Curb was governor — for 32 hours

L.Gov.: Mike Curb served as acting governor for the first time Sunday and Monday, while Gov. Brown went to a labor meeting on Florida, marking the first time in five years a republican has governed the state.

Curb’s tenure as chief executive lasted an uneventful 32 hours.

Tuesday, Brown reversed two of three orders issued in December by outgoing l.t. Gov. Mervyn Dymally stripping him of authority to limit the influence of the man who had defeated him.

Brown refused to issue the order that would have returned the Commission on Food and Nutrition and the Rural Youth Employment Program to Curb’s office.

Brown released a statement that would have returned authority of the Southwest Border States Commission to Curb’s office. Bobbie Metzger, Brown’s press secretary said she did not know why that authority was not included with the other two, but said “I’m going to find out right now.”

In related stories, labor leaders expressed concern about the plan to balance the federal budget, but were “very friendly” during Brown’s meeting with labor leaders.

Brown said he discussed with the leaders future job prospects in California and economic problems. He did not discuss running for president.

“I told them I wasn’t prepared to really discuss that,” Brown said. “I did give my observations on the economy and other matters of interest to labor leaders. They do have some fear about my proposal to balance the federal budget through a constitutional convention.”

Meanwhile, Brown’s proposed constitutional convention has met its first test. Speaker Leo McCarthy has thrown his support behind the measure which was introduced in the assembly by Tom Bane (D-Van Nuys).

Brown’s measure was introduced Monday. McCarthy endorsed the concept and the bill last week.

Developers: the industry is dying

BY PAMELA RAMTRUM

Environmentalists and government revisions are killing the building industry in California, said the president of a major Los Angeles development firm here yesterday.

Karl K. Bergheer, president of a company which bears his name, attacked supporters of “stop-and-start” buildings and other “nit-picky” self-interest groups pressure groups as holding up progress in California’s multi-billion dollar-a-year construction trade in speeches sponsored by Cal Poly’s Society for the Advancement of Management.

“The entrepreneur-builder is operating in a hostile environment,” Bergheer told his audience in Chumash Auditorium.

“We must relate to constantly changing governmental policies, ever-emerging power centers, power politics and non-political uniformed bureaucrats and effect on society,” he said.

Bergheer, who started his own development firm in 1964 after leaving everything he had in a previous building, two years earlier, currently has projects going in California and Arizona.

The difference between the two states is that California threatens builders with restrictions through “constant harassment by non-experts who question everything,” whereas in Scottsdale, Ariz., Bergheer said it took him only five months to get approval to build a high-density condominium development.

In businessmen like Bergheer, time is money. If permits are tied up too long he said, “it costs money.” Such a situation forces many developers out of the business.

Bergheer said that buying housing for people in the middle-income bracket must be the major concern of developers today.

“The poor are not the cause of the government, but it is not building for the middle-income groups,” he said.

Bergheer said that building more housing would solve the situation and make the center more pleasant.

Bergheer’s speech was part of the 12th annual Business Week in which 30 business executives participated Monday and Tuesday.

Employees call in sick

BY SCOTT CRAVEN

Daily Courier

All nine cooks and 11 of 15 maintenance personnel working at the California Men’s Colony called in sick Tuesday as they joined the statewide “sick-out” in a gay protest.

About half of the 400 food service and maintenance employees at state institutions stayed home sick yesterday, spokesman for the California State Employees Association said.

The workers argue they are not getting a “living wage” and have been frustrated by the State Personnel Board for employee who supervises them.

The governor’s office has refused to authorize the premium pay pending a final decision in a court case filed by Ralph Hearn, CREs spokesman.

Hearn said San Quentin County Superior Court Judge Raymond Sherborne said last week he intends to order the money paid, but has not issued the final decision. The governor’s office said he would issue no.

Sherborne’s decision before it decides to appeal, said Hearn. The case was authorized by the Personnel Board about a year ago but was not included in the governor’s budget.

Supervisory workers filled in for those employees who did not report to work, said Don Snyder, CWA’s associate-warden.

“All of our cooks and 11 maintenance men called in sick,” he said. “It hasn’t caused any major problem.”

