Women's liberation studied from biological and economic viewpoint

The Foreign Language Department offers all students a chance to gain an insight into several different languages in one quarter. This new type of elective gives you an opportunity to learn all kinds of clothy little phrases in a multitude of languages and also become familiar with cross-cultural communication.

The course that accomplishes all this is Part Fours of Foreign Languages, listed as Language 670-01, and scheduled for Tuesday Thursday 6:30 to 11 a.m.

This quarter lectures have been given on general linguistics, Mexican Spanish, Peninsular Spanish, Portuguese, French, Italian, German, Russian, and Hebrew. Subsequent presentations will include Persian, Arabic, Chinese, Vietnamese, and Swahili.

The material covered includes basic sentences in the language such as phrases like, "How are you?" the alphabet and sentence structure. Also covered when applicable are the number system and recognition of many of the foreign terms used in English.

The classes have drawn favorable student reaction. One student commented, "The class has been the most successful in respect to the interrelationship between culture and languages as a verbal expression of these cultures...for languages more than just sounds is a way of thinking".

This course is worth three units of credit and general prerequisites. Dr. Brenda Lecumberri is the course coordinator.

DAILY reposes till the spring

Today is the last issue of Mustang Daily for the winter quarter. The paper will resume production March 30 of spring quarter. The staff from Mustang Daily wishes you a relaxing and happy break.

by JUDITH BIERARD

Women's liberation is part of a larger human revolution taking place in American society as companies the efforts of the movement to gain recognition of their essential membership in the human community. It is an immediate and sometimes provocative program held Wednesday night at Ojai Auditorium. O. Martin and Gila Allen explored the historical, biological, and economic sources of the female stereotype and its role in society.

Before the discovery of the biological facts of reproduction, man revered and feared woman because of her reproductive powers. Miss Allen, a counselor and author of several books, traced the information known of early man through the mythology of the Student Affairs Council, and Allen sees the beginning of the exaggerated differences between male and female in the scientific ignorance of man. It was comparatively late in history when the discovery was made that man had a role in the reproduction of the species, and "this discovery wasn't a good one for woman," said Allen, because woman then became recognized as an important economic asset to the male and dependent upon him to bear children, her primary source of power. Woman led from her position of mystery and power to simply the producer of workers for man's civilization. Martin, an instructor of medical at Loyola University, then outlined the biological development of the human fetus for the purposes of demonstrating that "there is very little anatomical or physiological difference between the male and female human.

Martin stated that the possession of different genital organs was not enough to justify the belief that men and women are racially different due to biological phenomenon. Hormonal production and fluctuations occur in both sexes in much the same way, he said. Martin discussed the Freudian concept of penis envy when he said, "Penis envy is just another organ, it is the female breast." Allen and Martin proceeded to discuss the role of society as culturally conditioned and imposed upon all members of that society.

The defined role of woman as mother, wife, and in-laws held by Allen. The fact of women's lives do not match up with the stereotype imposed that, "One quarter of all women reach menopause without bearing any children and without their ovaries.

Although no more men are being drafted, the case another war should bring back conscription.

The council in favor of seating any students, you should resign. Pitta replied, "I will resign if you put an ethnic person in my place."

In other action SAC defeated a resolution that would have prohibited smoking in SAC chambers, and approved a resolution endorsing the concept of instituting a faculty fines fee structure into the now existing fine system by the library. This resolution will be sent to the Faculty Library Committee.

POW suffers many agonies while interned

CLARK AIR BASE, Philippines (AP) - POWs are being taken to beginning of surfaces at the Clark Air Force Base POW reception center. Five years ago the enemy began sending Philippine nationals to the island, but it was the longest held prisoners who suffered the worst agony.

Information about POW maltreatment at the hands of their captors comes from various sources, including the men themselves and support personnel who have assisted the prisoners in resisting from an internment to freedom.

The men are most bitter about torture and corporal punishment they were put through in an effort to get them to make public anti-communist statements which could be used for propaganda before the principal goal of the North Vietnamese interrogators.

"You can measure the military confinement in months and years, but not hours and days," said one source.

"In any case, we could show the world the scars that these men received," said another authoritative source who can't, Not anymore.

