Students to guess
at ME scheduling

BY CATHY SPEARNAK
Daily Editorial Assistant

In an effort to curtail student "shopping" for preferred instructors, the head of the mechanical engineering department has omitted all faculty names from the spring quarter schedule of ME classes.

Dr. Raymond Gordon, head of the ME department, said he spearheaded the change in part to move students through the university more quickly. Many students wait around for a favorite or "easy" professor to teach a course, thus delaying their graduation anywhere from a quarter to two years, he said.

"When I see in a week's time ten to fifteen students who have radically altered their programs because of instructor availability, then something's wrong," said Gordon.

He said the immediate reaction of students is to assume some instructors are bad, but added this is not the case.

"When I look at the faculty as a whole I could name one—possibly two—teachers that create a problem," said the president. "However, the rest of the faculty receives consistently positive student evaluations.

"Professors such as Max Riedlsperger, who is chairman of the Academic Senate, said the instruction forced by self-interest on the teaching force designed the system so the add-drop procedure could be made easier with the computer."

He said, "It's not going to be brushed down anybody's throat," said Holley about the add-drop procedure. Some of the departments, such as history and English, had at least nine signatures on the petition.

Riedlsperger, who is chairman of the Academic Senate, said the Instruction forced by self-interest on the teaching force designed the system so the add-drop procedure could be made easier with the computer."

Flushing students' rights

Pity the poor mechanical engineering student. After struggling through classes, labs and finals, coping with mountains of homework and trying to stay sane at the same time (like most students on this campus), the MEs have been dealt a dirty hand— they no longer have the right to know which professors they are taking when they register for a class.

Hoping to stop student "shopping" for favorite teachers, Dr. Raymond Gordon, ME department head, has decreed that ME instructors' names be left off the class schedule. Gordon thinks the move will get students through the department faster by keeping them from waiting for a certain prof to teach a class. In justification of his move, Gordon said "students are used to freedom of choice in everything," and in this time of tight funds, he added, their claims are not legitimate.

Attitudes like Gordon's make a travesty of student rights.

If students care anything about their education, they are going to try to get the best professor possible to teach a class. Students are smart enough to know a good professor can make a class a true challenge. Is there anything wrong with seeking out that challenge?

Perhaps Gordon's move was to protect weak teachers. Through his recent plan, ME students will be forced to take a professor, no matter what his reputation. This would certainly make it better for those profs who are not among the favorites with the students—they will have full classes no matter what they teach.

And if we must pity the MEs for having their rights taken away, we must certainly pity students in general. The action by the ME department sets a precedent for the entire campus. If one department has the option of leaving names out of the catalog, won't the others want it too? Vice President for Academic Affairs Hazel Jones said the plan is "an experiment" and is not meant to set a trend for the rest of the university. But what will she do when another department head comes to her and asks for the same treatment— it seems she will be obligated to give him the same chance.

Hopefully students will not take this denial of their rights lying down. Administrators have too much say as it is— presently they are considering shortening the drop period, lying down. Administrators have too much say as it is—

"an experiment" and is not meant to set a trend for the rest of the university. But what will she do when another department head comes to her and asks for the same treatment— it seems she will be obligated to give him the same chance.

"If the pet fails, the master should punish it until the animal gets it right." And, "like teaching an animal, the U.S. must punish in full.

Training and punishment do not belong together, as you suggested, in the training of a pet, or the handling or any animal. You are doing a disservice to all the animal scientists and prospective animal scientists on this campus to suggest that slapping and other forms of punishment are the accepted ways of controlling animal behavior. The name of the game today is conditioning and behavior modification, even though we may call it "teaching the dog to sit or stay."

I have been involved in professionally training dogs in obedience for over ten years part-time and I am licensed by the American Kennel Club as an obedience judge. I have seen thousands of dogs in various stages of training, and I have never seen a punishment-trained dog which did not have several negative side effects. The side effects are often worse behaviors than those for which the dog was originally punished.

To educate your staff on correct behavior training of dogs in particular, I would suggest reading, Behavior Problems in Dogs by William E. Campbell. It is in our library.

What about King?

