**New Chinese restaurant with a Mandarin touch**

BY BRIAN CARDILLO

Along the Yangtze River in China, there is an overlap of agricultural patterns between the cold and dry climate of Northern China, and the mild and humid climate of Southern China.

In San Luis Obispo, the Mandarin style of Chinese Restaurants has been celebrated by the Peking Palace, a new restaurant on upper Higgins that features the Mandarin style of Chinese cooking, which is characteristic of Northern China.

Peking Palace is not just another Chinese Restaurant: Peter Lee, who run the master's degree in Business Administration from Cal Poly says the restaurant is a combination of American business practice with traditional Mandarin cooking. In China, mains and apps run the restaurant until they die, and no one is left to carry on the business. The children might want to commit themselves to such demanding work.

But Americans want to run in a long-range planning—they think about how the business should progress and grow for future years.

As for his Chinese cooking, Lee says there are three goals to meet for a perfect dish: color, small, and taste—in that order. Each one must be just right, according to Lee, so the diner is pleased.

**A combination of American business practice with traditional Mandarin cooking.**

Lee, who moved here from Hong Kong eight years ago, says most Americans are accustomed to the Cantonese style of Chinese food which originates in southern China. This kind of food (chop suey for example) is "Amendment" according to Lee. It is like eating a hamburger in China and calling it American food.

But Mandarin Chinese food is new to American taste buds. Lee. When President Nixon was in China eight years ago he was introduced to the Mandarin Style—Lee says it is spicer than Cantonese, that it is served in larger portions, and that each dish (for each person) is prepared separately.

The Mandarin style requires more techniques. "Lee said, The Cantonese style tends to group foods together so that they blend with each other, whereas the Mandarin style is prepared so that the meats and vegetables are distinguishable. "Some religions forbid the consumption of certain foods, so this style allows people to choose what they eat in a dish."

"Even more important to Lee, he said, is the nutritional value of the food he serves. His partner, Dr. Paul Lee (an anesthesiologist) conspires him often pertaining to the nutritional value of the food. Also. Lee cooks with very high temperatures on the "nutritional value is saved," and even has to hold it. The vegetables are always fresh; the beef is "the only beef," and the fish is fresh from Morro Bay. "Glossy is the only meat in which you can separate the meat from the fat," Lee pointed out.

He serves his chicken dishes without the skin. This can be a problem, since trimming of the skin can also trim profits.

Lee added, "In America it is general practice to order one meal at a restaurant and eat only that dinner. But in China it is traditional for everyone to order a different kind of dish and share with another as they do."

Rather than eliminating the American method, Lee points out that the nature of American food does not necessarily lend itself to being shared. The advantage of sharing is that the dish may become more balanced, since nobody eats too much of any one food type.

By now it might be expected that the Peking Palace is one thing straight out of Northern China. with expensive rosewood architecture, fancy decorations and table settings. But Lee feels that it is logical to use silverware rather than the hectares, since most of his customers feel more comfortable with it. But the silverware consists of only forks and spoons. The knife is never mixed since traditional Chinese food is prepared so that a knife is not needed.

Lee used careful consideration when deciding how to remodel this building into a restaurant. Two Cal Poly graduates, an architect and a landscape architect, were major, helped Lee decide on colors. The narrow, restaurant that is homey, pleasant, and very comfortable. The smart seems to be in the simplicity.

Lee serves restaurant guests.

**Ornamental horticulture major buys local disco**

BY DAVE KEERLEY

Cover to the City

The only liquorics on San Luis Obispo has been sold to a Cal Poly student who has issued its 18 to 21 year old patrons will have to worry about being turned away.

For the last two plus years, the only disco in town that doesn't serve alcohol is open to those under 21.

The new owner, Scott Hallquist, a junior Ornamental Horticulture major, says he plans to get a liquor license, but does plan to make some changes.

"It will still be a disco, but it will have a theme," Hallquist said.

The Poly senior plans to convert the disco into a bar, "for the downtown people," he said.

Hallquist also said he plans to get a liquor license, but does plan to make some changes.

**SLO Council Billig: Better leaders**

BY JAY ALING

The city council is not providing leadership for San Luis Obispo and that is why she is running for one of the two council seats up for bid on the March 6 ballot, said 30-year-old Melanie Billig in a recent interview.

Billig criticized the council for not deciding whether or not to import water from other sources. Although Billig said she sees no imminent need to import water, she said she would push to complete plans that would ensure ample water resources in times of drought.

"Billig said the council did not inform the public during the 1977 drought.

"The council did not tell people what the facts were."

Billig said the council had plenty of water at its disposal during the 1977 drought but refused to move for water from other sources in order to prevent a shortage in 1978.

