A major oil spill off the coast of San Luis Obispo County and overindustrialization caused by refineries and petrochemical plants are two possible results of the proposed supertanker port in Estero Bay according to Rick Meyer. He spoke in opposition to the supertanker port Thursday during college hour.

Meyer, who represents the board of directors of the California Native Plant Society and the Maro Coast Audubon Society, as well as a group called Don’t Ruin Our Coast (D.R.O.C.) said there are 8,000 oil spills yearly against United States coastlines.

One such spill from a supertanker off the coast could do irreparable damage to coastal environments, including state parks and beaches, said Meyer.

This land is dedicated to the public and held in trust for future generations, and he feels a supertanker port would jeopardize it.

Meyer also predicts that the Estero Bay facility would be used to supply the crude oil needs of the Midwestern United States, by means of a pipeline, thereby increasing the tanker traffic and possibilities for accidents in the bay.

He said opponents of the proposed port feel it ought to be located in San Francisco or Los Angeles instead, but that the oil companies fear the vocal opposition that could be mustered in the larger metropolitan areas.
Pottery show will open next week

From an original list of over 400 entries, 70 have been selected for display during the Pottery 5 show, which will open Tuesday, April 13, in the Gallery of the Julian A. McPhee University Union.

A national open show for both students and professionals, Pottery 5 will be open for public viewing during regular hours of the University Union through Friday, May 2.

Roger Bailey, advisor to the Fine Arts Committee of the All said 70 entries on display were chosen by Juror Sheldon Kaganoff, a professional potter and member of the University of California at Santa Barbara faculty.

Kaganoff will judge the display pieces after they are received and cash prizes and purchase awards totaling $1,200 will be announced during a reception starting at 7 p.m. Monday, April 14. The public is invited to attend the free reception.

Rock dispute

New Editor

I would like to comment on the review of the Shanae of the concert which appeared in your April 7 issue.

Your rock critic needs to be a little more sensitive to the music history in the future. I have read several of his articles, and have been disappointed, or outraged, by all of them. His efforts to criticize the Shanae concert seemed like an unneeded attempt at sounding official. For some reason he thinks it is wise to be a critic, he must be negative. "Entertaining, but hardly inspiring" is not an adequate summary of a concert that was restricted the way our recent one was. He may not have seen or heard the standards clearly at the end of each of the acts, or the booting when the houselights were turned on at the end, or the horde of photographers in front, or the house, or the people dancing in the aisles, and from the tone of his article, I wonder if he even heard the concert at all.

I don't think their phenomena can be dismissed as symptoms of concert starvation, since although Cal Poly isn't known for frequent concerts, the students have adequate opportunities to see concerts elsewhere.

I had the privilege of being there, and saw a totally different point of view concerning the concert. Holding obviously tried too hard to make it still and the enjoyment from the concert. Journey, which did an excellent show despite Greg Rolie's bouncing, did not need to offer as much music since their usual music was more than adequately outweighed by their musical excellence. As a band, they functioned relatively well, and under the guidance of Carlisle, who, throughout the concert, was not only directing the musicians, but also the sound crew as well.

Canned was superb. He managed to achieve so many different effects on this type of music that it was sometimes hard to believe there was only one man. He had an air of confidence and expertise which meliand to the concert. He did not hold back, under his father, he acted in his capacity as leader of the band with humility rather than aggressiveness (unfortunately due to his new spiritual awareness).

The music did not suffer as a result of this, if anything, it sounded better. Although the band was not named after Carlos, it has never been his issue to be chosen. He merely backed up the rest of the musicians. Santana has always been played as a group and it should not be expected that Carlos would spend time in the spotlight playing by himself.

reusing raised a point about the volume and distortion. The music was too loud, but he is either confusing or assuming volume with distortion and theory entirely separate. Any distortion he heard was most likely not accidental. The sound system was not more than adequate for the size of our gym and was capable of producing that much noise without unwarranted distortion.

In conclusion, I would like to agree on one point: Holding made not much stands between Journey and greatness. But, Good job already there.

Immunization info could save your life

Has your immunization knowledge gotten a little hazy? Read on, because in this column we will hopefully clear the air about worldwide need/for young adults.

Tetanus protection is a must, because tetanus germs are ever-present, in more places than just the traditional rusty nail. Because tetanus (lockjaw) is not time-dependent, and because tetanus vaccine is readily available, safe, and completely effective.

It is often given in combination with diptheria vaccine to help keep that old killer suppressed. The currently accepted interval between booster shots after the initial babyhood immunization series is ten years. Boosters for additional insurance are often given at the time of certain types of injuries, regardless of the date of the last booster, after deep penetrating, dirty wounds, for example. There is no reason for additional for annual booster shots, and this practice should be discouraged.