SCSC joins SEC to boost communication

In an attempt to provide more input and communications between committees and the students who serve, the Student Executive Cabinet (SEC) has passed a motion to include Student Community Services Committee as a standing committee of that body.

"Horn - Camp, Student community services committees chairman, asked that SEC include the committees as a non-voting standing committees member capacity. SEC endorsed the concept unanimously, and will send the recommendation to SAC for approval.

A recent recommendation from SAC directed SEC to include the Student Community Services Committee as a voting member of their governing body or their - approved representatives as voting members of SEC. The cabinet rejected the idea due to the programming function of the body as outlined by their codes.

The school council chairman will retain their non-voting membership rights, according to Laura Lemperk, SEC chairman.
Have you ever been asked if you wanted life insurance? If your answer is yes, you have already heard the sales talk. The insurance salesman may have asked you if you had any pre-existing medical conditions. He may have implied that if you had a heart condition or high blood pressure, you could not get life insurance. As a result of a well-planned strategy, the salesman tries to sell you a policy that fits your needs. He may say that if you sign the policy, you will save money in the long run. If you ask for a copy of the policy, he may tell you that it is too complicated for you to understand.

The office of a sales agent

Insurance policies without any answer

Insurance. As a result of a well-planned strategy, the salesmen try to sell you a policy that fits your needs. He may say that if you sign the policy, you will save money in the long run. If you ask for a copy of the policy, he may tell you that it is too complicated for you to understand.

The salesmen offer the policy at a higher rate and believe that you will accept it. This is because you are more likely to accept a policy that is offered at a higher rate than one that is offered at a lower rate. They may also tell you that you can cancel the policy at any time, but they may not tell you that they will charge a fee for this.

It may seem to most readers to avoid the problem all you have to do is ask questions. But say "it is easier said than done." The salesmen are used to overpricing and as a result, the student is put in a state of mind which leaves little room for sound reasoning.

The insurance policy itself is a legal document and is binding. The student should be aware of the terms and conditions of the policy before signing it.

Organic or not, plants use nutrients

Editor:
I read with interest Lee Hall’s article “Good Things from the Garden” in the Mustang Daily and found some very misleading, if not erroneous, statements which need rebuttal.

One statement was chemical fertilizers force “big, beautiful, but bed-afflicted plants” and that tissue tests show more and more petioles being colonized by the human body.

I believe Lee Hall realized (but was certainly not apparent in his article) that an organic system involves microbiological decomposition of the organic material in soil by soil-borne organisms. The subsequent release of nutrients are absolutely identical to the nutrients supplied by regular commercial fertilizers.

A plant does not particularly care if, for example, it gets nitrate (the form of nitrogen that many plants require) from the biochemical breakdown of organic material or from a commercial fertilizer. I am not questioning the benefits of adding organic materials to soil, but rather am questioning the validity of indicating the nutritional status of an organism by the use of petioles. Ahh! But that is different, some may say (particularly if one has aphylite or just a simple cold). It is no different! One simply weights risks versus benefits. I prefer the careful use of pesticides and fertilizers so we may feed our population more adequately.

Mr. Hall is also in error in that research into pesticides, I suggest that a comparison be made of the poisonous effects caused by eating food containing pesticides (including DDT) with the human deaths caused by using another “pesticide” called penicillin. Many more people die annually from over-reaction to penicillin than from over-reaction to minute quantities of pesticides on or in food.

There is some continuous demand for the banning of pesticides, but not too many people advocate banning the use of penicillin. Ah! But that is different, some may say (particularly if one has a phobia or just a simple cold). It is no different! One simply weights risks versus benefits. I prefer the careful use of pesticides and fertilizers so we may feed our population more adequately.

Mr. Hall is also in error in that he apparently does not know the definition of an “organic soil.” He commented correctly that it would be expensive to add large quantities of material such as powdered granite, bone meal, and wood ashes. These materials are inorganic materials (as are commercial fertilizers).

Anyone who has grown plants or crops in truly organic soils knows that plants grow very poorly without fertilizers because true organic soil is often nutritionally low in potassium and several essential micro nutrients.

The consumers who purchase organically grown “health foods” are the ones who have a right to complain about high food prices because they are being taken for a ride if they are led to believe that their health food is more nutritious.

