will take a mass movement to free this campus from the shaggy conservatism that envelopes every aspect of our lives," Boveri said. "This website for this mass movement will be Student Rights Alliance.

Northwest Evaluation

A student questions Seale on the goals of the Black Panthers.

"We are trying to unify people in the country around their desires and needs," said Bobby Seale, Black Panther Party organiser.

Seale spoke on the party's goals and objectives Thursday night in the Men's Gym, after outlining his talk at an earlier press conference.

When the party was founded by Huey P. Newton, it was based on a 10-point program, according to Seale.

"We took the 10-point program out of the Black community and we had 99 per cent agreement on that program," Seale said. He did discuss the 10 point program point by point, but instead went on to describe the party's functions.

The direction of the Black Panther Party not to pick up guns in order to go out and shoot up the whites. The party was organized after the government fell in the development of the War on Poverty program.

"Because of the low-down, the Black Panthers' goal is to make people the ... "Seale said. "We are trying to develop and unity plan that has a political understanding of the relationship between the political and the people's politics.

A main program offered by the Black Panther Party are the numerous free programs for oppressed individuals.

Seale centered his presentation around these programs. The Noble Cell Anemia Research Foundation was developed to aid the black people in finding out if they carry this disease at the Urns they are checked.

The country was willing to solve diseases that white people were more concerned in, said Seale, for the party began a program whereby black people could prevent sicknesses harmful to them.

"We take the medicine to the people and it is absolutely free," Seale said. The party also for- mulated the Free Black Factory and the People's Free Medical Service. Both of these organizations or programs give to members of oppressed races.

In the most recent food donations sponsored by the party, it dealt with more grocers in three days or four five (Continued on page 5).

Legal aid

The special election to determine voting procedures for the election of both Hall officers and SAC representatives will be held today.

Polling booths will be situated in the CLC, on the Library, on the Home Economics and Math building, and near the self-service store.

The results of the election will not prevent the majority and plurality systems of voting will replace the preferential system.

'Kind gesture' ignored goals

**Editors:**

To the Cowboys and Cowgirls who left the Bobby Seale lecture. It was a kind and generous thought to give 71 cents to the betterment of health care for the black community. It was unfortunate that you couldn't have spent your contributions more thoughtfully. It's hard to believe that a group concerned about the future of the black community would have such little regard for its own welfare.

Jim Kirsh

On the contrary, I am sure there are many here that would love to attend the next lecture on poetry. Dr. Curzon would be happy to send you his latest work on this subject. It's a pity that you couldn't make it to the lecture.

Jim Kirsh

Relaxed and informal, they focus on poetry

**BY EVANDAVIES**

It was the first meeting of the Poetry Workshop that will meet every Wednesday night in CU 219. "Let's just relax and be informal," said Dr. Gordon Curzon, whose comments summarized the aims of the group, "and make it into a gathering of friends so we can have fun — something a class can't do."

Dr. Curzon said referring to the two dozen or more people who filled the room nearly to capacity. From the way the discussion was received, it seems that poetry is really in a feverish state. When one young man apologized that he was unable to read, Curzon replied: "Don't any of you ever apologize. You say you can't read, but then you go ahead and read...great!" He gestured with a sweep of his arm.

Another student's work, a dense and wordy poem, received considerable criticism until there was a meeting of minds that poems are more important for their impact than their clarity. "This is a valid poem — poetry is really just playing around with words, anyway, so it's no use."
Many sides to geodesic...

(Continued from page 1) Geodesic domes can be squashed and still be a geodesic dome, said Feldman. The domes can be flattened and elongated to rid the structure of the unusable high space.

As far as the living quarters of the future, Feldman said the domes have their drawbacks. Studies have shown, he said, that people aren't very comfortable living in a dome. He said that once a large flat surface was suspended over the ceiling of the Astor dome, attendance went up.

Unity goal...

