Land ho!
Poly seeks further growth
From Plains to Poly

It came too late, but the Baptist Church in Plains, Ga., has decided to allow blacks to join.

On Sunday, after intense lobbying by President-elect Jimmy Carter, the congregation voted to lift the church's 1932 resolution barring "Negroes and other civil rights agitators." Under general circumstances, the policy of a small town church isn't news to the nation's press. However, in Plains, the President-elect's policy is to exclude blacks and the town is in the South, it makes headlines.

The ban became an election issue just before the census ended. At that time, a black minister tried to integrate the church, only to be barred at the door.

Carter, clearly embarrassed by the incident, said he would stay in the church and work toward a policy change. Many people had urged him to quit the church in protest against his position.

It's good that our future President's church is open to all people, regardless of race. It keeps the U.S. from being a country of discrimination and racism.

The underclass is black, but it's not just blacks. It's all Americans that believe the rich are not investing in the poor.

Under his thumb

Sinking GOP may require major overhaul this time

by J.R. WERTHER

WASHINGTON— GOP leaders are talking about the possibility of an overhaul of the Republican Party. The party, which has been struggling to regain its footing after losing the White House in 2008, is now facing a serious challenge from Democratic nominee Barack Obama.

One option that some party insiders are discussing is a major overhaul of the party's platform and its leadership. This could include changes to the party's bylaws, as well as a new set of policies that would reflect the current political climate.

Another possibility is that the party could consider a more centrist approach, moving away from its traditionally conservative positions. This could be seen as a way to appeal to a wider range of voters, including those who are concerned about social issues.

However, these suggestions are not without opposition. Some party members are concerned that an overhaul could lead to a loss of the party's core supporters, who may feel that the party is drifting away from its traditional values.

Despite these challenges, many Republicans are hopeful that the party can weather this storm and emerge stronger. They believe that by adapting to the changing political landscape, the GOP can once again become a major force in American politics.

HOLY, ALIENS!

El Refrito again. I want to invite all of you down to the late late to get into the early California Thanksgiving spirit.

YOU LIKE MY NEW SOMBRERO?

TOMAH, HERE, AND I AM GOING TO HELP YOU WARM UP TO THE BEER BIRD FIESTA BY SERVING TURKEY TACOS THE WEEK BEFORE THANKSGIVING.

BOY, ARE THE GUYS' PUNS UNBEARABLE!

DO COME ON DOWN AND "GOBBLE" (HEH, HEH) SOME OF MY FAMOUS TURKEY TACOS OK?

Bike use may be banned

by BYROE LOMELAND
Daily Poly Writer

Bike riding may be banned on Cal Poly's campus, according to a Student Affairs Council proposal.

The SAC Administration Committee is considering the ban which would ban people from riding their bikes.

According to committee members, an sao would prohibit bikes on the outer campus, and possibly on the inner campus as well. SAC is currently considering a ban on bikes on the entire campus.

There have been several injuries on campus involving bicyclists hitting pedestrians or other bicyclists. The number of bike-related accidents has been increasing, according to a spokesperson for the campus police.

By not allowing bikes to be ridden in the crowded core of campus, the SAC Administration Committee hopes to alleviate these incidents and provide the campus with a safer place for both pedestrians and bicyclists.

"We can't have people just riding all over the place," Boero said. "This will go into effect immediately.

"The ban is still in the planning stages," Boero said. "We will present its proposal to SAC, who must then send the proposal to the School Administration Committee and have the final say on the matter.

The School Administration Committee, which is comprised of members of the administration, is the group responsible for implementing the ban on bicycles as far as the eye can see today to the popularity of the two-wheeled vehicle. Bike use may not be banned in the inner core of campus. (Daily poly photo by Bill Pullman)

Spent the holidays on the buddy system

by ELENA MARIE
SAC Correspondent

The Cal Poly Housing Office has devised a buddy system to help students spend the holidays away from home. The program pairs students with a roommate for the break and makes plans to get together then.

"Normally students find someone by themselves," Lambert said. "This service is designed to speed up that process, especially for the students who are fairly new and probably don't know as many people.

The housing office is acting simply as a referral service. The students will be given the list of students in town and they will be left with the responsibility of getting in touch with each other.

"We will leave the arrangements of what they want to do up to the students. Whether they're looking for someone to stay with them for the whole time, or a short period of time, or one day, they should be able to make the plans themselves.

Since the program is new at this campus, and has never been tried at other campuses, there is no way of knowing what the demands will be. The service will be available for as long as the students meet other students downtown over the break and make plans to get together then.

"Normally students find someone by themselves," Lambert said. "This service is designed to speed up that process, especially for the students who are fairly new and probably don't know as many people.\n

Land is possible off-road site

by PAULA CHAMBERS
Daily Staff Writer

The possibility of obtaining the 1,300 acres of surplus land that is located almost directly across Highway 1 from CSUCI ingredients Community College, as well as recreational off-road vehicles was recently discussed by the committee.

