A vet’s checklist

To avoid unnecessary hang-ups and hassles, and to insure good service to those veterans on campus who are receiving O.I. benefits, the veteran representatives for Cal Poly recommend:

- When contacting the campus representative have your V.A. file number (C No.)
- If you have any problems be sure and contact the veteran representative.

Plotkin summons students

by CLAUDIA BUCK

In a rare move in student body history here, ARI Pres. Scott Plotkin has called for a special meeting of the entire student body next Tuesday, Feb. 6. The meeting, which will be held in Chumash Auditorium at 11 a.m., has been set to discuss what Plotkin terms “one of the most crucial issues facing student government.” AB 3116 and the accompanying referendum on maintaining student body fees.

Survey: Poly students like houses better

The preliminary results of the Housing Preference Survey—sent out to 80 randomly picked Poly students and faculty—seem to show that students would prefer a house, in a mixed group, in a residential area rather than on or off-campus student housing.

Reasons most often given by those polled for selecting their current housing were, with largest response first: nothing else available at the time, type of housing, cost and distance from campus, other, condition and design, number of roommates, and availability of recreational facilities.

Food club cooking it on nutrition

by DENISE COLSTON

Food Industries is in the school of Agriculture and Natural Resources—not a concentration of Home Economics.

“We follow the product from harvest to market,” said Heidi Burrl, Cal Poly Food Industries Club member. The food industry student applies knowledge of managing jobs connected with operations of the industry from field to market. The graduate is qualified in production, quality control, food technology, marketing and management of the product, Miss Burrl said.

The Food Industries Club is concerned with the public’s awareness to preservation and processing of food. The goal of food preservation is to free man from total dependence on geography and climate in la to free man from total dependence on geography and climate In ever, not maintain the current 180 level, will be clarified. The referendum, included by state legislators as a mandatory requirement for the entire state system in passing the bill, will be voted on during campus elections Feb. 25 and 26.

However, the student vote is an advisory referendum and does not set the final fee. The final decision rests with the Chancellor’s office, following the recommendation of Pres. Robert Kennedy.

According to the director of ARI business affairs, Roy Geresan, if the student referendum sets the fee too low to cover certain commitments such as football team’s schedule into 1967, Kennedy will be forced to recommend raising it.

Endorsing a yes vote on the referendum, the student vote is an advisory referendum and does not set the final fee. The final decision rests with the Chancellor’s office, following the recommendation of Pres. Robert Kennedy.

Although admittedly biased towards a yes vote to maintain the fee at its present level, Executive Committee spokesman Sue Bugnion said “this is a state-mandated election and we’re simply giving our side to the issue.”

Committee member John Ronca explained the master calendar outlining campaign strategy, passed out the buttons which will be sold on a donation basis as a publicity fund raiser and had SAC members sign up to address various clubs on campus.

Next Thursday, Feb. 6, the committee will be holding training sessions to brief speakers pool composed of debate team and Speakeasy Club members. The speakers will be addressing various classes and organisations regarding the bill. AB 3116, which became effective Jan. 1, appropriates $2 million for Instructionally Related Activities (IRA) throughout the state system. These are activities and laboratory classes which are at least partially sponsored by an academic discipline or department and which are integrally related to formal instruction. In the case of Poly, those programs include agricultural judging, forensics, Model United Nations in others.

Food Industries Club has received two-thirds of its $181,886 allotment or $121,250 for the two quarters since the fiscal year began July 1, 1974. Since the first half of the fiscal year already has passed, provisioned group on campus la

Column called ‘low blow’

Editor:
I enjoy reading the Mustang Daily, and my favorite item in there are the editorials. Until this morning, they attempted to present both sides of the story, regardless of your own personal view and those of the other writers.

Then along comes Alison Harvey’s tirade against advertising, stockbrokers, and capitalism. I give little merit to those of the editorial for two main reasons.

The first is that I find it very hard to believe that a journalist, major with a concentration in technical editorial skill, is that the writer used quite a few empty phrases and made statements that, aside from not having anything to do with the editorial who cares if Russians haven’t had their orange juice this morning—they are able to get Pepsi Cola now so the sunshine fruit’s healthful juices are probably only a quarter page ad in Pravda anyway) and that they wouldn’t stand up if they did.

Stockbrokers are not totally responsible for the current financial fiasco. Maybe they sell stock, but people have to buy it before a stockbroker can make his money on the deal.

