Bill would prohibit discrimination

Student housing

The bill is now being discussed by the Senate Committee on Finance. If the bill is approved, landlords will no longer be allowed to inquire whether a prospective tenant is a student.
Learning from PALS

By Jeff Chamberlain

PALS is a part of the Student Community Service program, and it is a relatively new type of organization. I required making not so many extra hours now that I don’t have time to help somewhere else. When there was a little more time in the PALS program here on campus.

PALS was introduced to me at the beginning of the semester, and it seemed like a great opportunity. I decided to join the program, and I was not disappointed. My experiences with the organization have been extremely valuable.

While at a meeting of my family, an individual with whom I had been in contact through the PALS program mentioned something about the program. He was looking for new members, and I decided to inquire more about it. The organization works with a variety of people, and I felt that it would be a good fit for me.

While the PALS organization is relatively new, I was able to find out more about it. The program is designed to help people in need, and I felt that it would be a great opportunity to get involved with. I decided to try out the program, and I was not disappointed. My experiences with the organization have been extremely valuable.

One of the most exciting things about the PALS program is that it is open to people of all ages and backgrounds. I was able to meet people from all over the world, and I felt that it was a great opportunity to get involved with. I decided to try out the program, and I was not disappointed. My experiences with the organization have been extremely valuable.

I have been able to learn a great deal about the world through my experiences with the PALS program. I have been able to learn about different cultures, and I have been able to learn about different perspectives. I have also been able to learn about the importance of giving back to the community.

Overall, my experiences with the PALS program have been extremely valuable. I have been able to learn a great deal about the world, and I have been able to learn about the importance of giving back to the community. I would highly recommend the PALS program to anyone who is looking for a great opportunity to get involved with.
Sirens, stretchers, sleepless nights

By KEN CROLEY

The atmosphere is heavy with potential disaster. Technicians are running last-minute checks on equipment and the drill turns to reality as the first two ambulances roll out of the San Luis Obispo Ambulance Base. It's going to be big. It's going to be noisy. And it's going to be a test of the ambulances and their medical crews.

An American Red Cross group is coming to San Luis Obispo to train the local emergency medical technicians. The drills are intended to simulate the kinds of emergencies that could occur in a large-scale disaster, such as an earthquake or a chemical spill.

The drills will be held at the local hospitals and will involve the participation of all local emergency medical services. The purpose of the drills is to ensure that the local emergency medical services are well-prepared to respond to large-scale disasters.

The drills will include the simulation of a variety of emergencies, such as a chemical spill, an earthquake, and a terrorist attack. The participants will be trained in the proper procedures to follow in each scenario.

The drills will be a significant test of the local emergency medical services, as they will be simulating a large-scale disaster that could potentially involve hundreds of casualties. The drills will also be a significant test of the local hospitals, as they will be required to care for multiple casualties simultaneously.

The drills will be a significant training exercise for the local emergency medical services, and they will be an important step in ensuring that the local community is well-prepared to respond to large-scale disasters.
The ins and out of proper dental care

Barbara, thrive on

polydactyly, which is a rare

condition in which a person is

born with extra fingers or toes.

The condition is usually

caused by an extra copy of the

nanogenitalis gene, which

controls the development of the

limbs. Affected individuals can

have anywhere from one extra

digit to several extra digits.

Barbara's case is unique because

her extra digits are not attached to

her body, as is often the case with

polydactyly. This is thought to be

due to the fact that her parents

had genetic markers for the

condition, which increased the

likelihood of her being born with

extra digits.

Proper dental care is

essential for maintaining good

oral health. Regular brushing and

flossing, as well as seeing a dentist

regularly, can help prevent tooth

disease. The use of mouthwash

and dental floss can also help

remove plaque and bacteria from

the mouth.

Filipino situation discussed at workshop

The Filipino situation was discussed at a workshop sponsored by the San Fernando Valley College of Law. Two members of the Anti-Martial Law Coalition in Los Angeles, Reinaldo Capulong and Hale of California, discussed the situation of the Filipinos in the United States. The workshop was attended by law students and faculty.

Jobs abroad examined

The Department of Labor in the Philippines is examining the possibility of opening a job placement center in the United States. The center would help Filipinos find employment in the United States. The center would also provide training and assistance to Filipinos who want to work abroad.

Dawatawi Filipino calculator

The San Fernando Valley College of Law has announced the availability of a new calculator, the Dawatawi, for students in the legal arts program. The calculator is designed to help students with their legal studies.