Snyder said work shifts had to be rearranged to cope with the situation, but he does not anticipate that it will be prolonged.

“It’s an anomaly,” he said, “I think they’ll be back soon. In my opinion, the workers will be back in a day or two.”

If the workers are not back within a couple of days, Snyder said temporary help will probably be hired to fill in.

“The employees will probably be back on the job when the governor authorizes the pay and the workers will be back. You know how unpredictable the governors are.”
LA and beyond

The rift existing between the International Olympic Committee and Los Angeles for the 1984 Games has shifted from the question of who's going to pay for the games to who's going to make the most money from the games. Before negotiations between the two began in 1977 (and after), there was continuous amount of sparring and spurning from both sides on who was going to plot out the tab for the games.

Proposition 13 prevented the taxpayers from being burdened so heavily. Despite that, Los Angeles, Lord Carrington and the IOC did not accept the less but as negotiations wore on, and the fear of losing LA's bid crept nearer, they accepted. Recently, the investors (referred to as organizers from now on for lack of a better term) and the IOC gathered in Lausanne, Switzerland to complete the details.

Coming along for the ride this time, however, was the United States Olympic Committee. Now that the site for the 1984 Olympics was decided, the USOC came on the scene, begging for funds.

The USOC claimed they should get a 10 percent out from the television revenues. Harder work and persistence from the USOC produced an agreement, made with the organizers, that the Los Angeles organizers give an overall 40 percent share of Games.

According to an article in the Los Angeles Times (February 4), the USOC's head council has been making bigger strides, bringing in more profits for the national organization. It appears the Los Angeles organizers are now going to get the shaft. After the 1976 Montreal Olympics and that city's outstanding debt, there probably will be very little profit, if any, from the LA '84 Games.

The whole affair comes down to why should the games even be held in Los Angeles. We feel Los Angeles is the worst place to hold them. First, the Los Angeles Coliseum and other facilities used in the 1984 Olympics can be used in the '84 Games, in the eyes of organizers, in order to save money.

It's often said true fans will go out of their way to see a special event. But if fans will not be able to go out of their way because they will still be on the Golden State Freeway trucking along at a rapid two-mile-an-hour pace.

Carrington said he would also have a damaging affect on the world class performances of the athletes. During the spring and summer months, Los Angeles transforms into rolling hills of smog. It's an archaic argument but it has to be mentioned. The past few years, LA has seen smog alerts and school closures because of constantly visible gases. Death from the heavy smog has even been a result.

Now that the Environmental Protection Agency is considering steps to bring about acceptable levels of air emissions by 1984 the smog can be a more serious threat. With the differences in negotiations, the density of the area, and the overwhelming smog, LA is just not the place for the Olympics.

Disloyal diplomacy

Now that Iran has a somewhat stable government, Pres. Carter is doing his best to woo the Iranians. While trying to keep the United States close to Iran's heart.

When it comes to diplomacy, loyalty is not the name of the game in today's political musical chairs. Whoever is in power gets all the attention.

It has been said that gas prices will go up to a dollar a gallon because of the turmoil in Iran. Carter is doing his best to avoid that fact, obviously trying to work out a trade agreement with the new regime.

Carter's efforts, if successful, will undoubtedly benefit the United States. However, he will not win the Nobel prize for loyalty.

In three days of oil and gasoline shortages, parking shortages, and traffic jams, you would think that Cal Poly would try to solve the parking and traffic problems here, not enhance them.

In reference to the article on Tuesday, January 30, about the parking increases which already exist. Even Mr. Gerard admits that "if everyone on campus arrived at the same time, we'd be in trouble." It's sad that Mr. Gerard recognizes the problems, yet comes up with inept, unimaginative solutions.

More parking spaces are not the answer. I propose a solution which may help. Why not take the existing parking lots and designate areas which are closest to the academic core as "Carpool Parking Only" spaces. Cars with 3 or more students or teachers or staff could park in these areas, possibly having guaranteed parking spaces for free parking permits used as incentives. I think the $16,5000 that are going to be spent on this project could be better spent in student programs and promotions, improved bike paths and facilities, free bus passes, and so on.

