SAC may freeze funding of Poly Royal

Budget deficit shrinks slowly

by ALFRED RUCKER

The deficit of the half million dollar 1972-73 Associated Students Inc. Budget is slowly dwindling, according to Roy Gersten, director of AIS business affairs.

Gersten told Student Affairs Council Wednesday night that with actual losses from Homecoming, the 1971 and 1972 deficits, and 1973 fees, plus estimated losses from athletics (basketball and wrestling), minus $8,000 saved from the Child Care Center and $14,000 returned from the E.O.P. program, the deficit is now around $1,075.

If things continue as they are now "we stand a good chance of breaking even," Gersten said. He emphasized that the figures are only estimates and not fact.

Mike Mooney, Finance Committee Chairman, said some budgeted groups may not spend all the money allocated to them and this helps.

IAC postponed action on these proposals until it sends a representative to SEC meetings, concerning the Publishers Board write-off be discussed at the next SEC meeting, according to the Publishers Board.

IAC "fully supports the pursuits of a class action suit directed at the Trustees of the State College and University System of the State of California regarding the rights of adult residents on this campus and all others within the system. The purpose of said suit will be to force the implementation of a lease contract."

The legality of the license was explored in a letter from Carriel to former AIS Pres. Pete Evans. Carriel said, "The concept that a state college may negate or suspend basic individual liberties in order to protect its students originates from the old legal doctrine of parens patriae."

Carriel said the doctrine no longer has legal merit because most college students, 18 years or older, have been emancipated as legal adults.

"In short, it is inexcusable for the state college to put aside basic rights in order to protect adult persons," Carriel said.

A legal attorney for the chancellor's office, Bob Henry, told that the office had "reviewed the model license form point by point and everything is legally permissible from a statutory or constitutional point of view."

New formula proposed for set-attending prices

by TOM MARSHALL

A new formula for determining non-student fees for extra-curricular activities here on campus has been proposed by AIS vice-president Denny Johnson.

Johnson presented his proposal to SEC (Student Executive Council) saying that the current formula for determining these fees is inadequate and unfair to the students.

He pointed out "in the long run it is less expensive for the non-student to attend activities here on campus than it is for the student who has already paid his fees." This would seem to be very unfair to students. At a concert for example if the student pays $5.00 the non-student pays only $3.50. This gives the non-student the financial advantage since if they both go to three activities the non-student will be paying only three extra dollars whereas the student will have already paid his original twelve dollars fee.

Johnson is attempting to alleviate this inequity by his proposal of a minimum ratio of two to one for fees. "Besides being more fair to the students, it would also bring in more money."

If SEC approves his proposal this week, it would be an experimental policy extending into next year. "If the experiment succeeds, it is expected that rates for special events for non-students will rise."

Currently twenty dollars is taken out of each student's fees for AIS activities such as films, speakers forums, concerts, etc. This would seem to be very unfair to students. At a concert for example if the student pays $5.00 the non-student pays only $3.50. This gives the non-student the financial advantage since if they both go to three activities the non-student will be paying only three extra dollars whereas the student will have already paid his original twelve dollars fee.

This gives the non-student the financial advantage since if they both go to three activities the non-student will be paying only three extra dollars whereas the student will have already paid his original twelve dollars fee.

If SEC approves his proposal this week, it would be an experimental policy extending into next year. "If the experiment succeeds, it is expected that rates for special events for non-students will rise."

"Students will not live in a prison maintained for public relations purposes. This issue has been smothering in the ashes of apathy," said Rep. Lee Pitts at Wednesday night's SAC meeting.

Parking without paying or cooling the Cushman

**Editor:**

There must be quite a few of you out there who agree with Pamela Jones’ comments about how disheartening it is to pay $5 for a license to hunt for parking spaces. Well, there is a plausible alternative that is within reach of anyone who wants to use the campus. I did not purchase a parking sticker for either Fall Quarter or this quarter. I play an interesting game with Officer Ramirez and his friends. It’s called evade the Cushman. You don’t have to know that tiny vehicle, you simply learn the patterns of parking lot surveillance. There’s an unlikely logic to it all, but it is easy enough to get eventually.

The lists to avoid for the most part are the ones across from Graphic Arts, Chase Hall and the one near Democracy. But even these are often unpatrolled when you need them the most. The trick is to park where Officer Ramirez and his friends seldom check. With 4,000 spaces on campus, it is virtually impossible for every space to be checked every day. They spend a lot of time on the derma, which are within easy walking distance to the north campus. It is a convenient spot for you to park unnoticed.

Oh yes, I forgot to mention that I have only been ticketed twice in two quarters, and both times it was for parking in a loading zone. That never goes over well at all. You have heard about how few tickets actually produce a warrant for payment. If you just ignore them, they are mighty fine odds if you ask me. Here is one time when the bureaucracy works in your favor. It sure beats buying a ticket.

Richard Fleming

Chair of what?

The EARPLUGS AWARD in Paul Simon’s column in Thursday’s Mustang Daily noted that ASI Pres. Robin Baggett and Vice Pres. Denny Johnson had tangled with the KQVR radio air with Bari Walters, chairperson of the University Forum. I should have read they tangled with Bari Walters, chairperson of the University Union Board. She showed it right back on the radio’s University Forum several days later. A line of type was inadvertently dropped in production.