Dr. Luther B. Hughes

Marchers get drill victories

In an unprecedented victory the Men's Drill Team captured first place in the military category, Saturday at Ripon, Calif. According to team secretary Brian Vial the is the second such victory for the drill team. They also bested planes in the Governor City contest in December. The drill team was competing against approximately 10 drill units at the recent meet, but were prepared to contribute to their victory, according to Vial. The drill team is currently planning on entering the Governor of Arizona match in Phoenix in April, the Poly Royal parade, and the La Fiesta parade.

The drill team is an ROTC affiliated club.

National Honor Society holds meeting today

The 78 year old national honorary society, Phi Kappa Phi, meeting Monday, was attended by approximately 75 members, including students and faculty, to discuss the club's plans for the upcoming year. The club's main focus will be on organizing events and activities for its members, as well as working to promote the society's values of excellence in scholarship and leadership.

The club will be meeting again on Thursday to discuss the election of new officers. The election is open to all members, and the results will be announced at the October meeting. The club will also be holding a fundraiser to support its activities, and members are encouraged to attend.

Why does a man join Maryknoll?

There are probably as many reasons a man might join Maryknoll as there are men who join. Some join to help themself and their order. Others join because they feel called to serve others. Some join for personal reasons, while others join for social reasons. Whatever the reason, the most important thing is that the person joining has a genuine desire to serve God and his people.

If you keep saying you want to do something with your life — here's your chance to prove it

MOVIE REVIEW

Barbara in fantasyland

by Rick Goulart

Women's liberation from several views...

David Selby, as her husband, is most noted for his role as Quentin in the ABC-TV series "Dark Shadows" and provides a fine blend for Miss Streisand's performance.

The Sunset Drive-In Theatre is a family attraction after being besieged by the flood waters and numerous burglaries of the theatre's outdoor speakers. It is under new management with prices set at $1.00 per person, children under 12 are free. Its premier offering is Diana Ross' impressive movie debut in "A Little Holiday in 'Lady Sings the Blues'" with showtimes at 7 p.m.

Women's liberation from several views

(Continued from page 1)

Women's Liberation through the United States in University and college campuses, recognize the excellence in all recognized academic fields. Last year 88 outstanding Juniors and Seniors at this campus were initiated on commencement day in June.

To be elected you must fit into certain qualifications. If you are a junior you must have 135 units with a 3.90 GPA. A Senior must have 180 units with a 3.90 GPA. Only 10 per cent of the student body can be elected.

So what’s so special about a groundsman?

Art Everett is what’s so special about a groundsman. In 1966 he took a welding class as part of his printing major and found that he found more meaning and satisfaction in artistic metal work than his major. With five years of college under his belt, he decided to follow his inclinations to be an artist. That decision has led him to entries in art shows from San Diego to Santa Rosa. Steel and bronze have proved to be most useful metals to express his feelings.

Many of his inspirations come from nature. What better way to get these inspirations than to work as a groundsman for the University? You can find him most sunny days somewhere in the area between the east end of the English building and the west end of the library lawn. When you see him on a coffee break, feel free to stop and say hello.

Photos by Mike Sullivan
The Beach Boys to take off

by ROB MCENTEE

I can remember when bushy blond hair, harmonies, and surfing music would have me lost in a trance.

I can also remember when The Beach Boys, used these same "highs" to record what would be called "Surf City." USA.

Some things have changed since then. Though most of the original five members are still together, the music has evolved. Later, the name was changed to The Beach Boys by a recording promotion man. The group consisted of Brian Wilson, lead and vocal arranger, Dennis Wilson on drums, Carl Wilson playing lead guitar, Al Jardine rhythm guitar and Michael Love on tenor and bass vocals. Jardine left the group after the first recording session and was replaced by David Marks. A year later, Jardine returned and Marks left to composing music.

Three years passed and Brian Wilson decided to stop touring in order to concentrate on record production. He was replaced on the road with Bruce Johnston, who left in 1973 under "mutual consent." In 1974, the classic L.P. "Pet Sounds" was released. Critically acclaimed by one of the two front record producers of the decade along with the "I Remember You" album by the Beach Boys, established Brian Wilson as a genius in modern music. The next year, "Good Vibrations" was released. This is the best selling single record the Beach Boys have made thus far.