I also can't understand why Cal Poly is spending $7,5000 connecting Via Carta with the northern half of Campus Way. This project is totally ridiculous. Here's why. Years ago the northern half of Campus Way was to be used as a on-street parking lot, and closed off to through traffic and today is a pleasant pedestrian and bicycle-oriented street. I can understand the improvement in the areas around that area but grouping areas for through-bound traffic is a crying shame. I don't see any possible benefit in this action. Why can't they have a good thing alone?

It seems to us that Cal Poly administrative planning and design to the students in the projects and designs that they do, yet the administration seems that it never heard of those words.

The next time you hear about a program being cut back, a concert which is possibly having guaranteed parking spaces, or free parking permits used as incentives, I think the $16,5000 that are going to be spent on this project could be better spent in student programs and promotions, improved bike paths and facilities, free bus passes, and so on.

Parking solution

Editors:

I am very disappointed in Cal Poly's attitude toward the parking situation here.

Greg Errett
WASHINGTON (AP) - With President Carter as his predecessors, the bottom line is loyalty to the administration once the president has set in course.

Presidents never have taken kindly to public disclosure of the private debates that shape policy, or to public dissent within the official family.

"Once I make that decision, I expect my policy to be carried out, with loyalty and with enthusiasm," Carter said Monday.

Commentary by Walter Mears
AP Special Correspondent

Enthusiasm may be a bit much to expect from an aide who has seen his counsel rejected, but a president certainly is entitled to expect loyalty from his advisers even if they do not agree with something he has decided to do.

In that situation, loyalty can simply mean silence.

All of this came up after Carter lectured his top aides in three White House meetings, telling them to be careful what they say to reporters.

Carter was quoted as saying that "those of us in responsible positions ought to be very careful about making public comments which could contribute to a misapprehension about what our policy was."

The subject is a difficult one because Richard M. Nixon gave confidentiality a bad name by invoking national security and the privacy of White House conversations in the attempted Watergate cover-up.

But the excesses of the Nixon administration don't change the fact that a president couldn't function if everything he and his staff said to each other was available for publication.

Carter came to office promising an open administration, and suggested at one point that even the meetings of his Cabinet might be open to coverage by newsman. He dropped the latter idea, but not the commitment to openness.

The question becomes how open. An administration in which every adviser was free to recount every conversation would be free for all in which debate would substitute for policy.

Carter said he never told his aides to stop talking to reporters. "If I do, however, have to make upon a degree of teamwork once a decision is made that relates to a sensitive area, like the Middle East, or like SALT negotiations or like the relationships with Iran in recent months," he said at his news conference. "That's what I have admonished them to do to have a free expression of opinions and to let me have their individual opinions up to the time that I make a decision. Once I make a decision, to comply with it.

The net result of the Carter lectures is sure to be a more reticent administration. His personal views on the Middle East (and on the Soviet Union, where he seeks an understanding), on the Panama canals and other issues relating to America's foreign policy.

The subject is a difficult one because aides and advisers won't get into trouble by keeping their mouths shut. Richard M. Nixon gave confidentiality a bad name by invoking national security and the privacy of White House conversations in the attempted Watergate cover-up.

BY PAULA BERGEY

"Attention," read the sign recently hung in the UU men's restrooms near the third floor.

"Writing needs to be off the wall."

Comments on the sign ranged from suggestions of putting scratch paper and chalkboards in the restrooms, to re- 
constructions of "har-raising" and an "American, commit plot" over the threat of removing partitions. One writer said he

students, getting upset about the graffiti shouldn't have an influence on graffiti policy since they aren't paying for the building, and another just wanted to know "where will the toilet paper go?"

"At least they're writing on the sign and not on the walls," said Martha Blood, UU Building operations manager, whose office is next to the graffiti warnings.

Blood tells the possibility of removing the partitions a direct measure in response to some of the drastic graffiti-

writing and erasing going on in the UU restrooms. While 4,000 recently came out of UU fees to refresh paint and make them more durable, students have, particularly in the men's restrooms, sprayed graffiti with knives through the panel flaps.

