Eloquent portraits of life

By BILL McKEAN
The black-and-white and color photographs of artist Eugene B. White, on view as the February "Unseen Galleria," are the result of his own creative talent. They come straight from the photographer's viewfinder, with no press or assignment. The exhibit, "Art for a Time of Transition," includes some of the youngest portraits in the show, as well as older ones. The portraits range from the everyday to the dramatic, as in the portrait of a young girl in a striped dress.

White, 46, a native of Ohio, has lived in California for the past 15 years. He has been painting professionally for the past 10 years and has exhibited his work at the University Art Gallery and the Museum of Art in Los Angeles. He has also taught at the Otis Art Institute.

The show opens on February 1 and runs through February 28. It is sponsored by the University Art Gallery and the California Polytechnic State University Art Department.

Heilmann reflects on country's qualities

By SANDY MUX
Daily Hotel Writer

San Luis Obispo County has clean air, good land and ample water, with just enough people to make it a place to live.

That is the evaluation Hans Heilmann, 10-year-old son of the Board of Supervisors chairman, gave the Daily at his home for the past 10 years.

Heilmann's devotion to San Luis Obispo and his desire to see it prosper prompted him to run for the County Board of Supervisors 10 years ago.

"As a boy, I knew we had great potential," Heilmann said. "But now I know we have great potential."

Heilmann was elected Board of Supervisors chairman at age 10 and has been reelected every term since then.

"I was disappointed with the former supervisors and the city council," Heilmann said. "I was told they were just treading water."

Heilmann said he had been a member of the county's grand jury and farm bureau.

Heilmann's three brothers and his parents lived in California from 1954 to 1964.

"I remember what Hans Heilmann called the "Indian country" at Crow's Nest when San Luis Obispo County was just a land of cats and dogs."

"They were just a trail," Heilmann said.

"I lived with them," he said. "They loved the land, with the horses and cattle."

"I remember when Hans was a little boy and he would ride with his parents and they would have to go to Germany if he had to go to school," he added.

"Hans Heilmann, a small child, lived in the mountains with his parents and would have a big breakfast on the John Muir Trail."

HANS HEILMANH has spent 64 years in San Luis Obispo County, as a rancher and a politician. (Daily photo by Dennis Sweeny)

"It is a very beautiful land," Heilmann said. "The air is clean, the water is clear and the people are friendly."

"I believe the county can be saved by agriculture," Heilmann said. "Agriculture is the county's main industry and the good land, claimed Heilmann, appeals to outsiders and results in making tourism the county's second most profitable industry.

"While tourism is growing, Heilmann supports the growth of population and industry in the county.

"If we have too many people living here (in the county), we will have too many people living here," he said. "The county is still a very good place to live."

A frightful tale of the slopes

After enduring a 3-year drought, California is now being overwhelmed by a deluge of snow. This is the best crop of snow in the Sierra Nevada in 19 years. The Sierra is in the process of snowmaking in North County, East Fresno, and other locations. The snow has been welcomed by just about everyone.

The snow is quite fresh, and even in places where the snow was already on the ground, the new snow has added a layer of fresh, fluffy snow to the existing blanket. The snow has brought a breath of life to the ski resorts, which have been struggling to attract visitors in recent years.

Disaster forecast

Just when we were all feeling good about the winter weather in the Central Valley, the National Weather Service has issued a severe weather warning for the area.

The weather, they tell us, is changing. The temperature is expected to drop significantly, and there is a possibility of snowfall in the higher elevations. The forecast calls for strong winds and possibly hazardous travel conditions.

Restrictions anger students

The restriction of parking space on campus has not gone unnoticed by students. The restrictions have caused frustration and anger among the student body.

The never-ending search for a parking space

It is a common sight to see students, faculty, and visitors searching for parking spaces. The demand for parking spaces is higher than ever before, and it seems that finding a spot is becoming more challenging.

Letters policy

Mustang Daily encourages letters to the editor to be submitted by students, faculty, and staff. Letters should be no more than 400 words and should be submitted to the Editor-in-Chief, Linda Johnson, or to the Editorial Board. Letters are published in the order they are received.

Ed's

There are three unrelated blasts on the morning pages today. Yes, there is a new moon up in the sky and the 1st of February is here, but the other news is not unrelated.

One is the University of San Luis市の

President's statement that "we will continue to struggle to keep you in class. I don't want any more deals!"

I know this is a little strange, but I think it's important to try to keep an eye on the university's situation. Why not start looking for a job? The best way is probably to make a decision and then go to school. But that's another story.

The second blast is the fact that the university is in a financial crisis.

I know this is a little strange, but I think it's important to try to keep an eye on the university's situation. Why not start looking for a job? The best way is probably to make a decision and then go to school. But that's another story.

The third blast is the fact that the university is in a financial crisis.

