AGRICULTURE SKILLS WEEK WILL BEGIN TODAY

One hundred and fifty high school vocational agriculture instructors will begin a week-long Skills Week program on campus today (Tuesday, June 16). They will be studying the latest techniques and knowledge in such fields as natural resources, agricultural mechanics, animal sciences, poultry industries, and ornamental horticulture.

The program is a joint project of Cal Poly and the California Bureau of Agricultural Education. Cal Poly faculty members will be providing instruction in the various subjects.

The Skills Week precedes the annual California Agricultural Teachers Association Summer Conference slated to begin on campus Monday (June 22). The Skills Week program is arranged so that any participating teacher may enroll in at least three courses.

Morning sessions include classes in Natural Resources Curriculum and Teaching Materials Development; Organization and Management of Agriculture Mechanics Shops; Pilot Programs in Cooperative Vocational Education in Agriculture; and Pollution and Environmental Controls in Agriculture.

Afternoon classes will include Natural Resources - Rural Recreation; Photography Workshop; Maintenance and Care of Ornamental Trees; Teaching Horticulture Mechanics; and Introduction to Dairy, Poultry and Meat Animals Judging.

BIDS ON CAMPUS UTILITIES PROJECT DUE NEXT WEEK

Bids for further development of utilities service for the central campus will be opened next Tuesday (June 23) in Sacramento. The project, estimated by architects to cost about $65,000, will include installation of about 3,000 feet of sewer trunk line along the north side of the campus and construction of an underground condensate pumping station near the Mechanical Engineering Building (Power Plant).

E. Douglas Gerard (Executive Dean) said this week that installation of the sewer line will disrupt track flow along North Perimeter Rd. during July and August. It will follow the course of that street from the vicinity of Science North Building to the baseball field, then cross that field to a point near Poly Grove. The project should be completed prior to start of the Fall Quarter.

SUMMER QUARTER PARKING PERMITS STILL ON SALE

Faculty and staff parking permits for the Summer Quarter are still available and may be purchased for $9 each at the State Cashier Office, Adm-131C. Parking enforcement began today (Tuesday, June 16), the first day of classes.
NEW BOOK DROPS WILL BE USED IN CAMPUS STORE

When El Corral bookstore moves to its new location in the new Julian A. McPhee Memorial College Union late this year, it will bring with it an innovation in book drops.

Book drops are systems used in most college stores for patrons to deposit their personal books and supplies while they are either shopping or browsing through the store.

The present system in use by El Corral in its temporary quarters in Walter F. Dexter Library is simply a group of metal shelves and wooden cubby-holes which can be approached only from one side. Congestion and confusion can result during busy periods.

The newly developed system can be approached from four sides, and should provide better traffic patterns. It is composed of units of cubby-holes constructed of particle board covered with Formica and trimmed with oak.

Designed by Larry Price and Brent Berry, both senior architecture students at Cal Poly at the time, the four units of 30 cubby-holes each will be located in the foyer of El Corral's new quarters, between the main entrance and cashiers.

The units were built at a cost of $1,400 for materials by students in the industrial cabinetmaking class of the Industrial Technology Department. The class of juniors and seniors preparing to become industrial arts teachers, was instructed by faculty member Roger Keep.

Mrs. Mary Lee Green (manager of El Corral) believes the new book drop system will greatly improve traffic flow, both into and out of the merchandising area of the new store facilities.

"We are really looking forward to the more efficient operation of the store that should result from use of the new book storage units. They should definitely result in improved customer service both during periods of peak load and when our flow is at a more normal level.

"This is the only system of its kind that we know about," Mrs. Green continued. "We're quite pleased with the students' work and design and thrilled that we could be involved in this innovation in bookstore operation."

NATIONAL SCHOLAR PLANS TO ENTER CAL POLY THIS FALL

William E. Blakely, a San Jose high school senior who plans to enroll at Cal Poly in September, is one of 119 high school students from across the nation chosen by President Richard M. Nixon as 1970 Presidential Scholars. Blakely, who will graduate this month from William C. Overfelt High School, attained a grade point average of 3.90 for his high school study. He will major in electronic engineering. The Commission on Presidential Scholars, based in Illinois, annually selects one boy and one girl from high schools in each of the 50 states, the District of Columbia, and Puerto Rico, plus fifteen other students at large. Two other Californians were named for 1970.