Aside from the decoration敦煌, Blood has had a lot of complaints about the type of graffiti which is on the walls. It was during WDW week that she started hearing from both faculty and students who said they felt they couldn't take their children into the restrooms. She also heard complaints from freshmans and parents.

Another idea Blood is considering, though, is to put up

bulletin boards for students to write on.

Blood also says that the graffiti has "written itself."

Besides just being unsightly, Robert O'Sullivan, supervisor for state buildings on campus, believes there is possibly a connection between graffiti and vandalism. If we can control it in the early stages, we may reduce vandalism," O'Sullivan said.

As a result, O'Sullivan's department tries to make sure graffiti is removed within 24 hours after it's been written. That way, the vandalism will be away from graffiti artists who take pride in seeing their work on walls day after day.

In the effort to clean campus buildings of graffiti, it takes roughly eight hours a day for eight people to clear a

work at a $350 per month plus $25 a month for cleaning materials to clean up the writing, according to O'Sullivan. Besides bathrooms, this involves working in classrooms clearing chalk and desks, and in the library fixing the shelves and cubicles.

One observant person in a women's bathroom in the science building noticed graffiti was all over the right-hand partition and wrote, "It seems like only left-handed people can write on walls." While there are still the "dirty" sayings

and drawings, there are a lot of "clean-up-yourself" writings not to them. "One student even chose the bathroom partition to write personal letters. "In the memory of Daffy Duck.

"Bones" on Star Trek. He died last week. Good bless him for contributing to the expansion of the human mind through his portrayal of the Kirk's Chief Surgeon."

O'Sullivan feels there is nothing that can psychologically be done to stop people from writing on walls. "There are ways to make it physically harder, which have been discussed at Cal Poly and other institutions with the same problem."

Some of the more drastic ideas include removing the stall doors, spraying partitions to make it hard to write on, and even placing grease on the walls which Garrett feels would just be unnecessary.

Today’s Poly to be preserved in time capsule

BY CATHY SPEAR

Wadntaday, Fabruary 14, 1979

A time capsule buried in front of the new library will hold artifacts from 1977 and 1979 to remind future inhabitants of Cal Poly life as it is today.

The capsule will be opened on the 100 year anniversary of Poly clubs work against hunger

Most students realize there are millions of people starving throughout the world. But they think they can’t do much about it and that’s where the problem lies.

Working with hunger can be a vocation.

One of the students who originated the idea is Economic Club president Randy Brown. He presented the idea to the Economic Club for consideration.

Chairman rage l. enhart put it this way: “It will be part of the library dedication ceremony. It’s unique,” Barnes said. The complete list of items to be included in the time capsule has not been decided. Barnes said the History Club, which is sponsoring the venture, has come up with some ideas of what they think represent Cal Poly. Their list includes a student catalog for 1977-1979, a couple issues of Mustang Daily, faculty directories, and some campus documents related to Dr. Kennedy’s retirement and some local documents and statistics dealing with the relationships between San Luis Obispo residents and Poly students.

“The time capsule is really an art of arrogation,” said Barnes. It shows a lot of confidence in the future. We are going to open it with some suggestions for artifacts to be included in the time capsule.

Barnes said the capsule will last practically forever. It will be made of plastic acrylic by Professor Asbell in the Industrial Technology Department. The time capsule will contain “the seeds of a small beach ball,” said Barnes. Because the capsule is so small, Barnes said they may put some of the documents on microfilm to make more room for other items.

The project was originally the idea of Poly student Jo Jo Miller, who contacted the History department to ask if they’d sponsor the project.

Barnes said the time capsule is “really insensitive,” costing about $35. He said he hopes to get the funding from ASI.

“WPH’s certainly talk about Proposition 13,” Barnes said, grinning, “so it’s appropriate that the capsule is cheap.”

The whole idea of a time capsule is really an art of arrogation,” said Barnes. It shows a lot of confidence for us to say anyone will be here or that they will care.”