"Billig also said she would like to keep the downtown businesswoman, try to break through a long-standing bias preventing the closure of a growth management program."

Lee said, "You can only work for one group, but it's going back to the old contract," she said.

Sex in dorms may soon be legal if plan survives

Dorm residents may be able to have sexual relations legally in the residence halls next year if a group of students that has proposed changes to the housing license gets its wish.

"The two council seats up for bid on the March 6 ballot, said 30-year-old Melanie Billig in a recent interview.

Money to burn

At a time when governments on all levels are scrutinizing their budgets and cleansing their souls, we were disturbed to learn of a meaningless expenditure by our student government. The fund amounted this year to $13,000, the equivalent of the 620 ABFI fees from 160 full-time Cal Poly students. The fund was used by him and other student government members for trips in the "state."

In a position to allocate funds but also in a position to know students' wants, our student government's actions might be construed as a direct slap in the face to students. Had we known who was actually paying for the trip, we might not have paid for it themselves or chosen not to allocate funds but also in a position to know students' wants. The student senators apparently felt they should not be punished. But they should not be punished if they are guilty and forced to be proven innocent.

The case goes to a jury trial, the defendants' peers will decide their fate. Personally they won't be proven innocent, but that doesn't mean they are guilty. Are they undeniably because of a complaint? Are we truly exempt from the scrutiny and demands of the electorate? When the case comes to trial, the Mustang Daily might be proved guilty. If so, then they should be punished. But they should not be punished if they are guilty and forced to be proven innocent.

Male discrimination

In response to the article by Paula Regan on February 27, "Waiting on Equality," I have a few points to make.

First, I agree with you that restaurant owners and managers should be discriminate against, their female or male employees in their hiring and promotion policies. Second, I would like to know if NOW is planning to do something about these unfair practices in restaurants which not only serve the evening but also the lunch and morning shifts for women only. The biggest and one of the busiest in the county, that comes to mind is McLoone's of Shell Beach and San Luis Obispo. This is not the only example where serving food is left to women alone. When was the last time you saw a woman volunteer at a Colonist Kitchens or Branch?

My question to Paula and to NOW is if you are willing to go to court or boycott restaurants with similar policies, does that include restaurants which discriminate against men waiting tables? I hope not because you wouldn't be discriminating if you didn't.

Military blues

Liberal students are a major force in job market

BY PAULA KREEGL

Thursday, March 1, 1979

There is a myth that liberal arts students have few opportunities in the job market. However, the student community at Cal Poly, an engineering or social science will tell you a different story.

Non-engineering majors are finding that in some top-profit companies, there are alternatives to the hard-to-find teaching jobs, according to professors at Cal Poly.

“As for English majors, jobs with large companies can be plentiful which most people consider reserved for the administrative business major or the prelaw engineering student.”

“Companies need people who can write—people who can communicate,” said Bill Wahl, English professor at Cal Poly.

As a result, companies are hiring technical people as well as professionals.

Some jobs other than teaching which are open to English majors are open to English majors are:

One Cal Poly English graduate has become an editor of the Los Angeles Times, hired in Palo Alto. Another, after editing a magazine in Los Angeles, has moved on to become a technical writer for Gilman magazine.

David Kane, also a Cal Poly English professor, said, “It's been found that English majors tend to run quietly into management in the technical majors don't as often.”

Middle management jobs are also open to history majors, according to Daniel Krieger, Cal Poly history professor.

In the school year 1975-76, Krieger received a grant to study job opportunities for history graduates. Out of 1,500 companies, he found that government agencies and department stores have a large number of positions open to history graduates. But, he said, there are many alternatives.

“Companies are looking for people who can write. History majors are especially good at analyzing historical problems, explained Krieger as another strength of history graduates. They're able to move from assignment to assignment, and go to different jobs,” he added.

Large companies like Sears, Roebuck and Co. and the Los Angeles Times are hiring history majors for such reasons.

Krieger gave an example of a person who was hired at $35,000 a year to compensate for a top executive who was writing indecipherable memos.

“People are looking for men and women who can write. History majors are able to get teaching jobs now, said Krieger. But, he said, there are many alternatives. History majors seem to be well-received in public relations jobs, said Krieger, something his study on job opportunities seemed to confirm.

“One history grad went in to where a company was planning to build a plant and said, 'I can do a history of the area and find some of the problems that might arise.'” Krieger said.

Public history training also is a large, fairly new area which history majors can find jobs in, said Krieger. Workers in the area trend toward modest-day problems into a history, so it is not to deal with the same problem after time, Krieger explained.

History majors are also qualified to do museum, historical pamphlets for towns and companies, work for the national park system, and other jobs, according to Krieger.

