Disabled Services makes move

By JILL PERRY

The Disabled Student Services Office has moved to a better loca­tion on campus to better serve the needs of students with physical dis­abilities.

The new location in the student union is more accessible and provides easier access to services for students.

Bob Francis, a junior applied art student, was one person who was pleased with the move. "It's a lot easier to get around now," he said.

The office is now located in room 104 of the student union, which is on the first floor.

In addition, the office has added a new staff member, Janet Musgrove, to help with student assistance.

New Mustang II falls short of expectations

By REBECCA PROUGH

For students who moved into the new Mustang II apartments near campus, the experience was mixed. The apartments were supposed to be completed by June 1, but they were not. Students were told they could not move in until Sept. 15.

Those students who arrived early for the weekend to get a head start on settling in, found the apartments unfinished and not ready.

The management company, Southstate Construction, was responsible for the delays.

"We were supposed to move in on June 1, but that didn't happen," said one student.

In addition, the management company has been slow to respond to student complaints.

New positions open on campus committees

By SUSAN DELOHREN

More than 100 students are being sought to fill positions on campus committees. The University's President Kevin Crafton and the members of the Board of Trustees have announced the need for more student representation.

There are over 60 positions available on the various committees, including academic, faculty, and student-related committees.

The new positions are designed to give students a voice in the decision-making process on campus.

Poly professor dies

By Michael Wamp

Staff Writer

The legacy of the late Cal Poly English professor John Kerr will endure through his poetry.

Kerr, 54, an accomplished poet with a strong connection to Cal Poly, died Aug. 29 of cancer.

He was a quiet man with a habit of walking alone on the beach near his home in Connecticut. He was a member of the Connecticut Poetry Society and had several poems published in various journals.

He graduated from the University of Texas at Austin in 1980 and was a member of the English department at Cal Poly for 20 years.

Kerr's widow, Joanne, a Cal Poly professor, said Kerr's work will be published in a special edition of the university's literary magazine. She said she is looking forward to seeing Kerr's work in print.

The news of Kerr's death has been met with sadness on campus.

"He was such a gentle soul," said one student. "He was always there for us."
WHAT EVERY STUDENT SHOULD KNOW ABOUT THE DIFFERENCES BETWEEN LEASING A TELEPHONE AND LEASING A CHICKEN.

Yes, there are differences. And we think you should know what they are.

Ask yourself these questions.

WHEN YOU LEASE A CHICKEN, DO YOU GET THREE MONTHS FREE DURING THE SUMMER?

Probably not. But when you lease your telephone from AT&T this fall, you won’t pay any lease charges next summer. You can use your phone at home, and bring it back to school in the fall.

DO LEASED CHICKENS COME IN A SELECTION OF COLORS AND STYLES?

No. Chickens don’t come in many colors. But the AT&T telephone you lease this fall comes in a variety of colors and three popular styles.

ARE LEASED CHICKENS REPAIRED FREE?

Don’t kid yourself. Repairing a chicken is a delicate process that requires the work of expensive professionals. However, in the off chance your AT&T leased telephone needs repairs, we’ll fix it absolutely free when you visit any of our AT&T Phone Centers.

ARE LEASED CHICKENS SHIPPED DIRECTLY TO YOU?

Ship a chicken? Don’t be silly. However, your AT&T leased telephone will be shipped directly to you after one call to 1-800-555-8111, or you can pick up your phone at any of our AT&T Phone Centers.

ONE FINAL QUESTION: DOES IT COST THE SAME TO LEASE A CHICKEN AS TO LEASE A TELEPHONE THIS FALL?

Hardly. While we have no hard data on the exact cost of leasing a chicken, we can tell you with some certainty that the cost of leasing a telephone this fall is far less than you might think.

The decision to lease a chicken or a telephone, of course, rests with you. But should you opt for the telephone, remember: you get three months free next summer, and you can take the phone home with you. There’s a choice of colors and styles, free repair, and we’ll ship you the phone or you can pick it up at any of our AT&T Phone Centers. It doesn’t cost much either. And that’s something to crow about.

AT&T Consumer Sales and Service. To order your telephone, call 1-800-555-8111 for delivery right to your door or for information concerning AT&T Phone Centers locations.