Barnes is now up in the situation of burying something to be uncovered 100 years later. The things included in the capsule now may not seem unique, said the History professor, but in a century they will be “rather

Health care not required

LOS ANGELES (AP) - Counties are not required to provide non-emergency health care to illegal aliens as part of public relief programs, California Attorney General George Deukmejian said Tuesday.

The opinion generally agrees with one released earlier by the Los Angeles County Counsel in support of the Board of Supervisors' desire to cut back on welfare costs by discontinuing free health services to illegal aliens.

The attorney general's opinion said that a county may require, as a condition of providing health care services under the state Medi-Cal program, that all applicants complete Medi-Cal application forms.

The forms require verification of address and identity, and many illegal aliens refuse to complete them for fear that they will be deported.

Deukmejian's opinion said that a county has the right to require nonemergency health care services to people who are not eligible or who, for some reason, do not provide addresses, address verification and personal identification.

Youth killed after movie

ONISDALE (AP) - Police say the shooting of "The Warriors," a movie about gang warfare, was the spark of a racial altercation that left one youth dead and two injured at a theater.

Following the showing of the movie Monday at the Esplanade Shopping Center, police said that at least two black youths attacked three young white men, finally wiping one of them.

Lt. Don Hathaway said that when police arrived at about 10:30 p.m., they found Timothy Gilchrist, 16, of Ventura, with six wounds in his head. He was pronounced dead at St. John's Hospital.

Gilchrist's brother, Dan, 15, and Alan Grandstrom, 20, both of Escondido, were arrested on charges of homicide. They were released.

Fred Ruml, 18, of Oxnard, was booked at county jail for investigation of a charge of accessory to murder.

More than 20 law enforcement officials searched for the group inside the mall on телефones, but none was found.

Camp David summit

WASHINGTON (AP) - Egyptian President Anwar Sadat and Israeli Prime Minister Menachem Begin may be invited to a second Camp David summit meeting if the two countries can resolve obstacles in the way of a treaty between them, President Carter said Tuesday.

He told a news conference Monday another summit might be held if talks scheduled next week between Egyptian Prime Minister Maamul and Israeli Foreign Minister Moshe Dayan and followup consultations in Jerusalem and Cairo fail to reach an agreement.

"If their effort is not completely successful, and final peace terms are not reached, there is always the possibility of a second summit," the president said.

The first Camp David summit was held in September and resulted in the setting up of frameworks for an eventual agreement. Following the summit, a round of U.S.-hosted talks fell apart between the two countries over a deadlock on the unresolved issue, but fell short of a complete deadlock.

Carter said he might meet briefly with Khalil and Dayan. The talks, headed by Secretary of State Cyrus R. Vance, will begin Feb. 12.

"The valley wide stoppage yesterday was a spontaneous thing, not something we had ever done before," said he, adding it was "a spontaneous thing, not something we had ever done before," said he, "that's why we did it.

"I think that a lot of the people returned to their jobs," he said. "The valley wide stoppage yesterday was a spontaneous thing, not something we had ever done before."
Health Center without 'love carefully' campaign

A shift in emphasis in birth control education at Cal Poly has left the Valentine's Day 'stop love carefully' campaign run by the Health Center for the past year.

According to Health Educator Jeannette Rozes, last year's Valentine's Day letters in the campus dorms, free bumper stickers on Mustang Daily and radio spots on KCPA helped make students more aware of the need for birth control methods.

Rozes added that the whole campaign was planned to help people avoid unplanned pregnancies and venereal disease.

Health statistics showed no difference in the numbers of students who used the facility after the 'stop love carefully' campaign, she said.

Education Coordinator Sally Rogers of the TDC Family Planning Center in San Luis Obispo, who is often in touch with Rozes about educational programs, said the Family Planning Center would focus on unmarried pregnant students, but not especially Cal Poly students.

Rozes, who said she is more than willing to put time into a new effective program which would, define results, has written a proposal for a state grant.

The grant would allow Cal Poly to hire a student to do research and education on the subject of birth control. However, due to Proposition 13 there is a good chance the grant will fall through, commented Rozes.

A construction worker uses a tamper to compact the soil as he prepares to put in a sidewalk at the site of the new faculty offices near the Fisher Science Hall.