(Continued from page 1) Supermarkets deal with in a week, said Seale. “Every last chicken was fat and healthy,” said Seale. “If necessary we will give up a free pot program to cook the chicken in.”

Towards the end of his speech Seale talked about pollution. “We have to get a greater feeling of human survival on this earth,” he said. “We have to get together and act like human beings. Let’s get together like a bunch of human beings that get some sense. The only solution to pollution is a people’s humane revolution.”

Dynah-Vision Analysis

MENS DEPARTMENT
MENS SPORT SHIRTS
Short sleeves, cotton, Dacron and cotton by Arrow. Sizes 3-M to XL.

MENS BOXERS
White cotton briefs, cotton stretch. Sizes 399 or 5 for 2.99

MENS JEANS
Boys present, jeans, flared bottoms by famous maker. Colors: natural, brown, olive. Sizes 50 to 60.

MENS ROBBE
Blouses, shirts with colorful patterns shell and jersey lined. One size fits all.

MENS DRESS SHIRTS
Long sleeves, permanent, solid colors and patterns. Sizes 15 to 17.5, Regular 5.99 to 7.99, Sale 4.99 to 5.99

MENS KNIT SHIRTS
Long sleeves, poly-nylon, fashion collar with four button placket. Bold colors and stripes. Machine washable wool blend.

MENS SKI WEAR
Season clearance on all ski pants, sweaters, wind proof, water proof. Sizes 30 to 36.

MENS DRESS SLACKS
Selected group from our regular stock.

MENS SUITS
Selected groups from our regular stock.

SPORTSWEAR
SPORTSWEAR SEPARATES REDUCED
All from regular stock. Includes skirts, pants, and tops. Patterned acrylic knits in red and purple.

FRINGED PONCHOES
Bom sera with embroidered trim. Navy, red and brown.

BLAZER CLEARANCE
Long sleeves shirts and blouses in white, solid colors and prints. Sizes 30 to 36.

ACRYLIC SWEATER KNIT SEPARATES
Pants, skirts and tops. Navy with red and gold trim. Sizes 3-M to XL.

ON FOOTHILL BLVD.
OPEN 9:45 to 5:30, Thursday Until 9
The Mustang track team was hard hit by nine injuries to athletes at Cal State Los Angeles on Saturday. The injured list included nearly a third of the team.

The non-conference meet was won by the Mustangs' California Collegiate Athletic Association rival Cal Poly Pomona, which scored 80 points. Los Angeles was second with 44. In the third-place UC Riverside scored 38 points. Injuries started occurring early. Mike Bribin injured a thigh muscle getting out of the car.

Coach Steve Simmons was concerned about that injury. "Bribin is usually indestructible," he said.

Russ Grimes, sprinter and long jumper, had a hamstring strain. Sprinter John Rayley re-injured a hamstring that had hampered him all season. Grimes and Rayley both have histories of hamstring problems.

Tennis players net 2nd in first league tourney

After the end of one third of league competition, the Mustang tennis team is sitting in second place. The three-day round robin competition, held at Ben Fendalls' Valley, last Thursday, Friday, and Saturday, saw the hosting Matadors pick up the No. 1 spot in the California Collegiate Athletic Association.

The Matadors grabbed the top position after a 1-4 win over the locals on Friday. The home team played in doubles competition cost them first place.

Coach Jurgensen said, "We won four out of the six singles to give us a tremendous edge." "All we had to do was win just one doubles match to win overall," he added. The Mustangs were swept in the doubles.

Three Mustangs were unseeded in singles play. Dan Lambert, Tom Martin, and Kent Cobb picked up three wins each. Ronald Brenna, Dennis Bottelli, and Jack Lobus were victorious in two of the mainstays.

Cal State Fullerton and UC Riverside rounded out the league standings with Cal Poly Pomona not able to enter a team.

The Fresno State Bulldogs travel to this campus tomorrow for matches starting at 1 p.m.