Students! Work Smart.  
Work Simply...With Hewlett-Packard.

If you’re in Science or Engineering, charges are your classes include Calculus, Physics, or Chemistry. Engineering Statics or Dynamics. You’re running up against some tough calculations with statistics problems, hyperbolas, and logs. The HP-11C calculator helps you breeze through those problems with a few simple keystrokes.

Need to simplify problems that are even more complex? The HP-41CV gives you 128 built-in functions—and the HP-41CX over 200—to simplify your long homework assignments. Use up to 8,437 bytes of memory to save the programs and formulas you use often. And there are thousands of software programs, so you don’t have to start from scratch next term.

If you’re in Business or Finance, you’re probably taking Accounting, Statistical Methods, Finance, and Investment Analysis. Classes loaded with tedious calculations. End the pencil and paper drudgery with the HP-12C. The most powerful decision maker on the market! Dicated keys make time value of money calculations, amortization, Net Present Value (NPV), Internal Rate of Return (IRR), and statistics solutions as simple as a single keystroke. And it’s easy to change values or correct mistakes without reentering your entire program.

Hewlett-Packard calculators. They help you work smarter this term. And next term. And even later on the job. Get your HP today from your local HP dealer.

For the location of the dealer nearest you, call TOLL FREE 1-800-FOR-HPPC.
Why choose Hewlett-Packard?

We'll be on campus October 30 - Nov 1 to give you lots of good reasons, and to interview for career positions.

Editor:

While leafing through the Mustang Daily (September 24) it was refreshing to read about the counselors were able to offer a little insight into this serious problem. My intention here is not to frighten our new friends, but to stimulate your awareness. There have been targets in the past, so one is not entirely safe on campus, either.

I sincerely hope we have been targets in the past, so one is not entirely safe on campus, either.

I am a senior and have been exposed to this issue as the son of a person who counsels sexual offenders, as a student interested in societal problems, and as one who is frustrated with a crime that inhibits the development of relationships. We must all contribute to the eradication of sexual assault, but until then we must not allow ourselves to become victims.

M. Gunn

Brown bagging it may help everyone

Editor:

I'd like to bring to the attention of all those students that have any concern about their lives on this planet, that they can do something right now to affect their future. When shopping at the local grocery store and all the merchandise is about to be put in a bag, ask for paper instead of plastic. Sure, plastic is stronger, it has to be...it lasts forever. Plastics stay in the garbage dumps, increasing the time necessary for reuse of the landfill site, in the oceans cluttering up its depths for eternity, and in the stomachs of many animals causing their systems to clog, resulting in death. True, not using plastic bags will not solve all the plastic refuse problems, but it's something that can be done now by a simple request at the checkout counter of the local grocery store. Besides, they make lousy trash bags!

Paul Cleveland

SUCCESS

At ROLM, we believe there is no single way to be successful. Rather, we believe success stems from the creativity and ambition of the individual. That's why we're committed to creating an environment in which motivated people can succeed. The risk in this approach is high, but the rewards are greater.

ROLLM. We create an atmosphere for success. The rest is up to you.

ELECTRICAL ENGINEERING AND COMPUTER SCIENCE MAJORS:

We'll be on Campus October 16 & 17

At that time, we'll ask you to share the responsibility for discovering where you best fit in ROLM. Consider working on one of our project teams in software areas such as voice and data communications, distributed data base management, integrated voice-text applications, data, voice and network architecture, or Ada.

Explore a team hardware design position in areas such as digital telephones, voice and data communications, local area networks and packet switching, or analog, digital and VLSI design.

Or, you can talk with us about combining your hardware, software, and customer-oriented skills in the areas of product support, production, field service or sales engineering.

Headquartered in Santa Clara, California, ROLM designs, manufactures and markets digital-controlled business communications systems, and the most advanced ruggedized computer systems in the world.

Sign up with your Placement Office for an on-campus interview, or forward your resume and letter of interest to Vicky Anderson, Engineering Recruitment, M/S 350, 4900 Old Ironsides Drive, Santa Clara, CA 95054. Watch for posters announcing our campus presentations.