The building, which will cost more than $2.5 million according to Peter Philips, Poly's facilities planner, will contain 140 individual offices, eight department head offices, one dean's complex, and several conference rooms.

In compliance with the master plan for Poly construction, the building will be gray concrete with colored plaster, roof and sunscreens. Each office will have a window overlooking a landscaped courtyard.

The building is designed for easy accessibility to the handicapped, said Philips.

Construction of the new faculty offices began April 1978 by Butternut Construction and should be completed by August. The building will be ready for use by fall quarter.

Construction of the new faculty offices began April 1978 by Butternut Construction and should be completed by August. The building will be ready for use by fall quarter.

A construction worker uses a tamper to compact the soil as he prepares to put in a sidewalk at the site of the new faculty offices near the Fisher Science Hall.

The building, which will cost more than $2.5 million according to Peter Philips, Poly's facilities planner, will contain 140 individual offices, eight department head offices, one dean's complex, and several conference rooms.

In compliance with the master plan for Poly construction, the building will be gray concrete with colored plaster, roof and sunscreens. Each office will have a window overlooking a landscaped courtyard.

The building is designed for easy accessibility to the handicapped, said Philips.

Engineers have designs on future

Cyl Poly's School of Engineering and Technology has chosen "I.T.G. Engineering for a New Future" as the theme for this year's Engineers' Week.

The annual event is scheduled for Thursday, Feb. 17 through Friday, Feb. 23, and is part of a national celebration sponsored by the National Society of Professional Engineers.

This year's Engineers' Week will feature a conference entitled "Engineering and the Complete Person," to be held at the Polytechnic Beach Club on Monday, Feb. 19 and Tuesday, Feb. 20. The conference will cover a wide range of topics, from the role of engineers in society to the importance of personal development.

On Saturday, Feb. 19, there will be a special event at the Polytechnic Beach Club, where guests will have the opportunity to network with other engineers and learn about the latest developments in the field.

On Sunday, Feb. 20, Poly students and faculty will host a "Meet the Engineers" event at the Polytechnic Beach Club, where guests will have the chance to interact with engineers from various specialties and learn about their work.

On Monday, Feb. 21, Poly will host a "Career Day" event, where students will have the opportunity to meet with professionals in the engineering field and learn about job opportunities.

On Tuesday, Feb. 22, Poly will host a "Tech Talk" event, where guest speakers will discuss topics related to engineering and technology.

On Wednesday, Feb. 23, Poly will host a "Engineering for a New Future" awards ceremony, where students and faculty will be recognized for their contributions to the field of engineering.

On Thursday, Feb. 24, Poly will host a "Engineering for a New Future" exhibition, where guests will have the opportunity to see the latest technologies and innovations in the field of engineering.

On Friday, Feb. 25, Poly will host a "Engineering for a New Future" concert, where guests will have the opportunity to enjoy a variety of musical performances.

On Saturday, Feb. 26, Poly will host a "Engineering for a New Future" theatre workshop, where guests will have the opportunity to participate in a variety of hands-on theatre activities.

On Sunday, Feb. 27, Poly will host a "Engineering for a New Future" film screening, where guests will have the opportunity to see a variety of films related to engineering and technology.

Throughout the week, Poly will host a variety of events and activities designed to promote interest in engineering and inspire students to pursue careers in the field.

There are professional opportunities on a large scale at NCR-San Diego.

THERE ARE PROFESSIONAL OPPORTUNITIES ON A LARGE SCALE AT NCR-SAN DIEGO.

You will find the facilities irresistible, especially those at the world-class location that has brought together some of the most impressive living in California's most attractive living and recreational areas.

The world-renowned city of San Diego is fast becoming a hotbed for professional opportunities in the high-tech industry. With its location on the western coast, the city has a vibrant and diverse economy, offering a range of industries from aerospace and defense to biotechnology and software development.

NCR-San Diego is a leader in the high-tech industry and offers a variety of professional opportunities to qualified candidates. The company is known for its innovative and challenging work environment, with a strong focus on professional development and career growth.