Typewritten copy intended for the next issue of Cal Poly Report must be received prior to 12 noon Friday, June 26, in the Office of Information Services, Adm-210.
SANTA MARIA MAN NAMED TO HEAD NEW ETHNIC STUDIES DEPARTMENT

Appointment of David J. Sanchez of Santa Maria as head of the soon-to-be established Ethnic Studies Department has been announced by Carl C. Cummins (dean of Applied Arts). Sanchez, who has been involved as a teacher in special education programs for the Lucia Mar Unified School District in Southern San Luis Obispo County for the past three and a half years, will begin his new duties on July 1.

Sanchez, 43, will replace Richard A. Martinez, who has been coordinator of ethnic studies at the college on a combined basis with responsibilities in the college Educational Opportunity Program since last fall. Martinez will give his full attention to his EOP duties after July 1.

Dean Cummins said that in addition to his duties as head of Cal Poly's Ethnic Studies Department, which will become operative on that date, Sanchez will also fulfill teaching assignments from time to time.

Prior to becoming a teacher in the Lucia Mar district in September, 1966, Sanchez taught Spanish and science in the Tornillo, Tex., school system for three years and was an insurance agent in El Paso, Tex., for six years. A graduate of University of Texas at El Paso, from which he received his bachelor's degree in business in 1950, he has taken graduate study in both adult education and education of emotionally and mentally retard persons at UTEP and at University of California at Santa Barbara.

Courses in Cal Poly's interdisciplinary Ethnic Studies Program are offered by the faculty of 11 different departments as part of the curricula of those departments. A total of 45 courses ranging from "Teaching the Culturally Deprived Child," "Afro-American Literature," and "Latin American History" to "Race Relations" were offered by the Art, Education, English, Social Sciences, Business Administration, History, Child Development, Physical Education, and Music Departments during the 1969-70 academic year.

Sanchez will be responsible for coordination between the various departments and for liaison with Cal Poly's college-wide Ethnic Studies Committee.

APPELGARTH SCHOLARSHIP ESTABLISHED BY BIOLOGICAL SCIENCES GROUP

A $100 annual scholarship has been established by the campus chapter of Beta Beta Beta Biological Society in honor a long-time faculty member of the Biological Sciences Department. John H. Applegarth, who came to Cal Poly in 1952, was honored by the creation of the Applegarth Biology Scholarship by Epsilon Pi chapter of the national society recently.

A graduate of San Jose State College, where he earned his bachelor's degree, and Stanford University, which granted him the master's degree, Applegarth formerly taught at both University of Maryland and San Jose State College. He has announced his intention to retire from his teaching duties at Cal Poly Sept. 1.

The scholarship will be awarded annually to any biological sciences undergraduate student during the spring for use during the following school year. Seniors are not eligible. Two criteria, financial need and scholastic achievement, will govern faculty recommendations for the award.
PURCELL RESIGNS TRACK COACHING POST

Dick Purcell (Physical Education Department) will bow out as Cal Poly's varsity track and field coach at the 1970 National Collegiate Athletic Association's 1970 University Division championship meet in Des Moines, Iowa, this weekend. He announced his request for relief from his coaching duties just prior to the NCAA College Division championship meet, which took place in St. Paul, Minn., last week.

After having been on the college coaching staff for four years, Purcell said he felt he had "accomplished as much as he could for the Cal Poly track and field program and that the needs still to be recognized for the program could be better realized by a new coach." He plans to continue as a member of the college faculty.

The Mustang track and field varsity, which had never won a California Collegiate Athletic Association championship prior to Purcell's takeover of the program, won that title in 1968, 1969, and earlier this year, in addition to NCAA national College Division crowns in both 1968 and 1969. (Results of last weekend's 1970 meet were not available at this writing, but are reported elsewhere in this issue of Cal Poly Report.