The committee, established by the Morro Bay Parks and Recreation Commission, is now in a "wait and see" mode, according to Mrs. Maxe, chairperson of the committee.

"We are waiting to find out where the land is going," she said. "We know that Cal Poly has an interest in it, and the City of Morro Bay recently sent a letter to the General Services Administration stating that they would like to acquire the property as a part of their master plan."

Morro Bay City Administrator Murray Ward said that the city has no definitive plans for the land, but that at least part of it would be used for a water reclamation system.

"The main thing is not to let the land get away," said Ward. "The reclamation system is the main reason we want the land, but it also has recreational potential and a site for off-road vehicles is just one possibility."

The administrator added that he is aware that Cal Poly has an interest in the land also, but does not know what the committee will be.

"If the city acquires the land and does not want part of it for the off-road vehicles, or if some other institution would like to use it for some other purpose, such as an alternate site, said Ward. "We are not meeting right now, and will reconvene when we hear some news about the surplus land."

Drill added that there are over 1,000 registered off-road vehicles in San Luis Obispo County, with many having permits for ridings on the public lands.

"We know there is a need for this sort of thing," he said. "This problem is not going to stop so we need to ride their vehicles illegally because there is no place for them to go in showing up all over the county."

Riding motorcycles and other off-road vehicles is recreational and the county should have a location where people can ride legally, according to Drill.

"I see this as a county problem," said Dave Barry, director of the Morro Bay Parks and Recreation Department. "But Los Angeles County has a program that has been very well received."

The Drill added that the land would pay for itself, as it would be free from the government, and the only cost would be for maintenance. "Riders would be required to pay a fee to ride on the land," he explained. "This would be a popular deal, but it would cover costs."

The ad hoc-committee will face several problems if the land, or a part of it, is given to them for the off-road project. Aside from the many fees that would exist at that time, there may be to obtain funds for an environmental impact report.

"There are a lot of reasons to overcome, especially since we are not even sure how we will approach the project," said Drill. "But our major problem right now is finding out where the land is going."

"I think they will look for a new star-studded, glamorous place," added Drill. "The idea is to make this land available."

Hart's performance before an attentive sold-out house at Cuesta College received a standing ovation at the conclusion.

The following interview is a condensed version of two separate interviews with Hart prior to his performance with the County Symphony.

"I'm a working musician, period. I don't know that I have any time whatsoever," Sidney Hart said.

Said Hart, as a result of his Dual position as a symphony conductor and assistant conductor of the Los Angeles Philharmonic Orchestra, is well known to many people across the county. Hart was the ad hoc-committee will only be able to purchase the land if the Education and Welfare Department of the university is the listing agency.

"Eight years ago the federal government gave a major grant to the land available. Only 25% of that grant was used for land, according to Doug Gerard of Cal Poly Planning.

About 1,300 acres of surplus land adjacent to the Northern section of Poly property, almost directly across Highway 1 from CSUCI Community College, interests Cal Poly as a possible agricultural or educational site, noted Gerard.

"The land has been under the jurisdiction of the State Department of Parks and Recreation for two years now without being developed," the planner said. "We have informed the public that the land is being returned to the federal government and we are prepared to develop it for agricultural purposes."
Parke and Recreation within the stipulations that it was to be
developed within a year, sustained Gerard.
"The land was not developed as a park site since
the possible hazards in the area." Gerard
attributed these hazards as being natural and
surrounding landscape, as well as the land used as a
existing ground by Camp

"It is not too likely that we see this as a
park soon," said. "It has been
given to Cal Poly's Agriculture
Department, and the Army has
suggested that it has to be
held for future use.

The university is satisfied
that the land is safe, he
added.

"The only reason that Cal
Poly is interested in this
future of the land is because
the university feels that it is a
property under the GSA, the planner

The site of 1,185 acres of federal land which Cal Poly would
like to acquire as a possible agricultural training site. The
Morro Bay Parks and Recreation Commission would like
to have this land used as an agricultural field, and we
need more land.

"Acquiring the land is
logically needed if we are to
expand our agricultural
programs," he stated. "The
site is suitable for our
purposes because it is
largely range land.

The land is to be used for recreational off-road vehicles. (Daily

OH Club meeting
A former Cal Poly graduate will be the featured speaker at the Ornamental Horticulture Club meeting Thursday, Nov. 18. He will be present at the University Union to negotiate with Charles Walker, head of the ornamental horticulture department. The meeting will be held at 10:30 a.m. in Room 108 of the University Union.

Acupuncture film
"Acupuncture is a wonder," a film showing the variety of techniques and operations performed using acupuncture as the only form of anesthesia, will be shown Nov. 10 at 8 p.m. in the lounge of the Student Union. The film is produced by the Oregon State University College of Veterinary Medicine.