NCR-San Diego is committed to providing a supportive and inclusive workplace that values diversity and inclusion. The company is committed to creating a culture of respect and inclusivity, with a focus on promoting diversity and inclusion in all aspects of the workplace.

NCR-San Diego is an equal opportunity employer and is committed to providing a harassment-free workplace. The company is committed to providing a supportive and inclusive workplace that values diversity and inclusion.

Rolls and holds name the game

They sit around in a semi-circle and listen to a lecture from a fellow member. They are clad in traditional "gi's" and they speak of "kata's." At first glance, an intruder might think he has entered a meeting of some vainstream Eastern religious group. A second look reveals the true meaning of the spectacle. "GI's" are the members of a Judo club. "Kata's" are techniques performed by individuals in competition.

Cal Poly's Judo club wears the "gi's" and talks of "kata's" but the formal competition is a year away. In the meantime the members are training for the fall tournament that will determine who makes the team.

At a recent meeting, the president of the club, explained that the members train for the fall tournament for the same reason a regular competitor trains. He explained that work-out consists of throws, takedowns, arm holds, and a wrestling-like move. The competitive season for judo starts January through July, with Cal Poly's Judo club coming together about once a month.

At the meetings the club represents Cal Poly in the matches. They are just sanctioned by AAI and all costs must come out of the member's pockets.

**Saco sportswriter blackmailed?**

GULF SHORES, Ala. — The issue of a sportswriter apparently framed for a cocaine arrest while trying to interview Ken Stabler, has led investigators to Randall Watson, who is

charged with blackmail in Calcasieu County.

Watson, described by Stabler's attorneys as a friend of the Oakland Raiders quarterback, reportedly was with Stabler at times when Sacramento Calif. sportswriter Bob Padwsky had his ill-fated interview with Stabler here Jan. 22.

Alabama Attorney General Charles Graddick says Watan allegedly had a warrant purchase "the same kind of evidence" used later in the apparent framing of Padwsky.

Police say someone apparently planted a magnetic key case on a former of Padwsky's car and then called police with anonymous tip saying cocaine was on the automobile. Police dropped charges when it became apparent that Padwsky was the victim of what looked like a frame.

Graddick said Monday investigators want to talk to

Watson, who is from Montgomery, about 100 miles north of Gulf Shores. He said a warrant has told investigators that prior to Padwsky's arrest, Watson told him to buy a key case and said he did. He said investigators were unable to take fingerprints from the key case found on Padwsky's car.

Henry Pitz, a former attorney who represents Stabler, said Monday that Watson is a friend of Stabler's. Stabler wasn't available for comment.

John Yung, an assistant state attorney general in Montgomery, said Watson and Watson's wife, Elaine, and a man named Thomas "Taco" Andrews are charged with trying to blackmail M.M. Kennedy Jr., the president of Mobile County Telephone Co., where Watson once worked.

Yung said the indictment accuses the three of demanding $75,000 and the bill of sale to a four-wheel-drive vehicle under a threat of exposing the Kennedy company's admiration with Watson's drug arrest. The couple was later released on $700 bond. Watson was unavailable for comment Monday.

second degree brown while Raymond had a first degree brown. The nationals are held under the Amateur Athletic Union rules, even though there is collegiate competition.

"We don't compete in NCAA because they ask for too much money," Carlyle said. "Also a lot of us have already used up our four years of eligibility," Carlyle added.

The top two places in each weight class at the meet will be limited to the Olympic Trials, and will represent the U.S. in this year's Pan Am games.

Carlyle took up judo three years ago in a class at Poly.

"A friend from home, Kim Wenzel, was teaching the class, so I took it. And I've really gotten into it since then," Wenzel captained the 1976-77 wrestling team, and competed in the Sumbo national games in judo last year.

Mustang gymnasts lose over weekend

Mustang gymnast Diana Roman shows she but the team failed in its bid for a win over the Cal State Fresno Bulldogs Raiders.

It was close after the final points were tallied with Fresno sporting 104.3 points and Cal Poly 100.4.

Roman picked up second place in the uneven parallel bars and floor exercise and third place in the balance beam and all-around competition.