We are proud to be an equal opportunity affirmative action employer.

ROLM
At GTE SPRINT, you’ll start a career that will grow with you. We’re growing and expanding in many ways.

As a leading interexchange carrier, we are involved in a wide variety of technological areas in our efforts to provide the finest long-distance services in the industry. We are integrating satellite telecommunications, fiber optics and advanced digital switching into our system.

Talk to us when we visit your campus and find out why SPRINT isn’t another job but an environment for career growth. Depending on the position, a BSEE or MSEE in Engineering with an emphasis in telecommunications or Computer Science is needed. We have immediate openings in the following areas.

**POSITIONS**

**ENGINEERS**

- Transmission
- Systems Development
- Switch Network
- Operations Research

**PROGRAMMERS**

The positions listed above will be responsible for projects that maintain, modify or expand our present system, or plan, research and develop future system additions.

**SPRINT CAMPUS INTERVIEWS**

**TUESDAY**

October 9, 1984

Check with your Placement Center for interview schedule.

If you can’t meet with us during our campus visit, please send your resume to Professional Employment, Dept. DM, GTE SPRINT, 1818 Gilbreth, Suite 142, Burlingame, CA 94010.

An affirmative action/equal opportunity employer, m/f.
Actors, dancers get a department

By DONALD MUNRO
Staff Writer

Cal Poly students can look forward to a stronger theater and dance program this year, thanks to the campus reorganization plan in effect this quarter.

"The new theatre and dance department will go a long way toward uniting different performing arts groups on campus," said Professor Russell Whaley, a faculty member in the new department.

"That's the closest thing we have to a minor in this department," said Whaley. Classes in the new department include acting, directing, stage production, ballet, modern dance and jazz dancing.

"We're still in the process of organizing because we're a new department," Whaley said. "We're organizing a program dedicated to the performing arts. Music classes are still offered through the separate music department.

Faculty members worked during the summer to organize the department, and there is still work to be done, said Whaley. "We're still in the process of organizing because we're a new department," he said.

"That's the closest thing we have to a minor in this department," said Whaley. Classes in the new department include acting, directing, stage production, ballet, modern dance and jazz dancing.

"One definite advantage to having different performing arts classes combined in one department is that it's much easier to put together a large production such as a musical play," Whaley said. "In the past it has been difficult to coordinate everything," he said.

"We're growing - we're more than just a service to the community," he said. The department puts on plays and dance recitals for the public, but it's also sensitive to the general education needs of students.

He likes the fact that students from a wide variety of majors are involved in the department's programs, from engineering students to speech majors.

The department's first theatrical production this year is Shakespeare's classic "Macbeth." Auditions will continue Thursday night from 7 to 10 p.m. in room 212 of the music building.
Noise

KCPR Radio grows, still makes waves

By BRUCE PINKLETON
Special to the Daily

Students who have heard that "noise" coming out of their stereos when they tune it to 91.3 FM might be surprised to find that "noise" is KCPR. KCPR is Cal Poly's own radio station, located in the Graphic Arts Building, Room 251. Started in 1968 by Glen Smith, an English instructor who had an interest in broadcasting, KCPR has grown to be the "largest station in the state of California that is run by students," according to Ed Zuchelli, 59, an associate professor of journalism who has been the station's advisor since 1969.

KCPR began broadcasting at 1½ watts but "we kept building up to 2000 watts we now have," said Zuchelli. KCPR has also expanded as an educational tool for the journalism department. One of the station's primary uses is as a news laboratory for journalism students.

One of the most unusual aspects of KCPR is that it is not allowed to run commercials. In place of commercials, KCPR runs public service announcements for non-profit organizations. Another interesting aspect of KCPR is that it is run primarily by volunteer students.

"I let the students do most of it from the station," I'm the advisor," said Zuchelli.

KCPR has also expanded as an educational tool for the journalism department. One of the station's primary uses is as a news laboratory for journalism students. KCPR is underwriting. A business will pay KCPR money to hire a student who gives KCPR about $8,000 out of its Instructionally Related Fund.