I know this is a little strange, but I think it's important to try to keep an eye on the university's situation. Why not start looking for a job? The best way is probably to make a decision and then go to school. But that's another story.

Hope this wasn't too much to read. You know, I'm starting to get a little dizzy.

As always, please keep up with the news at the university and let us know if you have any questions or concerns.

Ed

By the way, I'm starting to get a little dizzy.

Rose Garden: memories from the past

Joe Rose, owner of the Rose Garden in Pismo Beach, believes in Pismo Beach, has seen many such famous gardens come and go during the past. Others, including the leopard Spooner, the Yardbird, Joe Rose, and his brother Frank, also have played at the Garden.

"The (the Garden concert) was a great show, and these stars had never been heard before. Right there I said that I would try twice what I paid for their tickets that night in the house. In, we had to sell everything, but this is another story."

During the sixties the Rose Garden was a popular spot for new bands travelling between San Francisco and Los Angeles. Many were loading or unloading a city a couple of times a day and their names did occasionally leak out. Joe Rose suffers that as a great Charlie Barnet and his band.

"In 1945 the town was definitely populated, but that completely changed in the 1950s. We rarely played here any more because the Garden was under new management."

Joe Rose remembers the days when the Rose Garden was the center of activity on the Central Coast. He could hardly believe that nearly everyone who was in the business with an enthusiasm that at age 83 is rare. Joe Rose said they did every Friday and Saturday evening, and there was always going to be some band there. Joe Rose was the best part, really. He never let the public and to see them play."

The Rose Garden was built by Rose avi in Pismo Beach. It was a hit with the locals, and was a favorite for many years.

Pre-law club forms

A new club is being formed at Cal Poly to help those interested in pre-law.

The Pre-Law Club will be open to students of all years, and Mr. John Oliver, Currier, has announced that attendance at the meeting is expected to be high. The purpose is to provide students with information and guidance in the field of law.

The club is expected to meet once a week and will provide a better way of what to expect in law school and beyond.

Charter brings boycott to close

LOS ANGELES (AP)—Saying California’s 24-year-old charter was “alive and functioning,” United Farm Workers President José Carlos Payan today said the second round of prolonged and bitter but largely successful boycotts carried out by the chartered union will come to an end.

Payan also said in a statement released by his office in Keene, Calif., that he will stay in the state to discuss the tax cut and other issues with state legislators.

The Puyallup, Wash., area, Payan said, “is not as much a part of the California farm workers’ movement as it is a part of the United Farm Workers movement.”

Compton’s annexation was a “major blow” to the charter, Payan said, because it “is not as much a part of the California farm workers’ movement as it is a part of the United Farm Workers movement.”

Payan said the charter will remain active in Compton, where labor leaders have vowed to continue the boycotts.

The Workers’ Charter Relations Act of 1973 will be vetoed by the governor, but the charter will continue to operate in Compton.

Taxes cut passes State Senate

SACRAMENTO (AP)—A “closer” tax bill that promises property tax cuts to about 55 percent of California’s homeowners nears the end of the legislative process today.

The bill, which now goes to the Assembly, also promises to increase the dollar amount of the tax cut.

Some lawmakers have predicted the increased exemption, coupled with a $5 per year increase in the state’s debt, would provide a tax relief for a family of $41,000.

Rhodesian talks resume today

KABATJ, Malawi (AP)—Blacks guerrilla leaders said Monday they want to share power with whites, starting with a government that would have some of the African leaders as members, according to a report.

The guerrilla leaders said they were willing to enter into a dialogue with the government on the issue of power sharing, but they also called for the withdrawal of all foreign troops from the country.

The talks were held in the capital, Harare, and were attended by representatives of the African National Congress and the Zimbabwe African National Union.

Farmers’ group backs Maddy

SACRAMENTO (AP)—A farmers group backs Maddy. The group is backing Maddy because they want him to represent them in the legislature.

The group, the California Farmers’ Federation, said they want Maddy to represent their interests in the legislature.

Dylan sues Folkway Records

NEW YORK (AP)—Bob Dylan, who has a way with words, is going to a court today to seek $10 million in damages from the owners of Folkway Records.

Dylan said he had been approached by the Folkway Records people about a song of his, “Tears of a Clown,” which he had written.

The suit is for copyright infringement.

But where's the rah-rah?

At a recent Poly basketball game I noticed several gals (who were basketball players!) in uniforms. They were sitting on the bottom row, huddled together, watching the game. Taking a closer look or better, best, they were cheerleaders. I wondered why they didn't say cheers. They seemed to feel a bit out of it, too, and I was curious as to why they were there. I guess Poly's cheerleader's motto is to be close but not too close.