Cal Poly Athletic Director Joe Harper (also Physical Education Department), who announced Purcell's resignation from the coaching post, praised his efforts in building the college athletic program. "Dick has done a tremendous job in putting together teams that have been eminently successful since he's been at Cal Poly. We are disappointed that he has decided not to coach next year."

Although final details remained to be worked out, it was reported last week that the appointment as Cal Poly's next track and field coach had been offered to Stevan Simmons, assistant coach in that sport at Chapman College in Orange for the past five years.

"CAL POLY REPORT" BEGINS 21ST YEAR OF PUBLICATION

This issue of Cal Poly Report is the first of its 21st year of publication. Current plans provide for publication of issues every two weeks during the Summer Quarter, a special issue on Sept. 11, and resumption of weekly editions on Sept. 22. Deadlines for receipt of copy for Cal Poly Report will continue to be 12 noon on the Friday before publication for regular editions. Deadline for the special Sept. 11 issue will be Sept. 8. Suggested copy, which may be mailed or taken to the Information Services Office, Adm-210, should be typewritten, double-spaced, and bear name and telephone number.

BIOCHEM MAJOR NAMED OUTSTANDING BY SCIENCES SCHOOL

Elaine M. Chisholm, who majored in biochemistry, was named outstanding graduating senior of Cal Poly's School of Applied Sciences during an honors luncheon held on campus recently. Seventeen other students selected from among the nearly 500 seniors in the School of Applied Sciences who received bachelor's degrees June 6, were also honored during the luncheon. Miss Chisholm attained an overall college grade point average of 3.87 (4.0 is perfect) to earn the honor.

Typewritten copy intended for the next issue of Cal Poly Report must be received prior to 12 noon Friday, June 26, in the Office of Information Services, Adm-210.
COMING EVENTS -- COMING EVENTS -- COMING EVENTS

Floral Design Symposium -- Continuing through Wednesday, June 17, morning, Music, Speech, and Drama Building. Annual symposium on floral design; sponsored by the American Institute of Floral Design and hosted by Cal Poly's Ornamental Horticulture Department. By advance registration.

Nutrition Workshop -- Continuing through Friday, June 19, all day, Mathematics and Home Economics Building. Workshop on nutrition for elementary school teachers from throughout San Luis Obispo County; sponsored by the Home Economics Department and the California Dairy Council. By advance registration.

CATA Skills Week -- Tuesday, June 16, through Saturday, June 20, all day, campus. Annual Skills Week workshops for agriculture teachers from throughout California; sponsored by the School of Agriculture and the California Agricultural Teachers Association. Members of CATA invited.

Summer Quarter Classes Begin -- Tuesday, June 16, all day, campus. Start of Summer Quarter classes for Cal Poly students and faculty.

Summer Quarter Late Registration -- Tuesday, June 16, through June 23, all day, Administration Building Room 219. Late registration period for Summer Quarter classes for continuing Cal Poly students and newly admitted students.

Folk and Sacred Concert -- Tuesday, June 16, 7:30 p.m., Engineering Auditorium (formerly Air Conditioning Auditorium). Concert of folk and sacred music performed by Singin' Travelers of Pepperdine College; sponsored by Cal Poly's student Campus Advance organization. Public invited.

Flower Shop Management Short Course -- Wednesday, June 17, through Saturday, June 20, all day, Ornamental Horticulture Unit. Short course on flower shop management for florist employees; sponsored by the Ornamental Horticulture Department. By advance registration.

Noon Speakers Series -- Wednesday, June 17, 12 noon, Engineering West Building Patio. Rev. Bruce Tjaden will discuss human relations during the first program of the 1970 Speakers at Noon Series; sponsored by the Summer Program Committee of the Associated Students, Inc. Public invited.

CATA Summer Conference -- Sunday, June 21, through Friday, June 26, all day, campus. Annual Summer Conference of the California Agricultural Teachers Association; hosted by the School of Agriculture. Members of CATA invited.

Child Development Workshop -- Monday, June 22, through Friday, July 3, all day, Dexter Library Room 129. Workshop on "Understanding the Culturally Disadvantaged Child" for public school teachers from San Luis Obispo area schools; sponsored by the Child Development Department and the San Luis Coastal Unified School District. By advance registration.

