In-the-round production highlights Spring play

by JOAN CAMPBELL

Within the past decade, words like "energy crisis," "fuel shortage," and "depletion of natural resources" have become increasingly important to the American citizen. Theories dealing into the prospective use of space power and the possible conversion of solar energy are tossed about while each day we come to rely more heavily on foreign sources to supplement our shortage.

The play, written by Paul M. Uta paraon la Tom Patna. The setting is a lower classroom. Richard Penska, Doug Scheldt, Richard Popham, and John Hathaway, Marilyn Lewis (not pictured) will be seen as the main characters of the play. Each member of the cast has read the book, CITIZEN Tom Paine, and is rehearsing all week to prepare for their performances. Five performances will be presented, since the seating is limited.

Twirlers spin

Square dancing, by it's name alone, turns many people off. Associated with hobbily stomps and corn liquor, it's true character is something else. Now recognized as the American Folk Dance, square dancing began in frontier banks and has progressed to include clubs worldwide.

A generation of what square dancing really is can be seen during Poly Royal, from 11 to 8 each day, in front of the library. Student members of the Poly Twirlers will be dancing, and inviting participation from onlookers.

Between square dancing tips, while the caller rests his voice, couples will pair off for round dances—which are also a big part of square dancing. Adapted from popular songs the Poly Twirlers will walk, twirl, and dance in the best ballroom tradition.

Students interested in learning to square dance are welcomed to the Monday Night Beginners Class at 7:10 in the campus snack shack.

While our resources have rapidly dwindled, another problem has appeared in the form of decomposition. It literally takes organic fuel products ranging from refuse to sewage to potato parings and cow skins, to potato parings and cow

Cement canoes race at Laguna

Four races will make up the competition. There will be men's crew races over a 200-yard course, a 160-yard women's race, and a faculty or mixed race over 180 yards. An added attraction is an open-class race planned over a 200-yard course. In the open race, power for the canoes may be derived from any source (excluding engines), including swimming, pulling and pushing.

Farm-cement is new to the boating world, especially in making canoes, according to Jeff Jackson, who heads the student committee in charge of arrangements for the races here. Jackson explained that until recently only boats of 10 to 15 feet were made from cement, but a maximum length of 50 feet has created a challenge for the student committee.

The Cal Poly entry is 18 feet long and 10 inches wide. Hull thickness is one and one-quarter of an inch. Participating students are funding the $800 cost.

Beside Jackson, Cal Poly construction engineering seniors who are working on the canoes are Richard Penska, Doug Scheldt, Richard Popham, and John Hathaway. The Outstanding Senior in Animal Science Scholarship was awarded to Leslie Sanderson, the Animal Science Scholarship was awarded to Leslie Sanderson, Animal Science Scholarship was awarded to Leslie Sanderson, Animal Science Scholarship was awarded to Leslie Sanderson, Animal Science Scholarship was awarded to Leslie Sanderson. The Outstanding Senior in Animal Science Scholarship was awarded to8, and that It was "a directorial and actorial decision" as to whether it would be included.

Advances tickets for the play will be available from the University Bookstore. Poly Royal will hold a special pipeline sale on April 30 at the Information Desk of the Julian A. Memorial Library. General admission tickets will be $3.00 for adults and 875 for students.

Ag club honors members

Two men were named Honorary Life Members of the Boots and Spats Club at the Animal Science banquet held last Tuesday night, Dr. M. E. Enisberger, special guest speaker for the evening and a noted author, received one of the awards. The other presentation was made to Lyle G. McNeil, member of the Boots and Spats.

Outstanding members of the Ag club included Ed Boelter, Gail McClellan, and Fred Rainey, and Rodeo Club, were also recognized.

Leary sentenced: six months to five years in state prison

Dr. Timothy Leary was sentenced to six months to five years in state prison by Judge Richard R. Johnson at the Santa Clara County Superior Court February 13, 1973. Leary pleaded the term prescribed by law to be served concurrently for two federal sentences for possession of marihuana. Leary has also been convicted of smuggling in Laredo, Texas and charges of possession and sale of marihuana in Santa Ana.

Leary has been at the Men's Colony in San Luis Obispo since 1969, arriving at the California Men's Colony by Judge Richard R. Johnson at the Santa Clara County Superior Court February 13, 1973. Leary pleaded the term prescribed by law to be served concurrently for two federal sentences for possession of marihuana. Leary has also been convicted of smuggling in Laredo, Texas and charges of possession and sale of marihuana in Santa Ana.

Irritated by ‘sexism’

Editor: I hope I am not the only person that is becoming increasingly irritated by the rhetoric, the arrogance, and the misplacement of the ‘sexism’ issue. The vast majority of people who join in the controversy, on either side, are essentially feminists who wish to redefine words and concepts. One of the most emotive words in the English language is probably ‘sexism’. It seems to have been applied to everything from human sexuality to human interaction.

However, there are some who feel that the term is being misused. They argue that the word is being used to describe behavior that is not necessarily sexist, such as the way in which individuals interact with each other. They argue that the word is being used as a way of reinforcing stereotypes and bias, and that it is being used in a way that is not necessarily accurate or fair.