As you might have figured, this isn't me. And don't get me wrong, I had fun. It was a great game and I enjoyed the 20 minutes or so. But the fun was missing. I mean, they didn't do anything. During a game against Cal Poly Pomona, the Mustangs were routed by 70 points as the game went into the final minutes. Poly's Bob Richardson was demanding in bashing in a last minute effort to pull the Mustangs ahead. I looked over at the uniformed students sitting on the other side of the gym and noticed one girl writing in a notebook. Two cheerleaders were sitting next to each other, next to the girl who was writing in a notebook. Two cheerleaders were sitting next to each other, next to the girl who was writing in a notebook.

Women hoopers to face Aztecs

The women's basketball team tied its league record for the 15th time in its history with a 15-10 victory over the Mustangs on Saturday. The Mustangs did not play well. "We are not playing well enough to win," said Ballard. "It's not just the defensive needs to win," Ballard added.

Three Mustangs scored in double figures. Jeanine Christensen had 11 points and Terrie Gilreath and Jill O'Connell had 14 points each. The Irvine Anteaters fell to the Mustangs on Saturday night. O'Connell was the high scorer at the game.

Poly fails at Pomona relays

The men's swimming team had a tough time keeping pace with Pomona as the Mustangs came in 15th of 16 teams at the annual Pomona Relays over the weekend. The team tallied 50 points while the winner, Pomona University, had 2,400. Second place Cal State Fullerton accumulated 800 points.

The Mustangs will have to work hard against the College's athletic conference teams during the upcoming season. The team is at the bottom of the standings with four points.

**SPORTS**

**Good-bye Willie Joe**

At ending go, it was hardly fitting. Once revered as the game’s final quarterback, Joe Namath voted up his chances as a second string Los Angeles Rams noseguard. He drove 4,000 miles and several years from what had been the glory of his life, New York and the late ’60s.

Namath, known as dessert’s inner man-about-town, sat on a TV button, called his leisure, but dined when an action-in-situ player, said it was beyond. That his was beyond.

Reflected by sitting and watching the passer, more Joe, Pat Hudson, Los Angeles Rams coach, Namath would be back. He’s always been the football and been fitting.

"Hey, this isn’t him," he said. "Isn’t it."

Not only was he but a super-quarterback to the interior action Namath sited by passing, 44 to 1977. Always, on those he was not on water.

But beyond his raw talent, Joe Namath was just that out running. His daring, challenging style of play seemed to bring out the best in everybody, his emotions and opponents. Most importantly, in all of us millions who watched, he became the reality of our team. So long Joe, you’re going to be missed.

Photomobile

The Photomobile is now on campus to photograph and record events which are being sold for $31.50 a year.

There is no charge for Photomobile photographs during mid-week, but charges are levied as follows:
- Friday, 6:00 p.m. to 11:00 p.m. for sale photos:
  - $1 per picture
- Saturday, 6:00 p.m. to 11:00 p.m. for sale photos:
  - $1 per picture
- Sunday, 6:00 p.m. to 11:00 p.m. for sale photos:
  - $1 per picture

Dance and dinner will be held on Friday, February 10, at the Cal Poly gym. The entry fee is $2 per couple.

The Photomobile will be located in the Cal Poly gym during this time.

Modeling show

In support of Dana Fidler's Senior Project, a modeling show will be held in the gym. The show will feature clothing manufactured by local vendors and will be open to the public.

Birth control

The Student Health Center will be holding a presentation on birth control methods. The presentation will be held in the gym on February 10 at 7:00 p.m.

Volleyball club

The volleyball club will be holding a tryout on February 12 at 7:00 p.m. in the gym. Any interested students are encouraged to attend.

Future space talk

Two Cal Poly professors will speak on the impact of future space travel on society. The talk will be held in Room 202 of the Cal Poly Union on February 12 at 7:00 p.m.

Dr. Donald B. Morgan, Head of Poly's Industrial Engineering Department, and Dr. David George, a Poly political science instructor, are the speakers.

In the lecture, entitled "Are we ready?", the Human Relations Office will discuss the impact of space travel on society.

Dr. Morgan, who was one of 20 scientists selected by NASA in 1955 to lead the space program, will be discussing the topic.

Cannabis caution

The speaker of note, Assemblyman Willie Brown, said the bill was strong and needed to be strengthened, and if it is, he will vote for it again.

The bill would reduce penalties for first-time drug possession under $100.

The sponsor of the bill,Assemblyman Willie Brown, said he will vote for it again if it is strengthened.

The bill is a step in the right direction and will help reduce the stigma associated with cannabis use.

The bill was introduced in response to the growing number of people using cannabis for personal and medical purposes, and the need for a more humane approach to drug policy.

The bill will likely be voted on by the House of Representatives in the coming weeks.

The bill will also help reduce the number of people in prison for cannabis-related offenses, which is currently at an all-time high.

The bill will provide a more equitable solution to the drug problem, and it will help prevent people from being unnecessarily incarcerated for a non-violent offense.