Editor:

Are you at the Mustang Daily so busy that you can't take a few moments to write a brief summary to recognize one of America's most honorable Nobel Peace Prize winners, Dr. Martin Luther King Jr.? Understand me to mean are you?

Once again, the birthday of Dr. Martin Luther King Jr. went by unnoticed at Cal Poly.

Those who were willing to acknowledge his accomplishments last Tuesday participated in a speech presentation to commemorate Dr. King's non-violent struggle, which was directed not only towards Blacks, but all races.

Your attitudes and responses toward Black related issues are totally nonexistent. You give priority to sporting events and trivial issues over relevant issues like human rights. Open your eyes Daily!!!

Paula Morgane
Representative of UBSAC
The United Black Students
Awareness Council

Training pets

Editors:

According to the disclaimer in the Mustang Daily, the unsigned editorials reflect the majority view of the Editorial Board. If this is the case, many of your board members are grossly uninformed on the proper training and conditioning of animals, particularly pet dogs. I refer to two of the sentences which appeared in Jan. 24's editorial. "If the pet fails, the master should punish it until the animal gets it right." And, "like teaching an animal, the U.S. must punish in full.

Training and punishment do not belong together, as you suggested, in the training of a pet, or the handling of any animal. You are doing a disservice to all the animal scientists and prospective animal scientists on this campus to suggest that slapping and other forms of punishment are the accepted ways of controlling animal behavior. The name of the game today is conditioning and behavior modification, even though we may call it "teaching the dog to sit or stay."

Schedule

From page 1

She also disagreed with Gordon on another point. Jones said if an ME student went to the department secretary he or she could find out who was teaching the course.

"A great many students will go in and find out about it because they care and a great many won't," she said.

Gordon said he has instructed his secretaries not to tell students who is teaching a course, but students can ask instructors.

"Instructor's names will be available on the first day of class," Gordon said.

Jones stressed that the ME department's procedure to withhold names is an "experiment" on a one-quarter trial basis. She said it will not set a precedent for the rest of the departments on campus.

"What the students may be concerned about is whether or not this new name means that everyone is going to do this—and the answer is no, it does not," she said.

Jones said she sees "nothing wrong" with testing the system.

Perkin-Elmer offers a competitive salary structure and a comprehensive benefit program. Benefits include company paid dental, medical, life and travel insurance, optional supplemental life and income protection insurance, liberal vacation schedule, ten paid holidays, retirement plan, credit union, and a company profit sharing program.

On campus interviews will be conducted Tuesday, Feb. 5.

Contact the Cal Poly placement center for an appointment.

Hughes Aircraft Company

PERKIN-ELMER PERKIN-ELMER PERKIN-ELMER PERKIN-ELMER

The Perkin-Elmer Aerospace Division in Pomona is an international leader in the manufacture of analytical and scientific instruments.

For intensive care units in hospitals, the Aerospace Division manufactures respiratory gas analyzers and patient monitoring systems. The Division markets life support units for submarines and manned space laboratories. Precision cameras and tape recorders are designed and developed at the Division; those products will be used in space shuttle orbital test flights and other projects.

The following openings offer stimulating careers for recent graduates in the engineering and administrative disciplines:

**ELECTRONIC ENGINEERS (BSEE)**
- Analog and digital circuit design and analysis.
- Power supply design, magnetics, worst case analysis.

**MECHANICAL ENGINEERS (BSME)**
- Electro-mechanical equipment design, thermal and stress analysis, metallic and non-metallic material properties in vacuum environment.
- Proposal preparation.

Schedule

From page 3
be content with every name being left from the schedule," she said.
Although she wants to give students as much choice as possible, Jones said she does not always have that option.

"I hope students won't get overly excited about a small thing, but I recognize their right to get excited," she concluded.

Reactions from student and faculty members were mixed.

"I think it's terrible because some instructors I refuse to take a class from," said ME student Berdie Goodrich. The 24-year-old said he will try to add and drop classes to get the right instructor.

"I know a lot of students who sit around an extra quarter and wait for the right teacher to teach a class," said Goodrich.

ME David Schade "I take teacher because I trust them. There are some I try to avoid." Schade said the lack of teacher's names on the schedule will present a bigger problem to lower division students.

