Board of trustees passes IRA fees

$10 limit imposed
until at least 1981

By RICHARD PRICE
Daily Mail Writer

Cal Poly students had heard out of their share, January 31, with the power of an intramural athletic activities (IRA) fee.

Designed to support athletic activities like school bands and student athletic programs in- 

by the California Polytechnic State University (CPC) Board of Trustees at its meeting this week in Long Beach.

As for the fee, the board stipulated that it may be raised 10 per cent per year on a (IRA) fee on the CPC system. According to Cal Poly President Robert Z. MacDonald, this means the IRA fee will be raised $1 per year for the first year and $1 per year, increasing $1 per year for the next 10 years.

Student fees will begin paying the IRA fee in the fall 1979.

The IRA fee will be used to support athletic activities on the campus.

There are some people who feel the Central Coast is somewhat culturally lacking, but high caliber student athletic programs are right in our own backyard.

The Pacific Conservatory of Performing Arts (PCPA) at Santa Maria's Allan Hancock College is a program that's worth supporting if you believe in helping your community.

The students at PCPA are teachers, studying, and working hard to put on a production.

Another concert goes down the tube

Sunday night, while sitting on the back four of the Chico Magnolia concert, I had rather agree with Al who was sitting directly facing its site. They seemed to be doing a wonderful business showing as well as people who were sitting there. The concert was to be going on in the Multipurpose Room. It was a typical students' concert. Just like a real university.

It was too good to be true. Easily this week, the administration lifted heavy restrictions on the concert. The restrictions were not clear to what extent or what limits could be viewed in the concert. The administration obviously wanted the concerts to continue. They were clearly against the concert from the beginning.

The concerts are not easy if it is not the best. The faculty have it tightly controlled. What demand they have to make it clear, but their restrictions are few to none.

At the end of this concert, the audience stated that they had brought in the best. This year is a wish the administration.

Problems were to be expected. The concerts might have provided a higher quality in the concert space than any George Brown, but there is no reason for that. The administration could have allocated members of the concert committees to fill the whole evening without a scuffle.

The latest dimension in children's toys

Recently, I had to go through the ordeal of finding suitable birthday presents for a couple of small relatives of mine.

Now that the market is so vast, I haven't been far from some time now. Frankly, I didn't know what the younger set was going to do over these days.

Finally, in desperation, I decided to ask my friendly neighbor's toy manufacturer for advice.

"You ask me what's in these days?" said Leo, with a knowing smile on his face.

"I was just wondering if you thought that the new styles of dolls and games designed to appeal to television are going to be popular this year.

"Lately, the next step in real-life, games and dolls are those that are likely to appeal to the TV viewing public. There are new, real-life dolls that mimic various types of activities. What's the latest?" Leo asked.

"Well, do you have any suggestions?" I asked.

"Of course! I would recommend the latest designs for kids. With the new line of dolls, it's easy to find a doll that is realistic. The dolls have realistic features like clothing, accessories, and even hairstyles. It's a hit with the kids, and it's an excellent opportunity for parents to introduce the concept of real-life preparation to their children.

"What sort of dolls?" I asked.

"The dolls are realistic, so they can be used as play dolls, but they are also designed to appeal to the TV viewing public. They are realistic enough to be used as play dolls, but they also have features that appeal to the TV viewing public. It's a great opportunity for parents to introduce the concept of real-life preparation to their children.

"Dingy dairy diet"

We didn't know what to make of the recent announcement by the U.S. Department of Agriculture which said that the government might ban the sale of dairy products. It's a disaster, they said. The regulations would make it impossible to buy milk, cheese, and other dairy products.

"But why would they do that?" I asked.

"They have evidence that dairy products are not safe. They say that they cause a new disease called 'dairy disease.'" Leo continued.

"But I haven't heard of anything like that," I said.

"Well, it seems to be catching on. People are starting to report strange symptoms like headaches, digestive problems, and even cancer. It's a very serious issue.