The second reason that I do not appreciate the finer points of her editorial is so idealistic reasons. (He editorial for two main

Harvey’s tirade against capitalism. I give little merit to the writer used quite a few empty phrases and made statements that, aside from not having anything to do with the editorial.

It is the same with advertising. Our wants and needs are inexhaustible! Any first year business student can tell you that. We may not need something, but if we see an advertisement, we might buy the product, and if we use the product enough it will become one of our needs. We don’t need buildings, books or clothing, if you want to get very basic about the whole thing, but they make it a lot easier to live.

Advertising serves as an information medium almost as much as does a newspaper. While the paper tells of what has passed, the ad (and this does not mean that all advertising is good) tells you of the future.

Finally, and this was the lowest blow in the whole editorial, Ms. Harvey stepped across the bounds of decency and good taste by criticizing the fact that Cal Poly has a department that turns out people to work in public relations.

What right has she to dictate what courses students should be able to take? A periodical of any sort without a PR section would function about as well as it would if it had no editorial control. In short, another MAD magazine. I sincerely hope something good will come of this.

Dan Friedman

Letters

Vet benefit

Editor:
Significant changes are needed in veterans’ benefits laws and in the Veterans Administration, in regard to services for Vietnam-era veterans. I am a veteran who wants to see these changes made, and I would like to locate other veterans who can contribute good ideas or useful energy in these directions.

For example, certain changes in the laws could free thousands of veterans to pursue alternative learning experiences of all kinds, not necessarily related to working towards a degree. This could include such things as carrying out a self-designed learning project, pursuing an apprenticeship in crafts, or starting an experimental living community. These are only examples of the wide number of possibilities not yet explored, and currently denied to us.

See campus raps Tom Jacobs and Don Marquardt.

Meet Euell Gibbons at EL CORRAL autographing session Friday, Jan. 31. 2:30—3:30pm

Other areas are equally important: I’m particularly interested in setting up a nationwide skill-ideas-friendship exchange network among veterans. Such a network could lead to many good experiences, as well as ways to get those experiences accomplished.

If you are interested in these things, and are a veteran, I’d like to hear from you - Lawrence Morgan P.O. Box 50, Indiantown, FL 33464.

Definition of life’ refuted by reader

Editor:
This letter is directed to the article “Definition Of Life Questioned”, published in the Mustang Daily, Jan. 30, 1973. To put this bluntly, Donald J. Curtis, Chairman for Life, you are a liar. You deceive the people by claiming that “abortion is allowed on demand.” The hell it is.

The Supreme Court decision of Jan. 25, 1973 states that an abortion may be obtained during the first three months of pregnancy. In fact, the Supreme Court states the woman has the right of an abortion after the first three months of pregnancy to decide whether she wants to carry the fetus. Between the third and seventh months of pregnancy, the states have the power to regulate medical aspects of abortion. After the 36th or 27th week (or 6 months) the states may forbid all abortions except those essential to save the mother’s life or health.

Therefore: ABORTION IS NOT ALLOWED ON DEMAND.

Plotkin summons students
(continued from page 1)

If they think concerts are bad
now," Ronca said, "wait and see
what happens if the fee is reduced
to $10 and the budget is cut in
half."

The $20 ASI fee has remained
unchanged since 1981. However,
said Gersten, inflation has
reduced the purchasing value of
the dollar to approximately 80%
percent. "Although the size of
the student body has increased each
year, such increases have not
been sufficient to offset the
results of inflation." Inflation has
also reduced the unallocated
reserves of the ASI to their lowest
level in six years. These reserves are
used to bail out groups who
suffer financial losses.

In the past, when there are
insufficient funds from reserves
to offset deficit, budget groups
receive cuts in their ex-
penditures. Many groups have
resorted to raising admission
prices to conquer the problem,
Gersten said.

After this year, the state
funding of IRA will become a line
item on the governor's budget
and subject to legislative vote
each year. Consequently, the
governor can choose to cut or
increase IRA funding as he or she
sees fit. "(Continued from page 1)

House survey
(continued from page 1)

Walking and driving were rated as
the most popular means of
transportation. Bicycles and then
public transportation were listed
next in preference.

Both married and single
students were surveyed with the
results of the two being tabulated
separately. The survey shows the
average cost of housing for
married students to be $315 a
month while single students pay
an average $79 per month and
have 1.5 roommates.

The preferred amount of rent for
the students surveyed closely
matched the average currently
paid by the students in both the
married and single categories.

Many students, however, do not
live under the average conditions
depicted in the survey and with
the completion of the survey
analysis, a better view of the
variety of circumstances in
which Poly students and faculty
are now living should emerge.