Child care workshop will be given

The San Luis Obispo County Juvenile Court will be holding a child care workshop for the benefit of its clients. The workshop will provide information on child care and parenting.

Alcohol Gets In The Way

Contrary to popular opinion, boozing does not help in the pursuit of romance. Yet, in this modern belief unaided generation have consumed quantities of alcohol, often to excess.

For many, the enjoyment of alcoholic beverages can be part of a rich and pleasurable relationship. Just as good wines enhance foods, a good relationship enhances any drink.

The dangers of overdrinking are many. Overdrinking is a social problem, a financial problem, and a health problem. It can lead to accidents, domestic violence, and even death.

Excessive drinking is simply drinking for the wrong reasons such as showing off, relying on booze to solve problems or boost self-esteem. At best, a few drinks, in moderation, may help you to relax, but in excess, alcohol definitely gets in the way. Intoxication is not the same as being sober. The booze itself is detrimental to your sexual performance. So, if you try to do something you’re not in condition i.e. such as driving, you may ruin your relationship with one who loves you and doesn’t want to see you get hurt.

Know yourself. Know when you’ve had enough, because after a point, it will get in the way. Enjoy alcoholic beverages — for the taste.

Ozzie’s first major league weekend

by JANET KRISTEMEYER
Daily Sports Editor

It was a weekend of firsts for Ozzie Smith.

In his first major league game on Friday, Ozzie graduated from Cal Poly last year, had his first put out against the San Francisco Giants at Candlestick Park.

The rookie shortstop for the San Diego Padres also drew his first walk.

On Saturday, Ozzie went to the box three times as the Padres were shut out 6-0. His first hit came in the fifth inning when he singled to left field, his first foul tip off the bat of a left-handed batter.

The first base bag, Ozzie had thrown out at the San Francisco Giant’s home opener, he was ordered off a base road to be brought in by a linesman.

Infact, after Ozzie was removed from the lineup, the manager of the Giants, John McGraw, ordered the team to practice extra safety measures.

The baseball world was waiting with bated breath as Ozzie and the Giants were to play their first game.

The manager, John McGraw, was expected to announce Ozzie’s number, to draw him up to bat, and give him his first hit.

Before the first pitch, Ozzie said that he did not feel as nervous as he had the previous Saturday when the Padres played an exhibition game in San Diego. Green up to bat on Friday he was trying to keep his mind on the ball and the ball, not Ozzie.

Well, I was just trying to make contact today. You know, not striking out. That’s mostly what I’ve been working on all spring—getting a good swing, and trying to make as much contact as possible on the ball.

With the Padres everything was right. He came through in the third inning and his first hit off the bat was a double.

Ozzie is one of the few players in the nation who have made it through the first test of his career with a smile on his face.

“When Ozzie started playing with the Padres in Arizona last February Alvin Dark was the manager. Done that time Ozzie has been fired and Roger Craig has become the San Diego manager.

Many reports say that Dark had a communication problem with his players. If this is true Ozzie says he has never experienced any communication problems with his players. ‘To this point I still don’t know what it was that caused Alvin Dark’s firing but so far Alvin Dark (as concerned), to me he was a great person and Ozzie. I’m not saying that because I’m trying to say that’s the way I feel about him, I’m saying that because of the kind of person that Dark was. I think Dark was a super person.’

As for the rest of the team’s feeling about Dark, Ozzie has stayed on.

“I go by my own book and Ozzie is in it. He’s an all-around player.”

Although the Padres lost the first game of the doubleheader, 6-0, to the Giants in 7 innings, the team is not worried about the loss.

“All the firsts, the rookie season, that’s the way it is. We have to get used to it.”

He means in the box—batting and fielding. Ozzie and Dark must get used to the new situation.

“Everything newbie will work itself out. It’s just a matter of playing hard and trying to do your best. Just trying to do as you’re told.”

But for the first time Ozzie Smith waits for the pitch from San Francisco Giants pitcher Jim Barr during Saturday’s game at Candlestick Park. Ozzie went two for three against the Giants. (Photo by Janet Kristemeier)

Mustangs in two easy victories

The Cal Poly volleyball team showed it can win under trying circumstances sweeping a pair of matches in boastful games over the weekend.

The Mustangs had problems throughout the week with a few weekends but have still managed to defeat the Mustangs in three easy matches this past week.