The next four years saw the group split from Capitol Records and form their own label, Brother Records, as a company that would allow artists to share in profits as well as receive record royalties. In 1979, the album "Surf's Up," "Carl and the Passionate" and the latest effort "Holland," have been major steps forward in recorded music. Each have been unique recordings, something for which Brian Wilson has always been known.

Last year, two new members joined to add a further dimension in the already classic set-up. With Ricky Fataar on drums, and Bruce Johnston playing lead guitar, the group has strengthened their hold on the world's music market.

The set concert date here is Mar. 14 because the group is playing that afternoon at the California Men's Colony. A majority of the proceeds taken in at the evenings show in the Men's Gym will be handled by the Love Foundation which is an educational and charitable organization. The foundation will then fund "worthwhile projects," as Mike Love put it, such as taking Tranquendental Meditation to prisons, orphanages and hospitals.

Tickets for students with a college I.D. have been set at $8.50 in advance and $9.50 at the door. Non-students will be asked to shell out $13 in advance and $14.50 at the door. Tickets are on sale at the University Union Information Desk, Kings and Queen Avenues, and Brown's West outlets, Brown's Music and Hancock College.

To quote "Rolling Stone," "The Beach Boys are the most important vocal group rock has produced." An article was recently printed locally that started it, "The Beach Boys are coming." The article was misleading. The Beach Boys have been here for 11 years. They are finally coming to Cal Poly on Mar. 14 at 8 p.m.

A graduate of Cal Poly and Blue Medalist of the 1960 Olympics at Belgrade, Yugoslavia, has the opportunity this year again in the 1973 Olympics at Malmo, Sweden. Linda McArthur, deaf from birth, has been selected as one of the last 18 women volleyball players with such a handicap.

To go however she must raise $1,000 and the proceeds will go into this fund. They go on sale March 13 and may be had by contacting Mrs. Pellaton in room 6 in Crandall Gym, 240-958. Or you can contact Linda by writing to Chilton, in Trinity Hall, or Tom Barnhart at the CAPPM office, 240-572.

Discounts to be offered from local merchants

"Support the Merchants Who Support You" is the slogan of a student discount card sponsored by the AII and Student Roundhouse Service. This program is one of many in a series of continuing improvements student community relations initiated by Robin Baggett, AII Pres., and John Johnson, AII Vice Pres. Discount program will begin Spring Quarter, with cards going on sale during the first week of the quarter continuing throughout the quarter. Delta Sigma Phi fraternity will act as official agent for the program and will work in cooperation with Roundhouse to insure the success of the program.

Discount cards may be comparable in size to a credit card, according to Baggett, and will include the following information: the year of validation, the signature of the bearer, the AII seal, and a note which will read "Good only when accompanied by an AII card." The back of the discount card contains blank space to be filled in by the local merchants who have agreed to make a discount to Cal Poly students.

"To receive the discount privilege, the student must have the discount card and present valid AII card in his or her possession," Baggett added. The cards will be sold to students, for 50 cents per card, per year, with the income going for postage, printing and advertising of the cards. The remainder of money will assist other student service programs.

"As of today we have received through the mail, approximately fifty five requests for discount cards from local merchants in the San Luis Obispo business community with thirty-five cards in the works," Baggett said. "The discount range is percentage from 10 to 30 percent, with Blake's Priory, Great Brother's Men's Clothing, Abbe's Restaurant, San Luis Island Gift Shop, Cramer's Flowers, R & 1 Electronics, International Bicycle Center, Jewelry, Hobby Center, General Electric Appliance, Mission Village Boutique, Mike Dee's Imports, Cook's Variety, Market, Pete's Locker, Mission Yarn, The Crest Prints, three dry cleaners three paint shops, three hardware stores, five and ten with understanding of their low-income status while here, Baggett said.

The advantage to the merchants will be the increased business they will receive from students who have a new understanding of the merchants interest in their patronage and the merchants understanding of their low-income status while here, Baggett said.
BURGLARIES DOWN

by LAURA LAMPION

The large number of burglaries reported in this area which began during Christmas vacation have slowed considerably, according to Detective William Anderson of the San Luis Obispo Police Department. The number of burglaries fell by on off-campus residents was probably due to the vacation breaks, Anderson said. Students leave for Christmas vacations, weekends, and quarter breaks with the intent of returning. As a result necessary precautions are not taken, leaving many apartments, houses, and dorm rooms open for possible entry and theft.