"When you get in the upper level there are only a few sections you can take. You're locked into a time schedule, but you know the teachers anyway.

"I can't afford to take certain teachers because they take too much time," said another ME student, Felix Delgado. The senior said although he takes his classes when offered rather than waiting for favorite instructors, he tries to avoid teachers who require a lot of computer programming.

ME professor Bill Stine agreed with Delgado. He said he felt students worried more about the time a class is offered rather than who teaches it.

"The last thing they go for is a particular instructor—engineer at last." -

"Speaking from a faculty point of view it doesn't present a problem one way or another—of course, we aren't students," he said. "If it bothers the students, if they want to see who's teaching the class, then it bothers me."

Gordon said he hopes the new system will be effective in getting students through the program faster.

"I'm not trying to prevent students from getting classes. I'm trying to stop students who want to 'deselect' what the computer has done," he said. "It's just an experiment."

RILEYS

TUESDAY SPECIAL

entire stock of Danskin Leotards and Tights 20% OFF

For one day only, today January 29 our entire stock of women's Danskins will be reduced by 20%. Danskins are for sleek and curvy people who know how to speak body language beautifully and want to add lots of mileage to their wardrobes. While Danskin's Freestyle Leotards are made for the poor dancer studio, they're perfect for everyday wear paired with a long skirt.

Sale price effective today January 29 only. Limited to stock on hand.
Carter requests defense budget

WASHINGTON (AP) - President Carter said today the United States must spend a record $142.7 billion next year on strengthening its defenses "to contain Soviet aggression and ensure U.S. security in the face of growing Russian military power."

The president told Congress he could not ignore "the implications of terrorism in Iran or Soviet aggression in Afghanistan."

Only last week, Carter asserted in his State of the Union address that the United States would consider a Soviet effort to gain control of the oil-rich Persian Gulf area as a threat to U.S. vital interests and that America would act to repel such an effort.

"Our forces are adequate to protect us against today's threats, but Soviet military capability is growing," Carter told Congress in the message explaining his budget for fiscal 1981, which begins Oct. 1.

"Our forces must be increased if they are to contain Soviet aggression and continue to assure our security in the future. This will require a sustained commitment over a period of years," he said.

Kennedy hits Carter on Iran

WASHINGTON (AP) — Sen. Edward M. Kennedy, seeking to rejuvenate his presidential campaign, blamed President Carter for the Iranian crisis Monday and said restoring draft registration is a "step across the threshold of Cold War II."

In his own state of the union message, Kennedy also called for a six-month wage and price freeze and immediate gasoline rationing.

And the Massachusetts Democrat, whose loss to Carter in the Iowa precinct caucuses last week prompted speculation about the future of his candidacy, declared he was in the race to stay.

There was no immediate response from the White House, but Carter has opposed mandatory wage-price controls.

Senate urges Olympics snub

WASHINGTON (AP) — The Senate Foreign Relations Committee voted 14-0 Monday to urge American athletes and sports fans to boycott the 1980 Olympics in Moscow if the International Olympic Committee allows the Games to proceed.

The panel called on the international committee to agree to the request made by the United States Olympic Committee on Saturday that the games be canceled or transferred if Soviet troops remain in Afghanistan beyond the Feb. 20 deadline set by President Carter.

Buzzer basket clinches first

BY TOM JOHNSON

That win, coupled with a 66-64 squeaker over the UC Irvine Anteaters Sunday, extended the Mustang's winning streak to nine and raised their league mark to 4-0.

The Mustangs looked all but dead when they fell behind by four points with less than two minutes left to play. But the trio of Joyce Bergner, Colleen Finney and Buehning sank consecutive baskets to put Cal Poly on top 63-60 with 30 seconds left to play.

Pomona quickly worked the ball down court and passed the ball to 6-1 freshman Carol Welch who was standing alone under the basket for an easy two points.

With 22 seconds left, Coach Marilyn McNeil quickly called a timeout. McNeil diagrammed a play which would isolate Buehning, the game's top scorer, at the top of the key. Buehning took the inbound pass and drove toward the key.

The lane was blocked. With just a second remaining, Buehning uncorked the ball from 20 feet on the right side. As the buzzer blared, the ball thudded against the rim.

