Hearing ends
Harris attorney: Separate trials likely

Hewell Peirce Harris, who will go on trial for the shooting death of Cal Poly student Alexander died three days later, the same day both Hewell and Harris were arraigned in Superior Court, but Harris was not tried. Von Felden said he had not decided on what motions, if any, will be filed in the Howell-Harris case.

Harris has a right to be tried within 60 days of arraignment in Superior Court, but Harris can waive that right according to state law. Von Felden said a plea will probably not be entered either. He said he wants a week to look over the preliminary hearing transcript first.

Von Felden might file several motions, including a change of venue (trial in another county), dismissal of the case because of extrajudicial publicity and suppression of certain testimony.

Von Felden said the testimony of Thomas Moran might be suppressed. Moran, a convicted right-wing serving time in state prison, said under oath that Harris told him that Harris "put the trigger.

Von Felden and Moran might lie in court in exchange for a transfer to Alessandro State Hospital. "Alessandro's a country club compared to state prison," he said.

Also, von Felden, Moran did not mention the use by name. Harris has two sons: Harri and Dean.

The Monday hearing was brief, said von Felden, because prosecutors did not present a key tape recording made between Harris and his son as evidence.

Von Felden said the preliminary hearing, Harris' third since being arrested, would have been much longer if the recording had been entered in court. Attorney for both Harris and Harris have argued that the secret recording, made in a garage at a Beverly Hills facility in San Diego, is illegal.

A trial date has already been set for Hans Harris, June 18. His attorney, Don Burton, announced he will file motions to move the trial to another county, to suppress the tape recording crucial to the prosecution's case and to dismiss the trial because of pretrial publicity.

Another municipal court judge, however, has already ruled that the tape is admissible as evidence in Hans Harris' trial.

The preliminary hearing was to find probable cause that Howell Harris was implicated in the Alexander death. Conklin ruled that there is.

The decision ends almost five months of legal hassles for the older Harris. Harris' first lawyer, public defender Richard Carroll, was disqualified for a possible conflict of interest by a municipal court judge after several days of hearings. Von was public defender James Reem. A second lawyer, Martin de la Mothe, was disbarred because he was representing defendants in the San Simon marijuana smuggling case.

A trial date has already been set for Hans Harris, June 18. His attorney, Don Burton, announced he will file motions to move the trial to another county, to suppress the tape recording crucial to the prosecution's case and to dismiss the trial because of pretrial publicity.

Poly housing official says student bill may not pass

BY CINDY HUANG

A bill prohibiting student discrimination in housing will probably not pass according to Cal Poly housing officials.

Wall Lambert, off-campus housing coordinator, said he thinks the real estate business does not see students as profit-makers. They would rather sell to middle-aged people, he said.

"There are too many strong real estate people with big money who have influence in the legislature," said Lambert.

The bill, which would forbid landlords from discriminating against students, is currently before a state senate subcommittee. There are no housing laws protecting students as non, said Lambert.

If the bill is passed, students discriminated against would be able to report the incident to the Fair Employment Practices Commission, the agency that handles cases of housing discrimination.

Lambert hasn't seen much student discrimination in San Luis Obispo because it is a college community and most apartments are geared to students. However, he said the R-1 zoning law--which prohibits more than three unrelated people to live in a single dwelling--is a form of discrimination to students.

Discrimination is hard to prove, said Lambert, because landlords don't have to rent to students. "As long as they don't openly discriminate against students, and say 'I'm not renting to your because you are a student,' landlords won't get into any trouble," he said.

Even if the bill passes, landlords would still be able to get around the law by discriminating against age. For instance, a landlord who didn't want to rent to students could say his apartment is for students 20 and over.

"For every law made, there is a new way to

(Continued on Page B)
More money to burn

The California State Students Association, which we have said is an insipid money-wasting "lobbying" group, has asked member universities to put more money all the group can expand, and eventually take an additional full-time fundraiser.

Cal Poly, which already pays about $3,000 per year to belong to CSSA, may contribute about $5,000 more per year. Sources explain that AliFlournoy and Larry Robinson are pushing for passage of CSSA's increase in the ASI budget.

That Robinson urges such passage is not surprising, rather it is quite expected. He is interested in the job as a legislative advocate of CSSA and would like to see Cal Poly kick in a few bucks to give the organization more money to spend.

This gives us further reason to show that the proposal should not be passed. The main reason, however, is that the CSSA does not do a good job and it does not deserve the money we are paying them now, much less another $8,000.