In addition, KCPR receives money from the journalism department, sales of t-shirts and caps and from the annual KCPR auction, where businesses donate merchandise that the station auctions off. A final source of money for KCPR is that it is underwriting. An additional $10,000 annual budget which KCPR receives from various sources, including the Associated Students, Incorporated (ASI), is made up of disc jockeys from KCPR who are hired to provide music for parties, dances and other gatherings.

Another of Mieliwocki's concerns is that it is run primarily by volunteer students.

The books include a $10,000 annual budget which KCPR receives from various sources, including the Associated Students, Incorporated (ASI), is made up of disc jockeys from KCPR who are hired to provide music for parties, dances and other gatherings.

Is There Life After Graduation?

At Avantek, yes. Because your learning continues when you join the innovators of microwave technology.

Avantek has been the premier company in solid state microwave technology since 1965. Our achievements in microwave components, equipment, and systems are known for excellence and quality. In microwave satellite and point-to-point communications, TVRO, cable television testing systems, and defense electronics, Avantek has an enviable reputation.

Besides the challenge of working in the rapidly growing microwave field, Avantek offers an outstanding location—Northern California—and compensation package: Benefits include cash profit sharing, employee stock ownership; a 401(k) savings program; tuition assistance; and a personal computer discount financing program.

If you’re about to graduate with a degree in Electrical Engineering/Electronics, Computer Science, Chemical Engineering, Industrial Engineering, or Physics, why not find out about the prospects for you after graduation with Avantek? We’ll be at Cal Poly on Tuesday, October 9. Sign up for your interview at your Placement Office now. Or, send your resume to S. Marrero-Johnson, Manager, College Relations, Avantek, Inc., Dept CPI, 3175 Bowers Avenue, Santa Clara, CA 95051. An equal opportunity employer. Permanent residency visa required. Some positions require U.S. citizenship.

Avantek has given me a lot of responsibility in a very technically advanced environment. It’s an atmosphere of exciting technical projects, rapid responsibility, and quick learning.”

—Richard Fornes, Process Engineer/R&D California Polytechnic Institute ’82
"We're controversial and I love it. People either love us or they hate us."

From page 8

Chris Johnson, 22, a senior architecture major who is one of the two acting music directors over the summer, agreed. "I think it's the format moving along very nicely and KCPR is becoming a progressive station," said Johnson.

"Hopefully it's going to get more strange. It's going to get more interesting," he added.

The reasons students decide to become disc jockeys are diverse. Some students said they enjoyed the music at KCPR and wanted to become more involved while other students simply believed they would be good at it.

"Sometimes you hear DJs on the air and think 'I could do that better,'" said Diane Turriff, 20, a senior business administration major who is also the special programming director at KCPR. For Kevin Swanston, 20, a senior mechanical engineering major, the reasons he became interested in working at KCPR were two-fold.

"For one thing, I've always wanted to be on the radio. I feel like I have the communication skills. Second, it's a good break from my curriculum," said Swanston.

"I think it's been an invaluable experience because speech communication comes into practice in whatever you do," said Kevin Swanson, 20, a senior mechanical engineering major, the special programming director at KCPR.

"Those are the obstacles of college life and becoming a progressive station," said Johnson.

"I would rather have one good listener than 100,000 listeners who tune us out every time we have a commercial," he added.

New Daily pages use your help

What goes inside the Mustang Daily this year depends on the people who make up Cal Poly.

Five new special sections, given new titles and designed with new purposes, will reflect the attitudes and concerns of students and faculty.

Monday editions will contain an expanded sports section, so busy Mustang sports weekends get full coverage.

Tuesday will feature a new section called "Achivements," with profiles on students and faculty members and their work on senior projects, masters theses, dissertations, internships and cooperatives, along with stories on achievements.

"Outdoors," a traditionally popular section, covers not only the special beauty of the Central Coast, but the environmental issues affecting us. Look for that Wednesday.

Thursday features "Fanfare," highlighting Cal Poly, and campus arts and entertainment.

"Universality" is a college survival kit packaged in the Friday edition, with stories about how to cope in a university environment, learn how to handle your finances, obtain credit, choose the best insurance for you, be wise tenant and handle consumer problems. It will feature people who have surmounted obstacles of college life and found creative ways to beat them.