"When Laura shot the ball and it rebounded off the rim, I prayed," said assistant coach Darla Wilson. "I was hoping that her finesse would let us hang in there."

Buehning's shooting finesse did more than allow Cal Poly to hang in there; it led the locals to victory. Buehning's shot fell through the hoop to provide the Mustangs with the margin for winning.

It was appropriate that it was Buehning's two-pointer which decided the contest as it was her hot hand which kept San Luis Obispo in the game. Buehning had a superb 58-point night, 11 points higher than the Mustang's second highest scorer, Jeenine Cardiff. Bergner and Finney were also in double figures with 12 and 13 points respectively.

Finney splashed in the second half of the Irvine game, leading Mustangs to a 68-64 win.

But it was anticlimactic after the previous night's thriller.

Finney, who was held to six points in the first half, bounced back during the second half of the game with 15 points. Finney was one of five Cal Poly from being blown out in the second half, as she capped the team's first night points.

**Buzzer basket clinches first**

**BY TOM JOHNSON**

With the score knotted at 62-62 and just a few seconds left, Mustang catalyst Laura Buehning took an inbound pass and drove for the basket. Not finding an opening, she pumped the ball in from 30 feet out as the buzzer went off to lift the Cal Poly women's basketball team to a 64-62 victory over its Pomona counterpart Saturday in the Main Gym.

Grapplers beat Arizona, face 7 game road trip

BY HARRY SHORTZ
Daily Trojan Writer

In their last home game before leaving on two long road trips, the Cal Poly wrestling team defeated the University of Arizona in the Main Gym Thursday, 32-18. The victory raised their season record to 12-1. The Mustangs will then return home for eleven days before traveling to Northern Arizona, Arizona, Arizona State and Nevada-Las Vegas Feb. 14-16.

Mustang coach Vaughan Hitchcock talked about the upcoming road trip his team faces.

"Any time you wrestle away from home, the meets are tougher because you don't have the support of the home crowd fans and the added pressure to perform well before your peers. Oregon has an tough and aggressive team and it should be a good match." Coach Hitchcock went on to explain why the team has an eleven day rest period between road trips.

"I planned the schedule that way to give us time to gather ourselves before our final push towards the Western Regionals and the National Championships later this year."

On their road trip, the Mustangs will face the only team that has beat them this year, Arizona State.

"We will be looking for revenge against Arizona State," said All-American Gary Fischer. Fischer, a senior at Cal Poly, habituates his weight and wrestles at 118 and 126 pounds for the Mustangs.

"I can wrestle good at either weight, but I dominate my opponent when I wrestle at 118," Fischer has been out sick with the flu and has missed the last three games but expects to be back in action when Cal Poly meets Oregon Jan. 31. The Mustangs are thin in the lower weight divisions and the absence of Fischer has hurt them. In Thursday night's game, the Mustangs had to forfeit the 126-pound division because of Fischer's illness.

When the Mustangs beat Cal State Bakersfield last week, 20-10, it preserved coach Vaughan Hitchcock's 18-year unbeaten record against California college teams. His record to date is 158-6-1.
### Arab students

The Arab Students Club will hold a general meeting Jan. 31 at 11 a.m. in UU 220 to discuss recent issues and Poly Royal.

### Study Abroad

Go to the International Programs Office in the Library, Room 311, for information about one year's study abroad. All 48 units are transferable. Students depart in late summer and must complete 87 units and have a minimum G.P.A. of 2.75.

### Birth control

The Health Center is holding birth control workshops to help men and women choose a contraceptive: advantages, disadvantages, side effects, and effectiveness will be discussed. There will be no charge. Tuesdays, 10 a.m. to 11:30 a.m.

### USBAC

The United Black Student Awareness Council will discuss old and new business at its Jan. 31 meeting in UU 219 at 7:30 p.m.

### Hospice meeting

Parent's Circle of Hospice is a group of and for parents who have lost a child or have a child with a life-threatening illness. For mutual support and caring, meet Jan. 31 at 7:30 p.m. at 3659 Mary St., San Luis Obispo. Call 544-2256 for more information.