Several weeks ago, while Assemblywoman Carol Hallett was visiting Cal Poly, she was asked "what is your impression of the CSSA?" She said she had never heard of it, or of its legislative advocate Craig Jones. Since membership in this organization is dependent on large fees, and seeing little direct benefit from the payments, we rationalized the money might have been wasted.

No, our student government was quick to pop back, our money is put to good use and should remain with the CSSA.

But, CSSA has become a playground for student government people who graduate and have no other political avenues to travel. Since they have influence over the college and universities they came from, money is always available, all supplied by student fees.

The CSSA should evolve into something more than a haven for retired student governors, and hopefully, if Robinson is appointed to his desired post, he will look at the job as more than just a political stepping stone to bigger things and he will not abandon us here.

Poly's student government should not pass any requests for more money. They should wait for CSSA promises to come true before the money is spent, and more importantly, when and how to break down.

Driving through the hills of San Francisco, my ear will break down. On the freeway during rush-hour traffic, my ear will break down. Trying to get to a concert or a final exam, my ear will break down without fail.

Right now, my ear is parked, immobile, in my driveway. I don't know much about cars, but one thing I do know for sure. When my ear sounds like an overlaid rumble, I might be having problems. When it drive like an overlaid rumble, I know I'm having problems.

But problems have a strong tendency to multiply themselves, and my ear is no exception. Car troubles is one thing; mechanical trouble is quite another.

Good mechanics are like good used ears; I'm sure they exist, but I have never seen them.

When I was having difficulty with my ear overheating every 100 feet, I decided to research the possibilities of fixing the damned machine. I took the motor off to four different mechanics, and subsequently got four different analyses of the trouble: Broken thermostat, broken water pump, broken water pump housing and stripped radiator hose.

I'm sure they exist, but I have never seen them.

The engine would turn over fine, the mechanic said, and it seemed to get plenty of gas and plenty of spark. It should be running, I thought, except it isn't.

At this moment, the ear is parked in my driveway, next to the dead battery ear, and the mechanic ear. I'm starting a collection.

And so I leave you all with this thought: I don't think that can like us. I realize, of course, that cars are very dangerous, and above all, short sighted and childish, and above all, wrong with us.

Another car catastrophe

Automobiles drive me crazy.

As of late, it seems that these mechanized monsters, these demons on four wheels, have become the personality of Murphy's Law. If anything can go wrong with my ear, there's no doubt that it will.

Like most Californians, I've been driving since I was sixteen. And, since that momentous turning point in life, the automobile has come to signify the conveniences and instantly all rolled up and under my ear.

It doesn't take much for me to realize, of course, that an automobile is a mass of steel and rubber (and plastic), with no consciousness of its own, but sometimes I can't help but think that ears have very distinct personalities, that they know when and how to sit and, more importantly, when and how to break down.

Fred Astaire celebrates 80th

NORTHAMPTON, Mass. (AP) — Fred Astaire died at his home in Beantown Thursday that he has a lot of young fans.

Miss Robbins got another student and Astaire fan, Jane Walsh of Northampton, to design a signed picture of Astaire in classic dancing poses.

BY SEVERLY LANGLOIS

Daily Hampshire Gazette

Working as a television station, it is almost impossible to watch all the programs without missing any. Each network probably knows that NBC is way down on the ratings lists. Nothing they do seems to work, but we have yet to see what Fred Silverman is going to come up with next fall.

The new line-ups have just been announced, and for those of you who don't step your hands over your ears at the mere mention of the letters T.V., you may after you hear that there is a future for tube watching.

NBC, surprisingly enough, has only six new series and is keeping two thirds of its current line-up. I don't know if they expect everyone to change radically over the summer and start liking what they haven't liked yet, or perhaps Fred Silverman has decided to cut the other two networks and isn't afraid of the competition. Looking at what's coming up, I think the latter possibility may not be too far off the mark.

What's amazing to me is that they (NBC) are only keeping two half-hour comedies. One is "Hello, Larry," another poor program that was once the public that there is some reason why Malcolm Silverman should be on the air. As far as I'm concerned, "MASH" is the only steady program that come out on top when he decided to spread his wings.

But listen to what the network three is putting up for our viewing pleasure next year. First of all we have "A Man Called Horse" which is sort of a new wave "Man from Uncle" about a secret agent who works for the police and is chased by a diabolical Indian from Kansas. Wonder where they got that name from! Then there is "The Magic Mountain of Sherwood's" about a secret agent and his two sidekicks. They're dragging Claude Akins out of the small screen for that one. More new television.

How about "Buck Rogers in the 25th Century" that I thought maybe the US would use Adam West (Batman) for that one. But no, they are instead going to use Michael West and have him protect "Supernatural" for Shirley Jones in new widescreen-film show. This time the stars (one of the same from "The Partridge Family") is in Laos Tahan, and another romantic interest for Shirley will be the Delta's own Pepper. Well, I suppose it's better than doing nothing at all.