‘Mr. Peepers’ is dead at 48

MOLLYWOOD (UP)—Wally Cox, television’s ‘Mr. Peepers’ and the mischievous wit of “The Hollywood Squares,” died Thursday at age 48.

SUIT Sought, freeze asked...

A&I budget is improving...

(Continued from Page 1)
mandates, Gerston said, the Program Board had made an effort to increase its income but there is no way it can make $22,000 over income, which is needed to erase the deficit. With the news that the budget may be increased, the Program Board asks for a request from the Journalism Department for $371 from Contra Costa College. The money is to be used to help pay expenses for an upcoming journalism conference. Four students had been budgeted to attend. The decision then was made that KCPR radio, advertising, Outpost Magazine and photography should be represented.

With an eye on next years budget, the Program Board approved a resolution that will prohibit out of state athletic travel which does not have a reciprocal agreement or a substantial guarantee, or is not a nationally scheduled tournament or N.C.A.A. championship competition. Any decision that might affect the budget would be subject to review by Finance Committee and BAC.

BAC defined a substantial guarantee as being 80 percent of travel cost. This could be in the form of money or room and board.

Mark Zachary (Human Development and Education) said the Board of Athletic Control was strongly against passage of the resolution because small teams could not demand guarantees and, thus, would be prevented from traveling.

In other action BAC gave support to Architecture students in their bid to build a walkway between Dexter Library and the Math Building.

Dave Bailey and Doug Tornia, who designed the walkway as their senior project, will now go before the Campus Improvement Committee seeking $3,900 to complete the plans. They decided they plan to do most of the work themselves with the help of other students.

The walkway will be 10 feet wide, brick-tiled, with a concrete retaining wall and benches. It will, if approved, cover the gravel area in front of the library that now stands bare.

Another request aimed at beautifying the campus, at least in the opinion of the Ecology Action Club, was postponed by BAC. The request for permission to remove the "P" from the hill, Ecology Action Club, received the letter as an "ecological hazard."

Rally Club is responsible for the upkeep of the letter and opposes its removal. They viewed the removal as being a hazard because it would create a hole and perhaps cause mudslides.

Mammoth trip set for holiday

The Mammoth resort ski trip sponsored by the Ski Club will take place this weekend.

The bus will leave at 6 p.m. today. The cost of the trip is $47 and includes three nights lodging and skiing at Mammoth. Stalls are to be drawn by the Ski Club.

Everyone is invited to attend. More information may be obtained from Mark Kurthfort, 444-7840.

Foothill bike plan set...

(Continued from Page 1)

According to Williams, there are two strong funders of the project on the City Council. "Councilman T.K. Gurnee and Myron Graham are really behind us. We've not really received any opposition," Williams explained.

But Williams anticipates objections and opposition concerning the removal of street parking spaces when the lanes are installed.

Williams said his apartment over the Foothill Boulevard has complained about the elimination of street parking spaces due to the marking of bike lanes.

"Each street will be a different situation," Williams said. "We'll be getting down to the nitty gritty when we start fighting for the parking spaces."

Most of the construction of the bikeways entail only striping and the installation of reflectors. The whole plan is estimated at $80,000, according to Williams.

When asked how this bikeway system will relate to the campus bike lanes, Williams said, "We'll just be coordinating with the lanes on campus, but it will be more balanced than just feeding onto the campus."

There are a number of avenues open to fund the bikeway project, according to Williams. "There is a possibility of receiving money from the five percent gas tax, recreational sources and state-wide bike licensing," Williams said.

Baseballers seek wins

The Mustang baseball team will return to action this weekend as it hosts last year's Far Western Conference champions UC Riverside.

UC Riverside faces cagers' upset desires

Mustang cagers try for another upset Saturday when they host conference leader UC Riverside at 8 p.m. Riverside demolished the cagers earlier in the year, 102-40, at Riverside.

The varsity tilt will be preceded by a freshman contest (Saturday) at 5-4 p.m. Tonight the Cots challenge Cal Poly Pomona's freshman squad in what shapes up to be the battle for second in the conference. Pomona reigns as last year's top freshman team and has just one league loss to Cal Poly. Pomona's games set is for 7:30 p.m. in Craniald Gym.

Riverside is proving the team to beat for the second straight year. The Highlanders were named the conference winners despite a three-way tie last year. By virtue of the best position to win the title outright.

Ranked in the top 10 of college teams, Riverside is led by Lee McDougal, the CCAA's best rebounder. He is averaging almost four more rebounds a game than Mustang Billy Jackson in league play.

The Highlanders offered a balanced scoring attack with Bobby Walters' 13.1 average. Stewart Kope, McDougal, Keith Batiste and John Griffith also average more than 10 points a game for the Highlanders.

The Mustangs will counter with Philly Williams and Bob Jeneings. The duo have led a resurgent Mustang attack averaging 8.8 points a game while Jennings averages 12.

Billy Jackson, if ready, will augment the Mustang scoring attack with his 13 point scoring average.
