Council waits for task force report

By RICHARD PRICE

The Los Loma City Council agreed to the recommendation of the city's civil task force Tuesday to wait for a report from the housing task force. A hearing on the ordinance was scheduled for Thursday, May 6.

The task force, set up in February to study student housing problems in Los Loma, represents a wide range of community interests. Membership includes student representatives, city councilmen, students and real estate professionals.

Jim Armenta, chairman of the task force, said City Council President Jack Jones set at least two weeks before his organization could produce a report. The next meeting of the task force is scheduled for April 21 at 7 p.m. in the council hearing room of City Hall.

Task force co-chairman Larry Robinson said Tuesday the meeting is open to anyone interested in coming, but he warned that it is up to the chairman whether outsiders will be allowed to speak.

"We have a lot of horses to treat," Robinson said, pointing out that any disagreements might only delay the task force's report.

City Councilman Allen Settle said yesterday postponement of the more-than-

Fountain needs recirculating pump

By JULIE MICHAELS

Water may flow again in the University

Plaza.

The UCI fountain was shut off last winter because of the water shortage, according to the University Board of Governors.

It was decided that some water was being wasted because much water from the fountain was run down the drain. It was decided that water was wasted. The fountain may be shut down.

Bill and Marilyn Blend, UCI building managers, have discussed the problem of how to have a recirculating pump put in the fountain.

They are trying to find students in the engineering technology Department to see if anyone was interested in building a recirculating pump to put in the fountain.

The problem is that students cannot build a pump in a short period of time. They said they have a faculty member in the Engineering Technology

Department to see if anyone was interested in building a recirculating pump to put in the fountain.

Rain creates problems for Poly crops

BY LEE HALENBERG

Pre-season people, sitting still, figure they'll have a good garden. In the fall, they draw a straw and take a chance. But the biggest gamble you take is growing a crop. For those who have plowed their fields and have dug in the ground to the extent of a good crop, it will be an adventure.

The news is, this year the rain has come in to create problems for the Poly crops. The crops have been growing well, but the rain has caused some problems.

CROP SCIENCE INSTITUTION

The crops are grown in the Poly science institute, which is located in the center of the campus. The crops are grown in a greenhouse, which is heated and watered automatically. The crops are also fertilized and sprayed with pesticides.

The rain has affected the growth of the crops, which have been grown for research purposes. The crops have been grown for research purposes, and the results will be published in a few weeks.

The rain has caused some problems, but the crops will be able to be planted later in the season. The crops will be able to be planted later in the season, and the results will be published in a few weeks.

**ELECTRONIC DESIGN CAREERS**

Having completed most of your academic requirements, you graduating Seniors are about to make a very important career decision. John Fluke Company would like to help you make the right decision. We offer challenging and exciting Design careers.

Our physical location is the Seattle, Washington, area of the scenic Pacific Northwest, coupled with our Engineering Design Team excellence offers Seniors graduating with a BSBE or MSBE outstanding career opportunities. At John Fluke Company, graduating engineers receive immediate “hands on” Design responsibilities within one of our Design Teams.

A representative of the John Fluke Company will be on your campus Monday, April 17. You've invested a lot of time and effort in developing skills for a career... Spending a few minutes with a John Fluke Company representative discussing career opportunities may be the most profitable time spent in your career selection process.

Contact your Placement Center to schedule a time to interview with our representative.
World class runners at Irvine meet

This is the ninth year that track and field meets have been held on the campus at Cal Poly. Over the years some great athletes such as Jim O’Donnell, Bob Williams, and Ron Hodges have competed in meets on the Poly oval. Currently, there are now a world-class meet known as the Poly Invitational, which was first held in 1962. However, it is a good bet that the record book will be renewed and doubled when the U.C. Irvine-Cal Poly, L.O.G.R. meet on April 24 begins at 1:00 p.m.

Individually the meet will always draw less than four world-class athletes on hand, but the Mussings, stamps are in the mail. Jim O’Donnell has won seven of the nine meets and has in the last three years a total of 11 meets. This is an opportunity to get an opportunity to see some of the greatest runners in the world and to have the excitement of a naval officer. Call collect (station-to-station) 213-468-3321 for more information.

NOBODY OFFERS MORE TO ALL MAJORS

Undergraduates

- No obligation (drop-out option)
- $100 a month while in college
- $1,000 pay while in summer class
- Guaranteed Aviation
- Free Flight Lessons
- $841 - $1,511 starting salary
- $19,735 in 3 years
- No Campus/NROTC type obligations

Seniors & Grades

- Immediate Openings
- Management Experience
- 30 days paid vacation a year
- Open to all majors
- $11,844 - $13,444 starting
- $19,735 in 3 years
- Guaranteed Aviation
- Best benefits offered anywhere
- Post-graduation education 75% paid

JOB OPPORTUNITIES

The U.S. Navy is looking for young men and women to go into the Navy as a middle manager. If you are a U.S. citizen, less than 27 years old and would like to make over $32,000 a year after 4 years, we would like to talk to you. It is an opportunity to do valuable management experience and have the excitement of a naval officer. Call collect (station to station) 213-468-3321 for more information.

BOOZE NOOZE

Your Arm Chair Guide to the Job of Nature Minded

Sobriety is just a matter of time

The only way to sober up is to wait. Nothing else will do it; not cold showers, not aspirin black coffee. Aside from the momentarily exhilaration of cold water or the temporary caffeine jitters, you’re still drunk—awake, but drunk.

Sobering up is just your liver catching up with your drinking. The important thing is to understand how you can do it in a way that will avoid the consequences, or falling that, how much time you need to regain the control you need to function.

Seniora & Grads

Do’s and Don’ts for Guests and Hosts

Give your guests more to do than just hang out. Provide them with something interesting. Provide food, and alternatives to alcoholic beverages. As a guest, don’t be afraid to say “When.” Drink slowly and don’t forget to eat.

Eating Helps

It is important to eat while you are drinking because it slows down the rate at which alcohol is absorbed into the bloodstream. But nothing will help sober a person up except time.

Non- “Drinks” Drinks

Pilgrim’s Progress, to serve these:

- 16 oz. bottle cranberry juice
- 1 pint, 2 oz. pineapple juice (can sail lemon slices)

Mix juices in large pitcher, pour over ice, garnish with lemon slices.