"How do you feel about it?" I asked.

"I think it's a good idea. I don't want to eat any more milk or cheese. It's just not worth the risk." Leo replied.

"I don't think I can do that," I said.

"Why not?" Leo asked.

"I just can't give up dairy products. They're too important in my diet. I need to eat milk, cheese, and other dairy products to get the nutrients I need."

"Well, you might want to try a dairy-free diet," Leo suggested.

"But I don't want to give up dairy products," I said.

"Well, you might want to try tofu or other non-dairy proteins instead," Leo suggested.

"Tofu sounds interesting," I said.

"It's a great protein source," Leo said.

"I'll give it a try," I said.

"Good luck," Leo said.

"Thanks," I said.

The administration was very clear about the restrictions on the concert. It was not clear what extent or what limits could be viewed in the concert. The administration obviously wanted the concerts to continue. They were clearly against the concert from the beginning.
Councilman calls for rational action

By MICHAEL COSTY
City Councilman Pat Snieckus said yesterday that he supports the proposal for a $10.60 real estate tax "in order to help meet the needs of the city."

The ordinance prohibits any home in the city from being bought for less than $20,000 and sets the minimum mortgage payment at $10.60 per month. The councilman said the ordinance is a "rational" solution to the housing crisis.

"I'm only here to speak as an ordinary citizen," said Snieckus, "and to express my support for this ordinance."

Snieckus added, "I believe it is important for the city to take action in order to help those who are struggling to afford housing."

The ordinance, which was introduced last week, would require all homebuyers to pay at least $10.60 per month in mortgage payments, regardless of their income. The councilman said this would help to ensure that all residents have access to affordable housing.

"It is important that we take action now to address this crisis," said Snieckus. "We cannot continue to ignore the needs of those who are struggling to afford housing."
Volleyball team drops first match

By Jim Alversez
Daily Sports Writer

First matchitters andorved mustangs dropped a little more than the Cal Poly Volleyball team dropped its previous encounter. The Mustangs, 13-10, 15-11, 10-12, Wednesday in U.C. Santa Barbara's Westem.

The Mustangs will try to keep their record today when they meet U.C.S.B.

Cagers lose to UCSB, 76-58

The women's basketball team fell at the hands of the University of California at Santa Barbara's Gauchos Wednesday 59-58.

The Mustangs were their own worst enemy as they had trouble with turnovers and making their shots count.

"We were outstanding 46-55," said Coach Mary Streibel. "We had a second and third effort from the boards and that hurt us.

The team moved the ball well but it definitely didn't play its best defense tonight," she said.

"I think we can beat them the next time we play them," she said.

All Corroth was top scorer for the Mustangs winning on 14 points. Orrock and Kristen Bryan shared the honors for rebounds with 11.

The squad will travel to San Diego next Saturday to take on the Anteliers. Friday's match will begin at 6:30 p.m., while the invitational is at 8 p.m.

Mustangs hit the road

The Mustangs, who were bumped out of a share of the California Collegiate Athletic Association(CCAA) lead as a result of splitting two games that weekend, will have a chance to get back onto the court with two out-of-town game today.

The basketball team plays at U.C. Riverside today and second game on Saturday is to be determined. The Mustangs are 2-13 overall and 1-6 in conference play.

Poly has been the best of best playing Riverside on its home court. The Mustangs first win at cadence came last year when they beat the Highlanders 79-74.

On the way to the CCAA crown last season Coach Wheeler's team divided with Westridge winning on the road and losing at home.

"We can't afford to play like we did earlier this season. We have to show defense like last time, and respect to beat anyone," said Coach Wheeler. "We must not make needlessly effort to beat people, we must not play very poorly against Pomona.

Mustangs center Paul Mills is not only the best rebounder but the CCAA leader as well. Mills is second of the field leader in points, and he is fifth best scorer in the league.

Poly will bring a 7-6 overall record into the weekend matches.