Of the 800 surveys sent out 500
were returned completed. Terry
Sanville, Planning Associate for
the City Department of Planning
and Building, termed the
collation of the survey as good.

Sanville pointed out that the
returns received closely follow
the percentages of married, single,
and faculty currently at Poly as well
as coming within one or two
percentages on class ranking and
area variables.

The survey is the product of a
joint effort between Cal Poly and
the San Luis Obispo Department
of Planning. The survey results,
according to Sanville, will serve
as an input for the forthcoming
general plan revision to be done
by the city.

Although student and faculty
desires will be considered there
are many other factors that
Sanville says must fit together
in order to create a realistic
general plan.
The Big Shot

"If I had one spacecraft, one Space Age development to save the world, I would pick ERTS and the satellites which I believe will be evolved from it later in this decade."

NASA Administrator Dr. James C. Fletcher had this to say of the Earth Resources Technology Satellite sent into orbit last week. The satellite, dubbed Landsat, is the second in a series of global monitoring satellites capable of photographing any given spot on earth every eighteen days. The data returned to earth from Landsat will be used in federal, state, and foreign governments, international organizations, universities and private companies for a broad range of earth studies.

The satellite was the first of six to be launched this year from the Kennedy Space Center at Vandenberg Air Force Base near Lompoc. Eighteen more will be sent into space from Florida.

Most of the missions scheduled in NASA's earlier years were undertaken to explore the space environment and develop techniques required for manned and unmanned exploration.

In contrast, approximately one-half of the missions scheduled for 1975 involve applications satellites to survey the earth and its resources, improve communications and enhance the accuracy of weather forecasts.

These are launched for other governmental agencies, foreign governments or private industry, with the space agency being reimbursed for launch vehicles and associated launch costs.

In its 29 months in orbit, ERTS-1, (Landsats predecessor), has returned more than 100,000 images, covering the entire U.S. and many other parts of the globe. The program benefits many scientific and technical areas. Agriculture, forestry, land use and mapping, water quality and resources, minerals and land resources, marine resources, and the environment, are among them.
Lidar can pick up the variations in sunlight patterns reflected from objects on earth (seven variations caused by subterranean materials, such as mineral deposits and water). This information is transmitted to earth, where it is translated into photo prints and tapes, sold distributed to researchers, analysts and users in agriculture, geology, land use planning and many other fields.
Prof unbottles genie today

"Contemporary Poetry: Unbottling the Genie" will be the topic when Dr. Gordon Curson speaks here today.

Dr. Curson's talk, which is being presented by the School of Communicative Arts and Humanities, will be given at 11 a.m. in Room 209 of the University Union. Admission will be free.

A member of the English Department faculty here since 1970, Dr. Curson will discuss the new strain of poetry that has emerged from a disharmonic contemporary society.

Before joining the faculty, Dr. Curson taught at College of the Desert in Palm Desert. He earned his doctor's degree at the University of California at Riverside, where he was a teaching assistant. He is editor of the California State Poetry Quarterly.

The talk on "Contemporary Poetry: Unbottling the Genie" will be the seventh of 13 programs scheduled as part of the Arts and Humanities 1974-75 series. Now in its fourth year, the series has offered a broad range of programs including programs of choral music, painting demonstrations, and lectures on various subjects.

$1,000 grant

A $1,000 research-travel grant from the Reader's Digest Foundation has been awarded to the Cal Poly Journalism Department.

The grant is used for travel to collect in-depth story material and photographs and to defray research costs for other important news events. This is the eighth year the department has received such a grant.

Photo winners announced

The winners of the "This Is Cal Poly" Photography Contest were announced at an informal ceremony on Wednesday, Jan. 29 at 10 a.m. at the El Corral Bookstore.

Ken Chen, a fourth year architecture student, won a $60 El Corral Gift Certificate first prize for his entry entitled "Gone."

Mark MacKinnon, a second year business major, was awarded the second prize, a $30 El Corral Gift Certificate, for his photography called "Reflections."

Third prize, a $10 El Corral Gift Certificate, went to Max Boverl, a senior majoring in journalism, for his entry entitled "John Stewart."

Boverl also won Honorable Mention for an untitled photograph.

Entries were judged on the basis of subject choice, composition, communication, print quality, and finish by Mrs. Helen Kelly, Bob Howell and Allen Pierce, all photo-journalism instructors.