It seems to me that the term ‘sexism’ is being used in a way that is not necessarily accurate or fair. I believe that the word is being used in a way that is not necessarily accurate or fair. I believe that the word is being used in a way that is not necessarily accurate or fair.

I hope that we can all agree that the term ‘sexism’ is being used in a way that is not necessarily accurate or fair. I believe that the word is being used in a way that is not necessarily accurate or fair. I believe that the word is being used in a way that is not necessarily accurate or fair.

Gas generator speeds decay...

(continued from page 1)generating of methane gas from this waste.

The antique generator that will be displayed this weekend, has been the topic of much discussion. Demonstrations have been given at the Bradley Elementary School and the Jurupa Mountain Cultural Center.

The demonstration appears and behavior still works. Improvements, in materials and design, could make this process a feasible alternative to fossil fuel.

Light blue Ghia ‘ripped off’ and ‘bashed’ by a ‘guilty party’

Editor: On April 17th I returned from my morning classes to find the left front fender of my light blue Karmann Ghia bathed in acid and the chrome ripped off. What a sight. It’s enough I’ve put so much money into the upkeep of my eight year old car, but now I get to look forward to laying out more money to fix the fender caused by some ‘accident’.

If you are the guilty party, believe me I know accidents can happen, but just stop and think for a minute. You are the cause of a lot of misery to me as well as damage to my car. I realize the cost of repair, which is estimated at $100.00, is a lot of money out of your pocket, but did you stop to think what it means to me, the innocent party!

You could have been decent enough to leave your name and your insurance company but I guess running away (I mean driving away) from problems is one way of avoiding any cost to you.

I don’t want to beg you to pay for the damage done to my car, I wouldn’t want to lower myself so far. All I can say is thanks for nothing.
The 1973 John F. Kennedy scholarship from the California Association for Health, Physical Education and Recreation (CAHPER) was awarded to Thomas Barnhart, a senior P.E. major here last Monday.

The $200 award is one of three such scholarships in the state. According to Barbara Ford, chairman of the scholarship committee, "the scholarship is awarded to the most outstanding senior or graduate student in the fields of health, physical education, or recreation.

"Candidate selection was based on the criteria of academic proficiency both theoretical and practical, professional attitude, leadership ability, enthusiasm, initiative, involvement in department activities, demonstration of a high degree of individual responsibility, evidence of good personal relations and the ability to work with others," Mrs. Ford said.

A group of people who are into classical guitar—either as musicians or listeners—will meet next week to organize a new club called the Poly Guitar Guild.

According to Ron Hansen, one of the group's founders, the Guild has already held one meeting and approximately 35 people attended.

"It was very successful," Hansen said, "however, the group is still looking for people who want to learn about classical guitar music.

The Guild plans to hold a general membership meeting Wednesday, April 25, in BA and E at 7 p.m.

Although still in the embryonic stage, the group has begun to plan a number of activities. According to Hansen, the Guild will sponsor a classical guitar workshop with David Grimes, a professional guitarist, sometime in mid-May.

For more information about the Guild or its scheduled activities, call Ron Hansen at 844-1793 or Dr. J. Barron Wiley, group advisor, at 844-6410.
Track rivals Fresno

Mustang track coach Steve Simmons heads into today's meet with arch rival California State University, Fresno, looking forward to a repeat of last year's victory, but still expecting a very competitive meet. The action is set for 4 p.m. at Ratcliffe Stadium in Fresno.

"We will be dropping some of our minor and quarter-mile events, such as Niels Kahlka, into the sprints and bringing up some of the sprinters, such as John Haley and Kerry Odd, into the middle distance events," commented Simmons.

Simmons is expecting improved performances from his 440 and mile relay quarters and hopes that his sprinters will run their best times yet.

Fresno State boasts one record as well. The Fresno team is looking forward to a repeat of last year's victory, but still expecting a very competitive meet.

The Mustangs will counter with a very strong middle distance group, featuring top class performers.

P.E. courses

get new names

A new numbering system for the physical education courses will appear in the 1973-74 Catalog Bulletin. According to Dr. Burntis, a member of the physical education department, the change will be in effect beginning the Summer Quarter.

Under the new numbering system for the classes concerning coed, men and women will be identified by a certain number.

All coed classes under general activities will be listed from 100 to 184. All coed classes under academic courses will be listed from 185 and above. All men's classes in general activities will be listed from 185 to 108. All men's classes in competitive will be listed from 186 to 124. All men's classes under professional activities (men only) will be listed from 141 to 180. All women's classes under academic activities will be listed from 125 to 160. All women's classes under competitive will be listed from 161 to 200. All women's classes under general activities will be listed from 201 to 230. All women's classes under professional activities (women only) will be listed from 231 to 250.

Under the present numbering system, all physical education courses are listed from 100 to 250 and all women's classes under professional activities (women only) will be listed from 101 to 224.

Under the new system it will be easier to find out if a class will be for coed, men, or women.