Polio vaccine boosters may be given, after the initial series, at ten-year intervals, although most experts agree that continuing boosters after age 18 is not necessary in this country.

The widespread immunization of children in the United States has come close to wiping out this disease, which requires susceptible individuals for its propagation. But apathy, or ignorance of parents of their responsibility to immunize their children will bring it back, along with diptheria, measles, and whooping cough.

Smallpox has all but disappeared from the earth because of massive immunization programs worldwide. In fact, so successful has been this effort through the years that vaccination has been largely discontinued. But some experts fear that smallpox, like leprosy, is back again. The situation is being closely watched.

Influenza? The vaccine has recently become available, and is quite effective with minimal side effects, but because influenza is a virus, there will be no immunity from a single vaccination, and influenza vaccines must be given annually.

Annual mass immunization worldwide could conceivably eliminate this disease, were it practical. But remember everything we call “flu” is really influenza, and we have no vaccine.

And what’s the story on this vaccine has undoubtedly saved many lives, but is not 100 per cent reliable, and is no fun to remember--or (if you were bitten by a potentially rabid animal, unless it can be proven free of disease.

The reason: rabies is almost invariably fatal despite treatment. And don’t kid yourself that your annual rabies shot in October will do you any good if you are bitten by a dog that has rabies.

Typhoid vaccine has never amounted to much and still doesn’t. It’s probably worthwhile if the risk of acquiring the disease is high, but it offers only partial protection, and for no more than six months. So why not take a chance on good eating habits and hygiene, instead?

Gamma globulin, although not a vaccine, is used as an immunizing agent against some forms of infectious hepatitis. It is a human blood derivative, and can prevent, or at least modify the symptoms of the disease. It is advisable if it can be given within a few days of intimate exposure to a hepatitis case, every six weeks while living in an area with high incidence of hepatitis.

Rubella vaccine for non-pregnant women of childbearing age, who plan pregnancy and had neither the natural disease or the vaccine in childhood, is important in reducing birth defects.

In the space available, we could not begin to discuss all the protective vaccines, hyperimmune sera, and anti-toxins that could be important to college students, particularly those planning on residing in the areas described in this column, in which cholera, plague, tuberculosis, typhus fever, typhoid, and other exotic diseases remain a major threat.

Consult your Health Center or the local Health Department on such matters. It would be noted that the production of new vaccines, is slow, tedious, exacting work, but medical research in this field is very much alive--effective vaccines against some types of meningitis and hepatitis are about as hand on, for example.

Gonorrhea, syphilis, staph and strep infections, mononucleosis, here and there, but not in time to help the researchers, but we tell our friends that they don’t want it and they’ll do it--hopefully in your lifetime. Remember that available vaccine “on the shelf” won’t stop disease--only vaccination will.

It’s where you come in, now and when you are a parent.
Flowers help campus looks

by DOMI TOMATE

Facing the Snack Bar across from the Men's Gym lays a forage of ivy, most of it hiding beneath the shade of several eucalyptus trees.

But below the heavy green clusters sprouts flower plants spaced about a foot apart on a long strip almost looking like a frame. Most of the day, students can see a blond-haired Cal Poly groundswoman, who looks similar to a student himself, work busily on the bravely planted flowers.

But the project is his own thing. Cal Poly has nothing to do with it.

A 1973 graduate of Poly who majored in horticulture, Thom Geiger decided more colorful plants should bloom on campus, especially in spring. Just planted in the beginning of the quarter, Geiger hopes his 500 yellow and gold marigolds will bloom by Poly Royal.

The campus and professional chapters of Sigma Delta Chi, Society of Professional Journalists, announced this week rules for its second annual writing contest. The contest will feature cash awards for entries in news writing, feature writing, advertising, opinion and radio news.

The contest is open to all Cal Poly students not just journalism majors. All work submitted must have been done between May 1, 1974 and May 1, 1975. The deadline for entries is May 15.

Judging of entries will be done by professional journalists from the local media. This includes the Telegram-Tribune, Santa Maria Times, Santa Barbara News-Press, Five Cities Time-Press-Recorder and local radio stations.

Entries can be work done on or off campus. All entries should be mailed to Thom Looker's mail box in the Journals Department.

One of the most common questions asked by young adults today is "How can I establish a favorable credit rating before I need to borrow?"

Credit rating, according to credit officers, is unique to each individual as his fingerprints and consideration made in granting a loan. While credit ratings vary greatly, there are certain things that can help a young person get off the right foot in preparing for the financial responsibilities of adult life.

"An excellent way to start," officials point out, "is to open both a checking and savings account at a bank. Proper handling of a checking account over a reasonable period of time will help demonstrate that you are a responsible person, while maintaining a relatively small savings account indicates an awareness of thrift and the necessity of building one's own savings and preparing for unforeseen emergencies."