“It's not as dismal as we thought at first,” Krieger said. “We have the traditional problem—a lot of writing and nothing concrete to our education, but we're really more flexible in different kinds of fields.”

In the Social Science Department at Cal Poly, Donald Floyd, social science professor in charge of placement, said, “Some graduates that half or a little more of the students are sending for teaching jobs.”

But Floyd points out that a wide range of social work jobs, middle management jobs with companies, as well asin schools are open to the social science major.

“It takes more imagination, say engineering, so the kind of work you'd like,” said Floyd of a social science degree. “You have to convince employers that you have a range of skills.”

As part of their course load at Cal Poly, social science majors have interned at such places as the probation department, California Youth Authority, Alameda State Hospital, the welfare department, and city hall, said Floyd. And often those places will hire the interns after they graduate, to serve in entry-level jobs.

During past Career Days in the Social Science Department, speakers from Police, Telephone, insurance companies, government agencies and department stores have told students they are looking for social science majors who can fill middle management jobs.

“Social science doesn't leave you with a skill that's as directly applicable,” admitted Floyd. “But it gives you four years to keep your eyes open, and take courses which will give you a combination of all.’’

UFW calls for banana boycott

CALIFORNIA (AP)—United Farm Workers leader Cesar Chavez called for a boycott Tuesday against Chavemex, Inc., one of the largest banana producers in the world.

Cesar Chavez, president of the United Farm Workers of America, and his workers have been organizing farm workers for several years. The United Farm Workers have been striking for higher wages and improved employee benefits.

“We've just asked for a boycott of Sun Harvest,” Chavez said. “It's a高峰 for us. Cesar Chavez has moved on to become a technical writer for Gilman magazine.

David Kane, also a Cal Poly English professor, said, “It's been found that English majors tend to run quietly into management in the technical majors don't as often.”

Middle management jobs are also open to history majors, according to Daniel Krieger, Cal Poly history professor.

**Hickey-Freeman Trunk Show**

Monday, March 5 11am to 3pm

Please come in and see the fall collection. This is your chance to order from the entire Hickey-Freeman fall line.

---

**Smoking Clinic**

A "Five-Day Plan to Stop Smoking" clinic is being offered by Cancer Survivors March 3 through 8. Guidance and counseling on how to kick the habit, and return on the dangers of smoking will be presented at the Adventist Community Center, 1301 Osuna Street, each evening at 7 p.m. A $5 registration fee is required to cover materials.

**Bicycle Club**

The SLO Bicycle Club will hold their monthly meeting tonight at 7:30 p.m. in the SLO Recreation Center. Everyone is invited to participate in all events.

**Communication Talk Show**

"Communication: the essence of science; a presentation on the importance of communication awareness in the performance of scientific investigation," will be held in Science A12 today at 11 a.m. The presentation is sponsored by the Red Conservation Society of America and is open to the public.

---

**Auto Cross**

The Cal Poly Sports Car Club is sponsoring Pylon Jungle, an auto cross Sunday, March 4. Registration is from 8 a.m. to 2 p.m. Helmets and firesuits are required. Each plaque and trophy will be awarded.

---

**Boots and Spurs**

The Boots and Spurs club will travel to Modesto and San Jose Friday and Saturday. They will leave the Ag Club Friday at 9:45 a.m. to visit Padres Raymore Ranch, Cornetion General, Laurel Wood Farms and Frontier Village Amusement Park.

---

**Weekend Retreat**

HUG the Human Understanding and Growth Committee, will host a weekend retreat in Cambria March 30 and April 1. The development of interpersonal skills and interpersonal awareness will be pursued through task-oriented group exercises during the three-day workshop. Students, faculty and staff are invited to attend. The cost will be $6.30. For more information contact Sam Spodic in the Activities Planning Center at 546-3478.

**Vegetarian Potluck**

The Vegetarian Inland Empire will hold the monthly potluck dinner Tuesday at 6:30 p.m. at the Meadow Park Recreation Room. Dr. Ruth Rappaport will talk on nutrition, stress, and biochemistry. For more information, interested persons should call 499-5461.

---

**Talk on Nutrition**

"Cancer and Nutrition" is the topic for a special guest lecture by Dr. Phyllis Williams from Loma Linda University Monday at 7:30 p.m. in Ag Engineering 123. Admission is free.

---

Poly visits SB with high hopes of victory

UC Santa Barbara plays host to the Cal Poly volleyball team tonight and it should be a very good match. Both teams have the same record in the California Inter- collegiate Volleyball Association (CIVA) at 3-3 and both teams lost the same amount of games to fourth ranked UCLA and Pepperdine earlier this season. Earlier this season, the Gauchos lost in three games to the Bruins and lost in four to the Waves. Cal Poly did the same thing against the two highest ranked teams in the nation.