According to Anderson, theft, or the intent to steal, and burglary, entry with the intent to steal, goes on, daily but vacation times, Anderson said, added that residential and auto burglary and theft are the major concern of students.

Anderson stated that television, stereo components and radios, watches, calculators, guns, jewelry, sewing machines and electrical appliances are the most popular items to steal. Perpetrators of burglaries are called by the Police Department, are hard to find, and rarely found in the area. The time the capture of one burglar will provide enough evidence to lead the capture of others.

As for the cause, Detective Anderson said, "There is no logical possible reason for the high burglary rate is carelessness on the part of the students." Students leave doors and windows open in homes and in automobiles, and students give the Police Department, are hard to find, and rarely found in the area. The time the capture of one burglar will provide enough evidence to lead the capture of others.

Anderson encouraged students to take necessary precautions against burglary, and suggested that they follow the guidelines prescribed in the Law Enforcement Manual: "Residential Burglary and What To Look For."

Women's lib views...

(Continued from page 4)

believe that it offers the chance to men to define themselves personally and to escape the ambivalence of their role.

The importance of using science and progress for the benefit of people, not vice versa, was stressed the entire evening by the speakers. The recognition that individual differences are more important than any sexual, racial, or ethnic differences would lead all existing movements into one. "They are all parts of the whole movement towards human liberation," Allen and Martin stated.

The activities of the women's liberation movement in the social, legal, and economic fields including the Equal Rights Amendment, class action suits, marriage and family reform, and the campaigns towards greater equality were explored during an all-day series of lectures and discussions. Miss Allen concluded the evening by expressing the hope that "progress and our society's technology can be used for people," towards the liberation and growth of every individual.

VULGARITHESE CAN Happen

WILLINGTON (UPI) - The Federation of American Scientists Thursday asked President Nixon to disclose whether weather modification was used as a "weapon of war" in Vietnam.

In a letter to Nixon, federation chairman Marvin L. Goldberger said charges of weather modification have never been denied and added "many American scientists are concerned about the precedents that such actions would pose."

He added: "The use of weather modification as a weapon of war is an opening wedge to the use of climate modification, the destruction of earthquakes, and other still more terrible methods."

Food stinks...

(Continued from page 3)

catering facility nearby, for almost the same per meal price, ($1.89.9 vs. $1.48.8), on a fewer menu plan, on fewer number of eateries, (except on Saturday evening), and, according to people who have eaten in both places, serve much better food."

In closing, I would just like to add, that because the food on campus has been generally poor, I am going to eat elsewhere next quarter, despite the inconvenience of the sake of those stuck on campus, however, hope that somehow things get better.

Now accepting bids for ushers

Seated bids to provide ushers for the March 34, concert with the Beach Boys are now being accepted, according to Laura Gelvin, chairman of the concert committee. Bids must be submitted to a recognized club or organization. A minimum of 40 and maximum of 90 ushers will be needed for the above in the Alumni Gym beginning at 8 p.m. The bid must comply with the set guidelines for use of the Men's Gym, as well as satisfy the committee's ushering chairman. This bid must also guarantee a meeting of all ushers on March 34, at 15 a.m. in the Men's Gym.

Tulip Trudy Beck at the Activities Planning Center at 40-0879 or ask Kenn Fuller at 94-0860.

We believe it will prove to be just what many of our beautiful young people are looking for in a evening. Why not stop by soon to see these enchanting rings?—Rudy Silva, Gemologist

Twinbills set for baseballers

Coach Berry Harr’s Mustangs became eligible for the first time this season last week when they won on the victory trail against a pair of formidable opponents this weekend. The Mustangs are scheduled to play a doubleheader at noon today against the U. of San Diego and then return home for a noon doubleheader on Sunday against Fresno State at the new La Mirada Stadium.

Both wiped out Tuesday’s scheduled night game in Santa Maria against U.C. Santa Barbara. The game is to be rescheduled later in the season. It was the seventh game lost to the weather this spring. Thus far only the Fresno State twin bill has been rescheduled.