Summer Session First Session Registration -- Monday, June 22, 9 a.m. to 12:30 p.m., Men's Gymnasium. Regular registration for first session of Cal Poly's 1970 Summer Session for all students.

(Continued on Page 6)
FOLK, SACRED CONCERT SLATED THIS EVENING

A concert of folk and sacred music will be given on campus this evening (June 16) by the Singin' Travelers of Pepperdine College. Scheduled for 7:30 p.m. in the Engineering Auditorium (formerly the Air Conditioning Auditorium), the program is being sponsored by Cal Poly's student Campus Advance organization. Admission will be free.

The Singin' Travelers, composed of five live-wire students from the Pepperdine campus in Los Angeles, have performed before audiences at colleges, universities, high schools, and military bases from Maine to California and British Columbia to Mexico since their founding five years ago. They have one album and a single record already on the market.

Bruce Roland, a spokesman for the sponsoring group, emphasized that the public is invited to attend this evening's concert.

COMING EVENTS . . . (Continued from Page 5)

Summer Session First Session Classes Begin -- Tuesday, June 23, all day, campus. Start of classes for the first of two sessions planned as part of Cal Poly's 1970 Summer Session program.

Summer Session First Session Late Registration -- Tuesday, June 23, through Thursday, June 25, all day, Administration Building Room 219. Late registration period for Summer Session first session classes for all students.

Noon Speakers Series -- Wednesday, June 24, 12 noon Engineering West Building Patio. Discussion of aerospace by speaker yet to be named presented as part of Speakers at Noon Series; sponsored by the Associated Students, Inc., Summer Program Committee and Education Department. Public invited.

Waste Treatment Short Course -- Thursday and Friday, June 25-26, all day, Music, Speech, and Drama Building Room 218. Short course on waste treatment for employees of governmental agencies from throughout Central California Coast area; sponsored by the Regional Water Quality Control Board and Cal Poly. By advance registration.

Noon Speakers Series -- Wednesday, July 1, 12 noon, Engineering West Building Patio. Talk on technology and education by yet-to-be-named speaker presented as part of Speakers at Noon Series; sponsored by the Associated Students, Inc., Summer Program Committee and Education Department. Public invited.

Independence Day -- Saturday, July 4. College holiday for Cal Poly students, faculty, and staff.

VACANT ADMINISTRATIVE POSITION AT CAL STATE LA LISTED

Information on the vacant position of dean of the School of Letters and Science at California State College at Los Angeles is available in the college Placement Office, Adm-213, 546-2501, to those who are interested in obtaining it:

Typewritten copy intended for the next issue of Cal Poly Report must be received prior to 12 noon Friday, June 26, in the Office of Information Services, Adm-210.
CHANGE IN REVISED POLICY ON EXPERIMENTAL COURSES APPROVED BY PRESIDENT KENNEDY

A revision in the policy on experimental courses has been approved by President Robert E. Kennedy just prior to close of the Spring Quarter. Recommended by the college Academic Council, the statement contained in College Administrative Manual Section 490.4 now includes a limitation of two college years on such courses. It reads:

"The following procedures provide an opportunity for experimentation in education without the delays that are necessary before new courses and programs can be reviewed for inclusion in the college catalog. Approval of courses under this procedure will be for a maximum of two college years."

The revised Section 490.4 will be incorporated in CAM changes presently being prepared for distribution prior to start of the Fall Quarter to all those holding copies of the manual.

TRACK MEN WIN THIRD NCAA CHAMPIONSHIP

Cal Poly's track and field team, under the coaching of Dick Purcell, won its third National Collegiate Athletic Association championship in St. Paul, Minn., Saturday (June 12). The Mustangs scored 49 points. Fifty-four schools scored in the meet, with Cal Poly winning only two events. Mohinder Gill reached 51 feet, 4½ inches, in the triple jump to take first place. Mathyas Michael won the 880 in a time of 1:49.9, his best yet.