Solar cell discussion
John F. Lawrence, president of Silicon Materials, Inc., will give a talk on the economics and technology used in converting solar energy to electricity. The discussion will be held in the student lounge on the third floor of the Union.

Cal Poly Cheering Gift Box
Whether you're planning a special gift for someone or just want to spread some cheer, a Cal Poly Cheer gift box is a great option. The gift box contains a variety of Cal Poly-related items, including a keychain, a coffee mug, a T-shirt, and a hat. The gift box is available in a variety of colors and can be personalized with a message or name.

Dear recreation major—sorry, but no faculty

by RANDY NAX

Daily Staff Writer

The newly approved Recreation major is a welcome addition to Cal Poly's array of business, health and education but is a pioneer in the social sciences. It is a recreation facility to bank the course.

The RA major is a separate major administrated by both Men's and Women's Physical Education departments.

The major is directed by PE teachers, according to Carolyn Shank, assistant professor of recreation. Because of the FE major's emphasis on a small group of students, every student must choose the major.

Presently, only PE, Natural Resource and Social Science students who have taken recreation courses at Cal Poly or other campuses may transfer to recreation education.

The reason for this discrimination in the program isn't fully im- mersed by Shank or Thomas, but it is hoped that the RA major will be easier on the major to change. The FE major requires a minimum of 36 units of work required of FE majors. But the PE major requires six units of work required of PE majors. The new major has six units of work required of PE majors.

Carolyn Shank, coordinator for the newly approved Recreation Administration major, works with her PE class. The vew major has six units of work required of PE majors. The new major has six units of work required of PE majors. The new major has six units of work required of PE majors.

Division courses are being added one at a time.

"To get the program really moving, we need a full-time recreation specialist," Shank said.

A Bachelor of Arts degree in Recreation Administration will also enable people to work in prison systems, federal agencies and state parks, Shank said.

Join in recreation are available. A 1975 study by California Manpower (state employment survey) revealed an increase in the demand for recreation professionals.

The survey predicted by 1980, there will be more jobs available in recreation than people to fill them, Shank said.

Carolyn Shank, coordinator for the newly approved Recreation Administration major, works with her PE class. The new major has six units of work required of PE majors. Shank said.

Intramurals
cagers playoff

Paly’s intramural basketball season has been underway for over a week. Games are played daily at 5 p.m. in the Men’s Gym. The intramural “A” League will get started.

Younger’s feature game that night was decided by a 14-6 victory. "I got to live," Anderson noted, "and left behind history,'’ said Anderson.

Donnie Dula, a sharp-shooting center who prefers to be the team’s #2 player, was the team’s #1 player. He made a balanced attack. The intramural final game was First Entry Take as sensational intramural basketball. Winning was the experienced players, according to the Intramural director, Dick O’Rourke. Paly’s popular sports at Paly, Younger’s playoff promise is to be one of the year’s bittersweet agonies.

CP football high in CCAA

With two non-conference games left to play, Cal Poly’s football team, 6-4-1, remains a surprise of the Cal Coast Collegiate Athletic Association. A shocking high in CCAA football statistics. Cal Poly’s Bob Treasure is the leading receiver with an average of 10 yards per game. He has rushed for 267 yards and seven game, leading the scoring. Interior players, in the absence of Tailback Jeff Jones is stuck.

Quarterback Bob Anderson is averaging 102.4 yards per game. He has completed 164 of 266 passes and only seven interceptions, a completion rate of 61.8% of the passes attempted. Anderson is also second in passing efficiency with 118.8 yards per game. He is second only to Quarterback Jack Judd in receiving with 39 catches and 553 yards, averaging 14.1 yards per catch.

Water polo ends season in third place

Cal Poly’s water polo team ended its season by winning two and dropping one game in the Intramural games at Cal State Northridge, Nov. 12 and 13.

The Mustangs finished with a 2-4 overall record and placed third in league play with a 2-4 record. Cal Poly’s lone loss was to Cal Poly Pomona in the California Collegiate Athletic Association title with a 2-4 record. "We played Pomona even the second half," said Dick Anderson said of the 11-4 defeat. "We didn’t play very well against them, but we should have played better.”

Cal Poly’s next loss, which finished last with an 0-4 record, was hounded by the Mustangs, 10-4. After a disappointing 12-14 defeat to Northridge last week, Cal Poly came back and avenged the loss by beating CSUN 15-10. In one of the most exciting games of the tournament, Northridge took an early 1-0 lead before Cal Poly outscored its opponent 6-1 in the last quarter. Northridge placed second in the league with a 2-4 record.

Asked about his feelings toward the season, Anderson said, "I was pleased with the season, but we are a lot of a victim of scheduling. We just started to play this weekend, we should have three weeks ago.”

Hunter was named to the first team all-CCAA squad, according to Ken Barlow, publicity director for the CCAA. Griffith joined Dave Parnell on the second team squad.