The Mustang Daily's special sections are Cal Poly's mirror. Help those reflect university lifestyle by dropping your story ideas to Graphic Arts Room 224 or by calling 454-1144. Shawn Turner is the special sections editor. For expanded sports section story ideas, ask for Sports Editor John Hummel.

Reggae, ska band, 11 am

The first Fall Quarter activity your campus features is the portable, a local reggae-ska band, sponsored by the ASI Special Programs Board. The concert begins at 11 am in the University Union Plaza.
FREE SPINAL EXAMINATION

Johnston Chiropractic Clinic, Inc. is sponsoring a spinal check-up and Scoliacs Screening program as a public service. This service will include consultation, physical examination and a report of findings.

WARNING SIGNS OF SPINAL MISALIGNMENTS

- Recurring Headaches
- Dizziness, Blurred Vision
- Neck, Shoulder & Arm Pain
- Low Back & Leg Pain
- Pain Between Shoulders

If you suffer from any of these warning signs call immediately to prevent possible advancing complications. This Free Spinal public service is for a limited time only, by appointment, please.

Please mention ad at time of visit

For An Appointment Call 541-2727

Palmer Graduate 1150 Grove Street San Luis Obispo

LOW INTEREST STUDENT LOANS.
GET ABOARD NOW AT WELLS FARGO BANK.

Low interest rates, flexible terms to help with college expenses.
Wells Fargo Bank is strong on student loans with the plans, terms, and money you need to minimize financial worries.

Borrow $1,000 to $8,000 per year. Take 5 to 10 years to repay.
Wells Fargo offers two special plans, the California Guaranteed Student Loan (CGSL) and the California Loans to Assist Students (CLAS). Both have low, fixed interest rates and flexible repayment plans. Depending on your circumstances and the loans you choose, you can borrow $1,000 to $8,000 per year and take 5 to 10 years to repay. And you may not have to start repaying until after you graduate.

Quick response.
You want fast answers to your loan request. Our on-line system gives you quick turn-around and immediate information about your loan whenever you want it.

WOW
Continued from page 3.
chair; and Mitch Moeller, Dan Balbierz, Kerry Bean and John Lamsford making up the rest of the board.
The 1983-84 WOW Board was headed by Chairperson Mike Ovenden, who was assaulted by five members of the board and six staff members.
Watters said "the trouble was way down this year. He attributes this to "very sensitive and responsible WOWies and counselors."
Christy Hayek, 19, a biological science major, was happy with her first experience as a WOW counselor. "I loved it! It was great!"
Hayek particularly liked the opportunity "to make new and close friends" and the opportunity to "have a good time."
Another counselor had doubts at first. Kathleen Mehling, a 20-year-old home economics major, was "a little hectic."
WOWie Kim Jeonson, an 18-year-old liberal studies major, "loved WOW. She thought it was "a great way to meet people. But she did think the program was "a little hectic."
Another WOWie thinks WOW is very necessary. Liz Linton, an 18-year-old math major, said WOW allows you to "meet people from other dorms. It increases your chances of survival."
Throughout the year WOW reunion sessions will be held.
During Winter Quarter, future WOW counselors will emerge and another training session will begin during Spring Quarter.
Full summer included he realizes that he will need to attend for two additional years to complete his degree. He’s kept in contact with friends who chose differently and found that they have not met the same extended term.

I wonder what happens to the poor student who is not in the position to call Dad and tell him he needs the money for an additional year of school.

This is hardly the end of it. In addition, students are told what they can expect to have offered in the upcoming year and they plan their curriculum accordingly. Yet, as my son and his friends have shown me, these courses are frequently dropped from the schedule with little or no notice, leaving a student to replan his curriculum, often sacrificing the proper sequence in order to maintain a load with sufficient units. My son, as an example, took Electronic Devices (EL 208) while taking the two prerequisite courses EE 211 and Phys 211. He received an A in the course and says he felt he was not handicapped in any way by not having these two classes in advance.