Coach Mike Wilson had the team get together and talk about some of the problems they have been having while on the court. "After that meeting, we've been playing on a new level," said Wilson. "We found out a lot of the guys were bringing some of their outside problems into the games."

Wilson said some of the team members were concerned with trying to produce and that contributed to some of the team's previous performances. "We're ready, now," commented Wilson.

"If we play our best and they play their best, we'll win," said Wilson of tonight's match with Santa Barbara.

Some lineup changes will definitely result, said Wilson. Probably starters for this evening's game will be Paul Draper, center blocker; Riske Hauser, outside hitter; Linden Crow, outside hitter; Tolan Keyes, setter; and Chuck Hayes, outside hitter.

Mustang nine blast SB for 18 runs en route to win

The Mustangs picked up their fourth win in a row Tuesday, pounding the UC Santa Barbara Gauchos 18-10. It was a home run spree for Cal Poly as the Mustang hitters tagged Gaoucher pitchers for seven home runs.

Centerfielder Eric Payton highlighted the hitting attack as when he slammed three four-baggers himself. The 5'-11" 165-pound Orange Coast College transfer boosted his batting percentage to .429 thanks to another join to his record at the plate.

The game was played at Cal Poly Field because the rain had left Sinsheimer Stadium.

Stadium/Poly's regular playing field flooded. Overall, the Mustangs scored the Gauchos for 11 hits. The runs began breaking the scoreboard in the start when Mustang shortstop Jack Ayer led the first inning off with a single. After the introductory inning, Gaoucher starter Stefan Wever had three runs against him. His luck was not to change either as he was pulled out of the game in the bottom of the third inning for giving up ten runs.

Payton began his home run spree during the third when Jeff Verhey came in relief for the Gauchos.

Other home runs from Payton came in the sixth and eighth innings. Leftfielder Tom Beyers lifted his batting average also to lead the Mustangs with a .413 batting clip. Beyers, catcher Ron Ornkleb, third baseman Craig Gerber, and Ayer picked up home runs for themselves during the contest.

Pitcher Ron Manichadd added another win to his record as he went the full nine inning gaining four earned runs. Manichadd is now 2-1.

Cal Poly begins a tough weekend Friday when Long Beach State Invades San Luis Obispo at 2:30 p.m. Saturday, a doubleheader starts at 12 p.m. and on Sunday, the San Jose State Sportpals top off at Cal Poly in a 1:05 p.m. game.
Poly sailors place in Humboldt regatta after 12-hour drive

Two stalwarts on the Cal Poly sailing team, Todd Burchard of Venice, Calif., and Keith Betts of San Diego, Calif., were both under a lot of pressure yesterday. Both were out in front last year's Humboldt regatta and both had to do it again this year to keep the Pressure on the Poly sailors.

According to Burchard, Burchard's dad has been under a lot of pressure all year, but he managed to keep the team on track for the Humboldt regatta.

The Poly sailors are under a lot of pressure to win the regatta, but they're not the only ones under pressure. The Poly sailors also have to deal with the pressure of being at the top of their game and being expected to perform at their best.

Jackson won't play baseball

If he doesn't get out of field job

(AP) Reggie Jackson, smooth-jawed and smooth-talking, was named the most valuable player in the American League yesterday, and made him the first player to win the World Series with a home run in both games.

Jackson was the MVP in the 1975 World Series when the Yankees lost to the Cincinnati Reds in seven games. He also played in the 1976 World Series, when the Yankees lost to the Baltimore Orioles in seven games.

Jackson has been a star in the major leagues for over two decades, and has been a two-time gold glove winner. He was also named the American League's most valuable player in 1973, and was the American League's Most Valuable Player in 1974.

The Giants still trying to sign North

(AP) - San Francisco Giants General Manager Bill North decided not to return to his post last season. His name is now being considered for the managerial position.

North, who managed the Giants for two seasons, is now a free agent. The Giants have been actively pursuing North for the managerial job, and have offered him a contract.

Sports

Sparky plus Yankees: winning combo?

(AP) - Sparky Anderson in New York Yankees' player/manager will bring a winning combination to the Yankees. According to Burchard, the Yankees have been searching for a player/manager who can bring a winning attitude to the team.

Sparky's experience in managing the Detroit Tigers and the Cincinnati Reds will be a great asset to the Yankees. Sparky has a great deal of experience in managing, and has been successful at it.

Sparky's leadership will be a great asset to the Yankees, and will help them to win the World Series. Sparky's experience in managing will be a great asset to the Yankees, and will help them to win the World Series.
The inherent virtue of socialism in the equal sharing of imbeciles, the inherent vice of capitalism in the unequal sharing of Budweiser.

Winston A. Churchill