### CD club

The Child Development Club will discuss singing valentines, fun raising events and field trips. The speaker will be Stan Borogovey from Friends outside on Jan. 29, 7:30 p.m. in Science North 202.

### Job seminar

A representative from the California State Department of Parks and Recreation will be on campus to discuss summer employment and application procedures in Science 9-11 a.m. on Jan. 29.

### Blood drive

Faculty, staff, students and immediate family are invited to donate blood to the campus blood account on Jan. 29, 9 a.m. to 2 p.m. in Chaucas.

### Business Club

The Ag Business Management Club will hold a general meeting welcoming new and old members on Jan. 30, in Ag 220 at 7:30 p.m. Yearbook pictures will be taken. Poly Royal information and aggie coop meals will be given.

### Polyphase

The Polyphase book exchange will hold a late payback session, for those who did not pick up their checks, on Jan. 31, 11 a.m. to noon in Building 20 Room 194.

### Pool tournament

There will be an eight-ball tournament for men and women in the UU Games Area at noon on Feb. 3. Entry fee is $2.50 and the winners will be entered in the western regional competition.

### KCPR

Join David Elliot for another "Dedust" show, this week featuring Creedence Clearwater Revival, Brush Arbor and the Little Dot Band, at 4:06 p.m. on Wednesday. Tune into 91.3 FM. The same night, DJ Dana Pangburn will present the new "No Nukes" album.

### IEEE

Valentine, funding raising charge. Tuesday, 10 a.m. to 11:30 a.m.

### LA trip

Anyone wishing to go to the LA field trip Feb. 22-23 to visit the LA Press Club, LA Times and KBBK studios sign up in the journalism department. Attend the Jan. 31 meeting at 6:30 p.m. at 3561 Johnson, San Luis Obispo.

### Be efficient.

**Apply to 6 divisions in 1 interview.**

These six Burroughs Groups have immediate openings in SOUTHERN CALIFORNIA:

1. **Computer Systems Group**
   - in Santa Barbara, Mission Viejo and Pasadena design, engineers and manufactures computer systems. They also design and produce system software for these computers.

2. **Peripheral Products Group**
   - in Westlake Village engineers and manufactures disk and tape units used with Burroughs computer systems.

3. **Components Group**
   - in Carlsbad engineers and manufactures printed circuit boards.

4. **Program Products Division**
   - in Irvine provides support services and application development, including application software packages and application development aids.

5. **Micro-Components Organization**
   - in San Diego engineers and manufactures micro-component products.

6. **Terminal Systems Group**
   - in San Diego investigates new technology and designs the basic software and hardware underlying all Burroughs terminal products.

---

Burroughs Corporation 25725 Jeronimo Road Mission Viejo, CA 92691 An Equal Opportunity Employer M/F.

### AFS Wildlife club

The American Fish, Wildlife and Conservation Society meeting scheduled for Jan. 31 will be held Jan. 20 at 11 a.m. in Building 22-36. Office elections will be held, and the Soda Lake trip discussed.

Burroughs' division into Groups has helped create what Fortune magazine described as our "potent reputation for technological innovation." This innovation has led to our growth—and you can be part of this growth.

Burroughs' revenue and earnings performance during the past few years has advanced the company to the #2 position in the industry in terms of profitability.

And our present size is only a starting point. As the second largest company in what has been predicted as the fastest-growing industry in the world—information processing—Burroughs' products span the entire field, ranging from electronic calculators to large scale computer systems.

We're looking for people with the following degrees.

- **EE** in logic design, circuits, packaging, analog design, test equipment development.
- **IT, ET** in quality control, manufacturing control, engineering.
- **CS, APIS** in systems software development, validation in compiler and operating systems, diagnostics, evaluation, applications software and information systems.
- **ME** in packaging, control mechanisms, thermal analysis for mainframe and peripherals.
- **E** in manufacturing engineering, production control and management systems.
- **BA, MBA** in finance, cost analysis. We have fast track opportunities into management.
- **MIS** in design, development and implementation of internal business MIS systems.

Interviews will be held on campus in the Placement Center Tuesday, Feb. 12.

If you are not able to interview with us now, but would like to at a later date, send your resume to:

M.R. Olson
Manager: Professional Employment
Western Region