Friday Mike Wilson’s team lost to the Cardinal in Stanford, but were able to come away with an easy 14-1, 14-1, 14-1 win. Saturday the Mustangs defeated the Cardinal in the bi-weekly tournament by the Cal Poly Mustangs in win 16-17, 16-10, 14-10.

Wilson’s girls had nothing to worry about in the win. Their only real problem was with the Mustangs in a 3-0 loss.

Mustangs dropped a match against Cal Poly in a 7-3, 7-3 victory. However, the Mustangs were able to come away with a 3-0 win.

Although the Mustangs are in good shape, they have a tough week to look forward to. This weekend the Mustangs will be playing in the first game of the 1st in the game of the week.

Keith Jackson to speak

Keith Jackson, senior at Cal Poly, will deliver a speech at the Student Body’s annual meeting.

He will deliver a speech on the work of the Student Body’s annual meeting.

Keith Jackson
Tracksters set records—but lose

By JIM ALVERNAZ

Amarillo Sports Writer

Stadium records were
erased, however, when the Cal Poly
track team moved into the finals of the
most important meet, deciding to
preempt U.C. Irvine in San
Diego.

Coach Lee Miller, who
rooms and trains in the
mechanics and the 1,500
meters relay, will
pull out the 3,000-meter
relay. Poly women were
notch up another
distance sweep in the
shot put, as Maggie
Kean overpowered the
field in the 1,500
meters relay. (3:58.5)
and the 1,200
meter dash. (3:45.6)
and the 200
meter dash. (25.8)

Poly loses to Florida

Poly drops four games
to Chapman

BY ANN PRATT

Anecessary
track meet
was

Poly lost to Chapman 2-5, 6-5.

Hitting away with three
errors in the first inning and
Bert B implementation Poly
was out hit by Chapman.

Poly pitcher
Harry, fast balling, however,
was able to hold the fourth inning by
Mark Claridge.

A session of the
Barnes for a
Tues.
and the 300
meter dash. (30.0)

Scott is America's first

Scott is America's premier
short track runner and
he showed why he
was a track star in the
100 meter, 1:07.8 and the 400
meter, 1:24.3.

Other track record setters
were Williams in the 400
meter dash, (47.3) and
Tom in the triple jump.
(49.3, one-fourth)

Other winners for Poly
were Williams in the 400
intermediate hurdles, (56.8)
and Taus in the triple jump.
(50.5, one-fourth)

and the
Montana mile relay
winning of Barry, Scott
Harrison, Russell Harrison and
Mike Barr.

The key to the women's
success was their first running event of
the day, the 1,500
meter race. Katie Upton ran the anchor
leg for Poly and made up a lot
of ground to record the victory. Both teams
were ahead when the
Montana teams were the winners.

Barry, Harrison and
Sharkey could handle. In
addition to running on the
Poly victorious and their
relay teams, she was both in the 100
(11.61) and 300, 30.8
meter dash.

Maggie Kean, who
won both the 1500
meter run, (4:57.5) and the
5000 meter run, (18:13)

Other winners for Poly
were Harry Miller in the 400
meter dash, (30.8) and Ann
Wessel in the 400 in
intermediate hurdles. (1:47.8)

Coach Steve Miller's
men's contingent will take
this weekend to regroup for
the Mt. SAC Relays April 22-23.
For the women, however, this
Saturday is a last day as they
will compete in the Western
California Selectors, who
will have come in Santa
Barbara which begins at 11:10 a.m.

Electronic Design Careers

Having completed most of your academic requirements, you graduating Seniors are about to make a very
career decision. John Fluke Company would like to help you make the right decision. We offer
demanding and exciting Design careers.

Our physical location is the Seattle, Washington, area of the scenic Pacific Northwest, coupled with our
Engineering Design Team excellence offers Seniors graduating with a BSEE or MSE. outstanding career
opportunities. At John Fluke Company, graduating
engravers receive immediate "hands-on" Design
careers. Interested students are encouraged to contact a John Fluke Company representative.

Get the most out of your academic training in an environment that will
help you take your career to the next level. Our design teams
are currently seeking motivated candidates for:

- Circuit Design Engineers
- Analog Circuit Design Engineers
- Digital Circuit Design Engineers
- PCB Design Engineers

If you are interested in exploring these opportunities, please contact our
recruiting team at John Fluke Company.

Contact your Placement Center to schedule a time to interview with our representative.