FACULTY APPROVES PROPOSED SALARY SCHEDULE

David M. Grant, chairman, 1969-70 Academic Senate, reports Cal Poly faculty members, voting on a salary schedule proposed by the state-wide academic senate, approved the proposal, 157-36. Twelve faculty members voted no opinion.

The proposed salary schedule, developed by an ad hoc committee of the state-wide academic senate, three college presidents, and two representatives of the Chancellor's Office, is available in the faculty reading room at the library.

RODEO TEAM WILL ENTER NATIONAL FINALS

Cal Poly's Western Region championship men's rodeo team will arrive in Bozeman, Mont., Sunday (June 21) to get ready for the national finals of the National Intercollegiate Rodeo Association. The finals will be held in Bozeman next Tuesday through Saturday (June 23-27). Although the Cal Poly team had a 2,400-point lead in regional competition, the national championships are determined on the basis of the results of the five-day competition in Bozeman.

Cal Poly coach Bill Gibford (Animal Science Department) says there will be one change in the men's team from that which was successful at all of their spring contests. Greg Riedel of Jamestown suffered a fractured neck vertebrae in the final contest of the season at Navajo Community College, Many Farms, Ariz. He will be replaced by George Brown of San Mateo. Riedel competed in bull riding and bronc riding.

The Cal Poly men's team has won every regional championship since formation of the NIRA in 1956. The team has won a national championship only once, however, in 1959.
Richard C. Carlston (Welding and Metallurgical Engineering Department) has been elected a fellow of the American Institute of Chemists. A specialist in metal corrosion and stress, Dr. Carlston has been a member of the Cal Poly faculty for the past two years. Prior to that he taught at the U.S. Naval Postgraduate School in Monterey and at American University in Washington, D.C., and worked in industry as a physicist, chemist, and engineer.

Lloyd R. Hennig (Student Health Physician) has been chosen by the California Medical Association to serve as a member of its Historical Committee. A member of the Student Health Center's medical staff since 1963, Dr. Hennig formerly was in private practice and a resident physician at Franklin Hospital in San Francisco.

J. "Mac" McRobbie (Head of Industrial Technology Department) judged entries in the 10th annual Industrial Arts Exposition and Award Program at the California Exposition in Sacramento last weekend (June 8-9). Dr. McRobbie said outstanding projects made by high school industrial arts students from throughout the state were judged. They will be exhibited at the fair Aug. 21-Sept. 9.

Frank J. Hendel (Aeronautical Engineering Department) addressed some 15 persons who were naturalized as U.S. citizens during proceedings in the Superior Court of Judge William Clark in San Luis Obispo last month. Dr. Hendel, himself a naturalized U.S. citizen for the past 15 years, is a native of Poland.

Mrs. Naomi E. Arey (Secretary, Research and Development Office) has been awarded a Certificate of Commendation by the State Merit Award Board for her suggestion for employee safety she made last year. After being unable to locate the emergency telephone in the Administration Building elevator when electrical power went off, she suggested that fluorescent tape be used to identify both the telephone door and the "panic" button. The idea has since been incorporated in the Administration Building elevator.

VACANT POSITIONS ON COLLEGE SUPPORT STAFF LISTED IN PERSONNEL OFFICE

Two vacant positions on the support staff of the college have been announced by S. Milton Pluma (Staff Personnel Officer). Both posted on the bulletin board located in the Personnel Office, Adm-111, they are:

**Equipment Technician I ($676-$821), Journalism Department, School of Applied Arts.** Duties and responsibilities include maintaining all photographic, television, and allied equipment in Journalism Department, ordering and issuing supplies and equipment, supervising students in darkroom operation, supervising student payroll, assisting in photographic darkrooms. Applicants must be high school graduates with experience in photography and a working knowledge of camera operation and photographic equipment repairs.

**Intermediate Account Clerk ($435-$530), Accounting Office, Business Affairs Division.** Duties and responsibilities include preparing and batching posting data for bookkeeping machine operation, training on bookkeeping machines to prepare as back-up operator. Applicants must be high school graduates with advanced knowledge of bookkeeping machine operation and knowledge of basic accounting principles. Knowledge of state accounting procedures desirable.