I was shown a copy of this summer’s Mustang newspaper and was appalled to read that a department that constantly complains of lack of funds would waste them to do a manual check of each student’s record to determine if he has actually met the course prerequisites. This seems to me to be an inexcusable waste of our taxpayers’ money. These are college students. If one feels that he is ready to tackle the material in a difficult course, I see no reason for the administration to play such foolish games. The students whom I have met are conscientious and ask around before taking a course out of sequence. They furthermore would be glad to take them according to the curriculum if the classes were not overfilled or cancelled.

These students are further insulted by not being given the opportunity to choose their instructors as others on campus can. By climbing through several of the recent class schedules it is easy to see that the engineering department is the least cooperative in this area. Some students work better under one teacher, whereas a friend might feel exactly the opposite. Why not allow them the option of filling their schedules to best suit the student?

These things have left my son angry over extra years and cost of funds would waste them to do a manual check of each student’s record to determine if he has actually met the course prerequisites. This seems to me to be an inexcusable waste of our taxpayers’ money. These are college students. If one feels that he is ready to tackle the material in a difficult course, I see no reason for the administration to play such foolish games. The students whom I have met are conscientious and ask around before taking a course out of sequence. They furthermore would be glad to take them according to the curriculum if the classes were not overfilled or cancelled.

These students are further insulted by not being given the opportunity to choose their instructors as others on campus can. **Renovation reorganization**

**By MICHAEL MARTER**

Executive Dean Douglas Gerard said the $2.3 million remodelling of the old Dexter Library is set to begin this November.

Since the summer of 1980 when library staff and materials were moved to the Kennedy Library, the Dexter building has housed the military science department, the architectural engineering department and labs, architecture and art labs, the Dean of Professional Studies and Education, and the vending machine haven better known as the Snack Shack.

Work has already begun to relocate the Celts to the east, end of the building in the former location of the ROTC armory, said Gerard, and should be completed in two weeks.

The military science department and the School of Professional Studies and Education will not be affected by the remodelling, Gerard said, and all of its programs will remain centrally located in the building will be relocated until the project is completed. The tentative completion date is March, 1986.

For temporary space Cal Poly has leased three classrooms at Pacheco School devoted to the campus entrance on Grand Avenue to be used as art labs and has installed a temporary mobile physical therapy unit.

**Dean balances act**

**By DEAN HATUCHI**

Special to the Daily

An award-winning internationalism known scientist and past tennis coach is the new dean of the School of Engineering.

Brayley received the American Society for Engineering Education's award for outstanding contribution in research in 1967.

"The dean of engineering holds a critically important leadership position," said Cal Poly President Duane F. Brayley. "Dr. Brayley's exceptional academic credentials and recognized professional accomplishments uniquely qualify him for service at the university. We are most enthusiastic about having him join us."

Brayley is the immediate past president and a founding member of the International Society of Oxygen in Transport to Tissue. The society's members represent essentially every major research center in the world.

Brayley left his position as head of the biomedical engineering department at Louisiana State Technical University to come to Cal Poly.

Before moving to Louisiana Tech in 1981, Brayley spent four years as vice president for academic affairs and dean of the Rose-Hulman Institute of Technology in Terre Haute, Ind. He was also a visiting professor at Princeton University and the Yamagata School of Medicine in Japan.

Research programs under Brayley's direction have received almost $4 million in grants. He has provided consulting services to firms including Exxon and Du Pont.

Brayley earned a master's degree in Mechanical Engineering at Stanford University and a doctorate in chemical engineering from the University of Tennessee.

He has delivered more than 160 scientific lectures throughout the U.S. and has spoken at scientific seminars in Belgium, Canada, Denmark, England, France, Italy, Japan, Sweden and West Germany.

In addition to being an engineering professor, Brayley was the head tennis coach at the University of Tennessee, Clemson University in South Carolina and Tulane University in New Orleans. His team won more than 200 matches in intercollegiate competition during his 16 years of coaching.

Brayley will lead a faculty of 130 who will teach courses to more than 3,500 engineering students. He and his wife Suzanne will make their home in San Luis Obispo.

**Peepers in Poly restroom**

A female Cal Poly student was surprised Tuesday in a women's restroom when a man stood on a toilet in an adjacent stall and tried to peer over the side.

The incident occurring in the "B" wing of the science building, said Cal Poly Investigator Robert Berrett.