San Fernando already owns a victory over Pacific Region powerhouse Stanford and leads with hard-hitting shortstop Mark Downey. Coach Harr will send Mike Kruh and Rick Blankinship in quest of his third victory of the season in the opener with Rich Simpson (1-4) slated to take the second game against the Dons.

The pitching rotation for Friday night sees junior, Dwayne Alderman (9-4) and senior Carl Hlavaty (1-4) doing the honors. Hlavaty has pitched six scoreless innings while Alderman allowed four earned runs in five innings last week in the 6-0 loss to U.C. Riverside. Alderman will be aiming to reduce his 7.71 earned run average.

Fresno has a 6-4 record against Pacific Region opponents thus far in 1979 despite having won two of three from UCLA, sweeping a three-game series against California, splitting a doubleheader with Stanford and losing all three against defending NCAA champion Southern California.

In Fresno the Mustangs will be facing their toughest competition this far in 1979. The Bulldogs are led by sweet-swinging first baseman Larry Shepherd, catcher Norm Kepnor and pitchers Dan Gilmorn and Brad Duncan. Bog outfielder Larry Cavileer continues to lead the Bulldogs in hitting with a .489 average. Other players, however, have matched Cavileer in number of hits with nine. They are: Shortstop Gary Stouke, centerfielder Dan Marple and catcher Doug Redick both 243, and second baseman Dave Oliver .300.

Netters to challenge CSLA, Pepperdine

The Mustang tennis team made the past weekend a week of making up for a time it considered a foregone conclusion. At the Cal State College Friday, 94, and battled UC Davis Saturday.

Friday the squad, now 64, travels to meet Pepperdine College of Malibu and Saturday to meet California State College Rodeo team without three top members

When the men’s rodeo team broke up the good showing the First National Intercollegiate Rodeo Association meet of the spring season for the Mustangs will have lost their stimulus.

Coach Bill Glidden, instructor of animal science, said that when the team enters the Cal State Fresno rodeo Clowns Tom Ferguson, Cliff Happy and Dave Clark will not be participating. There are four members have been mainstays of the team.

However, the coach has high hopes this weekend. Larry Roeser performing in five of the six events and Rich Partahn, the two other western riders.

Other members of the team will be: Junior, Jibstler, Red, Bluff, Charlie Castles of Rancho, Mark Clark of Boleld and Jack McDonald of Santa Maria.

The contest, scheduled to start at 9 p.m. on both Saturday and Sunday, March 17 and 18, will be held in the Clova arena. Admission price is $1 for adults and $0.50 for students.

The women’s team will include Linda Gill of Santa Maria and Mani Monte of Anaheim.

Mile record threatened

Several individual duals and a potential track record in the mile run highlight Saturday’s triangular track meet to be hosted by the Mustangs. In addition to the Mustangs, participants will be Cal State Hayward and Cal State Bakerfield.

Field events will get underway at 11:30 a.m. and running events at 2 p.m.

The Mustangs will be without two of their top individuals. Olympic high jumper Raymundo Brown will be competing in the NCAA Indoor track and field championships at Cobo Arena in Detroit on today and Saturday.

Coach Steve Simms also has entered 17-foot pole vaulter Dave Hamer in the national’s. Saturday’s triangular meet on the four-year-old all-weather track will be the first scoring meet to be held this season. Coach Simms expects it to be a very competitive meet.

“The marks may not be very good because we’ve all been bothered by rain, but I’m looking for a very competitive meet which should be a good test for us,” Simms said.

One track mark that may be wiped out is the 200 yard dash with a 22.6, 22.3, 22.5 and 22.7 mile established by former Mustang runner Melvin Michael in 1975.

The man with the 22.6 will earn that mark is Hayward’s Willie Eastham, the first black American to run under four minutes in the mile with a 3:56.1 effort last season.

Hayward’s Ed McCallum who has done 8-4 in the shot put and 177-4 in the discus this season, may receive stiff challenges from Mustangs Jim Brown and Scott Covery. Brown has a lifetime best of 8-4 in the shot and has done 10-11 this already this season.

Mileworm freshman Walter Mead will continue to be groomed for future competition in the rugged mile competition. He’ll run in the open 4:50 as well as the 1:58.8. He ran 4:37.8 on mile last week and 1:55.8 in the highs.