The "Buckford Files" and "Quincy" will be back, and I have to admit I am pleased I am a "Quincy" junkie. Everyone has some embarrassing failures.

Now the television station I work for happens to be a CBA affiliate. They have been running a steady second in the ratings, but they may be competing with NBC for the bottom. Other people get a look at what they think will tilt us.

First of all there is "Struck by Lightning," Bleyer it or not, this one is about a guy who inherits an old inn which turns out to be haunted by none other than the famous Dr. Frankenstein, and the caretaker Frank turns out to be you—gummed it—the monster. Oh boy.

Then we have the real interior stuff. "We're Crusin'" is about girls, men, stars, and the beach and how they combine in New York for two California teenagers. I like the way girls are listed.

Everything that is happening in tinsel town

WHITNEY GLENS stars in the new Disney TV movie "A Whisper in the Giseon," about an attempt at suicide. Miss Glenn is a reporter for a newspaper who investigates a plot to kidnap the Russian ambassador during an American visit. Lloyd Hayne also stars and Larry Cedar plays a newspaper photographer.

Robert Clouse is directing from a screenplay by Donald Morgan Hixson and David E. Bennett, based on a novel by Nicholas Blake.

Jill Eilenberry and Kevin Dobson star in the three-hour CBN movie "Daphne Thier," based on a true story of a woman who in 1846 got 150 homeless children out of New York and onto a railroad boxcar headed for the Midwest.

It was the first of many orphan train sponsored by the Children's Aid Society of New York. Between 1854 and 1870 more than 200,000 children were rescued with families across the country.

Robert Hay plays the title role in the CBN movie "Young Will Rogers," which airs Tuesday, May 31. Rogers devises a scheme to stop an Indian uprising being planned to turn the Indian people over to the law.

This is a true story of a man who was stricken with cancer. His devoted his wife left young children, especially two boys.

The movie, from Columbia Pictures Television, goes into production in Albuquerque in time.

Threepenny Opera

by BEVERLY LANGLOIS

Daily Entertainment Writer

Cal Poly is going to be presenting "Three Penny Opera," next weekend, and after it is probably the most difficult play for Dr. Michael Malkin, the theatre arts professor, to attempt, it seems appropriate to give the players some hint as to what they say in the show.

Nancy Jurgensen is going to play Jenny, that part she has done quite a few productions for Cal Poly, including "Death of a Salesman," and "Oliver!," and has played a couple of things at Cal Poly College and the University of Hawaii, the Honolulu Community Theater, and the San Luis Obispo Little Theatre. Remember, she's Greg McConnell, an incredibly, a linestyleer for the Mustangs. shotgun the part of Mack and, I don't want him to do that part. If you see me I am a fan of Greg's, I've never done him anything that wasn't great, even just a little joke and the last one for a Communication Thesaurus.

Kill Killing, who some of you may have seen the title role of "Shattered Hologram" in your year will be playing Mr. Peachum. It is an ironic engineer student, but apparently likes to go out in front of the audience for a little roar of the players and smell of the human voice, because he did a part in "The Doctor at the End of the Day," too.

Melissa Ann Martin, a graphic communications major, is going to be portraying Mrs. Peachum. Melissa has also done a quite bit of acting, including "Psycho," "Babes in Toyland," "South Pacific," and "The Doctor in Spite of Himself." She is currently a voice student here at Cal Poly.

The work has such great music in it. Everyone remembers "Mack the Knife," made famous by the late great Bobby Darin, and if you've ever heard Judy Collins do "Pirate Jenny" you know where I'm going.

Earle Hammamaster is going to be doing Polly Peachum, and she, too, is bringing musical experience to Cal Poly since she played "Carnival" and "Bye Bye Birdie" as well as "You're a Good Man Charlie Brown." J. Marc Mann, again, hailing in from the Graphic Communications Department, is going to be playing Streuengher. Mr. Mann's previous parts include "Oliver!", "Our Town," and "Up the Down Staircase" in high school, and "Tom Sawyer" and "Death of a Salesman" here on campus.

Last of the major players is Ed Cardona, who is going to be "Tiger Brown." Ed is a biology student, and had a role in "Shattered Hologram." "The Doctor in Spite of Himself." Ed has really put his heart into this one, and it sounds like it's going to be good.

Tickets for the show, which will be Thursday, May 17 through Saturday May 19 are being sold at a reserved seating basis for $3 at the U. D. dock and a few spots downtown. Dr. Malkin suggests the play is not suitable for children.