The woman screamed when she saw the man and chased him for a distance through the halls of the science building, said Berrett.

**ASK DR. BEEWELL!**

Q. WHY SHOULD I BUY A HEALTH CARD?

A. FOR THE SERVICE WITHOUT THE BILLS!

Health Cards can be purchased at the Health Center or State Cashier. Fall Quarter Cards cost $27.00 and Annual Cards (Fall, Winter, Spring) cost $59.00 — a savings of $22.00 over quarterly card costs.

*Dr. Beewell hint: There are no co-payments or deductibles with the Health Card.*

CORNER OF CAMPUS WAY & VIA CARTA • 546 1211
Financial for the schoolyear is still available

By Lisa McKinnon

The academic year may have already started, but there is still time for Cal Poly students to apply for and learn about the financial aid available to them this year.

Applications for Pell Grants and Guaranteed Student Loans for the 1984-85 school year are available in the Financial Aid Office, Administration Building Room 212, and can be picked up during office hours between 10 a.m. and 3 p.m. weekdays.

The Pell Grant is a federal grant, which does not require repayment. The processing time for these $250 to $9100 grants is four to six weeks.

The Guaranteed Student Loan is available to undergraduate, who may borrow up to $2,500, and graduate students, who may borrow up to $5,000. Repayment of these loans begins six months after graduation or after the student has dropped below half-time enrollment. Processing takes two months.

A financial aid peer counselor will be on hand in the University Union from 9:30 a.m. to 12:30 p.m. Monday through Friday to answer students' questions about financial aid, and to distribute application materials, brochures and workshop announcements.

The Financial Aid Office is also sponsoring two workshops during the Fall Quarter in order to promote student development in "financing education."

The first entitled, "Guaranteed Student Loans--Everything You Always Wanted to Know," is scheduled for 7:30 p.m. Tuesday, Oct. 2, at Santa Lucia Residence Hall, and at 10 a.m. Thursday, Oct. 4, in UU Room 219.

The second workshop, "Managing Your Money," will deal with budgeting, skills and techniques students can use throughout the year. Workshop times are 7:30 p.m. Wednesday, Oct. 10 at Temays Residence Hall and 10 a.m. Thursday, Oct.11 in UU Room 219.

Students may sign up for these workshops at the Financial Aid Office or call 546-2927.

Last Word

Beginning classes are often too advanced

By JESSE CHAVARRIA

In the beginning... to most people that phrase brings to mind visions of clouds, an overwhelming darkness and a sudden flash of divinely inspired light, but to me it also brings to mind "beginners courses" and the negative emotions associated with them.

Think back to the time you might have taken a "beginning" course in guitar, swimming or a foreign language and found that most of the people in the class were anything but beginners.

I can clearly remember some guy dressed in a neatly pressed pair of pants, with a white short-sleeved shirt and a bow tie sitting next to me conjugating verbs at an alarming rate during a "basic" Spanish class.

The whole reason I bring this up is because I happened to mention to a friend that I was interested in taking a beginning guitar class.

She then made a comment that I perceived as being a great insight into the relationship man has with the universe.

She said, "Everyone knows that whenever you take a beginning guitar class, everyone is there already knows how to play."

This type of logic applied to every "beginner's class" demonstrates the fact that many people in a "beginning" Spanish class should be in an intermediate Spanish class, students in "beginning guitar" should be playing backup for Van Halen and "beginning swimmers" should be off at NCAA II meets.

But who can blame these students? Doesn't our entire educational system demand that students get the best grades possible, supposedly to get the best job possible and to make that dean's list every quarter?

Besides, students can always say, "Hey, I'm just perfecting the basics" to justify their fear of actually progressing by taking on real challenges instead of taking the easy way out.

What would have happened if the Great Spirit would have said, "Well, I've created fish and birds and land before, but I've never tried to create a human being. I stick with the things I know I can do well and breathe through."

Stories are running rampant about how mediocre our educational standards are. School officials have taken steps to improve our future teachers can indeed teach, but half the education bargain is the responsibility of the student.

So challenge yourself. Try an earl learn something that you haven't had any previous experience with. Come on, physics can't be that hard.

Meanwhile, I have a guitar class I have to try and add.