Of the photographs, which will be on display in the El Corral Bookstore until March, Mrs. Kelly said, "We felt that the entries did give a well balanced view of Cal Poly and the life of students."

"If they think concerts are bad now, wait and see what happens if the (ASU) fee is cut in half."

Quote from John Ronca
Mustangs kick Bruins around

Winning only two matches, the Cal Poly wrestling team swept to a 28-6 win over the UCLA Bruins Tuesday night. The Mustangs won six straight bouts on route to their tenth dual meet win. Winning his 17th bout of the season, Rodger Warner gave the best show of the evening as he defeated Bruin Mark Black, in a superior decision, 16-3. With a footwork performance that Muhammad Ali would be proud of, Warner danced his way through the match showing complete control from the outset.

Mustang Mike Bodine surprised the crowd by pinning UCLA's heavyweight, Pete Pele in the third period. After the match Poly Coach Vaughan Hitchcock said from the beginning the plan was to tire out the UCLA freshman and then have Bodine take control.

Moments after the pin Bodine still looked shocked as he said "I didn't have that planned!"

Mark DiOrio won his 15th bout of the season as he won a 4-1 decision over Bruin Jim Mendota at 118 pounds. Cal Poly's Don Lawson won a tight match as he edged UCLA's Steve Pitcher, 3-2. It was the first win for the freshman after replacing the injured Benji Williams at 128 pounds.

The Mustangs, now 10-6, have the roughest part of the season out of the way. The team now has to concentrate on keeping itself together and not making mistakes, said Hitchcock.

Their next match will be here against UC Berkeley Friday night at 8 p.m.

Race horse owner defended

BENTON, LA. (UPI) — Racehorse owner Rex Ellsworth does care about his horses, says his son. It’s just that the ranch, which produced the winner of the Kentucky Derby two decades ago, is not doing well.

About 100 horses were found starving on his Ellsworth ranch in California last week. Kim Ellsworth said his father will do everything he can to take care of them, even if it means selling some of them.

Ellsworth, whose California-bred Swaps won the Kentucky Derby in 1968, was accused by animal welfare authorities of allowing some of the horses to die of starvation and the rest to approach death because of lack of food.

The son has 10 to 20 thoroughbreds on a spread near this Northwest Louisiana town and said some of them were brought from the California ranch a year ago. He said the California horses were being taken to another ranch near Tucson, Ariz., on a daily basis before news of their condition was made public.

"It is just depressing for us," the younger Ellsworth said. "No one likes to see these things happen and especially get it blown out of proportion."

Problems do exist, but I do think any farm in America will have some thin mares at this time of year that don't look good. Problems down there in California are a little worse, but not quite as bad as we were led to believe from information I received," Ellsworth said his father said. "He does care about his horses and he was doing all he could to remedy the situation just as fast as he could, we all were.

"We just got behind and that's what happened. Hopefully, if we can have a little break and if this kind of thing blows over, we can continue to get the horses moved around and taken care of or sold."
impressive Mustangs host tough SBCC volleyballers

Sporting an impressive 5-0 league record the Mustangs volleyball squad will host the Vaqueros of Santa Barbara City College tonight in an 8 p.m. non-league encounter.

The Mustangs hardly disposed of Cal State Dominguez Hills Friday, winning in straight sets 16-2, 16-1, and 16-0. They have been Cal Poly Pomona in their league opener in a tough five set match.

Fornication forbidden

NEWARK, N.J.UPI — Four moviemakers charged with fornication in the pornographic film "Deep Sleep" asked the federal courts Wednesday to abolish a New Jersey law prohibiting the act. The four asked a three-judge federal panel to declare the 1798 anti-fornication law unconstitutional in the context of film-making, arguing that the First Amendment guarantees the right to free expression through films.

Basketball intramurals for women

The Women's Recreation Association will hold a women's intramural basketball league beginning Feb. 3. The league will meet in Crandell Gym at 9 p.m. and will be free of charge.

All women students are eligible to play in the one of the better volleyball teams in California with "super players and good coaching." He thinks it will be a dandy match.

Coed hoop tourney set

A two-on-two coed basketball tournament will be held Sunday in Crandell Gym at 1 p.m.

Each team must consist of one woman and one man. The man may not be varsity or junior varsity basketball player,

Coach Ken Preston feels his team is making good progress and should be a contender for the league title.

Said Preston, after his team's loss, "We have worked very hard and as a result we are progressing, setting and playing super defense."

According to Preston SBCC has one of the better volleyball teams in California with "super players and good coaching." He thinks it will be a dandy match.