Matrix is the name which twenty-two members of the group, the Matrix, know themselves as. It is also the title of the show that Matrix, with the help of some of their friends, and other Matrix members, will be presenting at the Cal Poly auditorium Monday night, May 10.

These nine music students have masterfully blended a multitude of instruments that just about any group I've seen, couldn't begin to execute. Here we have nine different instruments were played during the course of the evening, but every time around every last member of the group, especially the last who were playing something different.

Cut off the group's current swirl of activity is the highlight of the show, particularly their version of the song with the same name, which was inspired by the late great Johnny Cash. It was sung by J. R. J. Tolkein's Lord of the Rings trilogy. The group's repertoire ranged from dynamic brass with inventive percussive accompaniment to fantasy and Thunder of Tolkein's battle scenes.

The founder and keyboardist of the group, John Harper, wrote most of the pieces played, and they were very right. It would have been nice to hear such a gifted bunch of musicians do a little more than just show off their keyboarding skills. I know this way around all the notes of instruments on the stage.

All of the members of the group were great, but I have to say that the ones that were truly amazing, First of all, being related to the group of people and their dedication is that instrument for hours on end. The group is made up of the ones that were truly amazing.

Mike Hale played trumpet on quite a few songs. He also played on the electric bass with slides that produced an eerie sound very reminiscent of the feeling, if not the actual sound, of those "I'm in the mood for love" blues songs. That piece also got an ovation worthy of it.

Something was added to the concert this year that I expect groups don't do, and that is "Yesterdays." Not words, as such, or even just words that sound. Their voices like more instruments, with harmonies and harmonies that only the human voice could produce.

The crowd was far from empty, but their enthusiasm made up for their lack of number. After the encore, the group received another standing ovation that wouldn't quit, and the group was forced after some 4 to 5 minutes of continuous applause to come out and take another bow, but they declined to play another song of music.

Well, no matter, the warmth of Matrix upon was well.
CCAA championships

Poly track team favored to win

BY JOHN KELLER

The Mustangs are favored to win the California Collegiate Athletic Association championship after the team won the West Coast relay last weekend in Fresno. With 89 points, Cal Poly captured the title with a 24 point margin over UC Irvine. Other CCAA entries in the WCA meet include Cal State Los Angeles (fourth place—77 points), Cal State Northridge (fifth place—53 points), Cal State Bakersfield (sixth place—16 points), Chapman College (ninth place—15 points) and UC Riverside (tenth place—10 points).

Coach Miller and his track team will defend their 1979 CCAA championship. Cal State LA finished second to Cal Poly, 113-92, in Bakersfield last season, the title of the 1979 conference meet.

Despite a second-place showing, the Mustangs, Capt. the Mustangs at the NCAA Division II national at Western Illinois University, 78-85.

"I think we can still win it (the CCAA)," Miller said one of our objectives all along. "We will keep our best events people the same, but we can be doubling in running events as much as we did a year ago," Miller said.

Doug Aldridge, Frank Harvey and Bert Williams will double in running events for the Mustangs. Aldridge will defend his 1,500 meter title and also run in the 800 meter run. Harvey is entered in the 100 and 200 meter sprints besides his relay participation in the 400. Williams will return from the 400 intermediate hurdles, an event he won last year. Instead, Miller entered him in the 200 and 400 meters.

"He was always a top relay man, but we have to push a good thing. Rather than push our guys hard and lose a super relay team member, I decided to move our people around so we can maintain a good physical and mental edge for the nationals," said Miller.

"We've had such a great year in 1979," the four-year Cal Poly coach said. "Things have gone so well. I don't want to push a good thing. Rather than push our guys hard and lose a super relay team member, I decided to move our people around so we can maintain a good physical and mental edge for the nationals," said Miller.

Poly pair in nationals

BY KELLY WINE

Mustang Daily

Coach John Crivello, left, and Chamberlain will be competing in the NCAA Division II national tennis finals next week in Fairfax, Va. Arkansas.

Last year, playing in Little Rock, the two players were knocked out of the doubles bracket in an early round. The season, according to Coach John Crivello, the pair should do much better. "They have a chance of doing well in doubles," said Crivello. "Of course, the draw is important."

One drawback in the pair's chances was an injury to Chamberlain over quarterfinals. His arm lagged behind, and that limited his match. However, according to Crivello, Chamberlain is back at full strength.

Along with their doubles experience, according to Crivello, another advantage is that their styles mix well. "They compliment each other," said Crivello. "Chamberlain is a power player, with a good forehand. Peel plays with more finesse."