Lori Phillips was the only other Mustang to place in the contest held at Chandler Gymnasium. She managed a second with a score of 6.65 narrowly losing to Bulldog Kim Sander who tallied 6.67 score.

The Mustangs rest for a sweep of picks until their meet with Diablo Valley College in March.

Mustang Daily — Fredy Flores and Cheryl Stueweing grab and throw each other in preparation for national competition in April.

Career Opportunities at PRINTRONIX INC.

We're on campus Wednesday, February 21st.
May we discuss your career?

THE COMPANY

PRINTRONIX, INC. Located in the Irvine Industrial Complex near the Orange County Airport, is a high technology manufacturing company dedicated to offering the computer user a uniquely versatile line printer.

Having positioned itself as an emerging leader in the field of computer printers, PRINTRONIX has experienced solid growth since beginning business five years ago.

A record of excellent quality, high reliability and broad application has created consumer demand which gives every indication that this dramatic growth pattern will continue.

WE NEED:

• Electrical Engineers
• Mechanical Engineers
• Test Equipment Engineers
• Advanced Technology
• Quality Control Engineers

BENEFITS:

PRINTRONIX provides a fully paid Dental, Vision, Medical, Life and disability insurance package. A liberal time-off schedule includes 12 days of personal leave each year, 9 paid holidays and a vacation off between Christmas and New Years, and a liberal tuition assistance and relocation plan.

It's easy to talk with our Employment Representative on campus; please call (714) 949-6389, COLLECT, to arrange plant interview.

McAdoo trade signals an end to NY 'open checkbook' policy

NEW YORK (AP) - The call of Bob McAdoo from New York to Boston has dramatically altered the futures of two of the National Basketball Association's most prestigious franchises.

The deal, arranged over the weekend and announced Monday, signals an end to New York's "open checkbook" policy of trying to achieve instant success by buying the most talented athletes available and a return to the more traditional course of rebuilding through the college draft.

From Boston's angle, it is a gamble that a player of McAdoo's magnitude offensively can be blended into the Celtics' lime-honored team concept without uprooting anyone engineered for the purpose.

The trade was engineered by Sonny Werbini of the Knicks and John Y. Brown of the Celtics, two owners who are not afraid to pull the die.

New York will receive the three first-round picks Boston had accumulated in the 1976 draft. Boston's own Golden State's and Seattle's the latter two having been obtained in deals for Jo Jo White and Dennis Averley. Boston retains the draft rights to Indiana State's Larry Bird, whom the Celtics picked in June.

New York will also get a player to be named later this week, a front-court reserve at a minimum.

Soviet hockey intensifies NHL

NEW YORK (AP) - The world of hockey, color it red.

It is red for the hue of the Russian uniform. It is red for the fury intensity of the Russians' play. It is red for the block of emotions on the chests of the National Hockey League.

In the first confrontation of the two hockey-playing continents - the Soviet national team versus the NHL All-Star 66 Sunday in the third and decisive game of the Challenge Cup series - it was a humbling lesson for the proud NHL professionals, mostly Canadians who grew up in the frozen wastes of the north, to be bullied by the speed, grace and finesse of the sons of the Hammer and sick.

The game was played in a sold-out Madison Square Garden but the result was an 8-3 win for the Soviets and a humiliation for the NHL.

"What impressed me more than anything," Ziegler said, "was the Soviet team's momentum - the high intensity of their play. They performed at a killing tempo and never sagged."

The win for the NHL's finest merely capped off a week of somber portents for the Western world. New Zealand's John Walker, the great miller, warned that the Russians and their satellites would invade American ice in a week.

"What impressed me more than anything," Ziegler said, "was the Soviet team's momentum - the high intensity of their play. They performed at a killing tempo and never sagged."

Doug Lilley, a journalist critic from the Montreal Sun, lamented: "We are No. 1 and fading fast. We taught the Russians how to play the game."

Doug Lilley, president of the NHL, acknowledged that the Russians had learned the sport from Canadians and then developed successful techniques of their own.

"What impressed me more than anything," Ziegler said, "was the Soviet team's momentum - the high intensity of their play. They performed at a killing tempo and never sagged."