Both job and residence stability are considered in the granting of a loan. For example, many lending officials feel that, in general, the person who does not change jobs frequently, though not always, a better credit risk than a chronic drifter or job hopper.

Income level is another consideration in establishing a credit rating, and one rule of thumb states that one should commit himself to financial obligations exceeding approximately 40 percent of total gross income.

You needn't have a walletful of charge cards to prove to your banker that you are a good credit risk. Even one revolving charge account, which has been handled in an exemplary manner, can tell a lending officer a great deal about an individual.

"Although some people may be able to go through life paying cash for every purchase, the days are over for nearly everyone when a large loan must be considered," for example, to purchase a home or go into business. For this reason, it is wise to take positive action early in life to assure that all important credit ratings will be there when you need them," officials concluded.

Oly iron-ons.

Are you suffering from an iron-ons deficiency? It's a scientific fact that up to the age of 49, beer drinkers need iron-ons every day. That's why Oly is offering these eight colorful ways to decorate your clothes for only $2.50. Oly trademarks. "Powered by Oly" stickers. Even the famous hip-pocket Oly can in iron-on form. 8 stickers in each kit. You owe them to yourself.

Concert tickets available

Tickets for the 11th Home Concert, scheduled for 8 p.m. Thursday, will be available at the box offices prior to curtain time. An annual highlight of the spring music season at Cal Poly, the concert will include pieces from the Physical Education Building. Box offices in front of the building will open at 7 p.m. General admission for the event are priced at $1 for adults and $1 for students and children. They are also planning in advance Brown's Music Stores to pick up tickets at the University Union, and by members of the performing groups.

Student ensembles slated to appear during the concert are the University Jazz Band, Collegians, the Men's and Women's Glee Clubs, the Women's Brunettes, the Collegiate Quartet and the World Famous Majors and Minors. Reader J. M. Maloney will direct the jazz clubs. Majors and Minors will assist. Grandson J. W. Williams will conduct the jazz band and quartet. Both are members of the Music Department faculty.

SDX contest rules

The campus and professional chapters of Sigma Delta Chi, Society of Professional Journalists, announced this week rules for its second annual writing contest. The contest is open to all Cal Poly students not just journalism majors. All work submitted must have been done between May 1, 1974 and May 1, 1975. The deadline for entries is May 15.

Men's Glee on Tour

Over the quarter break the Cal Poly Men's Glee Club, directed by Stanley A. Malinowski, and the University Jazz Band, directed by Graydon Williams, journeyed off to the Sacramento and San Joaquin Valleys for the annual Men's Glee Tour. Leaving in the middle of finals, the Glee Club spent the next five days giving performances at nineteen high schools, returning home just in time to start classes in the Spring Quarter. Also performing were two specialty groups, the "World Famous" Majors and Minors and the Collegiate Quartet. Students and staff will have an opportunity to see all these groups perform at the 34th Annual Home Concert, Saturday, April 12 at 8 p.m. Tickets are available in the University Plaza, at the door or from Glee Club members.

Photos and text by Kevin O'Connor

While the Collegiate Quartet entertains an attentive audience the University Jazz Band (Collegians) waits for its chance to perform.

The "World Famous" Majors and Minors not only sing their songs, they spell them out. Keith Record (standing) and Ray Weems form the T in M-O-T-H-E-R.

University Jazz Band drummer Doug Clements stops to autograph a program for a fan after a performance.

Director Stanley A. Malinowski leads the Men's Glee Club in the Alma Mater at the close of the show.
Guitarist in concert

The multi-talented Jim Turner who played two different lead roles in the rock opera Jesus Christ Superstar will appear in concert in Chumath Auditorium on Sunday, April 11, at 7:00 p.m.

Tickets for the concert are $1 for university students and $2 for the general public. They are on sale now at the ticket office in the University Union.

Turner has played Pontius Pilate and Caspian in two different stage versions of Jesus Christ Superstar and includes in his repertoire, acoustic rock, folk, and country sounds.

When he learned of auditions for Jesus Christ Superstar in New York, Turner joined the hundred-member residence* and in the session, Turner earned the role of Pontius Pilate.

When the rock opera ended its long run in 1971, Jim Turner remained to further his singing career and gain solo performance experience at the Winchell, which spawned such acts as Daryl and the Bananas.

Book Review

Watership Down’ thick, steep and poor literature

by EILEEN BEGLEY

Watership Down, a number one best seller by Richard Adams, is an epic in length and price, if not in scope.

It's almost five hundred pages long and the paperback edition is $2.25. If you figure out the price per page (less than one half cent), then it's cheap. But quantity doesn't always mean quality.