The pair will be one of 32 teams competing in doubles. As well as playing doubles, each player will also compete in singles. Crivello thinks that doubles is where they happen must rest. "They are better together than apart," said Crivello.

Tarkenton quits football, joins ABC

ATLANTA (AP) — Minnesota Viking quarterback Fran Tarkenton, who holds all of pro football's major passing records, has retired to join Howard Costello's "Monday Night Football." I could have played another year," said Tarkenton, who played 18 years in the National Football League with the Minnesota Vikings and the New York Giants. He led the Vikings to three Super Bowl appearances, but he could not win one. "But I was very sensitive about going out of the game when I was productive," Tarkenton said in an interview Tuesday. "I did not want to go out of the game as a lame duck, nonproductive quarterback. Last year I had what I consider my most productive year. I contributed more to my team than any year that I played."

"I had fun. I've had heartaches. I've had joys. I've worked," said Tarkenton, who played 36 years of football, including four in high school.

Union defies Carter's wage plan

(AP) -- The United Rubber Workers union struck Uniregal Inc. Wednesday as it launched a direct challenge to President Carter's anti-inflation wage guidelines.

"As far as we know, the strike is on," union spokeswoman Jacki Freeland said from LBV headquarters in Akron, Ohio, shortly after the noon local time strike deadline passed.

The walkout involves about 8,300 workers at 12 Uniregal plants, including four tire plants.

The first walkouts were reported at the No. 3 tire maker's plants in Detroit and Chatsworth, Calif.

The strike followed several days of fruitless attempts by federal mediators to get the two sides moving toward a contract settlement.

The company has pledged to comply with Carter's voluntary guidelines, which set a 7 percent annual ceiling on wages and fringe benefits.

The union has reported a pay hike of that size as inadequate.

Union President Peter Bommarito has dabbled the walkout "Carter's strike." Bommarito contends that administration policies have prolonged the strike by imposing Uniregal's operation to stay within the guidelines.

Three die in Florida tornado

(AP) -- Tornadoes swept across Florida's midsection Tuesday, ripping chunks of roof off two schools, wrecking hundreds of mobile homes and causing flooding and hundreds of mobile homes to rush off the property in 19 counties in the center of the state.

The hardest hit area was around the Polk County town of Auburndale, east of Tampa in the center of the state. The area was hit by a tornado that killed at least three confirmed deaths.

A local woman said she was believed drowned, and dozens of people were injured.

Late Tuesday, the National Severe Storms Forecast Center in Kansas City, Mo., issued a tornado watch for a wide area of central Florida, covering everything in a wedge between a northern boundary of Tampa Springs to St. Augustine and a southern boundary running east from Palm Beach to Darwin.

Infestation may top 8.5% in 1979

WASHINGTON (AP) -- President Carter still expects union leaders to adhere to his wage guidelines despite a new administration prediction that inflation probably will top 8.5 percent this year.

White House spokeswoman Jody Powell said: "There has been no modification in those guidelines."

Powell also said the administration inflation forecast for this year remains at 7.4 percent.

"There's been no modification in those guidelines," the press secretary said.

Linda Byrd to be chairwoman

WASHINGTON (AP) -- President Carter has decided to appoint Lynda Bird Robb as chairwoman of the National Advisory Committee for Women. The post, which former Rep. Belle Beatty held until Carter fired her last January, is a new one.

A White House source, who asked not to be identified, said the announcement was expected Wednesday.

Mrs. Robb is the wife of Virginia Lt. Gov. Charles Robb and the daughter of the late President Lyndon B. Johnson.

The source earlier had said that Johnson's other daughter, Luli Nugent, was being appointed to the post. However, she said later that confirmation had been in error, apparently resulting from a misunderstanding of the reporter's question.

Odd-even rationing: A success?

SACRAMENTO (AP) -- The first day of an "odd-even" gasoline rationing scheme appeared to have resulted in small impact as California drivers slogged through the week, waiting for a gasoline rationing scheme to work.

Liners of up to 75 cars were reported in suburban Los Angeles, where some motorists said they had put off buying gas for a second week, to wait for a rationing to begin.

"I've been doing a lot of walking for the last two weeks and I just exceed the 1 mile to work," said Kenneth Hens of Alhambra, who walked in line at 9:30 a.m.

The plan, which amounts to giving drivers the opportunity to buy gas between drivers with odd and even-numbered license plates, begins at midnight.

Immediate success was difficult to gauge. In the San Francisco area and San Jose, for example, lines appeared generally to be shorter. Lines were also shorter in parts of Los Angeles.

But in other parts of Los Angeles, the lines were longer. One driver said the lines in his area were the longest in a week while another counted about 23 percent more cars in line.