This is the story of a small group of rabbits who are forced to leave their home. Fiver, a strange prophetic rabbit with visions of the future, foretells the doom of their burrow. Their land is to be "developed" with high class modern residences and in the process the rabbits will be exterminated. Fiver makes their decision and leave.

Under the leadership of Hazel, the young “Mom” of the rabbit world, they set off for the promised land. Both the book and the rabbits move slowly. Things “happen” to the rabbits and predictably enough the rabbits overcome them. Like the Leonardo da Vinci, like Ulysses and his men, it takes them a long time to get home. But you know they’ll make it.

Only male rabbits have come on the journey. It has finally occurred to them that they’d better find some females if they want their burrow to continue.

The closest rabbit burrow is Efrafa. It is under the military leadership of General. The book is divided into four parts. If you get as far as the fourth part, then you will have no problem finishing the last hundred pages. The conclusion is a bit of a letdown.

Pacific Conservatory to open eleventh season of repertory

by FRAN MOLAN

The Santa Maria season on any evening including weekends for $12.50 savings. Grand Slam Subscriptions are $16 per season. Only male rabbits have come on the journey. It has finally occurred to them that they’d better find some females if they want their burrow to continue.

Season falls a few ticks short

By STEVE CRUM

SLOVIANO, when the clock struck twelve all the frill and razzmatazz had gone and she unwittingly returned to a life of anonymity.

But at Golden Valley salon the story had a happy ending with the triumphant return of the beautiful prince.

"We could have won 20 games easily," said Coach Tom Wood.

The Mustangs' season was marked by two events in March, when they won their first NCAA Division II Regional, as they finished third in the Far Western NCAA Conference.

We could have won 20 games easily," said Coach Tom Wood.

Wheeler attributes the collapse in the second half of the season to the departure of Gary Orgill. The Mustangs were shooting 47.1 percent, but the shooting percentage was reflected in the number of turnovers the Mustangs had suffered in the second half of the season.

For coach Ernie Wheeler the season was marked by two events in December, when they won their first Riverside game.

As the Mustangs rebounded from a 2-10 start to the season, Wheeler called his players into the gym and spoke of their potential.

"We're building a team that could go places," Wheeler said.

Off the court, Wheeler is a soft spoken man who is often away from the game to be with his family.

For Cinderella, when the rocket pass came with 1.8 seconds left, it was a second in a season that fell short of its potential.

For the Mustangs down the stretch, they averaged 15.5 points a contest in league play, while finishing second behind Orgill for season scoring honors with a 14.3 mark.

The Mustangs may not have won the conference, but they did have a happy ending with the triumphant return of the beautiful prince.

Speaking of his team, Wheeler said, "They are a pleasant problem of deciding who will fill the critical role of floor leader." Wheeler said there were several possible candidates for the job, but until then the Mustangs had to be satisfied with a veteran defense

"We're building a team that could go places," Wheeler said.

Coed nine face UCSC

The Cal Poly Women's Inter-collegiate Softball team will start their season this Saturday with a doubleheader against UC Santa Barbara.

After this weekend's season-opening doubleheader, the Mustangs will participate in a tournament at UC Riverside April 17-19.

On May 1-2 the team will travel to Huntington Beach to participate in an American Softball Association inter-collegiate tournament. The tournament will bring together 8 college and universities in a double elimination round.

Cal Poly is slated to take part in a May 10-11 tournament at Balboa hosted by Hanover College.

Probable starters named by Coach Mary Stallard for the UCSC doubleheader are:

Fay Flyer, a sophomore from Bishop, first base; Kathy Pollock, a junior from Bakarsier, second base; Jo Gillett, a sophomore from Escondido, shortstop; Valerie Peeler, a junior from Gilroy, third base; Lee Ann Britt, a junior from Hollister, catcher; Janet Plesker, a freshman from Whittier, outfield; Kathy Byrne, a freshman from Oakland; Yvonne Carrillo, a sophomore from Hollister, and Kim Graham, a junior from Hollister, pitchers.

The three pitchers also will see some outfield action.

The doubleheader to be played at home will start at 1 p.m. The games will be played either at Mustang Stadium or Pacheco Field.

The relay team placed sixth in the event at San Diego last week with a time of 5.36. The teams best time of the season, 5.12, was recorded in Las Vegas in February.

Williams, a Liberal Studies major, will also compete in the high jump and long jump. She is one of two new Cal Poly competitors this weekend.

Evelyn White, a junior Physical Education major from Richmond, the other new competitor will enter both the 100 and 220 dashes.

The team has established 4 school records this season and is scheduled to break 5 records this weekend.

Competition starts at 11 a.m.
